Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

7 Easy Ways to Bid

1 Internet

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 eMail

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGE Live!®

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Heritage Signature® Auction #1209 | Long Beach Expo

U.S. Coins

Featuring: The Pannonia Collection • The Valley View Life Collection, Part Two
The James E. Blake Collection • The J.S. Morgan Collection

September 4-6, 2014 | Long Beach

Signature® Floor Sessions 1-3

Dear Bidder:

Heritage Auctions welcomes you to the Long Beach Expo! This has been an unprecedented year of major sales and incredible numismatic rarities trading hands. The Long Beach U.S. Coin auction continues the trend with more than 4,400 lots including an outstanding Premier Session offering nearly 600 items, and two exceptional Floor Sessions – all made possible by the combined input of more than 200 consignors and a notable list of pedigreed and Featured Collections for this auction.

THE PANNONIA COLLECTION

More than 80 lots highlight the Premier Session of our sale with a wide-ranging collection of high-grade gold, proofs, silver type, patterns, and commemorative coins in silver and gold. The Pannonia Collection includes many rarities, featuring a High Relief Saint-Gaudens double eagle in the astounding PR68 ★ NGC grade, one of the finest-known proof strikings recognized by either PCGS or NGC. This coin is backed by a solid provenance, previously as part of the Captain Andrew North cased set that changed hands in 1956 and 1980, with this coin eventually residing in the Harry W. Bass, Jr. collection until November, 2000. Now, this remarkable specimen is offered once more to numismatic historians and collectors.

Other rare offerings from the Pannonia Collection include:

- High-grade $50 gold pieces including an 1851 Territorial Gold Humbert fifty, Lettered Edge graded MS61 NGC.
- A trio of 1879 Washlady quarter and half dollar patterns, all in near-Gem or Gem condition.
- Several late-date Saint-Gaudens twenty dollar gold pieces, including the 1930-S, 1931, and 1931-D issues, all in Gem Mint State.
- A fabulous 1900 Lafayette dollar in MS66 PCGS.
- A 1907 Wire Rim ten dollar gold coin in MS66 PCGS, as well as many other varied and high-end rarities.

In the past few months a memorable sequence of Heritage sales have seen an iconic issue of American coinage – the Silver Center cent – reshape the numismatic landscape. In just the past three months the second and third-finest examples of this issue have changed hands. In May of this year the renowned Eric P. Newman specimen (the third-finest known example), sold for a record auction price of over $1.4 million. As this letter is written, the second-finest example – the Norweb/Oliver Jung specimen – is poised to set a new auction price-realized record at the Chicago ANA Platinum Night event. Now, incredibly, the September Sale brings the fourth-finest Silver Center cent to auction in Long Beach. This appearance of the noted Bushnell-Parmelee-Green-Norweb piece culminates an historic four-month period, where three of the four finest examples of the Silver Center cent – the first coin actually produced within the walls of the newly established United States Mint in 1792 – have changed ownership. It may be many years, if not decades or a lifetime, before a similarly profound sequence of numismatic events occurs.

THE VALLEY VIEW LIFE COLLECTION, PART TWO

Additional selections from the fine Valley View Life Collection are included in our Long Beach event, headed by a seldom-seen appearance of the very rare 1877 Half Union fifty dollar pattern in PR63 PCGS. This Judd-1549a example is made from gilt copper. The coin is a majestic, two full inches in diameter and 1/8-inch thick. This example came out of a 1948 B. Max Mehl sale, where it was sold into the fabulous collection of King Farouk of Egypt. Robert Schermerhorn purchased it out of the Sotheby's Farouk sale in 1954, passing through a few unknown intermediaries to our present consignor. This storied pattern is beautifully preserved and rarely offered.

Other pedigreed collections in this sale include additional selections from The James E. Blake Collection of Shield nickels and a nice group of Alaska and California gold tokens from the J.S. Morgan Collection. Online bidders are encouraged to bid in our Signature® Internet Session on Saturday, September 6.

Whether you participate in the Premier or Floor Sessions, or prefer to bid remotely, numerous opportunities await you in all U.S. Coins categories from colonials to rare modern issues. Bidding is simple before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with Heritage LIVE!™ (our proprietary, award-winning online platform). Of course, if you are attending the Long Beach Expo we encourage you to stop by our booth on the Bourse, view the lots on-site, and bid in person from the auction floor.

Good luck! We look forward to a fantastic Long Beach sale.

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

COLONIALS

1652 Oak Tree Shilling, XF40
Rare Noe-11, Salmon 9-F

3001 **1652 Oak Tree Shilling XF40 PCGS. Noe-11, W-510, Salmon 9-F, R.6.** 69.29 gn. A rare Noe variety distinctive for its boldly engraved tree and a straight die scratch through THV. A silver-gray example that offers even definition aside from softness on the N in NEW. Mint-made clips create an oval appearance with the tops of IN MAS affected. Like many original Oak Tree shillings, the obverse is convex and the reverse is concave, as coined by a rocker press. Listed on page 39 of the 2015 *Guide Book*. PCGS# 20

1652 Noe-5 Oak Tree Shilling, AU50
Popular Massachusetts Type Coin

3002 **1652 Oak Tree Shilling AU50 PCGS. Noe-5, W-470, Salmon 3-D, R.2.** 73.91 gn. A pleasing silver-gray representative without detrimental marks or planchet imperfections. The obverse exhibits the classic wavy appearance of original Oak Tree shillings, with a bulge evident above the tree characteristic of rocker press production. Typical of Noe-5, the reverse is well centered while the obverse is misaligned a few degrees toward 6 o'clock. The usual die state with a heavy straight rim break on the obverse at 12 o'clock and slender vertical breaks near 3 o'clock on the reverse. Listed on page 39 of the 2015 *Guide Book*. PCGS# 20

1652 Small Planchet Pine Tree Shilling, AU55
Noe-16, Early Die State

3003 **1652 Pine Tree Shilling, Small Planchet AU55 PCGS. Noe-16, W-835, Salmon 2-B, R.2.** 71.14 gn. A lovely gunmetal-gray Boston Mint shilling that boasts smooth surfaces and pleasing eye appeal. Ideal for a quality Massachusetts silver type set. The strike is sharp except for incompleteness near 6 o'clock on both sides. The obverse has exemplary centering, and the reverse is only slightly misaligned toward 1:30. An early die state without the often seen crumbing on the lower left branches and obverse exergue. Listed on page 39 of the 2015 *Guide Book*. Population: 11 in 55, 9 finer (7/14). PCGS# 24

1724 Hibernia Farthing, MS63+ Brown
Rare M. 3.7-E.1

3004 **1724 Hibernia Farthing MS63+ Brown PCGS. CAC. M. 3.7-E.1, W-12610, R.6.** No stop after date. A coruscating walnut-brown farthing. The strike is consistent and the preservation is exceptional for the designated grade. The H and A in HIBERNIA is repunched, as is the 7 in the date. Lengthy die scratches on the portrait are as made, and are highly unusual for the series. The upper reverse field is buckling. Listed on page 45 of the 2015 *Guide Book*. PCGS# 187

1791 Liverpool Halfpenny, Choice AU
Rare Washington Variety, Baker-17

3005 **1791 Washington Liverpool Halfpenny, Copper AU55 PCGS. Baker-17, W-10650, R.6.** The 1791 Liverpool halfpenny is sometimes confused with the 1793 Ship halfpenny. The former is much rarer, however, and is typically encountered in worn grades. None have been certified as Mint State. The present medium brown representative has an undisturbed reverse and faint, faded hair-thin lines near the profile. Listed on page 81 of the 2015 *Guide Book*. Population: 7 in 55, 3 finer (7/14). PCGS# 698

HALF CENT

1806 Half Cent, Choice AU
Elusive Cohen-2 Small 6, Stems

3006 **1806 Small 6, Stems, C-2, B-1, R.4, AU55 PCGS.** Manley Die State 2.0, "rare." Clashed near the bases of the RT in LIBERTY. A desirable *Guide Book* variety, much scarcer than the No Stems (Cohen-1) or Large 6 (Cohen-4) marriages. This olive-green representative is satiny and has only a trace of wear. A few hair-thin marks are noted near the profile. Our EAC grade XF40. PCGS# 35194

LIBERTY PARENT OF SCIENCE & INDUST
1792

1792 Silver Center Cent, Judd-1, MS61+ Brown
Historic First Coinage on U.S. Mint Grounds
The Bushnell-Parmelee-Green-Norweb Piece

3007 **1792 One Cent, Judd-1, Pollock-1, High R.6, MS61+ Brown NGC.** The Silver Center cent has been an icon of American coinage for more than a century. Although some other pattern issues were struck earlier, in off-site facilities, the Silver Center cent was the first coin actually produced within the walls of the newly established United States Mint in 1792. It is probably the most famous of the important 1792 patterns (since the more numerous half dismes were actually circulation-strike pieces) and it always commands high premiums whenever an example is offered. The current price realized at auction for the issue is $1,410,000, garnered by the MS63+ Brown NGC specimen in Heritage Auctions' sale of the Eric P. Newman Collection, Part IV, but that record is being bettered even as these words are being written, by the MS64 Brown PCGS Norweb coin in lot 5517 of the ANA Signature (Heritage, 8/2014).

The Silver Center cent has had an unprecedented run of successful auction appearances in recent years. Heritage has been uniquely fortunate, offering an example of this issue on six different occasions since 2012 (the Morris specimen in 4/2012, the Mickley piece in 8/2012, the Bushnell coin in 4/2013 and the present catalog, the Newman example in 5/2014, and the Norweb coin in the August 2014 ANA Signature, which is still being conducted as this is written). No other auction firm has ever handled so many examples of this remarkable pattern in such a short time frame. When Walter Breen described the Silver Center cent in the 1974 G.E.N.A. Sale for Pine Tree Rare Coin Auctions, he commented, "I didn't think I'd ever see (let alone catalogue) this coin!" The opportunity to study and compare so many specimens has enabled us to refine our knowledge of this issue and deepen our understanding of the process that resulted in the creation of these fabulous patterns and ultimately led to their rejection as circulating coins.

Design

Liberty faces right with hair flowing behind. The obverse periphery reads LIBERTY PARENT OF SCIENCE & INDUSTRY, with 1792 just below the bust. The reverse has a wreath tied with a ribbon at the bottom; ONE CENT is within. Around the rim is UNITED STATES OF AMERICA with the fraction 1/100 below. Struck in copper with a silver plug in the center and a reeded edge. Medallic alignment. This coin was weighed and measured its precertification auction appearance in Stack's 65th Anniversary Sale. The weight was given at 72.8 grains, the diameter 22.5 millimeters.

The Price of Copper and the Judd-1 Silver Center Cent

As with any coinage proposal, the Judd-1 silver center cent has a complex genesis. One of the less-known roots of the issue is the economic activity of an unexpected country: Sweden. The northern kingdom held a near-monopoly on copper production in Europe thanks to the *Stora Kopparberg* or Great Copper Mountain mine, and it pushed production to finance its military and political aims. The kingdom began making copper *riksdalers* alongside silver coins of the same denomination in 1624, during the reign of Gustavus Adolphus the Great, which led a couple of decades later to the famous "plate money" that was used in the Swedish banking system until 1776 and today is popularly photographed on kitchen scales. The large size of Sweden's plate money points to copper's place as a valuable, but not *the* most valuable, commodity on the continent; while a Swedish silver *riksdaler* of the period was a crown-sized coin not particularly different in size or weight from its peers in other kingdoms, a copper one-*riksdaler* plate had significant size and bulk.

In absolute terms, the weights assigned to the copper coins in the U.S. Mint Act of April 2, 1792 were not nearly so large as a piece of Swedish plate money. The cent was listed at 11 pennyweights (where a *pennyweight* refers to the weight of a British penny's worth of silver, 24 grains or 1/20th of a troy ounce) and the half cent at 5 ½ pennyweights, both on the determination of inaugural Secretary of the Treasury Alexander Hamilton in his *Report on the Subject of a Mint*, the 1791 predecessor to the Mint Act. As with the gold and silver coinage listed in the Mint Act, Hamilton assigned the copper coins weights that represented full intrinsic value at the time, i.e. one cent's worth of copper in a one-cent coin. A bit of math reveals how Sweden's relentless production of copper had driven down the price of the commodity over a century and a half. An individual large cent at the Mint Act standard would weigh 264 grains, or more than half a troy ounce, on its own, and 100 such cent coins would have a collective weight of 1100 pennyweights, or 55 troy ounces! Even the one-*riksdaler* pieces of Swedish plate money were not so heavy.

Alexander Hamilton took notice of the weighty problem posed by an intrinsic-par copper cent in his *Report* and examined silver as a solution:

> "With regard to the proposed size of the cent, it is to be confessed, that it is rather greater than might be wished, if it could with propriety and safety be made less: And should the value of copper continue to decline, as it has done for sometime past, it is very questionable, whether it will long remain alone a fit metal for money. This has led to a consideration of the expediency of uniting a small portion of silver with the copper in order to ... lessen the bulk of the inferior coins..."

Hamilton, however, stopped short of endorsing a billon coin in the manner of France, pointing out in his 1791 *Report* that the appearance of a small level of silver in a large amount of copper could be imitated cheaply by counterfeiters.

Despite the obvious differences in appearance between the cent patterns of 1792—the silver-centered and obviously bimetallic Judd-1, the "fusible alloy" Judd-2 at an identical size with the same obverse and reverse designs, and the Judd-3 through Judd-5 Birch cents in pure copper—all illustrated either the problem posed by the Hamiltonian intrinsic-value cent standard or a solution thereto. The difference in size between the Birch cents and the silver-center and fusible alloy pieces is startling, as seen by the to-scale images in references such as the *Guide Book* and Judd's *United States Pattern Coins*.

While Alexander Hamilton cited the possibility of a "billon" cent, which has common cause with the Judd-2 pattern's fusible alloy, the immediate inspiration for the silver center on the Judd-1 patterns appears to have come from the U.S. Mint's Chief Coiner, Henry Voigt. A letter from then-Secretary of State Thomas Jefferson to President George Washington regarding the pattern cent coinage includes the following paragraph, describing the activities of Voigt and Director of the Mint David Rittenhouse, which is much-reprinted in the literature on the 1792 cent patterns but always worth a reread when considering one of these rarities:

> "Th. Jefferson has the honor to send the President two cents made on Voigt's plan by putting a silver plug worth 3/4 of a cent into a copper worth 1/4 cent. Mr. Rittenhouse is about to make a few by mixing the same plug by fusion with the same quantity of copper. He will then make of copper alone of the same size, and lastly he will make the real cent as ordered by Congress, four times as big."

This letter, of course, is of paramount importance in fixing the sequence of late-1792 pattern one cent coinage at the U.S. Mint and securing the Judd-1 silver center cent's place in history.

While the Judd-1 silver center cent became the first in a long line of unadopted prototype coins produced on U.S. Mint grounds, this is not to say that the idea was ill-considered. The work Voigt and Rittenhouse put into the 1792 pattern cent coinage was instrumental in convincing Congress to amend the Mint Act in January 1793, which reduced the statutory weight of the copper large cent from 264 grains to 208 grains. The resulting Chain cents, while still much thicker and heavier than the Judd-1 and Judd-2 patterns, were of a more reasonable diameter (26 to 27 millimeters) than the Judd-3 to Judd-5 Birch cents.

The Bushnell-Parmelee Specimen

The present coin made its first appearance on the numismatic scene as early as April of 1863, when it was described in lot 1075 of Edward Cogan's Sale of American Silver and Copper Coins and Medals. According to the title page, the coins in the sale were actually owned by Cogan himself, an auspicious start to the pedigree of this coin, which includes the names of more celebrated collectors than that of any other specimen (see roster below). This piece was a highlight of many great 19th century collections, bringing acclaim to such well-known collectors as Charles Ira Bushnell, Lorin G. Parmelee, and H.P. Smith. After the turn of the century, this coin was acquired by George Earle, whose collection was "One of the great collections: balanced strength in ancients, European and U.S. Rarities and high condition," according to John Adams. B. Max Mehl sold the present coin in his sale of the Will Neil Collection in 1947, and outlined its history after the Earle Sale:

"... I doubt if this coin has ever been in circulation, as it has considerable mint luster and only the highest portions show slight cabinet friction. Excessively rare. Only about eight specimens were minted. This particular specimen has an unusually interesting as well as valuable pedigree. It originally came from the great Earle Collection. At the Earle Sale it was purchased by the eminent numismatist, Mr. Wurtzbach of Massachusetts, who in turn sold it to the great Chicago collector Virgil Brand. From the Brand Collection it went to the Belden Roach Collection of New York, and when I had the pleasure of selling the Roach Collection in 1944, Mr. Neil was the successful buyer. It brought $525.00. But it is certainly worth much more today, considering its rarity, beautiful condition, and outstanding pedigree, and last but not least, the tremendous increase in value of all these greater rarities."

This coin was later owned by a succession of numismatic giants that includes the Norwebs and Robert Simpson, truly one of the most illustrious pedigrees in all U.S. numismatics.

Mehl's reference to some "slight cabinet friction" is probably just some striking flatness on Liberty's cheek, which remains lustrous and shows only a few minor signs of contact on the cheekbone. The copper bulk of the piece is rich brown with just a hint of reddish-violet color, while the small silver plug, larger and rounder in appearance on the obverse as always, is medium-gray with a hint of steel. Under magnification a number of small faults appear, including a shallow pinscratch that falls away from the tip of Liberty's nose, but the plain line on Liberty's neck southeast of the silver plug appears to be a planchet flaw rather than a post-striking defect. A small dot of deep toning on the rim near the Y in LIBERTY on the obverse may serve as a future pedigree marker. The overall presentation is most attractive.

Historically important and genuinely rare, the Judd-1 silver center cents have a remarkable story and distinctive eye appeal. This example has been appreciated by many famous owners, including Charles Ira Bushnell, Lorin G. Parmelee, Virgil Brand, Colonel E.H.R. Green, and Mrs. R. Henry Norweb. The next owner of this remarkable and high-end piece will join their esteemed collecting company.

1792 Silver Center Cent Roster

The following roster was expanded from earlier work by Scott Rubin, Saul
Teichman, and Mark Borckardt with the important assistance of Wayne Burt, Stuart Levine, Pete Smith and Joel Orosz.

1. Garrett Specimen, MS67 Brown PCGS. Peter Gschwend Collection (Thomas L. Elder, 6/1908), lot 116; Henry Chapman; James W. Ellsworth; purchased by Wayte Raymond and John Work Garrett via Knoedler Galleries in May of 1923; John Work Garrett; Johns Hopkins University; Garrett Collection, Part II (Bowers and Ruddy, 3/1981), lot 234; Joel Perlin; Robert Simpson Collection.

2. Norweb Specimen, MS64 Brown. R.C.H. Brock Collection; University of Pennsylvania; Philip H. Ward; Charles Dochus; Harry Forman; New Netherlands Coin Company; purchased by the Norwebs on 3/14/1958; Norweb Collection (Bowers and Merena, 11/1988), lot 3392; Americana Sale (Stack's, 1/2002), lot 724; Ed Milas; Marvin Browder; purchased for $2.5 million and subsequently resold in 2011 by Stuart Levine, Joe O'Conner, and Anthony Terranova; Oliver Jung; ANA Signature (Heritage, 8/2014), lot 5517. Pollock plate coin.

3. Newman Specimen, MS63+ Brown NGC. F.C.C. Boyd; Eric P. Newman; Eric P. Newman Numismatic Education Society; Selections From the Eric P. Newman Collection, Part IV (Heritage, 5/2014), lot 30426; realized $1,410,000.

4. Bushnell Specimen, MS61+ Brown NGC. Possibly Edward Cogan Collection (Edward Cogan, 4/1863), lot 1075, per New Netherlands catalog of 12/1958; Charles Ira Bushnell (S.H. & H. Chapman, 6/1882), lot 1766; Lorin G. Parmelee (New York Coin & Stamp Co., 6/1890), lot 5; Harlan Page Smith (S.H. & H. Chapman, 5/1906), lot 1315; George H. Earle (Henry Chapman, 6/1912), lot 2179; Carl Wurtzbach; Virgil M. Brand; Col. E.H.R. Green; Belden Roach Collection (B. Max Mehl, 2/1944), lot 3111; Will W. Neil Collection (B. Max Mehl, 6/1947), lot 1794; Stockmayer Collection (Stack's, 7/1952), lot 174; Mrs. R. Henry Norweb; Landau Sale (New Netherlands, 12/1958), lot 104; Corrado Romano Collection (Stack's, 6/1987), lot 143; Jay Parrino FPL; Americana Sale (Stack's, 1/1999), lot 143; 65th Anniversary Sale (Stack's, 10/2000), lot 56; Southern Collection; Simpson Collection; Central States Signature (Heritage, 4/2013), lot 4113, realized $822,000. **The present coin.** The *1914 ANS Exhibition* plate coin; *Standard Catalog* plate coin; former *Guide Book* plate coin. The October 2000 Stack's catalog cites an appearance in "Stack's sale of January 3, 1952," but there was no such sale. Scott Rubin suggests this might be a misprint for the Stack's 7/1952 sale listed in the pedigree above.

5. Morris Specimen, MS61 Brown PCGS. Charles Morris (S.H. & H. Chapman, 4/1905), lot 361; James O. Sloss; William Mitkoff; Great Eastern Numismatic Association Sale (Pine Tree, 9/1974), lot 1272a; William T. Anton; private collection; Liberty Collection (Heritage, 4/2012), lot 5403, realized $1,150,000; Kevin Lipton and Anthony Terranova; Cardinal Foundation. Breen *Encyclopedia* plate coin; former *Guide Book* plate coin. We believe this specimen is earlier from William J. Jenks Collection (W. Elliot Woodward, 9/1880), lot 1383; A. Dohrmann Collection (W. Elliot Woodward, 3/1882), lot 437; Lady of Western New York Collection (W. Elliot Woodward, 2/1887), lot 816.

6. Weinberg Specimen, Mint State. Thomas Warner (S.H. & H. Chapman, 6/1884), lot 3215; Richard B. Winsor (S.H. & H. Chapman, 12/1895), lot 291; Loye Lauder (William Doyle Galleries, 12/1983), lot 233; Alan Weinberg.

7. Smithsonian Specimen, AU. Robert Coulton Davis (New York Coin & Stamp, 1/1890), lot 1008a; John Story Jenks (Henry Chapman, 12/1921), lot 5569; Waldo Newcomer; F.C.C. Boyd; Lenox R. Lohr; Empire Coin (1961 FPL); River Oaks Collection (Bowers and Ruddy, 11/1976), lot 908; New England Rare Coin Gallery; private sale; Robert Hughes; private collection; Smithsonian Institution. Judd plate coin for the ninth and 10th editions; current *Guide Book* plate coin.

8. Stearns Specimen, XF. C.H. Stearns Collection (Mayflower, 12/1966), lot 280; Lester Merkin; Donald Groves Partrick; private Eastern collection.

9. Judd Specimen, XF. Hersch, Levick, Farrell Collections (Thomas Elder, 10/1907), lot 1732; later, Dr. J. Hewitt Judd; Illustrated History (A. Kosoff, 1962), lot 19; Julian Leidman; Eastern Collector. The original Judd plate coin.

10. Queller Specimen, VF30 NGC. Joseph J. Mickley (W. Elliot Woodward, 10/1867), lot 2135; Colonel Mendes I. Cohen (Bangs, Merwin & Co. for Edward Cogan, 10/1875), lot 380; William Sumner Appleton; later, Virgil Brand; Brand-Lichtenfels Collections (Abner Kreisberg and Hans M.F. Schulman, 3/1964), lot 1106; Gibson Collection (Stack's, 11/1974), lot 14; John L. Roper (Stack's, 12/1983), lot 425; Stuart Levine and Anthony Terranova; Bertram Cohen; San Diego Show (Dana Linett, 10/1988), lot 9; Denis Loring; Stack's, privately; David Queller (Lemus Collection); Queller Family Collection (Heritage, 1/2009), lot 1500; offered at fixed prices by Heritage in 2010 and 2011; Philadelphia Signature (Heritage, 8/2012), lot 5015.

11. Terranova Specimen, VF. Nigel Willmott; Glendining's Sale (1997); Anthony Terranova; TeleTrade; Larry Stack; Martin Ohgigian; Ohgigian Estate.

12. Starr Specimen, Fine 15 PCGS. George Seavey; Seavey Descriptive Catalog (William Strobridge, 6/1873), lot 842; Lorin G. Parmelee; Virgil M. Brand (Brand Journal number 20765); Armin Brand, per his notebook; 311th Sale (J.C. Morgenthau, 10/1933), lot 78; Floyd Starr; Starr Collection (Stack's, 10/1992), lot 3; Jay Parrino, offered in several fixed price lists in the mid-1990s; unknown dealer intermediaries; Stuart Levine in 2004; purchased by Ed Price on 5/14/2004; Stuart Levine again in 2006; Old West and Franklinton Collections (American Numismatic Rarities, 8/2006), lot 13.

13. California Specimen, VG10 Details, Scratched ANACS. A Northern California collector purchased this piece for $400 in 2006. The coin was offered at a police department auction of unclaimed property. Reported in *Coin World*, January 5, 2009.

14. Unplugged Specimen, SP63 PCGS. Silvano DiGenova and Stuart Levine; Anthony Terranova, 1993; Stack's (3/1995), lot 1400; Donald Groves Partrick Collection. Former *Guide Book* plate coin. The coin does not have a silver insert and may have been a trial striking before making the silver center pieces. In his 1984 provenance study, Scott Rubin mentions Thomas Elder's sale of October 1926, lot 1436, where a piece was described as: "1792. Pattern for Silver Centre Cent (freak)." That listing might represent an early appearance of this piece.

Additional Auction Appearances
With a single exception, none of the following were plated, and no further information in the catalog descriptions provided help determining provenance.
John K. Wiggin Collection (Edward Cogan, 3/1862), lot 747.
Finotti Collection (W. Elliot Woodward, 11/1862), lot 1528.
Benjamin Haines Collection (Bangs, Merwin & Co., 1/1863), lot 780.
Heman Ely Collection (W. Elliot Woodward, 1/1884), lot 444.
Matthews Collection (W. Elliot Woodward, 12/1885), lot 2120.
Woodside Collection (New York Coin and Stamp Co., 4/1892), lot 1. The Silver Center cent is plated (obverse only) and its appearance is bizarre, unlike anything else that we have seen. It is almost certainly a false piece.
H.G. Brown Collection (Lyman H. Low, 10/1904), lot 209.
Poillon, Lee, and Ralston Collections (Thomas L. Elder, 10/1926), lot 1436.
Lenz, Sloane, and Chapman Collections (Thomas Elder, 1/1936), lot 2968.
1941 ANA Sale (Ira Reed, 8/1941), lot 77.
12th Sale (Celina Coin Co., 2/1945), lot 2022.
Ohio State Numismatic Society Convention Sale (Celina Coin Co., 10/1949), lot 591.

Other Reported Appearances
Judson Brenner exhibited a Silver Center cent at the 1916 ANA Convention.
B. Max Mehl advertised an example as part of the Fred Joy Collection on page 599 of the November 1925 issue of *The Numismatist*.

Chronological Auction Records

The Silver Center cent has appeared at auction 63 times in the last 152 years, including the present offering. Heritage has handled the issue seven times since 2009.

John K. Wiggin Collection (Edward Cogan, 3/1862), lot 747.
Finotti Collection (W. Elliot Woodward, 11/1862), lot 1528.

The present sale.
PCGS# 11001

LARGE CENTS

1793 S-14 Liberty Cap Cent
AG Details, Readable Legends

3008 **1793 Liberty Cap, S-14, B-17, Low R.5 — Environmental Damage — PCGS Genuine. AG Details.** Easily attributed by the clear bisecting die crack from the E in LIBERTY through the portrait to the rim near 6 o'clock. Most of LIBERTY is sharp, and nearly all of UNITED STATES OF AMERICA is readable. The fraction is also clear. The date digits are faint but partially discernible. The surfaces are evenly granular and free from rim dings or abrasions. An opportunity to acquire the key 1793 type. Our EAC grade AG3. PCGS# 35492

1794 Large Cent, Choice XF
Sheldon-44

3009 **1794 Head of 1794, S-44, B-33, R.1, XF45 PCGS.** Breen Die State V with cracks through the 17 in the date and the EN in CENT. A charming chocolate-brown example of this widely collected Liberty Cap date. The hair is detailed and displays glimmers of luster. Minor marks on the right obverse field and the obverse rim at 12 and 3 o'clock are barely worthy of mention. Our EAC grade VF20.
Ex: Summer FUN Signature (Heritage, 7/2007), lot 30. PCGS# 35597

1796 Liberty Cap Cent, Fine 15
Flipover Double Struck, S-91

3010 **1796 Liberty Cap, S-91, B-1, R.3 — Flipover Double Strike in Collar — Fine 15 PCGS.** A spectacular early copper error. The first strike was struck approximately 15% off center toward 3 o'clock. Presumably, the coiner was unhappy with the appearance, and set it through the same dies again. The 796 of the date from the first strike is noted where the STA in STATES should be from the second strike. The fraction from the first strike is at 1:30 on the obverse from the second strike. Our EAC grade Fine 12. PCGS# 35780

1808 S-279 Cent, Choice AU
Conditionally Challenging

3011 **1808 S-279, B-3, R.1, AU55 PCGS.** A lovely chocolate-brown representative of this conditionally rare variety. Perusal beneath a loupe fails to find any marks, although a mint-made strike-through affects star 7. We note a small spot west of the wreath ribbon and a larger spot after the D in UNITED. Certified in a green label holder. Our EAC grade XF40. PCGS# 36463

1839 N-3 Cent, MS66 Brown
Head of 1838, Beaded Cords

3012 **1839 Head of 1838, Beaded Cords, N-3, R.1, MS66 Brown PCGS.** A beautiful sea-green and medium brown cent with ample hints of remaining red in protected regions. Lustrous and mark-free with a bold strike on the major devices. The stars are lightly brought up. A later die state example with a faint crack through the lips. Our EAC grade MS63. PCGS# 37228

1840 N-6 Cent, MS65 Brown
Repunched Large Date

3013 **1840 Large Date, N-6, R.1, MS65 Brown PCGS. CAC.** Grellman Die State b to c. The 40 in the date is repunched. A splendid chocolate-brown and sea-green Gem. Lustrous and exceptionally preserved. STATE and stars 5 to 13 are lightly impressed but the major devices are sharp. A desirable example of the Petite Head design. Our EAC grade MS60. PCGS# 395834

1841 N-5 Cent, MS66 Brown
Unabraded Surfaces

3014 **1841 N-5, R.3, MS66 Brown PCGS. CAC.** Grellman Die State d. Readily attributed by several lengthy die cracks. A magnificent olive-brown Premium Gem. Lustrous and virtually unabraded with a bold strike and exceptional eye appeal. A solitary fleck above the coronet tip is noted as an identifier. Much scarcer than N-7 in Uncirculated grades. Our EAC grade MS60. PCGS# 405803

PROOF LARGE CENT

1845 N-14 Cent, PR62 Red and Brown
Only Struck in Proof Format

3015 **1845 PR62 Red and Brown NGC. N-14, High R.6.** A rare proof-only variety. Slight die scratches on Liberty's jaw and on the rim near 12 o'clock identify the elusive N-14. Paired with the "standard" proof reverse of 1844 to 1849 with a rim die scratch near the E in UNITED. The luminous surfaces display ample peach-red along with blushes of lime-green on the central reverse and left obverse. The dies were likely slightly misaligned, since the right borders are well struck while other areas show incompleteness. No post-strike contact is consequential. Our EAC grade PR60.
Ex: Internet Auction #28045 (Heritage, 4/2008), lot 25032; Fred Iskra; Pre-Long Beach (Ira & Larry Goldberg, 9/2008), lot 546; Baltimore Auction (Stack's-Bowers, 3/2012), lot 1346; Adam Mervis. PCGS# 1965

PROOF FLYING EAGLE CENT

1856 Flying Eagle Cent, PR63
Snow-3, Popular First-Year Type

3016 **1856 Snow-3 PR63 NGC.** The 5 in the date is repunched, as is the E in CENT. According to Snow, this variety represents approximately 20% of the of all 1856 Flying Eagle cents seen. Additionally, based on the the certified population data it is probable that this variety makes up the 634 coins distributed to Congressman for their approval. There is also debate as to whether or not the coins were struck as proofs or circulation strikes, understandable given the mixture of proof and Mint State qualities featured on this Select representative. The surfaces exhibit golden-brown color primarily with interspersed accents of copper-orange, especially in the protected regions. The devices are sharply detailed, and scattered marks do not detract. A nice first-year type. PCGS# 47058

INDIAN CENTS

1873 Doubled LIBERTY Cent, MS63 Brown
Rare Snow-1 Variant

3017 **1873 Doubled LIBERTY, Snow-1, FS-101, MS63 Brown PCGS.** Among all Indian cent die varieties, the Doubled LIBERTY is the second most valuable, trailing only the 1888/7. A less prominent Snow-2 Doubled LIBERTY also exists for the Closed 3 1873, but the present lot is the key *Guide Book* Snow-1 variety with strong die doubling throughout LIBERTY. Other design elements, such as Liberty's eye and profile, are also clearly doubled. Sharply struck and satiny with medium walnut-brown, olive-green, and powder-blue toning. Minor obverse carbon determines the grade. PCGS# 37504

1878 Cent, Sharply Struck MS66 Red

3018 **1878 MS66 Red PCGS. CAC.** Although the 1878 cent is known to have circulated well into the 20th century, enough were saved so that finding an Uncirculated example is "relatively easy" (Snow, 2009). The population reports show that the date is fairly available through near-Gem, and that even MS65s can be located with searching. That said, this situation appears to apply only to Brown and Red and Brown coins. PCGS and NGC have graded only about 145 fully Red specimens, of which 50 or so are MS65 or better.

Copper-gold luster endows this Red Premium Gem, and the design elements are sharply struck, including the feather tips, all four diamonds, and the reverse wreath and shield. Both sides are free of mentionable marks or spots. Highly pleasing eye appeal is aptly recognized by CAC. Population: 14 in 66 Red, 1 finer (7/14). NGC ID# 2285, PCGS# 2132

1895 Indian Cent, MS67 Red
Tied for Finest Certified

3019 **1895 MS67 Red PCGS.** An impressive mintage of more 38 million cents flowed from the presses in 1895, and while high-grade representatives survive in some quantity, full Red Superb Gems are genuinely rare. This piece, one of only four MS67 Red examples at PCGS, is an important opportunity for the Registry Set collector, as none have graded finer (7/14). Blazing coppery-red mint bloom radiates from seemingly pristine surfaces, while the design elements are crisply impressed. A single, faint toning speck is noted below the wreath bow on the reverse, where it is not readily detectable. NGC ID# 228P, PCGS# 2192

PROOF INDIAN CENTS

1859 Indian Head Cent, PR66
Gorgeous, First-Year Example

3020 **1859 PR66 PCGS.** Shades of rose and apricot-orange intermingle over the obverse, while the reverse shows mainly golden-tan coloration. This first-year Premium Gem proof, from a mintage of 800 specimens, features predictably pinpoint-sharp definition throughout and is free of any marks visible to the naked eye. Population: 22 in 66, 1 finer (7/14). NGC ID# 2299, PCGS# 2247

1862 Copper-Nickel Cent, PR67 Cameo
Exceptional Contrast, Deeply Reflective

3021 **1862 PR67 Cameo PCGS.** Ex: Palm Beach Collection. This coin exemplifies why the 1862 is considered the ultimate date for a copper-nickel cent type coin. In general, the often-seen strike, mirroring, and planchet issues are not a problem on 1862 cents. Certainly, that is the case with this coin. The fields are deeply mirrored and the devices nicely frosted, which gives the coin a pronounced cameo contrast on each side. The obverse displays an even reddish coloration, while the reverse tends more toward the original whitish-tan the coin had when new. This is a memorable proof coin and extremely rare in this condition, with none certified finer by PCGS and only a single higher-graded coin at NGC in MS67. PCGS population: 3 in 67 Cameo, 0 finer (7/14).
Ex: 2004 FUN Auction (Heritage, 1/2004), lot 4371; Rosemont CSNS Signature (Heritage, 4/2011).
From The Pannonia Collection. PCGS# 82259

1863 Indian Cent, PR67 ★ Cameo
Only 460 Pieces Struck

3022 **1863 PR67 ★ Cameo NGC.** A small proof mintage of 460 Indian cents was achieved in 1863, amid the financial stresses and uncertainties of the Civil War. This delightful Superb Gem exhibits sharply detailed design elements throughout, with impeccably preserved copper-red surfaces and deeply mirrored fields. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (7/14).
From The Pannonia Collection. PCGS# 82262

Gorgeous 1864 Copper-Nickel Cent
PR67 ★ Cameo

3023 **1864 Copper Nickel PR67 ★ Cameo NGC.** In 1864, most proof sets included the copper-nickel cent, as they were the first coins made that year. Only a few additional sets and singles sold in the middle months had bronze proofs, and those sold at the end of the year included proofs with the designer's initial, L. Copper-nickel Indian cents with strong contrast are few and far between, especially in Superb Gem quality. This amazing piece has frosty light tan devices with deeply mirrored fields. Both sides have rose and gold accents that become more vibrant near the border. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (7/14).
From The Pannonia Collection. PCGS# 82265

1868 Indian Head Cent, PR65 Red
Highly Reflective Surfaces

3024 **1868 PR65 Red PCGS. CAC.** Slightly rotated die. Golden-orange and copper-red color this amazing Gem proof Indian Head cent. The field-device contrast generated from the deeply mirrored fields imbues this coin with potent visual appeal. Just a few carbon specks occur on each side. Housed in a green label holder. Population: 8 in 65 Red, 2 finer (7/14). NGC ID# 229L, PCGS# 2293

LINCOLN CENTS

1909-S VDB Cent, MS66 Red and Brown
Colorfully Toned Throughout

3025 **1909-S VDB MS66 Red and Brown PCGS.** The beautifully preserved surfaces of this richly patinated Premium Gem example showcase vivid hues of violet, blue, and orange-gold, well-masking the few faint, scattered carbon specks that are seen with a lens. The devices are well-defined, and the surfaces are nearly free of abrasions. Population: 34 in 66 Red and Brown, 0 finer (7/14). NGC ID# 22B2, PCGS# 2427

1910 Lincoln Cent, MS67 Red
Registry-Quality Example

3026 **1910 MS67 Red PCGS.** This Superb Gem is among the finest that survive from a mintage of nearly 147 million coins. The fiery-red surfaces show swirling luster and impressive detail on Lincoln's hair, beard, and shoulder. Only a tiny tick above the O in ONE prevents an even higher grade. Population: 26 in 67 Red, 0 finer (7/14). NGC ID# 22B5, PCGS# 2437

1910 Lincoln Cent, MS67 Red
Tied for Finest at PCGS

3027 **1910 MS67 Red PCGS.** This coppery-gold blazer displays virtually perfect surface preservation, with only a single faint carbon speck detected near the lower obverse rim upon close examination. Struck from well-worn dies, as evidenced by fine flow lines in the fields, but still exhibiting bold design definition. This piece is tied for the finest certified at PCGS (7/14). NGC ID# 22B5, PCGS# 2437

1912-D Cent, Well Struck MS66 Red

3028 **1912-D MS66 Red PCGS.** The 1912-D cent is very rare in full Red Premium Gem and unknown any finer. The two major services have graded only 24 MS66 Red coins, including the present example. Both sides display copper-gold luster, and each exhibits well-struck design features, including most of the peripheral elements that Bowers (2008) says are "weak or slightly 'fuzzy' ... due to use of worn dies." This is a nicely preserved piece. Population: 18 in 66 Red, 0 finer (7/14). NGC ID# 22BB, PCGS# 2455

1914-S Cent, MS65 Red
Challenging in Gem Condition

3029 **1914-S MS65 Red PCGS.** Colors range from gold-orange to peach but never fall outside the coveted Red designation. Well-defined with half-gloss luster on the obverse and a more satin appearance on the reverse, this Gem possesses great all-around eye appeal. Despite lurking in its Denver cousin's shadow, this S-mint issue is nevertheless challenging this fine. Population: 33 in 65 Red, 3 finer (7/14). NGC ID# 22BJ, PCGS# 2476

1915 Lincoln Cent, MS67 Red
Registry Set Contender

3030 **1915 MS67 Red PCGS.** The 1915 cent had a mintage in excess of 29 million coins, but this was actually a dramatic drop in production at the Philadelphia Mint from the preceding years of the Lincoln design. Full Red survivors can be located with a little searching in the MS64 to MS65 grade range, but Premium Gems are distinctly elusive and finer pieces are decidedly rare. This beautifully preserved Superb Gem ranks a full grade point finer than the coin represented in the current highest-rated Registry Set; it is one of only eight MS67 Red examples certified at PCGS (none have graded this high in either of the other color categories), and only one coin has been encapsulated finer (7/14). Satiny, coppery-red luster illuminates crisp design elements, and magnification is needed to detect any mentionable signs of carbon. NGC ID# 22BK, PCGS# 2479

1918 Cent, MS67 Red
Lustrous and Boldly Struck

3031 **1918 MS67 Red PCGS.** The 1918 cent is significant for having the initials VDB restored, only this time in tiny letters on the edge of Lincoln's shoulder instead of at the bottom of the reverse. This issue, from a hefty mintage exceeding 288 million pieces, is common through fully Red Gem. Red MS67s are rare and higher-grade coins are virtually unknown. Lustrous orange-gold surfaces are impeccably preserved and exhibit boldly defined design elements. Population: 22 in 67 (1 in 67+) Red, 1 finer (7/14). NGC ID# 22BV, PCGS# 2506

LINCOLN CENT ERROR

Off-Metal 1943-S Cent, AU55
Struck on a Silver Dime Planchet

3032 **1943-S Lincoln Cent — Struck on a Silver Dime Planchet — AU55 PCGS.** Struck the same year that cents were issued in zinc-plated steel alloy, the present off metal error has the first-glance appearance of a typical 1943-S cent. Nonetheless, its unusual characteristics caused it to disappear promptly from commerce, since both sides display substantial luster. Due to the slightly undersized flan, the strike is soft on Lincoln's forehead and shoulder, and the tops of WE TRUST are off the flan. The remaining legends are intact, although the 3 in the date is lightly impressed. Mostly silver-gray with blushes of forest-green. A pair of small roundish marks are noted above the left wheat ear.

LINCOLN CENTS

1946 Lincoln Cent, MS67 Red
Vibrant Red Color

3033 **1946 MS67 Red PCGS.** Rich coppery-red and rose hues blend across the radiant obverse, while the reverse showcases strong copper-gold luster. Virtually free of carbon and abrasions, this beautiful Superb Gem is tied for the finest certified at PCGS (7/14), and is also numerically equal to the coin represented in the current highest-rated Registry Set. NGC ID# 22EK, PCGS# 2743

1947 Cent, MS67 Red
Tied for Finest at Both Services

3034 **1947 MS67 Red PCGS. CAC.** Spectacular copper-orange color and radiant mint luster blend over each side to endow this Super Gem with enviable visual appeal, as affirmed by the green CAC label. This well-struck coin shows only a few minute ticks visible with magnification and is one of just 20 examples certified MS67 Red by PCGS with none finer (7/14). NGC ID# 22EN, PCGS# 2752

1948 Lincoln Cent, MS67 Red
Lustrous and Beautifully Toned

3035 **1948 MS67 Red PCGS.** Intensely frosty mint luster complements sharply struck design elements on this Superb Gem representative. The surfaces are clean and attractively toned, with deep orange-red coloration throughout each side. An important opportunity for the Registry Set collector, as PCGS has seen only 16 examples in this grade, and none finer (7/14). NGC ID# 22ES, PCGS# 2761

1948 Lincoln Cent, MS67 Red
Among the Finest Certified

3036 **1948 MS67 Red PCGS.** Mercurial mint luster shifts and alters the visual palette of pink, orange, and ruby-red toning for this Superb Gem cent when viewed from different angles, or when rotated under light. A full strike is confirmed by the lofty grade. Just a few light freckles populate the reverse, but this coin is remarkably clean and smooth with undeniable eye appeal. Population: 16 in 67 Red, 0 finer (7/14). NGC ID# 22ES, PCGS# 2761

1948 Lincoln Cent, MS67 Red
Registry-Quality Representative

3037 **1948 MS67 Red PCGS. CAC.** Wisps of lilac and rose accent fiery copper-red mint bloom on each side, while the devices are well-defined and the surfaces are essentially free of abrasions. A couple minute carbon specks are observed with a lens, though the appeal is uninhibited to the unaided eye. Tied with just 15 others as the finest certified at PCGS (7/14). NGC ID# 22ES, PCGS# 2761

1949 Lincoln Cent, MS67 Red
Rich Mint Luster

3038 **1949 MS67 Red PCGS. CAC.** Frosty, coppery-red mint bloom illuminates boldly struck devices on each side of this well-preserved Superb Gem representative. A few faint freckles are noted on each side upon close examination, though the appeal is hardly inhibited. This piece is tied for the finest certified at PCGS (7/14), and is numerically equal to the coin in the current highest-rated Registry Set. NGC ID# 22EV, PCGS# 2770

1950-S Lincoln Cent, MS67+ Red
Single Finest-Graded at PCGS

3039 **1950-S MS67+ Red PCGS. CAC.** This is the single finest-graded 1950-S Lincoln cent at PCGS, and Registry Set collectors will be watching closely when this amazing Superb Gem crosses the auction block. Razor-sharp definition and intense, shimmering mint frost guarantee the high degree of visual appeal that this piece displays. Minimal carbon specks, located just above the date, are mentioned solely in the interest of full disclosure; but the overall pristine preservation and splendid aesthetic quality of this coin are undeniable. Population: 1 in 67+ Red, 0 finer (7/14). NGC ID# 22F2, PCGS# 2785

1953 Lincoln Cent, MS67 Red
Tied for Finest Certified

3040 **1953 MS67 Red PCGS. CAC.** Pale lilac and cherry hues accent satiny orange-gold mint luster on each side of this nearly flawless, well-struck Superb Gem. No signs of carbon are immediately detectable, and the eye appeal is excellent. PCGS has encapsulated only 11 examples in MS67 Red, and none finer (7/14). This piece stands a full grade point finer than the representative housed in the current highest-rated Registry Set, and therefore represents a rare and important opportunity for the advanced specialist. Furthermore, it is one of only two MS67 Red examples endorsed by the Certified Acceptance Corporation. NGC ID# 22F9, PCGS# 2806

PROOF LINCOLN CENT

1950 Lincoln Cent, PR66+ Deep Cameo
One Coin Finer at PCGS

3041 **1950 PR66+ Deep Cameo PCGS.** Proofs struck earlier in the year show slightly granular surfaces, while Lincoln cent proofs minted later in 1950 were struck from highly polished dies, creating the Deep Cameo contrast seen on this Premium Gem. Blazing pumpkin-gold surfaces exhibit deeply mirrored fields and frosty design elements, and the sharp is predictably razor-sharp. Population: 12 in 66 (1 in 66+) Deep Cameo, 1 finer (8/14). NGC ID# 22LA, PCGS# 93359

TWO CENT PIECE

1872 Two Cent Piece, MS64 Red and Brown
Low-Production Issue

3042 **1872 MS64 Red and Brown PCGS.** With a small mintage of only 65,000 pieces, the 1872 two cent piece is by far the scarcest issue in the series in Mint State, even more so than the popular 1864 Small Motto variety. This Choice example exhibits tinges of fiery orange luster in the protected regions on each side, while the exposed areas display deeper auburn-brown toning. The strike is well-executed, though a couple small planchet voids are noted within the lower-right shield. Housed in an old green label holder. Population: 33 in 64 (1 in 64+) Red and Brown, 16 finer (7/14). NGC ID# 22NG, PCGS# 3613

PROOF TWO CENT PIECES

1870 Two Cent Piece, PR66 Red
Fiery-Orange Visual Perfection

3043 **1870 PR66 Red PCGS. CAC.** Front to back, rim to rim consistency is the hallmark of this brilliant proof two cent piece, which displays impressive fire-orange coloration evenly distributed over the nicely mirrored surfaces. The radiant eye appeal is outstanding, with a bold strike and the lack of any notable defects for the assigned Premium Gem grade. Just one coin is certified numerically finer at PCGS. CAC-approved for quality and appeal. Population: 11 in 66 (1 in 66+) Red, 1 finer (7/14). NGC ID# 274Z, PCGS# 3644

1873 Two Cent Piece, PR65 Red and Brown
Closed 3 Variant

3044 **1873 Closed 3 PR65 Red and Brown PCGS. CAC.** Proof two cent pieces dated 1873 were produced with two different styles of 3 in the date. This example represents the earlier Closed 3 variety, and retains nearly full Red color on the obverse, while the reverse shows mottled burgundy-brown toning. The strike is sharp, and only a few scattered carbon specks are noted upon close examination. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

1852 Three Cent Silver, MS67
Only Two Finer at PCGS

3045 **1852 MS67 PCGS. CAC.** The 1852 silver three cent piece, with a mintage in excess of 18 million coins, is a fairly plentiful date in the absolute sense, but it becomes conditionally rare at the MS67 grade level. This satiny, lustrous piece shows soft golden and ice-blue hues on each side, with essentially unabraded surfaces. Close examination reveals signs of die erosion on each side, including weak definition on the central devices, not uncommon for this issue. CAC-approved, in an old green label holder. Population: 14 in 67, 2 finer (7/14). NGC ID# 22YZ, PCGS# 3666

PROOF THREE CENT SILVER

1858 Silver Three Cent, Toned PR66
Rare at This Grade Level

3046 **1858 PR66 PCGS. CAC.** This was the first year the Mint widely distributed proof coinage. While the exact number of proof silver three cent pieces struck is unrecorded in Mint records, most estimates are in the range of only 210 to 300 pieces. Vivid ocean-blue, violet, and green-gold toning melts into the deeply mirrored fields of this boldly struck example, while the surfaces are seemingly pristine, even under magnification. Population: 12 in 66, 1 finer (7/14). NGC ID# 27C5, PCGS# 3705

THREE CENT NICKEL

1870 Three Cent Nickel, Bright MS66+

3047 **1870 MS66+ PCGS. CAC.** The bright surfaces of this high-end Premium Gem three cent nickel are devoid of toning. The fields show die polish lines, somewhat more prominent on the reverse, and their semiprooflikeness offers mild contrast with the lightly frosted motifs. The design elements are sharply impressed, including the beads on Liberty's crown, the lines on the III denomination, and the leaf veins on the wreath. This well-cared-for example exudes great eye appeal, appropriately recognized by CAC. Population: 19 in 66 (1 in 66+), 0 finer (7/14). NGC ID# 22NM, PCGS# 3736

PROOF THREE CENT NICKEL

1877 Three Cent Nickel, PR66 Cameo
Exceptional Surface Preservation

3048 **1877 PR66 Cameo PCGS. RPD-001.** The date is mildly repunched north, with the doubling most noticeable on the bottom of the 1 and 8. The 1877 three cent nickel is a proof-only issue with a recorded mintage of only 900 pieces. This Premium Gem example has a pleasing degree of field-motif contrast, but the true hallmark of the coin would have to be its incredibly clean surfaces, which are virtually void of even minute flaws. The devices are well-struck, and light golden patina graces each side. Population: 41 in 66 (1 in 66+) Cameo, 9 finer (7/14). PCGS# 83773

SHIELD NICKELS

1876 Shield Nickel, MS66
None Numerically Finer

3049 **1876 MS66 PCGS.** The 1876 Shield nickel is moderately available in grades through MS64, but it becomes scarce in MS65, and Premium Gems are decidedly rare. This coin is unusually well-struck for this issue, with a faint blush of champagne toning seen over much of each side. The typical array of die cracks is seen around the border regions. Population: 12 in 66 (1 in 66+), 0 finer (7/14). NGC ID# 22PB, PCGS# 3805

1882 Shield Nickel, MS67
None Finer at PCGS

3050 **1882 MS67 PCGS. CAC.** A rare survivor at this level of preservation despite an issue of more than 11 million pieces, this Superb Gem exhibits tremendous eye appeal. Hints of steel-blue, golden-brown, and light green appear on the lustrous well-struck surfaces. Population: 6 in 67, 0 finer (7/14). NGC ID# 22PC, PCGS# 3812

PROOF SHIELD NICKELS

1866 Shield Nickel, PR66 Cameo
First-Year Rays Design

3051 **1866 Rays PR66 Cameo PCGS.** A spectacular Premium Gem from the first year of the nickel denomination, this coin features the Rays on the reverse, which were removed the following year due to striking problems. This example exhibits sharply detailed design elements that contrast boldly with the pristine mirrored fields to create a noticeable cameo effect. Population: 28 in 66 Cameo, 3 finer (7/14). PCGS# 83817

1867 Shield Nickel, PR67 Cameo
No Rays Variant, Tied for Finest Graded

3052 **1867 No Rays PR67 Cameo NGC.** Only two coins are shown by either service at the Superb Gem Cameo level (both by NGC), with the present coin an exceptional representative of the grade and type. The brilliant, silver surfaces are deeply mirrored and fully struck. White-on-black contrast makes a strong statement on both sides of the coin. If not the finest known, this coin is a close second. Census: 2 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (7/14). PCGS# 83821

1876 Shield Nickel, PR66 Deep Cameo
Incredible Field-Motif Contrast

3053 **1876 PR66 Deep Cameo PCGS.** Heavy mint frost over the razor-sharp devices delivers full Cameo contrast with the profound depth of mirroring in the fields. The surfaces are largely untoned, and close examination fails to reveal any mentionable surface flaws. More than 1,150 proofs were struck of this issue, but Deep Cameo survivors are extremely rare in any grade. Population: 3 in 66 Deep Cameo, 1 finer (7/14). PCGS# 93830

1877 Shield Nickel, PR65 Cameo
Proof-Only Issue

3054 **1877 PR65 Cameo PCGS.** No business strike Shield nickels were produced in 1877, making the proof variant the only choice for date collectors. This example displays moderate mirroring in the fields and just enough frost on the devices to qualify for the Cameo designation. Wisps of ice-blue and pale gold color grace each side, with a few small, scattered toning spots noted upon close examination. Population: 42 in 65 Cameo, 40 finer (7/14). PCGS# 83831

1877 Nickel, PR66 Cameo
Important Proof-Only Key Date

3055 **1877 PR66 Cameo PCGS.** This key to the Shield nickel series is a proof-only issue, of which 900 pieces were reportedly struck (2015 *Red Book*). Frosty design elements appear to be suspended above the deeply mirrored fields, yielding pleasing contrast. This sharply struck specimen is devoid of mentionable marks or spots. An excellent choice for a high-grade Shield nickel collection. Population: 34 in 66 (2 in 66+) Cameo, 6 finer (7/14). PCGS# 83831

LIBERTY NICKELS

1883 With Cents Nickel, Brilliant MS66+

3056 **1883 With Cents MS66+ PCGS. CAC.** The CENTS denomination was added to the 1883 nickel about mid-year to counter the gold-plating of the No Cents variety by nefarious jewelers such as Josh Tatum of Boston to pass them off as five dollar gold coins. This high-end Premium Gem displays lustrous, untoned surfaces and sharply struck devices, though the corn and wheat ears left of the bowknot are weak. Nicely preserved throughout. The usually seen die cracks are visible at the peripheries. Population: 59 in 66 (4 in 66+), 2 finer (7/14). NGC ID# 22PH, PCGS# 3844

1885 Liberty Nickel, MS65+
Impressive Key Date Example

3057 **1885 MS65+ PCGS. CAC.** This Philadelphia Mint issue had a mintage of nearly 1.5 million coins, but few of those pieces were intentionally saved for numismatic purposes, and the importance of this date for 20th century collectors has been apparent for many decades. One of the most attractive examples of this important key issue that we have examined recently, this piece displays a great deal of flash and impressively clean surfaces that project a shimmering, semiprooflike sheen over both sides. Fully struck, essentially brilliant, and free of noticeable surface flaws. A few minute ticks keep this high-end Gem example from an even higher grade assessment. Population: 2 in 65+, 27 finer (7/14). NGC ID# 2773, PCGS# 3846

1896 Liberty Nickel, MS66
None Numerically Finer

3058 **1896 MS66 PCGS.** The 1896 is a slightly better date in the Liberty nickel series, but it does not become truly rare until the MS66 grade level. This satiny, light golden representative boasts strong luster and nearly unabraded surfaces. The design elements are sharply defined, while a few minute freckles on the lower obverse, seen with magnification, are not detracting. Population: 14 in 66 (1 in 66+), 0 finer (7/14). NGC ID# 277B, PCGS# 3857

1897 Nickel, MS66+
Only One Finer at PCGS

3059 **1897 MS66+ PCGS. CAC.** The Mint struck more than 20 million nickels in 1897, but few survive in the upper Mint State grades range. Of the 16 MS66 coins certified by PCGS, this is one of only four to receive a Plus designation, and only one has graded numerically finer (7/14). Radiant luster and a bold strike are the hallmarks of this coin, while a blush of light golden color adds a degree of warmth to each side. NGC ID# 22PN, PCGS# 3858

1912-S Liberty Nickel, MS65+
Conditionally Rare Any Finer

3060 **1912-S MS65+ PCGS.** While not the scarcest issue overall, the 1912-S does boast the lowest mintage of the series (only 238,000 coins), and also ranks as the only Liberty Head nickel produced at the San Francisco Mint. This high-end Gem displays satiny luster with varying shades of ice-blue, champagne, and pale lavender toning. The lower-left wreath is not fully defined, as is typical of this final-year issue, but the remainder of the design elements are well-detailed. PCGS has encapsulated just 15 numerically finer representatives (7/14). NGC ID# 277R, PCGS# 3875

1912-S Liberty Nickel, MS65+
Rarely Seen Finer

3061 **1912-S MS65+ PCGS. CAC.** The 1912-S boasts the lowest mintage of the series (only 238,000 coins), and these were all struck in just four days in December of that year. This Plus-graded Gem example displays somewhat glossy, pastel-tinted luster, with a touch of the minor high-point softness that is characteristic of the issue. Only 15 pieces have graded finer at PCGS (7/14). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKEL

1884 Liberty Nickel, PR67 Deep Cameo
One of Just Two Proofs Known This Fine

3062 **1884 PR67 Deep Cameo PCGS.** The strike is full and needle-sharp on this deeply mirrored, highly contrasted proof nickel. The gleaming silver surfaces convey the very definition of white-on-black contrast, while Liberty's hair strands can be counted individually. The reverse wreath displays a detailed ear of corn to the left of the ribbon bow. Although a substantial mintage of 3,942 proof Liberty Head nickels marked the second year of production for the design, just one other example has earned such a lofty grade from PCGS, nor has NGC seen any so fine. Population: 2 in 67 Deep Cameo, 0 finer (7/14). PCGS# 93882

BUFFALO NICKELS

1913 Type One Buffalo Nickel, Rare MS68
Incredible Technical and Aesthetic Appeal

3063 **1913 Type One MS68 PCGS. CAC.** As one would expect for the grade, the surfaces on this piece are nearly perfect, with no trace of carbon spotting. Each side has a pronounced matte-like texture, as always on this issue, and the striking details are fully brought up in all areas. This example shows pale violet, powder blue, and light gold toning over vibrant luster, which combines with the finely textured surfaces to grant each side a shimmering quality. Bold clash marks on the obverse around the Indian's eye and temple give the visual impression that the Indian is wearing war paint, further adding to the appeal and intrigue of this high-end coin. As one of just 13 PCGS-certified MS68 examples with none finer (7/14), this piece is equally suitable for the high-end type collector and the Registry Set enthusiast.
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5516; FUN Signature (Heritage, 1/2005), lot 30129; Central States Signature (Heritage, 4/2009), lot 2123.
From The Pannonia Collection. NGC ID# 22PW, PCGS# 3915

1913-S Type One Nickel, Well-Defined MS67

3064 **1913-S Type One MS67 PCGS.** As might be expected by the relatively small mintage (2.105 million pieces), the 1913-S is the most elusive of the three 1913 Type One nickels. PCGS and NGC have graded just 37 examples in MS67 and two finer. The 1913-S is also the least likely to be found sharply struck (Bowers, 2007). The present Superb Gem is a refreshing exception. Its design elements are well-defined, including the Indian's braid and the hair above it, the bison's fur, horn, and tail, and the mintmark. Soft russet toning visits the lustrous surfaces, all of which are impeccably preserved. This piece exudes great eye appeal. Population: 21 in 67 (1 in 67+), 1 finer (7/14). NGC ID# 22PY, PCGS# 3917

1917-S Nickel, MS66+
The Finest at PCGS

3065 **1917-S MS66+ PCGS. CAC.** According to David W. Lange (2006), "a relatively small number of [1917-S] coins may be found that are extremely well struck." He explains that such examples were from dies that "were simply unworn and closely set within the press, the ideal situation for any coining operation but one that was seldom maintained with respect to Buffalo nickels." This Premium Gem features sharp definition on the Indian's hair braid and the bison's head and tail. Each side offers gorgeous, frosted luster and pale shades of rose, lilac, peach, and sea-green toning. A few small clash marks and die cracks appear throughout. PCGS has certified 25 coins in MS66 but this is the only MS66+ representative with none finer (7/14). NGC ID# 22RF, PCGS# 3936

1918-S Buffalo Nickel, MS65
Lovely, Conditionally Scarce Example

3066 **1918-S MS65 NGC.** A trifle weak on the bison's head, shoulder, and tail; and on the hair detail just above the Indian's hair braid: all as usual. This is nonetheless a special example with a smooth, unmarked appearance and fine satin luster. A scarce coin at the Gem grade level, and essentially unobtainable any finer at both services. Census: 16 in 65, 2 finer (7/14). NGC ID# 22RK, PCGS# 3940

1924-S Buffalo Nickel, MS64
Seldom Seen Finer

3067 **1924-S MS64 PCGS. CAC.** The 1924-S nickel had a moderately low mintage of little more than 1.4 million coins, and draws proportionately high demand in all grades. This example is slightly soft in the central regions, as is typical for the issue, though the surfaces are free of any major abrasions, and a warm honey-gold hue graces satiny luster on each side. PCGS has seen 42 numerically finer submissions (7/14). NGC ID# 22RZ, PCGS# 3953

1925-D Buffalo Nickel, MS65
Well-Detailed, Satiny Example

3068 **1925-D MS65 PCGS. CAC.** While many 1925-D nickels fell victim to shoddy production at the Denver Mint, this example is particularly well-struck on the bison's head and torso. The Indian's braid knot and upper hair details are only slightly blended (a big improvement over most examples). The obverse offers satiny, silver-nickel surfaces without any marks or spots, while the reverse is a bit more lively with gleaming luster and an orange-gold hue among the devices. Just 10 pieces are certified numerically finer by PCGS (7/14). NGC ID# 22S3, PCGS# 3955

1925-S Nickel, MS65
Prohibitively Rare Any Finer

3069 **1925-S MS65 PCGS.** In the 1920s, it was common practice at the branch mints to use the undated reverse dies well-past their normal life expectancy in an attempt to reduce production costs. The result was that many coins (especially prevalent among Buffalo nickels, due to the dense nickel alloy) were struck with strong obverses and weak reverses. This 1925-S nickel is an excellent example of this phenomenon, with the obverse reasonably well-defined, but the reverse showing strong evidence of die erosion, particularly around the borders. The eye appeal remains pleasing, however, with soft champagne and sky-blue hues complementing satiny luster, and the surfaces are clean enough to easily qualify for the Gem grade level. Population: 27 in 65, 1 finer (7/14). NGC ID# 22S4, PCGS# 3956

1926-D Buffalo Five Cent, MS66
Impressive Strike Rarity

3070 **1926-D MS66 PCGS.** The all-important strike on this conditionally rare Buffalo nickel is impressive, with nearly full details on both sides of the coin. Perhaps fresh dies or a slightly thicker planchet were used for this coin. Iridescent pearlescence imparts attractive golden overtones among orange and lilac hues over the lustrous, reflective surfaces. Only a single coin is numerically finer than this Premium Gem at PCGS. Population: 26 in 66 (2 in 66+), 1 finer (7/14). NGC ID# 22S6, PCGS# 3958

1927-D Nickel, MS66
Conditionally Rare

3071 **1927-D MS66 PCGS.** While not to the extant of the 1925-D and 1926-D issues, the 1927-D nickel is frequently found with less than complete design definition, a factor that likely contributes to its scarcity in Gem condition and profound rarity in finer grades. In fact, this piece is one of just five MS66-graded examples at PCGS, and none have been certified finer (7/14). Soft green-gold and lavender-gray hues grace glowing, satiny mint luster on each side, while the surfaces are remarkably clean. The design elements are slightly soft at the centers, as is typical, and magnification reveals the beginning signs of die erosion in the recesses around the borders, but the eye appeal is nonetheless exceptional for this issue. NGC ID# 22S9, PCGS# 3961

1929 Buffalo Nickel, MS67
None Finer at Either Service

3072 **1929 MS67 PCGS.** The type specialist or Registry Set enthusiast need not look any further for a better example from this issue of over 36 million coins: the coin offered here is among the five finest certified at PCGS and NGC combined (7/14). Typical of the date and others from the 1920s, most coins were struck from dies set at a greater-than-optimal distance, resulting in a somewhat incomplete strike. This piece is clearly the exception to that rule. However, faint orange and lilac toning and satiny surfaces provide this Superb Gem with outstanding eye appeal. Bidders should seize the opportunity to own this essentially flawless Buffalo nickel representative. NGC ID# 22SE, PCGS# 3966

1934 Nickel, Softly Toned MS67
Above-Average Strike

3073 **1934 MS67 PCGS.** A medley of soft rainbow toning cascades over both sides of this Superb Gem, each of which is very nicely preserved. Moreover, the obverse center is better struck than usual, as is most of the fur on the bison. LIBERTY and the date digits are bold, though the 4 is a tad soft as typically seen. A handful of tiny flecks is visible in the right-obverse quadrant. Population: 25 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 22SL, PCGS# 3972

1934-D Nickel, MS66+
None Certified Finer at Either Service

3074 **1934-D MS66+ PCGS. CAC.** Nearly 7.5 million Buffalo nickels were produced at the Denver Mint in 1934, but not a single Superb Gem has been certified by either PCGS or NGC — a stunning verification of the strike problems that existed at the branch mint. While this example has great eye appeal and a far-better strike than most, even it shows a touch of blending above the braid knot, although the bison is bold.

The coin is beautiful to behold, with gleaming, satin-smooth surfaces and silver-blue highlights among gold and lilac shades and strong mint luster. There are no marks, spots, or other distractions. Just two other nickels have received the Plus designation from PCGS, suggesting that this example is certainly among the finest known of the issue. Population: 59 in 66 (3 in 66+), 0 finer (7/14). NGC ID# 22SM, PCGS# 3973

JEFFERSON NICKELS

1938-D Jefferson Nickel, MS67+
Conditionally Unsurpassed First-Year Example

3075 **1938-D MS67+ Full Steps PCGS.** A fully struck and beautifully preserved first-year Jefferson nickel with Superb surfaces and attractive, light tan-gold and ice-blue toning. An important offering for the Registry Set enthusiast, as none are rated finer by either service, with Full Steps. Population: 3 in 67+ Full Steps, 0 finer (7/14). NGC ID# 22T5, PCGS# 84001

1942-D/D Jefferson Nickel, MS65
Rare Major Variety, FS-501

3076 **1942-D D Over Horizontal D, FS-501, MS65 PCGS.** The mintmark was initially impressed in a horizontal position and then corrected, creating the popular D Over Horizontal D variety. This issue is the most elusive major variety of the Jefferson nickel series in Mint State and always commands a steep premium on the rare occasions when one is offered.

The present coin is one of the finest examples of this sought-after *Guide Book* variety. The design elements are well-detailed and the undertype D is easily visible below the primary mintmark. Vibrant mint luster shines through delicate shades of golden-brown toning on both sides and the well-preserved surfaces show no mentionable distractions. Population: 3 in 65, 0 finer (7/14). PCGS# 38495

1947 Nickel, MS67 Full Steps
Tied for Finest Certified

3077 **1947 MS67 Full Steps PCGS.** This satiny, beautifully preserved Superb Gem is one of just four so-graded Full Steps 1947 nickels at PCGS (5/14), and is a full grade point finer than the coin in the highest-rated Registry Set. Soft olive-gold toning spreads across the surfaces, while faint lavender and ice-blue accents are seen over each side. NGC ID# 22U5, PCGS# 84031

1948-S Nickel, Rare MS67 Full Steps
Tied With Two Others for Finest at PCGS

3078 **1948-S MS67 Full Steps PCGS.** Essentially brilliant centers yield to warm golden peripheral toning on this boldly struck, well-preserved Superb Gem. PCGS and NGC combined have certified only four Full Steps pieces in this lofty grade (three at PCGS and one at NGC), with none finer (7/14). As one of the finest known of the date, this coin ranks a full grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 22UA, PCGS# 84036

1964 Nickel, MS67 Full Steps
The Sole Finest Certified

3079 **1964 MS67 Full Steps PCGS.** For the Registry Set specialist, this Superb Gem is quite literally the ultimate 1964 Jefferson; it is the single finest Full Steps example certified, and even in the next-highest grade of MS66, it is only trailed by five coins at PCGS (7/14). Furthermore, not only is this coin finer than the piece represented in the current highest-rated Registry Set, it is *finer by two full grade points*. The strike is excellent, and swirling champagne and ice-blue hues further heighten the appeal. NGC ID# 22VG, PCGS# 84075

EARLY HALF DIME

1797 15 Stars Half Dime, VF30
Mid-Grade Example of the V-2, LM-1 Variety

3080 **1797 15 Stars, V-2, LM-1, R.3, VF30 NGC.** LM-1 is the only die pairing with the 15-Stars obverse, and it is always found with the reverse featuring an outer berry between NI of UNITED. Typical weakness of strike combined with wear have limited some of Liberty's hair detail, but the lower tresses are well-defined. Attractive, old-silver toning with charcoal gray at the margins attest to the coin's original appeal. Details on the small-eagle reverse are soft at the centers as often seen, but the strike is strong at the margins. This is an attractive, early half dime without any post-mint problems typical of those found on many mid-grade examples of this date. PCGS# 38597

1833 Half Dime, LM-10, MS67
Superb, Seemingly Faultless Example

3081 **1833 V-1, LM-10, R.1, MS67 PCGS.** This entry represents the 10th known die marriage from this date, which occurred in conjunction with a mintage of 1,370,000 pieces.

According to the NGC Coin Explorer:

> "This is another fairly plentiful entry in the Capped Bust Half Dime series. The published mintage includes some dated 1832, but the use of three obverse dies and seven reverses indicates that plenty were minted with the date 1833. Like the example illustrated, many of these coins are poorly struck at their centers.

The same press might coin half dimes one day, dimes the next, and then half dimes again the day after that. Thus, the dies were frequently removed from the press, shelved and then reinstalled. Little care was taken to use the same die pair each time, with the result that the known dies for this date produced a total of 10 marriages."

This is an outstanding specimen featuring gorgeous, original toning and full, unimpeded luster. The strike definition is superb, and the surfaces are seemingly pristine on both sides. Simply a great coin in every respect, and difficult to find fault with in any way.

PCGS has graded 10 examples of this date at MS67, without regard to die variety; with none finer. NGC has seen 20 coins at the same grade, only one of which is specifically identified as an example of LM-10; likewise with none rated any finer as of (7/14). PCGS# 38701

SEATED HALF DIMES

1840 No Drapery Dime, Bold MS66 High-End for the Grade

3082 **1840 No Drapery MS66 PCGS. CAC. V-4.** Star 8 is recut on this variety. A little more than 1 million examples of the 1840 No Drapery type were struck, but it is a rare occasion when a survivor is found certified at the MS66 grade level, and finer examples are rarer still. This CAC-approved Premium Gem example offers a degree of visual appeal that is even rarer than the coin itself; fully defined design elements complement lovely shades of olive and orange-gold toning over each side, with small tinges of violet and forest-green seen around the peripheries. The surface preservation, however, is the true hallmark of this piece, as close scrutiny beneath a loupe fails to reveal even minute defects. A coin fit for the finest Seated half dime collection or type set. Population: 13 in 66, 6 finer (7/14). NGC ID# 232U, PCGS# 4321

1857 Seated Dime, MS67 Tied With Two Others for Finest at PCGS

3083 **1857 MS67 PCGS. CAC. V-9.** This high-mintage date (more than 7 million pieces struck) is readily available in grades through MS66, but Superb Gem examples are conditionally rare. This piece displays soft multicolor toning on each side, with the rainbow hues more vivid on the obverse. The border dentils and the central devices are softly defined, an effect of excessive die wear, which is a characteristic of this variety. A great deal of satiny luster completes the eye appeal. Population: 3 in 67, 0 finer (7/14). NGC ID# 233S, PCGS# 4365

1860 Seated Half Dime, Rare MS68 ★ Tied for Finest Certified

3084 **1860 MS68 ★ NGC. V-2.** This is a simply stunning ice-blue Superb Gem with variegated patches of cobalt, russet, and champagne coloration throughout. Areas of darker patination cling to the rims on both sides and the luster is phenomenal, as one would expect for such a high-grade coin. All attributes combined, the current offering seems unimprovable. NGC has certified only seven 1860 half dimes at the MS68 level, with only two receiving the coveted Star designation; understandably, none are finer (7/14). This Superb piece is a coin for either the connoisseur of Seated half dimes, or those who simply appreciate uncommonly attractive type coins.
Ex: Long Beach Signature (Heritage, 9/2008), lot 1608; Long Beach Signature (Heritage, 5/2009), lot 394.
From The Pannonia Collection. NGC ID# 2347, PCGS# 4377

PROOF SEATED HALF DIMES

1852 Half Dime, PR65
Only a Handful of Proofs Known

3085 **1852 PR65 PCGS. CAC. V-3.** This carefully preserved, richly toned Gem proof comes from an estimated proof mintage of a mere 10 pieces. These proofs were struck several years prior to Mint Director Snowden's push to popularize proof coinage and make them more widely available to collectors. In 1852, proofs were still produced on an "as needed" basis, whenever requested by a collector.

Dense, obviously original sea-green and copper-red toning dominates on both sides, but iridescent accents of gold and purple-rose are also noteworthy. The design details are razor-sharp, and bright reflectivity becomes evident beneath the deep patina when the piece is rotated beneath a lamp. A few wispy die striations are noted on the obverse and reverse alike (creating the brightness in the fields), but the pleasing surfaces are free of bothersome contact marks. The proof 1852 is obviously a rare coin, and this is among the finest known as well as being the only Gem proof certified by PCGS. NGC has graded two coins at PR65, with one finer. PCGS has also encapsulated a single proof specimen at PR66 (7/14).
Ex: FUN Signature (Heritage, 1/2007), lot 854, where it brought $43,125. NGC ID# 235K, PCGS# 4429

1858 Half Dime, PR67
Ex: Floyd Starr

3086 **1858 PR67 NGC. V-8.** Ex: Starr. The Mint first began marketing proof sets to the public in 1858, making this half dime a historically significant piece. Of the 300 proofs issued, approximately 140 specimens survive, 20 of which grade in Gem or above. NGC has certified two coins in PR67 (one in PR67 ★), and PCGS has graded three coins in MS66 with none finer (7/14).

Pastel lilac and mauve hues accompany pale aqua on the obverse, while the reverse displays orange shading. The strike shows areas of slight softness, but the devices are mostly sharp. Overall, this lovely Superb Gem proof is free of mentionable contact and will certainly be a centerpiece in any collection.
Ex: Floyd Starr Collection (Stack's, 10/1992), lot 616; Central States Signature (Heritage, 5/2007), lot 2058. NGC ID# 235N, PCGS# 4437

EARLY DIMES

1796 Draped Bust Dime, JR-2, VF25
Highly Sought First-Year Issue

3087 **1796 JR-2, R.4, VF25 NGC.** Seven die marriages are known for the 1796 dime, the last one discovered after the JR book was published. The varieties range from scarce to rare, with the JR-2 variety among the most often-seen.

The present example exhibits a high degree of detail for the grade, with notable definition among Liberty's hair locks and the reverse borders. The obverse displays pale pinkish-gray patina overall, while the reverse offers a steel-gray center with darker gray margins. Close inspection reveals some faint, old pinscratches on the obverse, primarily hidden in Liberty's hair locks, and some mint-made adjustment marks on the reverse above the eagle's head, but these are hardly noticeable to the unaided eye. A pleasing representative of this first type. PCGS# 38743

Scott Stamp & Coin Company, 1893

1796 Dime, JR-6, MS63
Impressively Preserved

3088 **1796 JR-6, R.3, MS63 NGC.** This variety is most easily identified by a thick horizontal die break extending through the center of 17 in the date. This is a primarily lavender-gray specimen that displays astonishingly sharp strike definition, along with a plethora of interesting die characteristics: die breaks, die lumps, recuttings on several obverse stars (including numbers 4 and 5); a prominent die lump before L in LIBERTY; a tine that extends below the lower right edge of B in LIBERTY; etc.

Well-preserved and seemingly free of post-strike flaws, abrasions or other damage, this is a refreshingly original and undisturbed example that will please the specialist or the novice equally, with its obvious technical merit combined with splendid eye appeal. NGC Census combined for all 1796 varieties: 30 in 63 (1 in 63+), 37 finer (7/14). PCGS# 38747

1807 Draped Bust Dime, JR-1, MS62
Richly Patinated

3089 **1807 JR-1, R.2, MS62 NGC.** The sole die pair for this final Draped Bust date, and the usual die state with prominent clash marks in the right obverse field. This Uncirculated representative shows well-struck interiors with occasional softness toward the borders. Light chestnut-gold toning occurs in the fields and over the motifs, while the margins offer rich navy-blue patina. PCGS# 38770

BUST DIMES

1825 Dime, JR-1, Richly Toned MS64

3090 **1825 JR-1, R.4, MS64 PCGS.** The A in STATES is widely repunched on this scarcer variety, as is star 2 on the obverse. As a date, the 1825 dime is seldom seen at the MS64 grade level, and finer pieces are decidedly rare. This coin showcases rich orange-gold and violet hues over each side, with strong underlying luster and pleasing surface preservation. Several obverse stars and portions of the eagle's neck are ill-defined, not uncommon for the issue, though the borders exhibit complete dentils. Population: 14 in 64 (1 in 64+), 11 finer (7/14). PCGS# 38807

1829 Dime, VF Details
Extremely Rare JR-10 Variety
Famous Series 'Stopper'

3091 **1829 Curl Base 2, JR-10, FS-301, R.6 — Tooled — PCGS Genuine. VF Details.** Although PCGS estimates 40 pieces to exist, the finest-graded example is a single VF35 coin, and the next finest is a F15 example. Almost all survivors are net-graded coins, with one impairment or another, making a coin with decent eye appeal of primary importance despite the likely problems. This is such an example. It displays VF details but overall corrosion, which has been tooled at one time to minimize some of the heaviest residue. The date area with the all-important Curl 2 appears undisturbed and strongly detailed. The motifs are lighter than the granular fields, for a somewhat pleasing two-tone, silver-gray appearance. This coin is a tremendous rarity in all conditions, and it is prohibitively challenging in any collectible state — among the rarest issues of the entire Capped Bust series. PCGS# 38836

SEATED DIMES

1869-S Seated Dime, MS66
Conditionally Rare

3092 **1869-S MS66 PCGS. Fortin-101, R.3.** Fortin describes the 1869-S as being one of the more easily obtainable S-mint Seated dimes from the 1860s, though it is still scarce in any Mint State grade. This beautifully preserved Premium Gem displays just a blush of light golden toning over frosty, nearly undisturbed mint luster. The upper-left portion of the wreath exhibits a touch of the usual softness, but the strike is otherwise well-executed. Population: 4 in 66, 1 finer (7/14). NGC ID# 239Z, PCGS# 4650

1873-CC Arrows Dime, Fine 12
Key Seated Dime Issue

3093 **1873-CC Arrows Fine 12 NGC.** A key issue in the Seated dime series, the 1873-CC is always actively sought with problem-free surfaces in any grade. This Fine 12 example is such a coin, free of major marks and merely showing extensive wear consistent with the grade. The surfaces range from charcoal-gray in the fields to lighter silver-gray on the devices, and the major types are all clear and well-impressed, including the arrows at the date and the crucial mintmark. NGC ID# 23BH, PCGS# 4666

1873-CC Arrows Dime, Fine 15
Pleasing, Original Surfaces

3094 **1873-CC Arrows Fine 15 NGC.** The low mintage of the 1873-CC has always grabbed the attention of collectors, and the often-seen problematic surfaces of many examples places a strong premium on clean, problem-free examples such as this one. Even wear is seen over the design and numerous small abrasions are scattered throughout, the only mark that merits mention is a small dig above the M in DIME. Medium gray surfaces show a light undertone of red. NGC ID# 23BH, PCGS# 4666

1876-CC Seated Dime, MS67
Tied With Three Others for Finest at PCGS

3095 **1876-CC MS67 PCGS. Fortin-103, R.4.** Type One Reverse. This variety exhibits bold doubling on ONE DIME, with the spread most evident on the two E's. The 1 in the date is also mildly repunched south, with the underlying numeral visible on the top edge of the flag of the primary digit. As a date, the 1876-CC dime is easily obtainable in all grades shy of MS67 (more than 8 million examples were struck), but at this level the collector will usually have to wait a long time for an example to become available.

This rare offering features a beautifully preserved, boldly struck representative with frosty mint bloom. Each side exhibits peripheral hues of teal and sea-green toning around soft lavender-gold central regions. PCGS has encapsulated just four submissions in this grade, and none finer (7/14), making this coin truly special not only in aesthetic appeal, but in rarity. NGC ID# 23AJ, PCGS# 4680

1879 Dime, MS68 ★ Prooflike
Outstanding Visual Appeal

3096 **1879 MS68 ★ Prooflike NGC. Fortin-105, R.4.** The date is repunched, as seen on the flag of the 1, inside the lower loop of the 8, and inside and below the 9. On the reverse, a long die crack surrounds the wreath from 10 to 5 o'clock, and several parallel die lines are seen in the leaves at 9 o'clock. This example is clearly one of the first strikes from a fresh die pair, as evidenced by deep mirroring in the fields, and ranks as the single finest-certified Prooflike example (7/14). A thin ring of lemon-gold toning surrounds the frost-white devices, while the surface preservation is exceptional. PCGS# 74687

1886-S Dime, Well Defined MS66
Difficult to Obtain in All Grades

3097 **1886-S MS66 PCGS. CAC.** The 1886-S dime, coming from a relatively small mintage of a little over 206,000 pieces, is a difficult issue to obtain in all grades. Indeed, PCGS and NGC have seen only 130 specimens in all levels of preservation. The two services have graded 18 Premium Gems and 11 examples finer. Lustrous surfaces are silver-gray on the obverse of this MS66, joined by soft powder-blue on the reverse. The design elements are well-impressed, including Liberty's head that is typically weak. Devoid of significant marks. Population: 9 in 66 (2 in 66+), 6 finer (7/14). NGC ID# 23B4, PCGS# 4697

PROOF SEATED DIMES

1869 Seated Dime, PR66 Cameo
One of the Finest-Known Examples

3098 **1869 PR66 Cameo PCGS. CAC.** The obverse of this Premium Gem Cameo proof exhibits peripheral blue, sea-green, lavender, and gold toning. The reverse is mostly brilliant with a trace of gold at the border. A beautiful, fully struck specimen with tremendously reflective fields and nicely frosted devices. Free of contact marks or any other surface distractions. Population: 4 in 66 (1 in 66+) Cameo, 1 finer (7/14).
Ex: *ANA Signature (Heritage, 8/11), lot 3575.* PCGS# 84762

1873 Dime, PR66 Cameo
Ideal With Arrows Type

3099 **1873 Arrows PR66 Cameo PCGS.** This is an ideal two-year type coin from a mintage of 500 proofs. Deep mirrors surround the heavily frosted design elements on each side of this brilliant Premium Gem. The strike is predictably sharp and marks are invisible to the unaided eye. Population: 3 in 66 Cameo, 0 finer (7/14). PCGS# 84769

1873 Arrows Dime, PR67 Cameo
None in Higher Numeric Grades

3100 **1873 Arrows PR67 Cameo NGC.** On February 12, 1873, Congress passed legislation increasing the weight of silver coins, among other things. The weight of a dime increased from 2.49 grams to 2.5 grams. These later strikings (500 pieces) are distinguishable from the earlier proofs (600 specimens) by arrows that were added to each side of the date.

This Superb Gem With Arrows representative features remarkable cameo contrast between thickly frosted design elements and watery fields. The brilliant surfaces appear flawless to the unaided eye, and a loupe reveals no marks worthy of mention. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (7/14). PCGS# 84769

1874 Arrows Seated Dime, PR66
Sharply Struck, Attractively Toned

3101 **1874 Arrows PR66 NGC. Fortin-101, R.3.** A noticeable die defect above the center point on Liberty's neckline readily identifies the proof die pair. This representative is boldly struck throughout, with deeply mirrored fields and seemingly flawless surfaces. Olive-gold and lavender-orange hues melt into the fields, delivering a high degree of eye appeal. A thread-like strike-through is noted between the dentils and the left edge of the rock, and another connects the bottom edges of the IT in UNITED. Census: 15 in 66, 2 finer (7/14). NGC ID# 23DJ, PCGS# 4770

1874 With Arrows Dime, PR65 Cameo
Just One Coin Finer at PCGS

3102 **1874 Arrows PR65 Cameo PCGS.** The Philadelphia Mint struck With Arrows proofs in 1873 and 1874. Only 700 specimens were struck in this second year, making it a popular issue among type collectors. Each side displays bold cameo contrast with frosty design elements and mirrorlike fields. As expected from a proof issue, the strike is razor-sharp, and the brilliant surfaces are virtually mark-free. Population: 2 in 65 Cameo, 1 finer (7/14). PCGS# 84770

1883 Seated Dime, PR68
Magnificently Toned

3103 **1883 PR68 PCGS Secure. Fortin-103, R.3.** Two varieties are known for the proof 1883 dime. Fortin-103 shows a level date positioned further right and a partial first S in STATES. This amazing specimen, from a mintage of 1,039 proofs, features pristine surfaces and a razor-sharp strike. Brilliant centers turn to apricot-orange, violet, and cobalt-blue at the borders on each side. The fields lack just enough reflectivity to prevent a Cameo designation. Nevertheless, the field-device contrast is bold. Population: 4 in 68, 0 finer (7/14).
From The Pannonia Collection. NGC ID# 23D8, PCGS# 4780

1887 Seated Dime, PR67 Cameo
Gorgeous, Conditionally Rare Specimen
Tied With Two Others as Finest-Graded at PCGS

3104 **1887 PR67 Cameo PCGS.** Sharply struck and carefully preserved, this is a gorgeously toned representative with clean surfaces and bold field-to-device contrast observed on each side. The obverse displays gorgeous hues of deep royal-blue and russet-brown patina that is prevalent near the border regions, leaving Liberty's motif bright, frosted, and pale alabaster-gold. The reverse exhibits a lighter, more uniform blanket of pale blue-green coloration augmented by wheat-colored accents on the high points. A conditionally rare example from an original mintage of only 710 coins. Population: 3 in 67 Cameo, 0 finer (7/14). PCGS# 84784

PROOF BARBER DIME

1897 Barber Dime, PR67 Cameo
Beautifully Toned, Deeply Mirrored

3105 **1897 PR67 Cameo PCGS.** With a moderate mintage of 731 coins, the proof 1897 Barber dime is easily obtainable in most grades, but becomes increasingly elusive in Gem and finer condition. At the PR67 level, this is one of only 11 coins to receive a Cameo designation at PCGS, with only one such piece numerically finer (7/14). Concentric hues of pinkish-gold, mint-green, royal-blue, and violet surround pale champagne centers, while the devices are struck to full definition and the eye appeal is equally strong. PCGS# 84881

MERCURY DIMES

1917-D Dime, MS65 Full Bands
Sharply Struck Throughout

3106 **1917-D MS65 Full Bands PCGS.** Full Bands 1917-D dimes are very scarce in MS65, evidenced by fewer than 70 pieces having been graded by PCGS and NGC. A mere 14 specimens grade higher. The present Gem is well-defined throughout, an important attribute of this particular coin. The typical example is weak around the peripheries, despite often having Full Bands (Lange, 1993). Both sides of this piece reveal full rims, and the peripheral lettering is sharp. Moreover, lustrous surfaces display whispers of occasional gold color around the borders. Both sides are well-preserved. Population: 42 in 65 Full Bands, 10 finer (7/14). NGC ID# 23H3, PCGS# 4913

1920-S Mercury Dime, MS66+ Full Bands
Vibrant Mint Luster

3107 **1920-S MS66+ Full Bands PCGS. CAC.** Despite an adequate mintage of 13.8 million pieces, the 1920-S Mercury dime is a scarce issue in grades as low as the AU level. It seems that few high-quality examples were saved by contemporary collectors and most of the mintage circulated heavily in the national economy until coin collecting from circulation became popular in the 1930s. By that time, most examples seen were well-worn and abraded.

The present coin is a high-end Premium Gem, with well-detailed design elements, showing full separation on thbands. Thehe 0 in the date shows the "fade-away" effect seen on almost all specimens of this date, from all three mints. The well-preserved brilliant surfaces are brightly lustrous and eye appeal is outstanding. Population: 8 in 66 (1 in 66+) Full Bands, 3 finer (7/14). NGC ID# 23HD, PCGS# 4933

1931-S Mercury Dime, MS66 Full Bands
Sharp Strike, Glowing Luster

3108 **1931-S MS66 Full Bands PCGS. CAC.** A translucent hint of champagne-gold covers both sides of this glowing Premium Gem dime, one of the more challenging San Francisco issues to locate with Full Bands. Just 1.8 million pieces were struck, and no more dimes were minted at the San Francisco Mint until 1935 when production resumed with a mintage more than eight times that of 1931. This appealing example shows a tiny nick near Liberty's lower hairline, but no other distractions on the satin-smooth surfaces. Population: 42 in 66 (1 in 66+) Full Bands, 8 finer (7/14). NGC ID# 23J9, PCGS# 4987

1939-D Dime, MS69 Full Bands
Practically Unimprovable Example

3109 **1939-D MS69 Full Bands PCGS.** From a moderate mintage of nearly 24.4 million pieces, the 1939-D Mercury dime is an available date in all grades up to the Superb Gem level. The issue is known for high production values, and the present coin is an outstanding example of this well-regarded date. The striking details are full, with precise definition on the all-important bands. The surfaces glow with satiny luster under incredible rainbow toning. Each side displays vivid iridescent colors, including purple, russet, lavender, blue, and emerald-green. The fields are technically perfect, with no defects of any kind present on both sides. PCGS has certified only 16 coins in MS69 Full Bands, while NGC has graded another three examples at this exalted level, and unsurprisingly neither firm has seen any specimen finer (7/14). It is difficult to believe that the present coin could be improved upon, either in technical merit or intense visual appeal.

Ex: Central States Signature (Heritage, 4/2010), lot 2068.
From The Pannonia Collection. NGC ID# 23JS, PCGS# 5019

1944 Mercury Dime, MS68 Full Bands
Major Rarity at This Grade Level

3110 **1944 MS68 Full Bands PCGS.** The 1944 Mercury dime is a common issue in an absolute sense, and circulated pieces are often found in bulk bags of "junk" silver. At the Superb Gem grade level with a Full Bands designation, however, the date suddenly becomes elusive and draws an entirely different group of collectors. The piece here-offered is one of just three MS68 Full Bands coins certified by PCGS and NGC combined (two pieces and one piece, respectively), and none are finer (7/14). Frosty, silvery-white luster graces virtually flawless surfaces, while the design definition is exceptional. Close examination reveals faint die striations in the fields, though these do not detract from the immense visual appeal. NGC ID# 23KB, PCGS# 5051

TWENTY CENT PIECES

1875-CC Twenty Cent, MS63
Lustrous Carson City Issue

3111 **1875-CC MS63 PCGS.** Bemoaned and unloved by the public during its short tenure in circulation, the twenty cent piece has since found acceptance and appreciation by collectors. The short series is attainable for all issues except the rare 1876-CC (with only about two dozen known). This Select Uncirculated example is one of 133,290 pieces minted at Carson City in 1875. The coin is lustrous although a bit weakly struck at the centers, especially on the eagle's breast. The surfaces show only a few tiny abrasions beneath intermittent splashes of amber-gold toning. NGC ID# 23R6, PCGS# 5297

1876 Twenty Cent Piece, MS66
Prooflike With Contrast

3112 **1876 MS66 NGC.** A small mintage of 14,640 pieces was the extent of the Philadelphia Mint's 1876 twenty cent piece production, foreshadowing the end of the short-lived series (at least as far as business strikes were concerned). This example may have been one of the early strikes from the small mintage. The fields are prooflike, or nearly so, on both sides as if struck from newly polished dies, while the motifs are richly frosted. The coin is brilliant-white, lustrous, and razor-sharp in all regards. Census: 16 in 66 (1 in 66 ★), 4 finer (7/14). NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

Impressive 1875 Twenty Cent Piece, PR67 Cameo

3113 **1875 PR67 Cameo NGC.** The popularity of this issue is immense, being that it is the premier date in the proof twenty cent series. The 1875 is also a prime type candidate with the highest proof mintage (2,790 pieces) of the type. Not all of these coins appear to have been released, with Breen (1977) noting that 590 specimens were still in mint holdings on January 1, 1876. The fate of these coins is not known with certainty, but melting on the authority of Mint officials is a likely result. Breen also reports only one die marriage among survivors, this being most readily identifiable by the presence of random arcing striations in the obverse field around Liberty's head. While the currently offered Superb Gem displays these features, its surfaces are silent on the subject of post-production distractions. A fully brilliant, snow-white appearance greets the viewer. Noticeable reflectivity in the fields permits appealing, mild cameo contrast to be appreciable on both obverse and reverse. Census: 6 in 67 Cameo (2 in 67 ★ Cameo), 0 finer (7/14). *From The Pannonia Collection*. PCGS# 85303

1876 Twenty Cent, Toned PR64
The Highest Proof Mintage of the Series

3114 **1876 PR64 PCGS. CAC.** The second year of the proof twenty cent piece had a mintage of 1,500 pieces (2015 *Red Book*), the highest of the 1875-1878 series. A medley of reddish-mauve and aqua-green patination is slightly deeper on the reverse of this near-Gem. Liberty's portrait and the eagle display modest contrast with the fields. The design elements are sharply defined and neither side reveals significant marks. Population: 83 in 64, 35 finer (7/14). NGC ID# 27H3, PCGS# 5304

1878 Twenty Cent, PR64 Cameo
Excellent Contrast and Boldly Defined

3115 **1878 PR64 Cameo PCGS.** A number of 1878 proof twenty cent pieces are available to collectors, but Cameos are much more difficult to come by. Excellent field-motif contrast is apparent on this near-Gem Cameo, as the frosty devices appear to float over the deeply mirrored fields. The design elements are crisply defined and both sides are nicely preserved. Population: 25 in 64 Cameo, 10 finer (7/14). PCGS# 85306

Incredible Prooflike Gem 1796 B-2 Quarter Dollar From the Norweb Collection

3116 **1796 B-2, R.3, MS65 PCGS.** Ex: Norweb. High 6. In his 1796 Mint report, dated November 29, Elias Boudinot discussed some of the problems that faced the fledgling Mint in Philadelphia: "He has seen, with regret, an opinion generally prevailing, that the establishment is unnecessarily expensive, and less productive than was rationally expected by its advocates and friends." Among the problems was free coinage, meaning that the government paid the cost of refining silver and gold deposits, including the cost of copper that was necessary for alloy purposes. Boudinot continued: "not only the original cost of the works, and the salaries of the stated officers, fall on the public, but also the whole amount of the workmanship, with the alloy, wastage, and contingent losses."

During the period from July 18, 1794 to November 12, 1796, a total of 39 deposits of silver were brought to the Mint. Among those were five deposits in August 1794 that were the exact fineness of standard silver (89.24% pure). Only seven of the remaining 34 deposits were lower-purity than standard silver, but those seven deposits totaled 98,556 gross ounces of silver, or nearly 25% of all the silver deposited during that 29-month period. The result was a necessity for the Mint to supply more than 2,100 pounds of copper to bring the silver deposits up to standard. At the prevailing rates, the cost of that copper alone was approximately $560. Copper collectors will be quick to point out that the cost of the alloy was equal to a little over 70,000 additional large cents that could have been minted.

The 5,894 quarter dollars minted in the second quarter of 1796 were included among the silver coins minted at the time. Attempts to correlate silver deposit data from the 1796 Mint Report to coinage delivery records have failed, but research continues. Comparing those records does indicate an approximate delay of three months, suggesting that the silver contained in the coins was deposited around the first of the year.

The 1796 quarters were the first of their kind, featuring the Draped Bust obverse modeled from the work of Gilbert Stuart, and the Small Eagle reverse that would soon be replaced with a Heraldic Eagle design. These are one-year type coins, the first quarter dollars ever minted, and a low-mintage issue. Total production included the 5,894 coins struck in 1796, and 252 additional pieces coined in February 1797. Modern research into die states shows that the Browning-2 quarters, with the High 6 date position, were the first coined, adding to the importance of this coin.

More than a dozen Gem Mint State 1796 quarters still exist, although few of them have the strike of this example. On nearly all known examples, the eagle's head and neck are flat and indistinct, with the leaves above showing no detail. Although minor adjustment marks affect the strike on the present coin, the head still shows nearly full design definition. Breen claimed in his *Proof Encyclopedia* that "The weakness at eagle's head is characteristic of the design and is not to be attributed to imperfect striking." The mere existence of sharp heads on pieces such as the Norweb specimen clearly show that Breen was incorrect. However, the vast majority of pieces have poorly defined head and neck details on the reverse. Finding an example with full details at that location is a rare numismatic event.

This boldly defined Gem is one of the finest existing 1796 quarters. Steel, russet, and sea-green toning enhances the underlying deep golden appearance. The fields are fully and obviously prooflike. Besides the bold definition on the head, the wing feathers are sharp, and the rock below the eagle has full detail. The border dentils, especially on the obverse, are bold and wide, providing a wonderful frame for the design elements. An early die state example, the Norweb Gem is struck from perfect dies, adding credence to the idea that it is a special presentation strike. A few light adjustment marks on the reverse are visible, but they hardly affect the incredible beauty of this piece. The cataloger for the Norweb Collection suggested that this is a special piece: "This is quite possibly a presentation coin, of the type which years ago used to be called Proof, struck, as Walter Breen suggests, at the beginning of coinage of the denomination on April 9, 1796." The combined attributes of this incredible coin from the Norweb Collection ensure that it will delight collectors for generations to come.

Regrettably, there is no provenance recorded in the Norweb catalog. However, the numismatic history of the family will give today's scholars a place to start. Liberty Emery Holden (1833-1913), a graduate of the University of Michigan, studied law and had diverse business interests. He was a hotelier, miner, and newspaperman. As a hotelier, he built and owned the Fairmount Hotel and the Hollenden Hotel in Cleveland. As a miner, he managed and owned several mines, including the Old Jordan and Old Telegraph mines in Utah. He is perhaps most famous as the owner of the Cleveland *Plain Dealer*, a newspaper that continues to operate today in its 168th year. Today, the publication's website notes that, beginning in 1885 "under the direction of Liberty E. Holden, the paper assumed the strict policy of political impartiality and objectivity in news coverage that continues to this day." Holden's interest in numismatics apparently began circa 1890.

Liberty Emery Holden and his wife, Delia Elizabeth Bulkley, had nine children. Among them was Albert Fairchild Holden (1866-1913) who died of cancer in 1913, just prior to his father's death. The younger Holden was a Harvard graduate who studied mining and mineralogy. His hobbies were mineralogy and numismatics. His numismatic interests seem to have started about 1900, and continued concurrently with his father.

Albert's daughter, Emery May Holden (1896-1984) developed her own interest in numismatics while very young, and was recording die varieties in her father's collection by the time she was 12 years old. She joined the ANA in 1914 and held membership in the organization for 70 years, longer than anyone else before or since. Most of her numismatic purchasing took place from the early 1930s into the 1960s, actively buying from New Netherlands in the 1950s. She married R. Henry Norweb, Sr. (1895-1983) in October 1917. Their son, R. Henry Norweb, Jr. was also active in numismatics, specializing in Brazilian coins.

Today, the provenance hound may want to concentrate on two time periods for a source of this 1796 quarter. The Holdens, Liberty and Albert, collected from about 1890 to 1913, and Emery May Holden and her husband, R. Henry Norweb, Sr., actively collected from the 1930s to the 1960s, and even personally attended the King Farouk sale in Cairo in 1954. Likely sources for this Gem 1796 quarter include J.C. Morgenthau, New Netherlands Coin Co., B. Max Mehl, and other contemporary dealers, including the Chapman brothers in the late 19th and early 20th centuries. The opportunity to own this outstanding coin, surviving from the first striking of US quarter dollars, and later to the famous Norweb collection, may not present itself again for a long time.

Ex: Norweb Collection (Bowers and Merena, 3/1988), lot 1512; Boston Signature (Heritage, 8/2010), lot 3107.

From The Pannonia Collection. PCGS# 38920

BUST QUARTERS

1831 Quarter, B-5, MS64
Large Letters, FS-301

3117 **1831 Large Letters, B-5, FS-301, R.3, MS64 PCGS.** This *Cherrypickers'* variety describes a large date logo punch over a small date punch. The repunching is most visible on the 1 and the 8. Intense multicolor toning covers surfaces that offer well-detailed design motifs, save for a bit of softness on the stars. For all Large Letters 1831 quarters, PCGS has seen nine pieces in MS64 and only four finer (7/14). PCGS# 38984

1838 Capped Bust Quarter, B-1, MS64
Richly Toned and Lustrous

3118 **1838 B-1, R.1, MS64 PCGS. CAC.** The only dies for the year, if one does not count the Seated type, also struck in 1838. This is a thoroughly lustrous near-Gem, awash in ocean-blue, rose, and apple-green colors. Well-struck, the major devices are intricate, and only stars 6 and 7 do not possess clear centrils. A small mark on the cheekbone is noted for pedigree purposes.
Ex: Logan and Steinberg Collections (Bowers and Merena, 11/2002), lot 1318; Dallas Signature (Heritage, 12/2005), lot 605. PCGS# 39015

SEATED QUARTERS

1870 Seated Quarter, MS66
Tied for Finest at PCGS and NGC

3119 **1870 MS66 PCGS.** Philadelphia quarter dollar production increased substantially from 1869 to 1870 (86,000 coins). The issue is scarce into the lower-Mint State grades, and finer examples are rarely seen. Approximately ten pieces exist in Gem and above. This is the PCGS plate coin, tied with two other representatives for the finest certified (7/14). Housed in an old green label holder, this well-struck piece offers a frosty obverse toned in dusky shades of gold and silver-blue. As usual, Liberty shows signs of die rust. The reverse is largely brilliant, with areas of light golden-peach coloration. NGC ID# 23UK, PCGS# 5476

1877 Seated Quarter, Rare MS68
Incredible Preservation

3120 **1877 MS68 NGC.** Type Two Reverse. The 1877 is one of the more available dates in the With Motto series. However, at the MS68 level only a handful have survived from the mintage of more than 10.9 million pieces. This is an exceptionally attractive coin, as one would imagine from the grade. The surfaces are brilliant throughout and the luster glows with radiant mint frost. Perhaps there is an abrasion on this coin somewhere, but we could not find it. Just outstanding quality. Census: 8 in 68, 0 finer (7/14).
Ex: Long Beach Signature (Heritage, 2/2010), lot 1069.
From The Pannonia Collection. NGC ID# 23V5, PCGS# 5504

1877-CC Seated Quarter, MS67
Tied for Finest Certified

3121 **1877-CC MS67 NGC. Briggs 5-E.** With a reported mintage of more than 4 million pieces, the 1877-CC Seated Liberty quarter is a moderately available date in high grade and a popular choice of mintmark type collectors. This delightful Superb Gem exhibits well-detailed design elements, though a touch of softness is noted on Liberty's hair and neckline. The well-preserved surfaces radiate vibrant mint luster on both sides. Attractive shades of violet and champagne-gold toning enhance the outstanding eye appeal and there are no mentionable distractions evident to the naked eye. This coin is a "must have" specimen for Registry Set collectors and Carson City aficionados alike. Census: 6 in 67, 0 finer (7/14). NGC ID# 23V6, PCGS# 5505

1879 Seated Quarter, MS67 ★
Remarkable, Visually Delightful Example

3122 **1879 MS67 ★ NGC. CAC.** One of the most visually delightful representatives of this low-mintage issue imaginable, this incredibly frosty example is also sharply struck and well-preserved. An essentially brilliant Superb Gem with delicate gold peripheral toning that only enhances the amazing eye appeal of this remarkable coin. Census: 25 in 67 (4 in 67 ★, 1 in 67+★), 7 finer (7/14).
From The Pannonia Collection. NGC ID# 23VB, PCGS# 5511

PROOF SEATED QUARTERS

1858 Seated Quarter, PR66
First Regular Issue Proof Quarter

3123 **1858 PR66 NGC. Briggs 5-E.** At one time the reported mintage for all proof silver coins in 1858 was just 80 pieces of each denomination. As recently as 20 years ago, the figure of 80 coins was still used, including in Larry Briggs' reference on the Seated quarters. Today, however, the *Guide Book* records a mintage of 300 proofs, a figure that is merely an estimate. The actual proof mintage for all silver denominations in 1858 remains unknown. For every denomination the number of certified proofs falls in the range of 113 to 164 coins, figures that admittedly include resubmissions, but are still substantially higher than the old report of 80 pieces minted. This was the first year that proofs were widely distributed to contemporary collectors.

This Premium Gem proof exhibits multihued toning with delicate blue and lavender. Both sides are fully mirrored and sharply detailed with light cameo contrast. Slight design doubling appears at the lower right part of the reverse. An outstanding opportunity for the proof Seated connoisseur. Census: 4 in 66, 1 finer (7/14).
Ex: Central States Signature (Heritage, 4/2011), lot 5089. NGC ID# 23WK, PCGS# 5554

1862 Seated Liberty Quarter, PR67 Cameo
One Numerically Finer at PCGS

3124 **1862 PR67 Cameo NGC.** The recorded proof mintage of 1862 quarters totaled 550 coins, although only a little over 430 of those were sold, and the rest were melted at a later date, according to Walter Breen in the *Complete Encyclopedia of U.S. and Colonial Coins*. Breen suggests that all of the coins were sold as part of proof sets, not individually.

This impressive Civil War-era proof is elusive in top grades. The present Superb Gem proof is entirely brilliant with untoned, ice-white surfaces. The designs are boldly defined with frosty silver luster, and the contrast is exceptional. Census: 7 in 67 Cameo (2 in 67 ★ Cameo), 1 finer (7/14).
Ex: Long Beach Signature (Heritage, 2/2008), lot 372, which brought $11,500. PCGS# 85558

1868 Quarter Dollar, PR66+
Attractively Mirrored, Lightly Toned

3125 **1868 PR66+ NGC.** The 1 in the date is triple-punched north, an interesting diagnostic of the proof die for this issue. Remnants of yet another 1 can be seen in the dentils beneath the primary digit. A thin, clear patina of reddish-gold floats over the silver surfaces, with neon-blue accents near the rims (most noticeable on the reverse). A sharply struck, deeply mirrored example. No proofs are certified finer at either service — non-cameo or otherwise, with this coin the sole example with the NGC Plus designation. Census: 12 in 66 (1 in 66+), 0 finer (7/14). NGC ID# 23WZ, PCGS# 5567

1874 Arrows Quarter, PR66 Cameo
Brilliant and Sharply Contrasted

3126 **1874 Arrows PR66 Cameo NGC.** Significant, of course, because of the limited number of years Arrows coinage was produced (two), this coin is even more important because of the exceptionally high grade it is found in. Brilliant throughout, the fields are very deeply mirrored and there is thick mint frost on the devices which creates a sharp cameo contrast. Census: 6 in 66 Cameo, 1 finer (7/14).
Ex: New York Signature (Heritage, 7/2002), lot 7824; Long Beach Bullet Sale (Heritage, 9/2002), lot 918. PCGS# 85575

1882 Quarter, PR67 ★ Ultra Cameo
Profoundly Contrasted

3127 **1882 PR67 ★ Ultra Cameo NGC.** From a mintage of 1,100 proofs, this is a brilliant and fully struck Superb Gem that boasts exceptional eye appeal. Every individual design element, including the date, stars, and lettering, features intensive mint frost that provides a remarkable black and white appearance. The business strike mintage for this date was quite low (15,200 coins), and today proof examples provide the vast majority of high-quality pieces for date collectors. This is the sole finest example certified in Ultra Cameo at NGC(7/14).
Ex: Central States Signature (Heritage, 5/2007), lot 2093; FUN Signature (Heritage, 1/2009), lot 2420.
From The Pannonia Collection. PCGS# 95583

1886 Seated Quarter, PR67
Dramatically Toned

3128 **1886 PR67 PCGS. CAC.** Only 886 proof Seated Liberty quarters were struck in 1886, and the date is extremely elusive in business-strike format as well because of its meager 5,000-coin mintage. This magnificent Superb Gem exhibits well-detailed design elements and deeply mirrored fields, under attractive shades of cerulean-blue and champagne-gold toning. Population: 8 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 23XJ, PCGS# 5587

1886 Seated Quarter, PR67 Cameo
Deep Mirrors, Bold Contrast

3129 **1886 PR67 Cameo PCGS. Briggs 2-B.** Business strikes are rare for this low-mintage issue (just 5,000 pieces struck), while proofs are of average scarcity with 886 proofs produced. Deep mirrors surround the frosted motifs, with a mere hint of ivory color that mellows the otherwise brilliant-silver surfaces. Larry Briggs' discussion of the obverse proof die suggests the stars show virtually no centers, but on this coin the stars are fully centered and sharp. There are no distractions whatsoever across the surfaces of this boldly contrasted proof. Population: 6 in 67 Cameo, 0 finer (7/14). PCGS# 85587

1887 Seated Quarter, PR66+ Cameo
Spectacular Peripheral Toning

3130 **1887 PR66+ Cameo PCGS.** Only 710 proof Seated Liberty quarters were struck in 1887, and high-grade examples are seldom encountered today. This high-end Premium Gem displays bold field/device contrast, with spectacular dark green and cobalt-blue patina at the peripheries. Population: 4 in 66 (1 in 66+) Cameo, 2 finer (7/14).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3346. PCGS# 85588

1889 Quarter, PR68
Richly Toned Reverse

3131 **1889 PR68 NGC.** This razor-sharp specimen has a lightly toned obverse field, although the margin displays medium rose-red. The reverse is richly patinated lavender-red and jade-green. The seated Liberty is frosty, although reverse toning precludes any Cameo designation. Devoid of hairlines, and housed in a former generation holder. Among the finest survivors from the proof production of 711 pieces. Census: 2 in 68, 2 in 68 ★, 1 in 68 Cameo, 1 in 68 ★ Cameo, 1 in 69 Ultra Cameo, 0 finer (7/14).
Ex: Cincinnati Signature (Heritage, 4/2009), lot 2361, which realized $12,650.
From The Pannonia Collection. NGC ID# 23XM, PCGS# 5590

1889 Seated Quarter, PR67 Cameo
Boldly Contrasted and Completely Untoned

3132 **1889 PR67 Cameo NGC.** Only 711 proof Seated Liberty quarters were struck in 1889, to accompany a small business-strike mintage of just 12,000 pieces. This magnificent Superb Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields to create a startling cameo effect. The well-preserved surfaces are completely brilliant and eye appeal is terrific. Census: 5 in 67 Cameo (1 in 67 ★ Cameo), 2 finer (8/14). PCGS# 85590

1890 Seated Quarter, PR68 ★ Cameo
One Coin Finer at NGC

3133 **1890 PR68 ★ Cameo NGC.** Ice-white devices and mirrored fields appear to merit an Ultra Cameo designation, although NGC has instead bestowed a Star. This was likely awarded because the specimen is fully brilliant. The strike is precise aside from the star centers, and extensive evaluation is required to locate even trivial surface imperfections. A scant 590 proofs were struck, in addition to a mere 80,000 business strikes. Census: 6 in 68 Cameo (1 in 68 ★ Cameo), 1 finer (7/14).
Ex: Palm Beach Signature (Heritage, 7/2009), lot 495.
From The Pannonia Collection. PCGS# 85591

1891 Quarter, PR67 ★ Ultra Cameo
The Finest Certified Example

3134 **1891 PR67 ★ Ultra Cameo NGC.** This amazing coin displays profoundly mirrored, jet-black fields that contrast nicely against the frosted, ice-white devices, producing the white-on-black appearance that collectors so desire in Deep Cameo/Ultra Cameo coinage. This fully struck coin is devoid of any other color, but the deep contrast should produce a frisson of excitement in the most jaded collector. The 1891 proof Seated quarter issue (600 specimens) was the last of the series, as the Barber design would be introduced in 1892. Census: 1 in 67 Ultra Cameo (1 in 67 ★ Ultra Cameo), 0 finer (7/14).
Ex: FUN Signature (Heritage, 7/2010), lot 3596.
From The Pannonia Collection. PCGS# 95592

BARBER QUARTERS

1898-O Barber Quarter, MS66
Only Two Certified Finer

3135 **1898-O MS66 NGC.** There was virtually no collector interest in saving the 1898-O quarter from circulation at the time of issue, and so the vast majority of the more than 1.8 million pieces struck suffered the wear of extensive circulation in commerce. The few Mint State exceptions are of great interest to contemporary numismatists, especially the near-best coins such as this Premium Gem. Light gold and green overtones grace pale gray surfaces that swirl with luster. Both sides show die clash marks, the reverse more so, while the obverse has a touch of deeper color at the bottom rim. Softly struck on the usual trouble-spots, such as the eagle's claws, but nonetheless an attractive coin. Census: 3 in 66, 1 finer (7/14). NGC ID# 23YE, PCGS# 5620

1913 Quarter, MS66
Sharp and Lustrous

3136 **1913 MS66 PCGS.** Lightly iridescent and sharply lustrous, this attractive quarter displays sea-green hues at the margins flecked with umber accents. Brilliant luster rolls from rim-to-rim. A bit of softness at the shield/wing junction and a few scattered, light ticks on the portrait define the Premium Gem grade, although the eye appeal suggests a finer designation. PCGS and NGC combined have seen but four numerically finer coins. PCGS population: 6 in 66, 2 finer (7/14). NGC ID# 23ZU, PCGS# 5664

1913-D Barber Quarter, MS67
Tied for Finest at PCGS

3137 **1913-D MS67 PCGS.** This magnificent Superb Gem exhibits sharply detailed design elements in most areas, but just a touch of softness shows on the eagle's claw. The well-preserved surfaces are mostly brilliant, with a few specks of beige toning on the lower obverse. Vibrant mint luster adds to the tremendous eye appeal. Population: 2 in 67, 0 finer (8/14). NGC ID# 23ZV, PCGS# 5665

PROOF BARBER QUARTERS

1892 Quarter, PR68 Ultra Cameo
Attractive and Immaculately Preserved

3138 **1892 PR68 Ultra Cameo NGC. CAC.** Type Two Reverse. After Mint officials rejected roughly 300 proposed coinage designs to replace the ubiquitous Seated Liberty design, Chief Engraver Charles E. Barber took over the project and employed his own design, used on dimes, quarters, and half dollars from 1892 through 1915. This first-year type proof is a stunning representative with NGC-recognized and CAC-affirmed Ultra Cameo contrast. Faint russet toning occurs peripherally around the obverse, while the reverse presents brilliant centers that progress to shades of orange, red, purple, and blue. Census: 7 in 68 Ultra Cameo (1 in 68 ★ Ultra Cameo), 1 finer (7/14). PCGS# 95678

1894 Quarter, PR66 Cameo

3139 **1894 PR66 Cameo PCGS. CAC.** Following a proof production of 1,245 quarters in 1892, proof Barber mintages ranged between 731 coins (1897) and 972 proofs (1894) for the rest of that first decade. This amazing Premium Gem Cameo proof has brilliant silver surfaces with no evidence of toning on either side. The strike is bold and the surfaces are exquisite. Population: 15 in 66 (2 in 66+) Cameo, 4 finer (7/14).
From The Pannonia Collection. PCGS# 85680

1898 Barber Quarter, PR67
Brilliant, Frosted Ultra Cameo Proof

3140 **1898 PR67 Ultra Cameo NGC.** This proof issue — and many of the late 1890s proofs in general — are well-produced and attractive. The strike on this example shows no evidence of weakness on any of the motifs, with full details on the upper right shield corner as well as the eagle's legs and talons. The fields are deeply mirrored and untoned, in stark contrast to the frost-white devices. Even the high, square rims are frosted. There are no mentionable distractions or marks, other than a few short, delicate lines in the right obverse field. Census: 15 in 67 Ultra Cameo, 25 finer (7/14). PCGS# 95684

1901 Barber Quarter, PR67 Cameo
Untoned Reflective Fields

3141 **1901 PR67 Cameo PCGS. CAC.** This spectacular Superb Gem displays sharply detailed design elements in all areas except for a touch of softness on the eagle's claw. The devices are richly frosted, providing bold cameo contrast with the deeply reflective fields. The brilliant surfaces show no mentionable flaws and eye appeal is outstanding. Population: 9 in 67 (1 in 67+) Cameo, 2 finer (7/14). PCGS# 85687

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS63 Full Head
An Unusually Attractive Example

3142 **1916 MS63 Full Head PCGS.** Both the Walking Liberty half dollar and the Standing Liberty quarter underwent design alterations in 1917, but that imparted upon the half dollar (the moving of the mintmark from the right obverse field to the lower-left reverse border), was insignificant compared to the changes that took place on the quarter design. The bare-breasted, full-length Liberty on the quarters of 1916 was more martial in appearance than that on the half dollar, holding a shield in one hand, an olive branch in the other. On the redesign of 1917, Liberty's chest was covered with a more-military chain-mail coat (World War I was raging at the time); the redesigned reverse shows three of the 13 stars formerly at the sides moved beneath the eagle, which was consequently shifted upward in the field. Other more subtle design changes were imparted, as well.

Although the 1916 Standing Liberty quarter is a member of a two-year type alongside the 1917-PDS Type One issues, the low-mintage 1916 is much in demand from series completists as well as aficionados of key coins in general. This remarkably well-preserved example appears much finer than one might expect from the grade. The surfaces are bright and nearly brilliant with just a hint of golden at the margins. The strike details are strong throughout, unusual for this issue which is almost always "mushy" in appearance, and the mattelike surfaces show no obvious or detracting abrasions. NGC ID# 242Y, PCGS# 5705

1917 Type One Quarter, MS67 Full Head
None in Higher Numeric Grades

3143 **1917 Type One MS67 Full Head PCGS.** A Superb Gem representative, with the pinpoint sharpness expected of the issue and a few inconsequential frost breaks on the high points of the obverse. Attractive hints of champagne-gold and lavender toning enhance the outstanding eye appeal. Always in demand from type collectors and series specialists alike. Population: 74 in 67 (4 in 67+) Full Head, 0 finer (7/14).
Ex: FUN Signature (Heritage, 1/2006), lot 2460. NGC ID# 242Z, PCGS# 5707

1917 Type One Quarter, MS67 Full Head
Radiant Luster, Full Design Definition

3144 **1917 Type One MS67 Full Head PCGS.** A simply incredible Superb Gem example of this popular issue. Powerfully lustrous, frosty surfaces exhibit soft silver-gray patina with nearly imperceptible hints of ice-blue and speckles of purple. A solid strike transcends the full head of Liberty to include crispness on the rivets, inner shield, and eagle's plumage. Beautifully preserved with noteworthy eye appeal.
Ex: Dallas Signature (Heritage, 10/2008), lot 730; Houston Signature (Heritage, 12/2009), lot 600.
From The Pannonia Collection. NGC ID# 242Z, PCGS# 5707

1919-S Quarter, MS64 Full Head
Uncharacteristically Sharp Throughout

3145 **1919-S MS64 Full Head PCGS.** In *Standing Liberty Quarters*, fourth edition, J.H. Cline notes of this issue, "The 1919-S has long been considered one of the key coins of the series among most collectors and dealers. The 1919-D and 1919-S are usually paralleled in price and rarity. Full Heads of this date are very rare and would be closely paralleled with the value of the 1916, and very difficult to locate."

High praise, indeed, but this lustrous near-Gem is well-deserving. Liberty's head is a definite qualifier, and though a couple of rivets on the shield are softly defined, the strike is remarkable for the issue. Splashes of green-gold color appear mostly at the margins, while a tiny dark spot is noted above the W in WE on the obverse, and a faint streak of blue crosses the eagle's right (facing) wing. Population: 27 in 64 (5 in 64+) Full Head, 19 finer (7/14).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3628. NGC ID# 243D, PCGS# 5733

1920 Quarter, Vibrant MS66 Full Head

3146 **1920 MS66 Full Head PCGS. CAC.** The 1920 quarter dollar sports a plentiful mintage approaching 28 million pieces and is available without too much difficulty through near-Gem. Ten percent of the extant coins are estimated to have been struck with Full Head (Cline, 2007). The strike of the current Premium Gem transcends Full Head detail to include sharp definition on Liberty's chain mail, the rivets and inner shield, and most of the eagle's plumage. Vibrant luster emanates from surfaces delicately toned in soft golden-tan and violet. Nicely preserved throughout. Population: 27 in 66 (1 in 66+) Full Head, 5 finer (7/14). NGC ID# 243E, PCGS# 5735

1920-S Standing Liberty Quarter, MS67
Full Satiny Brilliance

3147 **1920-S MS67 PCGS. CAC.** This San Francisco date is one of the most strike-challenged issues of the series, with very few Full Head representatives and assorted weak areas elsewhere on both sides of the coin. This example, however, is boldly struck — although the head is shy of full, and two or three shield rivets are weak. Otherwise, sharp details prevail. The surfaces are brilliant and white, satiny and smooth. The luster is terrific. A short die crack is seen above the 920 of the date. Neither PCGS nor NGC have certified a numerically finer example. PCGS population: 4 in 67, 0 finer (7/14). NGC ID# 243G, PCGS# 5738

1920-S Quarter, MS63 Full Head
Challenging San Francisco Issue

3148 **1920-S MS63 Full Head NGC.** The 1920-S is typical San Francisco issue in that sharply struck representatives are exceedingly difficult to locate. This satiny example is better-struck than most, though the eagle's feathers and the shield rivets exhibit a touch of the usual softness. The date is clear, but grows weak at the top, as it characteristic of this issue. Traces of light golden color grace the surfaces, and abrasions are minimal. Census: 13 in 63 Full Head, 34 finer (7/14). NGC ID# 243G, PCGS# 5739

1926-S Quarter, MS65 Full Head Condition and Strike Rarity

3149 **1926-S MS65 Full Head PCGS.** At both NGC and PCGS, only about one-tenth of the Mint State 1926-S Standing Liberty quarters also have the Full Head designation. The 1926-S and 1927-S issues are among the weakest-struck S-mints from the decade of the 1920s, and both may be considered conditional as well as strike rarities within the series. This Gem Full Head 1926-S graded by NGC meets the minimum requirements for such a designation, including a visible earhole and three sprigs in the olive branch. Elsewhere most of the shield rivets are present save for two or three, and the chain mail and most of the eagle feathers are well-detailed. The surfaces on this near-pristine piece are frosty silver-gold with scattered bits of iridescence, a beautiful coin. Population: 18 in 65 Full Head, 10 finer (7/14). NGC ID# 243T, PCGS# 5759

WASHINGTON QUARTERS

1834 Washington Quarter, Rare MS67+ FS-401, Light Motto

3150 **1934 Light Motto, FS-401, MS67+ PCGS. CAC.** Beautiful pastel-rainbow hues form softly blended concentric bands around each side of this sharp Superb Gem. PCGS has encapsulated only 21 examples in MS67, and this is one of just three that have been awarded the sought-after Plus designation, with none finer (7/14). The coin is tied numerically with the example in the current highest-rated Major Varieties Registry Set, and is easily one of the most attractive Washington quarters this cataloger has recently seen. PCGS# 146000

1935-D Washington Quarter, MS67+ The Sole Finest Certified

3151 **1935-D MS67+ PCGS.** For the Registry Set collector, this coin is quite literally the ultimate when it comes to the 1935-D Washington quarter; it is the single finest-certified example of the date, if only by a Plus margin, and is therefore nearly half of a grade point finer than the coin represented in the current highest-rated Registry Set. The sheer quality, however, transcends the technical aspects of the grade, as the visual appeal is equally exceptional. Varying shades of soft toning encompass each side in virtually the entire color spectrum, though the obverse shows dominant hues of olive-gold and amber-red. Beautifully preserved with well-defined design elements. NGC ID# 244E, PCGS# 5798

1962-D Washington Quarter, MS67 None Numerically Finer

3152 **1962-D MS67 PCGS.** Strong silvery-white luster yields to traces of light golden toning around the borders on this nearly pristine Superb Gem. This incredible coin is tied with just six others at the top of the PCGS population charts (7/14), and ranks nearly half of a grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 246R, PCGS# 5873

1795 O-105a Half Dollar
Pleasing XF40

3153 **1795 2 Leaves, O-105a, R.4, XF40 PCGS.** For O-105a, Overton described a crack from the edge through B to the top of the head, but on this example that crack only extends from the edge to B, and goes no further. Both sides have lustrous light gray and lilac surfaces with some darker toning on the obverse. Light scratches are evident on the neck and head.
Ex: Houston Signature (Heritage, 12/2008), lot 674. PCGS# 39221

1806 Draped Bust Half, MS63
Pointed 6, Stem, O-115a

3154 **1806 Pointed 6, Stem MS63 PCGS. O-115a, R.2.** The variety is confirmed by the recut T and Y of LIBERTY and the five berries on the reverse, the lowest of which has no stem. As Overton describes, the crack at the bottom of the date becomes sharper and branches into two cracks at the left, one passing below stars 1 to 3, the other going through stars 1 to 5. A crack has developed at the top of STATES but does not progress downward to join UNITED, as Overton indicates that it should. Some Bust half specialists suggest that no such advanced crack exists.

Dusky golden-gray toning displays splashes of cobalt-blue and lavender on the reverse. The design elements are well impressed and nicely centered on the planchet, and the dentilation is complete and strong on both sides. No adjustment marks are visible. Population: 10 in 63, 17 finer (7/14).
From The Pannonia Collection. PCGS# 39318

1810 Half Dollar, MS65
O-109, Just One Certified Finer

3155 **1810 O-109, R.3, MS65 NGC.** In practice, 1810 half dollars are attributed by reverse characteristics. Ten die varieties are known from nine obverse dies and 10 reverse dies. Only the obverse of O-102 and O-103 is shared. The reverse of O-109 has several horizontal crossbars that extend to the right of the shield, and two lines of vertical stripe 6 that extend beyond the lower shield border. The reverse is rotated about 45 degrees clockwise. Both sides display frosty luster beneath rich autumn-brown and sea-green toning. The design motifs show sharp definition, and although a few minor blemishes occur on each side, the surfaces are exceptional for the grade. Census: 7 in 65, 1 finer (7/14).
Ex: Los Angeles Signature (Heritage, 8/2009), lot 1568; Houston Signature (Heritage, 12/2009), lot 664. PCGS# 39418

1811 Small 8 Half Dollar
O-110, Near-Gem Example

3156 **1811 Small 8, O-110, R.1, MS64 NGC.** Perhaps a small group of this variety was saved shortly after mintage, because several examples of the variety exist in the MS64 to MS66 range. This representative distinguishes itself with a steely-silver patina, highlighted by olive-gold overtones near the margins. A bold strike exists throughout, with minimal flatness on stars 4 and 5, but overall the motifs are sharp. The only noticeable marks are a few dark grease marks angling from 9 o'clock at the obverse rim to Liberty's ear. Struck slightly off-center southwest on the reverse. PCGS# 39434

1815/2 Half Dollar, O-101, AU50
Elusive *Guide Book* Variety

3157 **1815/2 O-101, R.2, AU50 PCGS.** The 1815 half dollar mintage of just 47,150 coins was accomplished with a single die pair, and all examples exhibit a faint underlying 2 beneath the primary 5 in the date. This example is also die-clashed on each side, but does not exhibit the reverse die crack through 50 C. that develops on the later state. As a date, this issue is one of the more elusive for the period, as evidenced by the rarity of Mint State examples.

This About Uncirculated piece exhibits a touch of high-point wear, but retains nearly complete detail. Soft silver-gray patina encompasses most of each side, though vivid tinges of orange, teal, and lemon-gold toning are seen in the protected regions, primarily on the obverse. PCGS# 39491

1819 Half Dollar, O-114, MS64
Ex: Eliasberg

3158 **1819 O-114, R.3, MS64 NGC.** The O-114 is a moderately scarce variety that shows a die line (faint on this example) at the eagle's neck. This example is from an early die state, as the obverse star points are not yet drawn to the rim. Warm golden-orange peripheral elements give way to pale silvery-gray and ice-blue hues in the centers that show the faintest hint of rose throughout. The luster is radiant, and the surfaces are free of major abrasions.

Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1767; FUN Signature (Heritage, 1/2010), lot 3440. PCGS# 39553

1826 O-117 Half Dollar, MS65 PCGS
Obvious Originality, Attractive
Condition Census for the Variety

3159 **1826 O-117, R.2, MS65 PCGS.** This die marriage is among the more common varieties for the 1826 Capped Bust half, but Gems are rare. In fact, both Parsley's 2013 Condition Census and Steve Herrman's June, 2014 Auction Prices Realized for the O-117 variety include only one MS65 example, with none finer. This is an unquestionably original representative, with golden-gray centers that yield to lavender and cobalt shadings at the borders. The devices are exceptionally sharp for the variety, including a fully bold scroll, which is often seen weak on lesser examples. Soft luster lurks beneath the thick, natural patina. There are no grade-limiting handling marks.

Ex: St. Louis Signature (Heritage, 5/2003), lot 6726. PCGS# 39689

1827 O-105 Half Dollar, Square Base 2, MS65
Sole Finest Certified of the Variety at NGC

3160 **1827 Square Base 2, O-105, R.3, MS65 NGC.** This variety exhibits a recut 5 in 50 C. on the reverse; this reverse die was also used to strike O-116. Potent luster sweeps the nearly undisturbed surfaces of this pleasing Gem. Light golden-brown toning enriches the margins, while the fields and devices remain brilliant. Well-struck with the exception of the star centers. Among the 32 examples certified by NGC as O-105, the present piece is the single finest by two full grade points (7/14).
Ex: Central States Signature (Heritage, 4/2010), lot 867.
From The Pannonia Collection. PCGS# 39697

1829 Half Dollar, MS66
O-112, Small Letters

3161 **1829 Small Letters MS66 NGC. O-112, R.1.** This variety is easily identified by several parallel die lines in the obverse field between the date and star 13. These lines fade with later die states, removed by lapping. This piece showcases razor-sharp design definition with satiny luster shining through a veil of lavender-gray toning, while deeper olive hues are seen in the protected regions. Certified at the lofty MS66 grade level, this piece is one of the finest known of the issue. NGC has certified only 12 examples in this lofty grade (1 in 66+, 1 in 66+★), and none finer (7/14). PCGS# 39795

1830 Small 0 Half Dollar, MS65
O-115, Outstanding Eye Appeal

3162 **1830 Small 0, O-115, R.2, MS65 PCGS. CAC.** Two faint parallel die lines in front of Liberty's bust confirm the variety, as does a slight knob on the olive stem at the base of the leaf. In an absolute sense, the 1830 half dollar issue is readily obtainable well-into the lower Uncirculated grade levels because of its mintage of over 4.7 million coins. In Gem condition, however, representatives become decidedly scarce, and only a handful of examples are certified finer.

This gorgeous coin offers radiant luster that shines through light golden-gray patina overall with blue, green, orange, and rose accents. The devices are sharply detailed, and strike incompleteness is confined to the obverse stars. Carefully preserved and highly attractive. Including all Overton varieties, PCGS has certified 21 Small 0 pieces in MS65 (two in MS65+) and just five finer (7/14). PCGS# 39826

1831 Capped Bust Half, O-109, MS65
Perfect for Type Representation

3163 **1831 O-109, R.1, MS65 PCGS. CAC.** This is a fairly plentiful variety, identified in part by a small die lump in the field near star 5, and by lines 2 and 3 of vertical shield stripe 1 being joined at the bottom. A small tine in the headband above the R in LIBERTY serves as further confirmation. Strong, satiny luster illuminates shades of sea-green, orange-gold, and lavender-gray toning over each side, while the devices are well-defined and the surfaces are pleasantly clean. For type purposes, this Gem example is ideal, as PCGS has encapsulated only seven numerically finer coins, all varieties included (7/14). PCGS# 39845

1832 Small Letters Half, MS65
O-103, Beautifully Toned

3164 **1832 Small Letters, O-103, R.1, MS65 NGC.** This variety shows the upright of the 5 in the denomination recut and a small triangular die chip on the lower-left drapery fold. Radiant luster shines through multicolor toning on each side in shades of golden-brown, purple, and blue. The devices show sharp definition with minor softness on the high points of Liberty's hair curls and the eagle's left (facing) wingtip. Including all Small Letters varieties, NGC has seen 27 submissions in MS65 (one in 65 ★) and seven coins finer (7/14). PCGS# 39860

1833 Half Dollar, O-101, MS67
Only One Finer of the Date at PCGS

3165 **1833 O-101, R.1, MS67 NGC.** A misplaced shield line extends from the top of the extreme left crossbars, down and along the inside of the left edge of the shield, to the bottom of the primary first vertical line. The 8 in the date is higher than the adjacent 3. The strike is bold throughout, and the nearly pristine surfaces radiate vibrant mint bloom. Vivid ocean-blue and violet peripheral hues surround rich orange-gold in the margins, while the central regions exhibit warm champagne patina. As a date, this issue is among the more available in the series, largely due to a substantial mintage in excess of 5.2 million pieces, but the surviving population drops off dramatically past the MS65 grade level, with Superb Gems being extremely rare. This piece is virtually the ultimate representative in both terms of technical quality and aesthetic appeal. NGC has certified just two 1833 halves in this grade, and just one finer (7/14). PCGS# 39887

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, GR-1, AU53

3166 **1836 Reeded Edge AU53 PCGS. GR-1, R.2.** The only known die pair. This reverse was also employed for GR-1 of the 1837 issue. This is a pleasing AU example of this popular Reeded Edge half, the scarcer of just two Capped Bust issues with 50 CENTS on the reverse. I light golden peripheral hue surrounds bright, steel-gray surfaces, while the grade-defining wear is minimal. Population: 20 in 53, 67 finer (7/14). NGC ID# 2U28, PCGS# 6175

1838 Reeded Edge Half, MS65
GR-4, Deeply Toned Throughout

3167 **1838 MS65 NGC. GR-4, R.1.** This is a plentiful variety, often chosen for type or date purposes. A bisecting die crack from the rim above the D in UNITED extends through the eagle and fades in the eagle's right (facing talons). In later die states this crack becomes even more prominent and additional cracks appear. The strike is sharp, save for the left obverse dentils which are often soft. Rich olive-gold and aquamarine peripheral bands surround dusky lavender and champagne-gray toning in the centers, while the surface preservation is in keeping this the assigned Gem grade. Census: 18 in 65, 6 finer (7/14). NGC ID# 24G5, PCGS# 6177

SEATED HALF DOLLARS

1839 Seated Half Dollar, MS64
WB-102, With Drapery Variety

3168 **1839 Drapery MS64 PCGS. CAC. WB-102, R.2.** The With Drapery variety is indicated not only by the additional drapery folds beneath Liberty's right elbow, but also by a distant star 1 from the rock — an equally obvious die change diagnostic of the reworked dies, where part of the rock was removed from the new design. The 1839 With Drapery variant is almost equally scarce in high grades than its more famous No Drapery counterpart. This boldly struck, near-Gem example is wonderfully toned in azure-blue and rose-gold shades, with strong luster shining through on both sides of the coin. Population: 16 in 64, 3 finer (7/14). NGC ID# 24GL, PCGS# 6232

1842 Small Date Seated Half, MS64
Reverse of 1842, WB-101
Splendid Strike and Toning

3169 **1842 Small Date, Rev of 1842 MS64 NGC. WB-101, R.2.** The so-called "Large Letters" variant, also identified as the Reverse of 1842. The Small Date obverse die is scarcer overall than the Medium Date, although some die pairings are more scarce than others of each logotype. (All varieties pale in comparison to the vary rare Philadelphia Small Letters variety — Reverse of 1839 — of which just four pieces are known. The 1842 and 1846 issues are the only dates in the Seated half series that have noticeably different date sizes in the same year. This splendid example is wonderfully toned in lustrous hues of gunmetal-blue, russet-red, and fire-orange. The strike is first-rate, with full star centers, a bold head on Liberty, and a full-feathered eagle. Broad, square rims complete the full details. Scarce this nice. Census: 12 in 64 (5 in 64+), 5 finer (7/14). PCGS# 6240

1843 Seated Half, MS65
WB-101, Among the Finest Known

3170 **1843 MS65 NGC. WB-101, R.3.** Certainly in the top dozen or so finest-known 1843 Seated halves of any variety. This silver-gray Gem is softly lustrous and virtually unmarked. The stars are sharp at the centers, with bold detail on Liberty's head and hair. The eagle is fully feathered, with only slight, minor softness at the left talon. This example is boldly die cracked both obverse and reverse, with an amazing network of breaks that predict the not-too-distant end to the useful life of the dies. Census: 1 in 65, 2 finer (7/14). NGC ID# 24GX, PCGS# 6243

1858-O Seated Half Dollar, MS65
WB-101, Satin Luster

3171 **1858-O MS65 PCGS. WB-101, Die Pair 29, Low R.3.** This die marriage, one of 41 identified thus far for the date and mint by Bugert, is quickly identified by obvious diagonal die lines in the lower section of the reverse shield; easily discernible between the vertical shield lines. This example is fully struck with clean, minimally marked surfaces, subtle light toning variations, and pleasing satin luster. For the 1858-O issue, PCGS has rated just one coin finer at MS66 (7/14). PCGS Population regardless of die variety: 4 in 65, 1 finer (7/14). NGC ID# 24HW, PCGS# 6294

1858-S Half Dollar, WB-103, MS65
Only Two Finer for the Issue
Ex: Richmond Collection

3172 **1858-S MS65 NGC. WB-103, Die Pair 12, R.3.** Ex: Richmond Collection. The obverse die is blundered, with the base of an errant 8 buried in the rock above the primary 8 in the date. The reverse has the scarcer Medium S, as always with this obverse according to Wiley and Bugert. While interesting, this variety is not overly elusive in an absolute sense, though it does become rare in the Mint State grade range, as do all varieties of this conditionally rare issue. The present piece is possibly the second-finest known of the variety behind the Norweb coin, which is encapsulated as MS66 by PCGS. The surfaces are frosty and nearly brilliant, save for traces of light golden color on each side, and the design elements are boldly impressed. A few minor, scattered surface marks preclude an even higher grade, though the eye appeal is hardly inhibited. Census: 3 in 65, 1 finer (7/14).
Ex Richmond Collection, Part III (David Lawrence, 3/2005), lot 1714; Long Beach Signature (Heritage, 2/2009), lot 1335; Long Beach Signature (Heritage, 9/2009), lot 780. NGC ID# 24HX, PCGS# 6295

1859-O Seated Half Dollar, MS65+
Richly Toned

3173 **1859-O MS65+ NGC. WB-101, Die Pair WB-7, R.3.** A high-end Gem example, this piece displays gorgeous toning in a number of attractive shades. Among the colors present are teal, yellow, copper-gold, orange-brown, and red. The coin exhibits a strong degree of design definition. The reverse reveals an as-made area of struck-in grease. Census: 11 in 65 (1 in 65+, 1 in 65 ★), 3 finer (7/14). NGC ID# 24HZ, PCGS# 6297

1883 Seated Liberty Half, MS67
Tied for Finest at NGC

3174 **1883 MS67 NGC. WB-101.** Only 8,000 business-strike Seated Liberty half dollars were struck at the Philadelphia Mint in 1883, and none were produced at the other U.S. mints. Mintages were uniformly small during this era because the Mint had to concentrate most of its resources on coining the vast amount of silver dollars mandated by the Bland-Allison Act of 1878. Fortunately, the low mintages alerted contemporary collectors to the scarcity of these issues, and a number of high-quality examples were saved for future generations.

The present coin is a spectacular Superb Gem, with well-detailed design elements that show just a touch of softness on some of the stars. The creamy surfaces radiate vibrant mint luster and no mentionable distractions are evident. Census: 4 in 67, 0 finer (7/14). NGC ID# 24KW, PCGS# 6365

1889 Seated Half, MS65
Just 12,000 Examples Struck

3175 **1889 MS65 PCGS. CAC. WB-101.** Half dollar output at the Philadelphia Mint remained low from 1879 through 1890, as resources were directed toward the production of Morgan dollars. Consequently, this late-date issue claims a mintage of only 12,000 coins. A blush of violet patina with orange accents covers the majority of each side but leaves the centers flashy and brilliant. The design elements are razor-sharp, and the overall eye appeal is exceptional. Population: 21 in 65 (1 in 65+), 11 finer (7/14). NGC ID# 24L4, PCGS# 6371

PROOF SEATED HALF DOLLARS

1873 Seated Liberty Half, PR66
Popular Two-Year Arrows Design

3176 **1873 Arrows PR66 NGC.** Arrows were placed on either side of the date on most silver coinage in 1873 to indicate a slight weight change. The Arrows were removed after the following year, creating a short-lived, but very popular, design type.

Only 550 proof Seated Liberty half dollars of the Arrows design were struck in 1873, and few survivors can match the quality and eye appeal of the present coin. This piece is spectacularly toned in vivid shades of golden-brown, lavender-gray, and violet, with sharply detailed design elements and deeply reflective fields underneath. Close inspection with a loupe reveals no mentionable distractions. Census: 9 in 66 (2 in 66 ★), 0 finer (7/14). NGC ID# 27UU, PCGS# 6434

1877 Seated Half, PR66 NGC
None Certified Finer by Either Service

3177 **1877 PR66 NGC.** Cobalt-blue, reddish-gold, and silvered lilac shades hide beneath layers of original patina, not revealed until the coin is rotated beneath light. Once discovered, the amazing colors and deep reflectivity of the mirrored surfaces are amazing. NGC certainly was correct when assigning this proof its Premium Gem grade. There can be few surviving coins that match its quality and natural appeal. Census: 5 in 66, 0 finer (7/14). NGC ID# 27UC, PCGS# 6438

1886 Seated Half Dollar, PR66 Cameo
Gorgeous, Technically Impressive Specimen
Ex: Eric P. Newman Collection; Ex: "Col." E.H.R. Green

3178 **1886 PR66 Cameo NGC.** Ex: Eric P. Newman Collection. It is curious that the availability of Cameo and even high-grade proofs varies from year to year. The 1886 half dollar has a similar (but slightly lower) mintage of both proofs and circulation strikes compared to the 1885, yet it is far less available in high grades and with Cameo contrast. This high-grade proof displays much central brilliance with an off-center arc of deep russet-brown on the lower left obverse rim; elsewhere toning is only observed on the outer reaches of the coin. Sharply contrasted and fully struck. Census: 8 in 66 Cameo (1 in 66 ★ Cameo), 4 finer (7/14).
Ex: "Col." E.H.R. Green. PCGS# 86447

1891 Seated Liberty Half, PR67
Finest Certified at PCGS

3179 **1891 PR67 PCGS.** Only 600 proof Seated Liberty half dollars were struck in 1891 and this coin is one of the finest survivors. The design elements are sharply detailed throughout and the fields are brightly reflective under shades of pale gold, cerulean-blue, and lavender toning. Housed in a green label holder. Population: 1 in 67, 0 finer (8/14). NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

1894-S Half Dollar, Conditionally Rare MS65

3180 **1894-S MS65 PCGS. CAC.** The 1894-S is one of the highest mintages (exceeding 4 million pieces) of the Barber half dollar series. Many (mostly low-grade coins) were melted in the 1979-1980 silver boom (Lawrence, 1991). Mint condition specimens can be located through near-Gem with searching and some patience but Gem and higher pieces are rare.

The lustrous silver-gray surfaces of this MS65 offering display deeper hues on the reverse. The design elements are sharply defined and both sides are devoid of significant marks. Great overall eye appeal. Population: 9 in 65, 5 finer (7/14). NGC ID# 24LR, PCGS# 6470

1906-S Barber Half, MS66
Rare This Nice

3181 **1906-S MS66 PCGS.** The 1906-S Barber half is marginally available in grades through MS64, but it becomes rare in MS65, and finer pieces are exceedingly so. This Premium Gem representative displays vibrant, largely untoned luster and nearly unabraded surfaces. The eagle's right (facing) shoulder shows the typically seen weakness, but the remainder of the design elements are crisply defined. Population: 4 in 66, 5 finer (7/14). NGC ID# 24MX, PCGS# 6507

PROOF BARBER HALF DOLLARS

1893 Barber Half, PR67+
Richly Toned, High-End Proof

3182 **1893 PR67+ PCGS. CAC.** A window of brilliant gold is surrounded by glasslike reflectivity and deep shades of azure-blue, lavender, violet, and royal purple on this boldly struck Barber half proof. The toning appears to be the result of long storage with an original proof set, now separated into its component coins and encapsulated as singles. CAC confirms the high quality of this Superb Gem proof. It is the only example in PR67 to receive the important Plus designation from PCGS. Population: 13 in 67 (1 in 67+), 1 finer (7/14). NGC ID# 24NV, PCGS# 6540

1898 Half Dollar, PR66 Cameo
Spectacular Proof Colors

3183 **1898 PR66 Cameo NGC.** Deeply mirrored fields embrace the frosted motifs of this complex and vibrantly toned proof. The obverse displays rich hues from turquoise and violet to yellow-gold and lime-green, flashing in reflective bands of changing colors. The reverse is target-toned, a sun-gold center surrounded by fire-orange, violet, electric-blue, and neon-yellow shades. The strike is full, although the visual impact and vivid appeal of this glittering proof makes the bold strike seem like an afterthought. Census: 13 in 66 Cameo, 21 finer (7/14). PCGS# 86545

1902 Barber Half, PR67
Tied For Finest at PCGS

3184 **1902 PR67 PCGS. CAC.** A layer of violet-gray patina reveals amazing rose, green, and blue iridescence when held at the proper angle. From a mintage of 777 proofs, this remarkably preserved Superb Gem exhibits a razor-sharp strike and stunning eye appeal. Housed in a green label holder. Population: 6 in 67, 0 finer (7/14). NGC ID# 24P6, PCGS# 6549

1903 Barber Half, PR67 Cameo
Unsurpassed at Either Service

3185 **1903 PR67 Cameo PCGS. CAC.** The PCGS *Population Report* provides telling insight into the scarcity of Cameo representatives. While the service has graded 262 1903 Barber half proofs, it has awarded only 13 coins the Cameo designation and this Superb Gem is among the four finest (7/14). The Philadelphia Mint struck just under 2.3 million business strikes and 775 proofs for the issue. Despite the former's seemingly high mintage, it is a sleeper in the series, heightening demand for the proofs. The nearly flawless surfaces demonstrate outstanding contrast. Thick mint frost covers the devices and the jet-black fields show immense reflectivity. Overall, this is a stunning and unsurpassed example. PCGS# 86550

1908 Barber Half, PR67
545 Proofs Struck

3186 **1908 PR67 NGC.** The obverse features intermingled shades of purple, blue, and sea-green patina, while the reverse exhibits a similar pattern interrupted by a diagonal band of peach-orange and rose coloration. This pristine 1908 proof Barber half claims a mintage of 545 specimens, the fourth-lowest production figure entire series. Census: 16 in 67, 3 finer (7/14). NGC ID# 24PC, PCGS# 6555

1910 Barber Half Dollar, PR66 Cameo
Low-Mintage Date in Proof and Business-Strike

3187 **1910 PR66 Cameo PCGS. CAC.** A minuscule mintage of 551 proof Barber half dollars was produced at the Philadelphia Mint in 1910, to accompany a small business-strike mintage of 418,000 pieces. This impressive Premium Gem displays sharply detailed design elements and deeply mirrored brilliant fields that contrast boldly with the frosty devices. Population: 8 in 66 Cameo, 4 finer (7/14). PCGS# 86557

1914 Barber Half Dollar, PR66
Only 380 Pieces Struck

3188 **1914 PR66 PCGS.** From a series-low proof mintage of just 380 pieces, this delightful Premium Gem exhibits razor-sharp definition on all design elements, including the usual trouble spots like the eagle's claw and shield point. The well-preserved surfaces are blanketed in attractive shades of golden-brown toning and the fields are deeply mirrored throughout. Population: 23 in 66 (1 in 66+), 14 finer (7/14). NGC ID# 24PJ, PCGS# 6561

WALKING LIBERTY HALF DOLLARS

1917-S Obverse Half Dollar, MS64
Minimally Marked for the Issue

3189 **1917-S Obverse MS64 PCGS.** Freckles of russet gravitate to the margins of this near-Gem Obverse Mintmark Walker. Each side displays satiny luster and reveals fewer marks than ordinarily encountered. This is one of the most challenging dates in the series to locate with smooth surfaces. The design elements are well-struck. PCGS has graded 43 pieces finer (7/14). NGC ID# 24PT, PCGS# 6572

1917-S Obverse Walking Liberty Half, MS64
Lustrous, Well-Detailed Example

3190 **1917-S Obverse MS64 PCGS. CAC.** The 1917-S Walking Liberty half dollar with the Obverse mintmark is much more difficult to locate in high grade than the Reverse type. This lustrous Choice example displays well-detailed design elements, with the usual touch of softness on Liberty's hand and the eagle's leg. NGC ID# 24PT, PCGS# 6572

1917-S Half Dollar, MS65
Reverse Mintmark Variant

3191 **1917-S Reverse MS65 NGC.** In 1917, the mintmark on the half dollar was moved from the obverse field to the lower-left reverse border. The 5.5 million-coin mintage of the reverse mintmark variant dwarfed that of the obverse mintmark type (only 952,000 coins), though the two remain surprisingly similar in rarity in Gem and finer grades. This example of the reverse mintmark variant is well-preserved and richly lustrous, with a pale golden hue over each side that grows deeper toward the rims. The high points of the obverse figure show slight softness, but the overall strike quality is above-average for the issue. Census: 24 in 65, 5 finer (7/14). NGC ID# 24PU, PCGS# 6573

1919-D Walking Liberty Half, MS63
Well Preserved and Conditionally Scarce

3192 **1919-D MS63 NGC.** This is a lovely piece with smooth satin luster that illuminates clean, remarkably preserved surfaces. The high-point definition is typically soft on Liberty's head and branch hand, and on the eagle's trailing leg feathers. An untoned piece with abrasion-free surfaces that exhibit a few wispy, grade-limiting hairlines in the right obverse field; attractive for the issue and the grade.

In his 2008 reference book on the series, Jeff Ambio notes: "A leading strike and condition rarity in the Walking Liberty Half Dollar series, the 1919-D is an important find even in Extremely Fine and About Uncirculated grades. In terms of the total number of Mint State coins known, the 1919-D is the third-rarest Walking Liberty Half Dollar after the 1919-S and 1921-S." NGC ID# 24PZ, PCGS# 6578

1920-D Half Dollar, Well-Struck MS64+

3193 **1920-D MS64+ PCGS. CAC.** This 1920-D high-end near-Gem half dollar is quite close to the Gem grade, showing a partial split thumb and bold strike elsewhere on satiny silver surfaces with just an occasional hint of nearly imperceptible amber-gold in the fields. The noteworthy lack of mentionable abrasions and overall strong eye appeal make this piece well deserving of the CAC sticker. NGC ID# 24R4, PCGS# 6581

1921-D Walking Liberty Half, MS64
Important Low-Mintage Key Issue

3194 **1921-D MS64 PCGS.** This issue boasts the lowest business strike mintage in the entire series, and it is understandably scarce in all grades; but particularly so in mint condition. Only 208,000 pieces were produced, and PCGS has only rated 234 examples of this Denver Mint date in Uncirculated grades; a remarkably low number for a non-gold, non-commemorative federal issue in the 20th century. This is a lovely piece with soft, satin luster and attractive light toning. The strike definition is noticeably better-than-average for the date and mint, and full separation is evident between Liberty's right (facing) thumb and index finger. Surface marks are minimal and non-distracting. NGC ID# 24R7, PCGS# 6584

1927-S Half Dollar, MS64+
Highly Lustrous and Minimally Abraded

3195 **1927-S MS64+ PCGS. CAC.** Both sides of this high-end near-Gem are awash with highly attractive frosty luster and each is very well-preserved and nearly untoned save for an occasional wisp of light gold color, especially at the upper reverse border. Liberty's face, cap, and hair exhibit much better detail than typically seen. The eagle's breast feathers are also much better struck than usual. The branch hand and eagle's trailing leg, however, are weak, a characteristic of most 1927-S half dollars. Superior luster, smooth surfaces, and some areas of above-average strike result in pleasing overall eye appeal. NGC ID# 24RA, PCGS# 6587

1927-S Half Dollar, Vibrant MS64+
Above-Average Strike

3196 **1927-S MS64+ PCGS. CAC.** While the 1927-S has the reputation of being one of the most poorly struck issues in the entire Walking Liberty half dollar series, this high-end near-Gem exhibits better definition than typically encountered. Liberty's branch hand, while not fully struck, shows the thumb almost completely separated from the branch and forefinger. Additionally, the skirt lines are well-delineated, and the eagle's breast feathers show considerable definition. Neither side reveals significant marks and both exude vibrant luster. This piece is well-deserving of the CAC sticker. NGC ID# 24RA, PCGS# 6587

1947-D Half Dollar, Well-Struck MS67

3197 **1947-D MS67 PCGS.** The lustrous surfaces of this Superb Gem are visited by splashes of orange toning on the obverse, and the design elements are sharply struck throughout, including Liberty's head and branch hand. This is a well cared for example. Population: 22 in 67, 0 finer (7/14). NGC ID# 24SN, PCGS# 6631

FRANKLIN HALF DOLLARS

1950-D Half Dollar, MS66+ Full Bell Lines
Vibrant Luster, Attractive Toning

3198 **1950-D MS66+ Full Bell Lines PCGS.** This issue is readily available with Full Bell Lines in lower Mint State grades, but its availability with such dramatically drops at the Premium Gem grade level; PCGS has certified 70 examples in MS66, but only seven have been awarded a Plus designation, and none are finer (7/14). This piece is tied numerically with the example in the highest-rated Registry Set, and showcases intermingled cherry-red, forest-green, and olive-gold toning over the obverse, while the reverse is primarily untoned, save for a thin ring of rainbow color seen around the periphery. The strike is sharp, and the preservation is in keeping with the numeric grade. NGC ID# 24SX, PCGS# 86657

1950-D Franklin Half, MS66+ Full Bell Lines
Incredibly Bold Detail
Among the Finest Known

3199 **1950-D MS66+ Full Bell Lines PCGS. CAC.** The 1950-D had the highest mintage in the Franklin half series up to that point (more than 8 million coins), and survivors with Full Bell Lines can be readily acquired in grades through MS65. In MS66, however, such pieces are scarce, and none have been certified finer. This piece is arguably the finest certified at PCGS; it is one of only seven MS66 examples to receive a Plus designation (7/14), and the bell lines, as well as Franklin's hair, are boldly defined. Frosty, vibrant mint bloom illuminates softly blended shades of forest-green, lavender-gray, amber-gold, and cherry-red toning, with the colors more prominent on the obverse. This is a virtually flawless, high-end Registry Set candidate, which is tied numerically with the example in the highest-rated FBL Basic Set on the PCGS Set Registry. NGC ID# 24SX, PCGS# 86657

PROOF FRANKLIN HALF DOLLARS

1952 Franklin Half, PR66+ Deep Cameo
Only One Graded Finer at PCGS

3200 **1952 PR66+ Deep Cameo PCGS. CAC.** An exceptional coin without a doubt, this beautifully preserved high-end Premium Gem well deserves the Deep Cameo designation, as the contrast between the frosted devices and the mirrored fields is boldly pronounced. A tiny, faint toning spot appears in Franklin's hair below the B in LIBERTY. The 1952 proof mintage consisted of 81,980 coins, but Deep Cameo examples from this key proof date are rarely encountered. PCGS has assigned the PR66 grade to only eight such examples, this being the sole PR66 piece to receive the Plus designation, with only one finer (7/14). NGC ID# 27VC, PCGS# 96693

1953 Half Dollar, PR67 Deep Cameo
Stunning Field-Motif Contrast

3201 **1953 PR67 Deep Cameo PCGS.** Proof 1953 Franklin half dollars are readily available through Premium Gem. Cameos are a bit more difficult to locate, and Deep/Ultra Cameos are elusive. Indeed, PCGS and NGC have graded fewer than 100 examples with this finish. Stunning field-motif contrast shows on both sides of this Superb Gem Deep Cameo, each of which exhibits sharply struck design elements and is immaculately preserved. Population: 13 in 67 Deep Cameo, 0 finer (7/14). PCGS# 96694

KENNEDY HALF DOLLAR ERROR

1977-D Kennedy Half on a
40% Silver Planchet, MS63

3202 **1977-D Kennedy Half — Struck on a 40% Silver Planchet — MS63 NGC.** 11.4 gm. The edge is visible within the recent generation holder and confirms the absence of a broad copper core. This variety is mentioned in the 2015 Guide Book: "A few of the pieces dated 1971-D and 1977-D were struck in silver clad composition by error." The planchets were intended for 1976-S Bicentennial halves. Lustrous and close to brilliant, although a few dabs of tan toning are present. The strike is good at the centers and slightly soft at the margins. Refreshingly unabraded and pleasing for the designated grade. NGC ID# 24UN, PCGS# 6732

1795 Flowing Hair Dollar, VF25
B-5, BB-27, Three Leaves Beneath Wings

3203 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 PCGS.** The most frequently seen variety of the Flowing Hair design. A silver-gray example, with deeper tones in the margins of golden-gray on the obverse and blue-gray on the reverse. Nice detail for the grade, with adequate hair definition on Liberty and most wing feathers on the eagle visible. Well-centered with sharp rims and denticles on both sides. PCGS# 39977

1795 Draped Bust Dollar, XF45
Centered Bust, B-15, BB-52

3204 **1795 Draped Bust, Centered, B-15, BB-52, R.2, XF45 PCGS.** Bowers-Borckardt Die State V. The Draped Bust design was introduced part way through the year in 1795 and two die varieties are known for the date and type. This Choice XF specimen represents the BB-52 variety, with the highest wave of hair under the E in LIBERTY. Much interior detail remains intact on the drapery and hair, and the lightly abraded surfaces show pleasing shades of gold and gray toning. Some planchet adjustment marks are evident on the reverse. Population: 44 in 45, 85 finer (7/14). PCGS# 39995

1796 Draped Bust Dollar, VF35
B-5, BB-65 Large Date, Small Letters

3205 **1796 Large Date, Small Letters, B-5, BB-65, R.2, VF35 PCGS.** Bowers Die State IV. The most noticeable marks on this Choice VF early dollar are mint-related characteristics. Otherwise, the fields and devices are smooth, hard, and attractive. An interesting, parallel planchet defect splits the rim between 7 and 9 o'clock on the reverse, rather like a die crack in appearance but not a characteristic of the die. Another defect is a large lump (diagnostic for the variety) obscuring parts of IC in AMERICA. Few other marks of any kind exist on this appealing example. Original, old-silver patina covers the fields and devices, which display strong detail for the assigned grade. PCGS# 40002

1797 Draped Bust Dollar, VF25
B-3, BB-71, 10x6 Stars, Large Letters
High-End for the Grade

3206 **1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 PCGS.** Die State III, as usual. A moderately available variety, ideal for type purposes. This is an unusually attractive mid-grade example, with strong remaining detail, including complete border dentils. A pale lavender tint accents primarily steel-gray surfaces, though deeper gunmetal hues are seen in the border recesses and lighter gray shades preside over the relief elements. A lack of adjustment marks further increases the eye appeal. Housed in an old green label holder. PCGS# 40004

1797 Draped Bust Dollar, VF25
B-1, BB-73, 9x7 Stars

3207 **1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF25 NGC.** Bowers Die State II. A sixteenth star (for Tennessee, admitted into the Union in 1796) appears on all 1797 dollars, either in the 10x6 star conformation or the 9x7 alignment of obverse stars such as this coin. This variety is the Large Letters reverse, struck from the final use of the obverse die after the scarcer Small Letters variant was produced. Slight porosity is seen on the surfaces of this silver-gray example, which is well-centered and nicely detailed for the assigned grade. The fields and devices are clear of any significant abrasions, with perfect rims and denticles. PCGS# 40003

1797 Draped Bust Dollar, AU50
B-1, BB-73, 9x7 Stars, Large Letters
Beautifully Patinated

3208 **1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 AU50 PCGS.** Die State I, perfect dies. BB-73 is one of the most plentiful varieties for the year, but most representatives are in the VF to XF category. As Bowers puts it in *Silver Dollars and Trade Dollars of the United States:* "Coins realistically graded AU are rare — more so than conventional wisdom allows. True Mint State pieces are exceedingly — dare I say 'excessively'? — rare."

This representative is fully deserving of its About Uncirculated grade, and possesses incredible eye appeal, as well. Rich hues of teal, violet, and orange-gold complement pale lavender-gray patina over each side, and just a touch of high-point wear on the devices leaves clear evidence of a bold, even strike. The connoisseur will especially appreciate the sharp border dentils and the finely detailed breast feathers of the eagle. Population: 2 in 50, 9 finer (7/14). PCGS# 40003

1798 Draped Bust Dollar, VF30
Small Eagle, 13 Stars, B-1, BB-82

3209 **1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, VF30 PCGS.** Bowers-Borckardt Die State II. This coin represents the B-1, BB-82 variety, with the Small Eagle reverse combined with a 13 star obverse. The BB-82 variety is reasonably available in lower circulated grades, but Mint State specimens are virtually unobtainable. This VF30 example retains much interior design detail, but the left side of the drapery is worn smooth. The pleasing surfaces are enlivened by shades of golden-brown and lavender-gray toning. Population: 23 in 30, 95 finer (7/14). PCGS# 40006

1798 Small Eagle Dollar, XF40
13 Stars, B-1, BB-82

3210 **1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF40 PCGS.** Only two varieties of 1798 dollars featured a small eagle on the reverse, and B-1 is easily identified because it has the standard number (13) of stars on the obverse. (The other variant has 15 stars on the obverse.) Gunmetal-gray patina envelops the obverse, which contrasts nicely against the light gray reverse. Both sides are remarkably smooth and a careful inspection reveals only trivial marks. This attractive piece would make a wonderful type coin. *Ex: Long Beach Signature (Heritage, 9/2008), lot 2385.* PCGS# 40006

1799/8 Draped Bust Dollar, XF45
Guide Book 13 Star Reverse, B-1, BB-142

3211 **1799/8 13 Stars Reverse XF45 NGC. B-1, BB-142, R.4.** Bowers Borckardt Die State II. Of the three popular overdate varieties for the date, the scarce BB-142 is the second rarest, and always in demand from series specialists. This attractive Choice XF specimen retains most of the original design detail in Liberty's hair and drapery and the lightly marked surfaces are pleasingly toned in shades of greenish-gold and dove-gray, with hints of original mint luster. A few planchet adjustment marks are evident on the central obverse. Census: 31 in 45, 78 finer (8/14). NGC ID# 24X8, PCGS# 6883

1799 Draped Bust Dollar, AU50
B-17, BB-164
Sharp Hair and Drapery

3212 **1799 7x6 Stars, B-17, BB-164, R.2, AU50 ANACS.** Bowers Die State III. A well-produced early dollar, with strong details on Liberty's hair strands and sharp folds on the bust drapery. The eagle offers bold feather definition on the breast, tail, and wings. Gunmetal-gray tones show just a hint of underlying mint luster. Well-centered with especially strong dentils on the reverse. The coin is nearly abrasion-free, with a slight rim indentation between stars 11 and 12 the only mentionable mark. Known for the largest berries on any 1799 dollar; this variety is virtually unavailable in Mint State. PCGS# 40055

1803 Small 3 Dollar, XF45
B-4, BB-254, Beautifully Toned

3213 **1803 Small 3, B-4, BB-254, R.3, XF45 NGC.** Attractive purple- and steel-gray patina dominates both sides of this Choice Extremely Fine representative. As usual, the strike is sharp throughout, notably on the stars, Liberty's hair curls, and the olive leaves, with light friction confined to the high points. Partial luster remains within the design recesses, and well-hidden marks do not detract from this early dollar's strong eye appeal. Census: 3 in 45, 6 finer (7/14). PCGS# 40099

1803 Small 3 Dollar, AU53
B-4, BB-254, Partly Lustrous

3214 **1803 Small 3, B-4, BB-254, R.3, AU53 NGC.** Unlike the common Large 3 variety, 1803 Small 3 variants are scarce. Delicate honey toning colors this otherwise brilliant Draped Bust dollar. The strike is good aside from softness on the bust tip and opposite on the right-side reverse stars. The obverse has a few faded marks, but this partly lustrous example exhibits pleasing eye appeal.
Ex: Central States Signature (Heritage, 4/2010), lot 1020. PCGS# 40099

GOBRECHT DOLLARS

1836 Gobrecht Dollar, AU Details
Judd-60, Die Alignment I

3215 **1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 — Tooled — PCGS Genuine. AU Details.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite the D in DOLLAR). No diagonal die clash mark is apparent above the eagle's wing, indicating this is a dollar from the first batch of 400 pieces struck the final week in December. The tooling mentioned is ever-so-slight, almost imperceptible, and appears limited to a very slight out-of-plane appearance in the left obverse field. Otherwise, the surfaces are brilliant and the strike is strong with just the slightest friction over the high points. The fields are peppered with numerous small, but individually insignificant abrasions. PCGS# 11225

1836 Gobrecht Dollar, Toned PR61
Judd-60, Die Alignment II

3216 **1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5, PR61 NGC.** Silver. Reeded Edge. Die Alignment II (center of Liberty's head opposite ES in STATES). These pieces are now believed to have been struck in the last week in December, 1836. It is also now believed that the variation between Die Alignment II and IV was caused by problems with the feeder fingers, causing the dies to be removed and replaced numerous times in varying positions during the production run. Only 600 pieces are believed to have been struck of these later die alignment dollars. The diagnostic die clash mark above the eagle's wing is extremely faint on this piece, and would be easy to overlook as it tends to blend in with other smaller abrasions scattered over each side. As expected, the fields are only moderately reflective and are further subdued by significant gray, blue, and rose-colored toning. A couple of tiny digs in the upper-left obverse field are the only mentionable surface defects. PCGS# 11227

SEATED DOLLARS

1840 Seated Dollar, MS62
Popular First-Year Issue

3217 **1840 MS62 PCGS.** When silver dollar production was resumed in 1840, the original purpose was to alleviate the massive quantities of half dollars that were being coined largely as backing for the various paper notes then being issued by banks and other private entities. Still, actual production hinged almost solely on requests for the coins from silver depositors which, in 1840, amounted to only 61,005 pieces by the end of the year. Of these, most underwent extensive circulation to the point that today, Mint State survivors are seldom seen, and are truly rare any finer than MS62. The example here-offered is boldly struck, with semiprooflike fields and minimal abrasions for the grade. The luster is nearly brilliant, though traces of light golden color are seen upon close examination. Population: 14 in 62, 13 finer (7/14). NGC ID# 24YA, PCGS# 6926

1843 Seated Dollar, MS63
Elusive in Mint State

3218 **1843 MS63 PCGS Secure.** The 1843 Seated dollar is one of the more plentiful No Motto issues in circulated grades, but in Mint State is nonetheless scarce. This originally toned Select example shows deep lavender-gray and gunmetal hues throughout the centers, with lighter olive-gold color around the peripheries. The strike is well-executed, and a degree of prooflike mirroring remains in the fields. Population: 15 in 63, 5 finer (7/14). NGC ID# 24YD, PCGS# 6929

1848 Dollar, MS61
A Low-Mintage Issue
Scarce in All Grades

3219 **1848 MS61 PCGS.** From a low production of 15,000 pieces, the 1848 dollar is scarce in all grades. Mint condition coins are particularly few and far between. Indeed, PCGS and NGC have graded only 34 Uncirculated specimens, primarily in MS62 and lower. This example is generally well-struck, save for a few of the obverse stars. Some grade-consistent abrasions are scattered across each side. The surfaces are largely untoned with moderate mirroring in the fields. Population: 5 in 61, 18 finer (7/14). NGC ID# 24YK, PCGS# 6935

1852 Seated Dollar, AU Details
Low-Mintage Rarity at All Grade Levels

3220 **1852 — Tooled — PCGS Genuine. AU Details.** This issue had a tiny mintage of 1,100 business strikes, which sounds much more like a typical proof mintage figure for the era. Apparently the high price of silver, combined with the public's preference for gold dollars in circulation, conspired to produce this nearly microscopic production number. As a result, this issue is a significant rarity at any grade level.

This example is boldly struck overall, if not completely defined on Liberty's head and nearby stars. High-point wear seems minimal on both sides, and the brownish-gray surfaces retain a surprisingly high degree of detail for the AU Details net grade. Some sort of tooling process (whizzing perhaps?) appears to have been applied to the upper right quadrant of the reverse, probably as a means to remove or minimize the abrasions that are present there in the field.

A significant opportunity presents itself, with this offering, for the specialist in this challenging series to acquire a famous rarity for an affordable price. NGC ID# 24YR, PCGS# 6940

1856 Seated Dollar, MS62
Rare in Mint State

3221 **1856 MS62 PCGS.** The 1856 Seated dollar is a seldom seen issue (only 63,500 pieces were struck), and Mint State representatives are decidedly rare. This piece shows satiny luster beneath golden-gray patina on each side, with unusually few abrasions for the grade. The central devices show moderate weakness, particularly on the upper portion of liberty and the surrounding stars and on the eagle's left (facing) leg; an interesting characteristic, not uncommon for the issue, and likely contributing to the lower grade assessment. Population: 7 in 62, 9 finer (7/14). NGC ID# 24YV, PCGS# 6944

1857 Seated Dollar, MS64 ★
Scarcer Philadelphia Issue

3222 **1857 MS64 ★ NGC.** Ex: La Jolla Collection. The 1857 Seated dollar is much scarcer than its mintage of 94,000 pieces suggests, as most examples were exported for trade in the Orient, where they were eventually melted. Vivid electric-blue, royal-purple, and golden-orange toning gravitates to the margins of this near-Gem example, leaving the central areas blanketed in light golden color. The design elements are sharply struck, save for the usual softness in the hair on Liberty's head and the stars at the upper-right border, and the fields display ample prooflike mirroring. A few light marks deny a higher numerical grade, but the Star designation confirms the lovely eye appeal. Census: 16 in 64 (1 in 64 ★), 2 finer (7/14). *Ex: FUN Signature (Heritage, 7/2009), lot 773.* NGC ID# 24YW, PCGS# 6945

1869 Seated Liberty Dollar, MS62
Heavily Exported Issue

3223 **1869 MS62 PCGS. CAC.** From a substantial mintage of 423,700 pieces, the 1869 Seated Liberty dollar was widely exported in the China trade and few high-quality specimens were saved by contemporary collectors. This attractive MS62 example is well-detailed and lightly marked, with vivid shades of greenish-gold and cerulean-blue toning at the peripheries. Population: 13 in 62, 20 finer (7/14). NGC ID# 24ZC, PCGS# 6962

1869 Seated Dollar, MS63
Scarcer Philadelphia Issue

3224 **1869 MS63 PCGS.** This date is seldom encountered in any Mint State grade, and business strikes in general are far scarcer than are survivors from the recorded proof mintage of 600 pieces. This example shows a bold strike on both sides, with gray-gold surfaces that show a bit of field haze, slightly diminishing the luster. A small bit of struck-in grease, as made, is noted on the lower reverse. Nonetheless, this is an attractive and rare coin. Population: 10 in 63, 10 finer (7/14).
Ex: Long Beach Signature (Heritage, 5/2007), 1358; ANA Signature (Heritage, 8/2007), lot 968. NGC ID# 24ZC, PCGS# 6962

1872-CC Dollar, Fine 15
Only 3,150 Coins Struck

3225 **1872-CC Fine 15 NGC.** The Carson City Mint produced a meager 3,150 Seated dollars in 1872, of which 400 coins are estimated to survive. The majority only entered into circulation after 1873, when their intrinsic value fell below face value. This well-worn piece shows uniform light-gray patina over each side. Some interior detail remains and LIBERTY is partially visible. A small scratch is noted between stars 3 and 4. NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, XF40
Attractive, Low-Mintage Issue

3226 **1872-CC XF40 PCGS.** As with other coins from this issue, the reverse shows a sharp strike with minor softness over the obverse. Although this piece is lightly circulated, most design elements remain clearly detailed, and just a few marks appear over the minimally abraded surfaces. From a mintage of only 3,150 coins, the issue boasts one of the lowest production totals in the entire series, which when paired with the CC mintmark makes it a perennial favorite among collectors. Housed in a green label holder. NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, XF40
Deep Original Patina

3227 **1872-CC XF40 PCGS.** Silver dollar production at the Carson City Mint got off to a slow start in 1870, when only 11,758 pieces were struck, but that total would prove to be the highest mintage of the series from that mint. Production two years later, in 1872, achieved a paltry 3,150 coins, likely due to a lack of demand from depositors, and surviving examples are elusive in all grades. This XF example is highly pleasing for the grade, exhibiting original teal and gold hues beneath thick gunmetal-gray patina. The strike is bold and wear is minimal. As most extant examples are cleaned or otherwise impaired, this piece represents a rare opportunity for the Seated dollar or Carson City specialist. Population: 24 in 40, 67 finer (7/14). NGC ID# 24ZK, PCGS# 6969

1872-CC Dollar, AU Details
Scarce Carson City Issue

3228 **1872-CC — Improperly Cleaned — NGC Details. AU.** Although the 1873-CC and 1871-CC issues are rarer, this date remains widely sought-after because of its mintage of only 3,150 coins. A layer of dusky gray patina covers each side, and golden-brown accents appear in the protected regions. The design elements are typically sharp with just a touch of friction over the high points.

1872-CC Dollar, MS61
Rare in Mint State

3229 **1872-CC MS61 NGC.** The fate of the 3,150 Seated dollars coined at Carson City in 1872 has been the subject of much debate, and researchers have put forth several theories. One thought is that the branch mint melted the majority of the issue in 1873. This seems illogical given that if coins were ordered, they presumably had a destination. Other thoughts abound, including the coins' release into circulation, their sale to bullion dealers, merchants, and banks, or their export to China. Unfortunately, the destruction of Mint records makes a definitive answer an impossibility.

This Uncirculated piece is fully brilliant and lustrous with an almost prooflike appearance. Apart from minor softness on Liberty's head, the devices appear sharply detailed. Abrasions are lightly scattered over each side consistent with the grade. Census: 5 in 61, 7 finer (7/14). NGC ID# 24ZK, PCGS# 6969

1873-CC Seated Dollar, VF Details
Key Low-Mintage Carson City Issue

3230 **1873-CC — Holed and Plugged — PCGS Genuine. VF Details.** Considered the rarest Seated dollar from the Carson City Mint, the 1873-CC has a low mintage coupled with a low survival rate. It is likely that many of the 2,300 pieces struck were later melted to provide silver bullion for the new Trade dollars.

The present coin is an attractive VF Details example, with all letters in LIBERTY evident save for the lower half of B. A great deal of detail remains visible on the major design motifs. The steel-gray surfaces are lightly abraded and suffer minimally in their overall appearance from the effects of having been holed and plugged at some time in the past. Otherwise, a pleasing coin with smooth surfaces that should have no trouble finding a new owner. NGC ID# 24ZN, PCGS# 6972

PROOF SEATED DOLLARS

1858 Seated Dollar, PR58
Richly Toned Example

3231 **1858 PR58 PCGS.** This is a pleasing lower-grade example of the first widely distributed proof Seated dollar issue. A brush of friction over the relief elements, likely caused by brief admittance into circulation, gives the central devices a near-cameo appearance against the deeply toned fields which show hues of sea-green, blue, and lavender-gold. The proof mirroring is slightly diminished, but the boldness of the devices and the broad rims are undeniably the result of a second impression from the dies. NGC ID# 252C, PCGS# 7001

1861 Seated Dollar, PR63+ Cameo
Impressive and Visually Appealing

3232 **1861 PR63+ Cameo PCGS.** Stark field-to-device contrast and razor-sharp strike definition are evident on both sides of this high-end Select proof specimen. Minute contact marks reside near obverse stars 4 and 7, and wispy hairlines are noted in the fields on each side, limiting the grade but not the eye appeal of this pleasing example. This issue had a high mintage of 1,000 pieces, but fewer than half of that number are believed to have been released from the Mint. The rest were eventually melted as unsold. Population: 7 in 63 (1 in 63+) Cameo, 17 finer (7/14). PCGS# 87004

1862 Seated Dollar, PR65 Ultra Cameo
The Only NGC Ultra Cameo Proof

3233 **1862 PR65 Ultra Cameo NGC.** Ex: Simpson. The 1862 proof Seated dollar mintage is recorded as 550 coins, some of which went unsold until the 1870s. The business strikes, produced to the extent of only 11,540 coins, are extremely rare in Mint State, exerting added pressure on high-grade proofs. On this Gem Ultra Cameo proof, a faint layer of gray patina has settled over the fields, but the profound contrast remains undimmed. The central devices are exactingly struck and heavily frosted, while the mirrored fields offer a signature gleam. A handful of tiny contact marks, some in the upper reverse field, mingle with shallow planchet flaws. This is the only Ultra Cameo of the issue certified at NGC in any grade (7/14). *From The Pannonia Collection.* PCGS# 97005

1870 Seated Dollar, PR66
One of the Finest Known

3234 **1870 PR66 NGC. CAC.** The 1870 is a deceptive issue among With Motto Seated dollars. Although it has a mintage of 1,000 proofs, it is nowhere near as available as one might believe, lagging far behind other dates such as the 1867, which had a mintage of only 625 pieces. This leads one to speculate whether a number of proofs might have been melted as unsold at year's end. This is a sparkling, deeply mirrored Premium Gem proof. The devices show a significant amount of mint frost and subsequent mild cameo contrast evident, even through the light golden-rose toning covering each side. No obvious or distracting contact marks appear on either side, but the holder shows numerous ticks and scrapes. Census: 11 in 66, 0 finer (7/14).
Ex: Central States Signature (Heritage, 5/2004), lot 8070. NGC ID# 252S, PCGS# 7018

1871 Seated Dollar, PR66 Cameo
Excellent Type Set Acquisition

3235 **1871 PR66 Cameo PCGS. CAC.** Deeply frosted grayish-gold devices on each side contrast well against the reflective fields, offering primarily pinkish-gold coloration with accents of ice-blue closer to the rims. A total of 960 proofs were reportedly struck this year, but this piece is definitely among the upper echelons of survivors, both in terms of preservation and contrast. A loupe reveals no mentionable marks among the light patina, and the strike is full, or essentially so, throughout both sides. This Cameo Premium Gem is one of only three such at PCGS, and none are finer (7/14). An excellent candidate for a fine type set. PCGS# 87019

1873 Seated Liberty Dollar, PR64+
Low-Mintage, Heavily Melted Issue

3236 **1873 PR64+ PCGS.** The 1873 proof Seated Liberty dollar claims a small mintage of 600 pieces, but Walter Breen believed many of these coins were melted in July of 1873. This high-end Choice example offers sharply detailed design elements and deeply reflective fields, under dappled shades of cerulean-blue and apple-green toning. No mentionable distractions are evident and eye appeal is quite strong. Population: 36 in 64 (1 in 64+), 15 finer (8/14). NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

1873-S Trade Dollar
Brilliant, Frosted Gem Example
Almost Never Seen Finer

3237 **1873-S MS65 NGC.** In general, numismatists and collectors in the United States had little interest in Trade dollars and, in particular, no interest at all in mintmarks when the initial mintages of Trade dollars commenced at the San Francisco Mint. Virtually all coins were exported, where they were subsequently melted either in China or in India. Of the few examples that returned to the States, many were chopmarked and virtually all were circulated to one extent or another.

As a result, both the 1873-S and 1874-S Trade dollars are extreme rarities in Mint State, especially in Gem or finer grades. Just two examples of the 1873-S issue — one at PCGS, one at NGC — are certified numerically finer than this brilliant, frosted Gem, which joins five other coins at the MS65 level at both services combined (7/14). The present coin is displays bold cartwheel luster with a mere powdering of silver-gray patina. A full strike adds to the appeal. NGC ID# 252Y, PCGS# 7033

1874-CC Trade Dollar, MS62
Scarce Carson City Issue

3238 **1874-CC MS62 PCGS. CAC.** Micro CC. Period after FINE. The bulk of the 1.37 million coin-mintage was shipped to China, and among those that remained domestically, few were saved because of low collector interest in mintmarks. Thus, the issue is scarce in lower Uncirculated grades. Light golden-gray patina embraces each side of this well-struck Carson City Trade dollar. The surfaces feature cartwheel luster and minimal marks, with a distinctly prooflike reverse. Population: 42 in 62, 64 finer (7/14). NGC ID# 2532, PCGS# 7035

PROOF TRADE DOLLARS

1879 Trade Dollar, PR65
Well-Preserved, Proof-Only Coin

3239 **1879 PR65 PCGS.** Although the proof 1879 Trade dollars were simply a specialty coin struck for collectors, the sales were fueled by rumors of future rarity. An ambitious 1,541 pieces were struck and sold; today, at least two-thirds of that number survive. Gem coins are scarce, however, and those with natural surfaces remain popular with collectors. This example has original appeal and deep-mirrored fields, with blue, purple, and orange-gold patina covering both sides. Boldly struck motifs add to the strong appeal. Population: 37 in 65, 25 finer (7/14). NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, Bold PR65
Rich Multicolor Toning

3240 **1879 PR65 PCGS Secure.** Type Two Obverse and Reverse. This is a highly attractive Gem example of this proof-only Trade dollar issue. Beautifully blended shades of ocean-blue, lavender, and green-gold color melt into the profoundly deep mirroring of the fields, while the design elements are needle-sharp throughout. Any grade-limiting hairlines are well-hidden by the rich patina, and the visual appeal is simple outstanding. Population: 37 in 65, 25 finer (7/14). NGC ID# 27YR, PCGS# 7059

1880 Trade Dollar, PR68 Ultra Cameo
The Single-Finest Coin Certified

3241 **1880 PR68 Ultra Cameo NGC.** This is a magnificent specimen, as close to perfection as is imaginable for a coin of this vintage. The strike is razor-sharp, even on the eagle's claws and Liberty's hair. All legends and devices are thickly frosted throughout. Dramatic contrast between the motifs and the darkly mirrored fields confirms the elusive Ultra Cameo designation. The fields are as smooth as if the piece were lifted from the dies with a gloved hand and never handled since. The only visible barrier to perfection is some near-imperceptible horizontal ticks near the base of 80 in the date that will serve as pedigree identifiers. From a proof-only mintage of 1,987 specimens, this outstanding piece is the single finest certified by either NGC or PCGS (7/14).
Ex: Dallas Signature (Heritage 11/2006), lot 1152; Long Beach Signature (Heritage, 5/2009), lot 986.
From The Pannonia Collection. PCGS# 97060

1881 Trade Dollar, PR66
Fully Struck and Lavishly Toned

3242 **1881 PR66 PCGS. CAC.** Type Two Obverse and Reverse. Just 960 coins were struck in this late proof-only date in the Trade dollar series. "Often lightly struck with flat head and stars," according to the Third Edition of *A Buyer's Guide to Silver Dollars & Trade Dollars of the United States*.

This is an exceptional specimen with full strike definition and lavish, deep original toning across the clean, contact-free surfaces. Dramatic hues of mint-green, jade-green, and apple-green adorn the high points, while the glassy fields exhibit deep mirrors and dark lavender coloration. Population: 9 in 66 (1 in 66+), 2 finer (7/14). NGC ID# 27YT, PCGS# 7061

1882 Trade Dollar, PR66 Ultra Cameo
Popular Proof-Only Issue

3243 **1882 PR66 Ultra Cameo NGC.** From a proof-only mintage of 1,097 pieces, the 1882 Trade dollar is reasonably available today in the context of the series. However, coins at the PR66 Ultra Cameo level are decidedly rare and NGC has certified only five numerically finer examples (7/14). The issue was quite popular with contemporary collectors, who frequently purchased more than one specimen from the Mint. A case in point was collector James B. Wilson. When dealer Thomas Elder sold his collection in October 1908, lots 215, 216, and 217 were all 1882 proof Trade dollars. Wilson's collection also included three examples of the 1881 and 1883 proof Trade dollars, so his pattern seems consistent.

The present coin is a phenomenal specimen, with brilliant, untoned surfaces. The dramatic black-on-white contrast between the deeply mirrored fields and frosty, lustrous devices is truly spectacular. Overall eye appeal is stunning. Census: 11 in 66 Ultra Cameo (2 in 66+ Ultra Cameo, 2 in 66 ★ Ultra Cameo), 5 finer (7/14).
From The Pannonia Collection. PCGS# 97062

1883 Trade Dollar, PR64 Deep Cameo
Amazing Black and White Contrast

3244 **1883 PR64 Deep Cameo PCGS. CAC.** The 1883 Trade dollar is a famous proof-only issue with a mintage of 979 specimens. Aside from the clandestine and essentially unobtainable 1884 and 1885 issues, it also represents the final date in the Trade dollar series. This near-Gem Deep Cameo representative is remarkably contrasted and possesses outstanding visual appeal. Fully struck, as expected, with a handful of wispy marks scattered over each side. Population: 3 in 64 Deep Cameo, 1 finer (7/14). PCGS# 97063

MORGAN DOLLARS

1878 'Triple Blossoms' Dollar, AU58
Rare and Popular VAM-44 Variety

3245 **1878 7/8TF Triple Blossoms, VAM-44, AU58 PCGS. CAC.** A Top 100 Variety. A tremendously popular variety, with the obverse die tripled and the reverse doubled. The leaves and cotton balls are pick up points for the obverse tripling, while the reverse doubling is most apparent on the eagle's legs. The "Weak" tailfeathers designation was awarded because only the tips of three feathers show beneath the primary seven-feathers motif. This variety has been called the "King of VAMs" and collectors prize examples in all grades and conditions. VAMWorld estimates only about 70 specimens survive in all grades.

The present coin is an attractive near-Mint example with the tripled blossoms easily visible and just a trace of wear on the other devices. The lightly abraded surfaces show prooflike reflectivity in most areas, with a scattering of minor hairlines and contact marks that explain the grade. Population: 8 in 58, 6 finer (7/14). PCGS# 133829

1878 7TF Morgan Dollar, MS66+
Reverse of 1878, Tied for Finest at PCGS

3246 **1878 7TF Reverse of 1878 MS66+ PCGS. CAC.** The seven tailfeathers 1878 Morgan with the Reverse of 1878 is an available issue all the way through MS65, but the situation suddenly changes at the Premium Gem grade level; PCGS has certified only 52 pieces in MS66, and this is one of just four to receive the Plus designation, with none numerically finer (7/14). Vibrant, frosty mint luster illuminates beautifully preserved, essentially untoned surfaces, while a sharp strike further heightens the visual appeal. NGC ID# 253K, PCGS# 7074

1878-CC Morgan, MS66
Frosty With Exceptional Eye Appeal

3247 **1878-CC MS66 NGC.** The 1878-CC is highly popular as the first Morgan dollar struck at the Carson City Mint, but its scarcity at the upper end of the Mint State grade scale is the chief factor that drives the strong collector demand Premium Gem and finer representatives. This boldly struck, frost-white representative showcases vibrant cartwheel luster, while the surfaces are essentially void of defects, save for a few faint, grade-defining disturbances on the obverse. NGC has encapsulated only nine numerically finer examples (7/14). NGC ID# 253M, PCGS# 7080

1879-CC Dollar, MS62
Frosty, Brilliant Carson City Example

3248 **1879-CC MS62 PCGS.** Normal Mintmark. A marvelously frosty, snow-white example with a somewhat scuffy obverse that limits the grade. Well-struck with a nearly mark-free reverse. This Carson City issue if the first one that becomes fairly expensive, especially in finer Mint State grades. It is the second-rarest date from the Carson City Mint, after the key 1889-CC issue. NGC ID# 253T, PCGS# 7086

1879-CC Dollar, Delicately Toned MS62

3249 **1879-CC MS62 PCGS.** Normal Mintmark. The 1879-CC claims a mintage of 756,000 pieces. This MS62 specimen is fairly well-struck, with partial detail showing on the hair over Liberty's ear and the eagle's breast feathers. Delicate aqua-green and reddish-gold patina makes occasional visits to both sides, being slightly more extensive and deeper on the obverse. A few light marks are scattered about, especially on Liberty's cheek. NGC ID# 253T, PCGS# 7086

1879-CC Morgan, MS63 Perfect Mintmark

3250 **1879-CC MS63 PCGS.** Perfect Mintmark, Large CC. Comstock depositors found it more profitable to ship their yields to the San Francisco branch mint, minimizing Carson City output in 1879. From a mintage of only 756,000 coins, this Select example offers brilliant, semiprooflike surfaces, particularly on the obverse. The devices are thickly frosted and sharply struck with only three small ticks on the eagle's breast that merit mention. NGC ID# 253T, PCGS# 7086

1879-CC Dollar, MS64 Conditionally Scarce

3251 **1879-CC MS64 NGC. CAC.** Pale champagne and golden-tan accents appear at the edges of this key Carson City dollar. A few trivial abrasions occur on the cheek and neck, and in the the obverse fields. The luster is bright and frosted. The reverse is well-preserved, and only shows a handful of minor flaws. A boldly detailed example of this important, highly popular issue. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, Radiant MS65 Exceedingly Rare Numerically Finer

3252 **1879-CC MS65 PCGS.** Normal Mintmark. The present Gem example of this issue is the finest quality practically obtainable, as PCGS has certified only two coins numerically finer (both MS66), while NGC has also certified only two such pieces, also both in MS66 (7/14). Legions of Morgan dollar collectors have this coin at the top of their want lists—perhaps even more so than the much-pricier 1889-CC. The Normal Mintmark variety is about twice as common as the "Capped Die" or Large CC Over Small CC variety, but the price differential is small in most grades, and many collectors prefer one or the other for personal reasons.

The present untoned silver Gem offers beaming luster over surfaces that show considerable prooflike qualities, even if insufficient for a PCGS designation. The eye appeal, however, is more than sufficient, with a bold strike, few signs of contact, and a clean cheek on Liberty. A few flecks of grayish toning in the obverse left field and on the reverse above the eagle help pedigree the piece but are not distracting.

Ex: Central States Signature (Heritage, 4/2009), lot 2615. From The Pannonia Collection. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, MS64 Prooflike
None Certified Finer in Prooflike
VAM-3 Capped Die

3253 **1879-CC Capped Die MS64 Prooflike PCGS. CAC. VAM-3.** A Top 100 Variety. Reverse of 1879. Nicely contrasted and medium-mirrored, this brilliant, silver-white dollar is rare in Prooflike with the "Capped Die" overmintmark. Liberty's frosted cheek shows no serious abrasions and the fields are only lightly abraded in this near-Gem grade. The bold strike yields a touch of detail above Liberty's ear, but elsewhere the motifs are sharp and frosted.

This rare date ranks behind only the 1889-CC issue in terms of Carson City rarity. Its scarcity increases considerably with prooflike fields on both sides. Neither PCGS nor NGC has graded an example higher with the prooflike designation. PCGS population: 25 in 64 Prooflike, 0 finer (7/14).
From The Pannonia Collection. NGC ID# 253T, PCGS# 7089

1879-CC Silver Dollar, MS64
VAM-3, Capped Die Variant
Large CC Over Small CC

3254 **1879-CC Capped Die, VAM-3, MS64 PCGS. CAC.** A Top 100 Variety. Although the collecting community generally prefers overmintmarks to perfect mintmarks, this issue the exception that proves the rule. In absolute numbers, the perfect mintmark is less common than the capped-die, overmintmark variety, and many collectors prefer an example of each type. This near-gem has a visible "Large CC over Small CC," with the accustomed granularity surrounding the die work. Amber-gold and blue accents appear along the rims and central devices of this otherwise brilliant, frosty example. This coin is CAC-approved for quality and appeal. Just 12 pieces are certified numerically finer at PCGS. PCGS# 133869

1880-CC Morgan, MS66
VAM-7A, 8/7 Reverse of 1878

3255 **1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 PCGS.** A Hit List 40 Variety. The remnant of an underlying 7 is seen in the form of a small dash in the field below the second 8 in the date. Clash marks in the field near Liberty's throat identify the VAM-7A variety, a late die state of VAM-7. This piece shows radiant, frosty mint luster and beautifully preserved surfaces. The strike is sharp and the coin is essentially brilliant, providing for excellent visual appeal. Population of all 8/7 Reverse of 1878 varieties: 37 in 66 (6 in 66+), 2 finer (7/14). PCGS# 134049

1880-CC Silver Dollar, MS66+
Golden-Toned, High-End Example
Reverse of 1879

3256 **1880-CC MS66+ PCGS. CAC.** The round-breast eagle and slanted-top arrow feather identify the 1879 reverse of this high-end Premium Gem dollar. Strong mint luster shines beneath gold and lilac hues across the obverse, with a crescent of similar tones on the reverse. A single small abrasion beneath the T in UNITED is the only mentionable mark visible anywhere on this attractive coin. As usual, remnants of an underdigit 7 are seen beneath the second 8 of the date. Just 30 pieces are certified numerically finer by PCGS (7/14). NGC ID# 2542, PCGS# 7100

1880-O VAM-48 Silver Dollar, MS65
'Hangnail' Top 100 Variety
Finest Certified

3257 **1880-O Hangnail, VAM-48, MS65 PCGS.** A Top 100 Variety. The variety is rare in high grades — in fact, this is the only Gem example listed by the variety according to both PCGS and NGC. Additional examples may exist that have not been identified by VAM number, although the 1880-O date is rare in Gem or finer grades regardless of variety, with fewer than 60 pieces certified by both services combined (7/14).

The "Hangnail" refers to a bold die gouge on the reverse, which pierces the left tailfeather. This high-grade example is a Gem in every sense of the word, with a bold strike and strong cartwheel luster across its untoned, silver surfaces. Liberty's cheek is clean. Only a few tiny abrasions are widely scattered and do not distract from the brilliant-white appeal of this rare dollar. PCGS# 133879

1880-S Dollar, MS68 Prooflike
Pronounced Field-Device Contrast

3258 **1880-S MS68 Prooflike NGC.** At first glance, this magnificent Morgan dollar resembles a proof Cameo, so pronounced is the contrast between the prooflike fields and the frosty-white motifs. The design elements are well-struck, including the hair over Liberty's ear and the eagle's breast feathers. An immaculately preserved coin that exudes breathtaking eye appeal. This piece may well have claims to Deep Prooflike status. Census: 9 in 68 (1 in 68 ★) Prooflike, 0 finer (7/14). NGC ID# 2544, PCGS# 7119

1881-CC Morgan Dollar, MS68
Excellent Registry Set Candidate

3259 **1881-CC MS68 PCGS.** Vibrant and inviting luster is the most immediately appreciable attribute of this outstanding Carson City Superb Gem, though by no means is it the only one. Ample frostiness is present at the centers of the silver-white devices, while the margins show occasional cloud-gray and peach elements. The 1881-CC Morgan dollar was well-represented in mid-20th century government holdings and survivors are readily available in most Mint State grades, though at the MS68 level, this does not hold true. PCGS has graded just four such examples and none finer (7/14). *Ex: Central States Signature (Heritage, 4/2009), lot 2618. From The Pannonia Collection.* NGC ID# 2547, PCGS# 7126

1881-O Morgan Dollar, MS66
None Numerically Finer at PCGS

3260 **1881-O MS66 PCGS.** The 1881-O Morgan dollar claims a substantial mintage of just over 5.7 million pieces and the issue is easily located in AU grades, but high-quality specimens with a sharp strike and vibrant mint luster are elusive. The present coin is one of the finest known survivors, with razor-sharp definition on all design elements, including the usual trouble spots like the hair above the ear and eagle's breast. The well-preserved surfaces are brightly lustrous, with a few hints of champagne-gold toning and outstanding eye appeal. This delightful Premium Gem should find a home in the finest collection or Registry Set. Population: 26 in 66 (2 in 66+), 0 finer (8/14). NGC ID# 2548, PCGS# 7128

1881-O Morgan, MS65 Deep Mirror Prooflike
Outstanding Visual Appeal

3261 **1881-O MS65 Deep Mirror Prooflike PCGS.** The 1881-O Morgan is a fairly plentiful issue in most Mint State grades due in part to the distribution of notable quantities in the Treasury releases of the 1960s. Of these, Deep Mirror Prooflike examples form a distinct minority, but can be found in MS63 and MS64 condition with patient searching. At the MS65 Deep Mirror Prooflike level, however, the issue's characteristically bagmark-plagued surfaces begin to affect the surviving population; PCGS has seen only 15 coins in this grade, and none finer (7/14). The coin here-offered is essentially brilliant, with pleasing cameo contrast and vibrant luster. A few minute ticks in the obverse fields and on Liberty's cheek limit the grade, but the strike is unusually sharp for an O-mint issue of the period. NGC ID# 2548, PCGS# 97129

1883-CC Morgan Dollar, MS66 Deep Mirror Prooflike
Attractive, Beautifully Contrasted Example

3262 **1883-CC MS66 Deep Mirror Prooflike PCGS. CAC.** An uncommonly attractive representative of this otherwise easily obtainable CC-mint issue, this coin displays a beautifully contrasted sheen that highlights the sharply defined features. The devices are thickly frosted, the fields are smooth and glassy. Light golden and champagne rim accents are noted on both sides; the centers are brilliant.
Ex: *Long Beach Signature (Heritage, 6/2001), lot 6438.* NGC ID# 254H, PCGS# 97145

1883-S Morgan, MS64
Seldom Seen Finer

3263 **1883-S MS64 PCGS.** Moderately available in lower grades, the 1883-S Morgan suddenly becomes rare at the Gem grade level, where PCGS has encapsulated only 18 pieces (7/14). This well-struck near-Gem example is void of any major abrasions, and displays strong luster beneath hues lavender-gray and aquamarine toning on each side. NGC ID# 254K, PCGS# 7148

1884-S Morgan, MS61
Mint State Rarity

3264 **1884-S MS61 NGC.** A "coin boom" rarity, emerging from the 1930s with new-found attention from numismatists, who had previously ignored the seldom-seen appearances of the date in Mint State. This example displays rustic, somewhat speckled tones of forest-green, almond-gold, and umber shades over both semiprooflike sides of the coin. A bold strike complements nice remaining luster. Many examples of this key date are somewhat dull in lower Mint State grades, but not this coin. It provides plenty of character and life. NGC ID# 254P, PCGS# 7156

1886-S Morgan Dollar, MS66
Sought-After VAM-2 Doubled Mintmark

3265 **1886-S MS66 PCGS. CAC. VAM-2.** A Top 100 Variety. This completely brilliant and frosty Premium Gem has a bold strike with only three or four hair strands over the ear merged together. The mintmark is slightly doubled. The surfaces are pristine with none of the usually seen abrasions this issue is noted for. The 1886-S has a rather low mintage of just 750,000 pieces, and it is seldom encountered in Premium Gem grades. The typical Mint State example is apt to be just MS61 or MS62. Population: 39 in 66 (2 in 66+), 4 finer (7/14).
Ex: Houston Signature (Heritage, 12/2009), lot 1055.
From The Pannonia Collection. NGC ID# 254X, PCGS# 7170

1888 Silver Dollar, MS67
Satiny and Untoned

3266 **1888 MS67 PCGS.** Generous bright, satiny luster complements surfaces that are untoned and virtually free of noticeable contact, making this piece among the few finest certified at PCGS. A couple of tiny reeding marks in the left obverse field before Liberty's profile are well within the context of the grade. The strike is sharp on the hair over the ear as well as on the reverse. Population: 27 in 67, 0 finer (7/14). NGC ID# 2555, PCGS# 7182

1888-O 'Scarface' Dollar, Unc Details
VAM-1B4, Later Die State

3267 **1888-O Scarface, VAM-1B4 — Cleaning — PCGS Genuine. Unc. Details.** A Top 100 Variety. The prominent die break from the rim all the way across Liberty's cheek identifies the immensely popular VAM-1B4 "Scarface" variety. This cleaned example retains plenty of eye appeal and the infamous Scarface feature is dramatically apparent from the rim at 10 o'clock all the way down across Liberty's face and neck. Somewhat bright from cleaning, with creamy-silver surfaces and circular champagne tab toning on the reverse around an untoned center. PCGS# 133918

1889-CC Dollar, Well-Struck AU55
Key Issue in the Series

3268 **1889-CC AU55 PCGS. CAC.** The silver-white surface of this Choice AU specimen display luster in the recessed areas and soft russet toning surrounds the obverse margin. The design elements are somewhat better struck than usually encountered. The hair over Liberty's ear shows about one-half of the detail. Scattered minute marks are consistent with a lightly circulated large silver coin. One of the keys in the Morgan dollar series. Bowers (2007) states that "among Carson City issues it is far and away the most elusive. In comparison to the demand for them, examples are rare in all grades." NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU58+
Keystone Issue in the Series

3269 **1889-CC AU58+ PCGS.** Production of coinage resumed at the Carson City Mint in 1889 after a three-year hiatus. The facility used five sets of dies to strike 100,000 Morgan dollars in October, another 100,000 coins in November, and the final batch of 150,000 pieces in December. Eventually, 250,000 to 325,000 coins were melted for reasons unknown. After the Treasury release in the early 1960s failed to yield any significant quantity of 1889-CC dollars, the issue was solidified as one of the true rarities in the series.

This near-Mint representative falls just half a point short of an Uncirculated designation, and the difference is nearly imperceptible. The entirely brilliant surfaces are sharply detailed and only lightly abraded on each side. NGC ID# 2559, PCGS# 7190

1889-CC Morgan, Unc Details
Carson City Rarity

3270 **1889-CC — Obverse Improperly Cleaned — NGC Details. Unc.** From a low-mintage and heavily melted issue, this Carson City Morgan shows a bold impression with trivial softness above Liberty's ear. Luster rolls over each side. The reverse is flashy and brilliant, while silver-gray patina blankets the obverse. The noted cleaning is undistracting, and the desirability of this key date remains high.

1890 Morgan, MS65 Deep Mirror Prooflike
Deeply Reflective Fields

3271 **1890 MS65 Deep Mirror Prooflike PCGS.** The 1890 Morgan dollar is fairly plentiful in grades through MS65, but Deep Mirror Prooflike coins are in the distinct minority. Lower-grade examples can be located with some searching, though Gem-quality representatives are decidedly rare; PCGS has seen only eight such coins in this grade, and none finer (7/14). This example displays incredible depth of mirroring in the fields, while the devices exhibit somewhat satiny luster. The strike is pleasing, though some minor, scattered surface ticks are noted in the fields. With or without prooflike mirroring, numerically finer pieces are exceedingly rare. NGC ID# 255C, PCGS# 97197

1890-CC Morgan, MS62 Deep Mirror Prooflike VAM-4, The 'Tailbar' Variety

3272 **1890-CC Tailbar, VAM-4, MS62 Deep Mirror Prooflike PCGS. CAC.** A Top 100 Variety, widely popular among VAM specialists. A "naked-eye" die gouge connecting the left tailfeathers with the lower-left wreath leaves is the cause for the "tailbar" nickname. This variety is widely sought in all grades, though Deep Mirror Prooflike examples are decidedly rare. This coin showcases pleasing cameo contrast, with bold definition and vivid lemon-gold peripheral toning surrounding essentially brilliant centers. Scattered abrasions define the grade. Population: 2 in 62 Deep Mirror Prooflike, 11 finer (7/14). PCGS# 43339

1890-CC Silver Dollar, MS65 Carson City Condition Rarity

3273 **1890-CC MS65 PCGS.** The generous mintage of 2.3 million pieces makes this a common Carson City date in lower grades, but true Gem examples are rare, and the issue is virtually unobtainable in Premium Gem or finer. This tastefully toned Gem is attractive and lustrous, with a azure-blue at the rims and orange a vignette of orange shades over both sides of the coin. The strike is a bit soft at the very centers, but bold elsewhere. Silver luster shines through the light patina for nice eye appeal. Just 13 pieces are numerically finer at PCGS (7/14). NGC ID# 255D, PCGS# 7198

1890-S Dollar, Toned MS66+ Exceedingly Rare Any Finer

3274 **1890-S MS66+ PCGS. CAC.** The 1890-S Morgan dollar is readily available through the Gem level of preservation, after which the population declines precipitously. Premium Gems such as this high-end specimen will take more searching to locate. Finer examples are exceedingly rare. Electric-blue toning around the margins cedes to peach-gold and russet in the centers, and lustrous surfaces exhibit well-struck design elements. Both sides are nicely preserved. PCGS has graded only seven finer and NGC one better (8/14). NGC ID# 255F, PCGS# 7202

1892-CC Morgan, MS66 Nearly Prooflike Fields

3275 **1892-CC MS66 NGC.** The 1892-CC Morgan had a moderately high mintage of more than 1.3 million coins, but was not as well-represented in the Treasury releases of the early 1960s as were other earlier dates from this mint, and the GSA sales of the early 1970s yielded only a single example, per Bowers. Mint State survivors frequently suffer from light to moderate abrasions, with the result that Premium Gem or finer examples are genuinely rare. This piece showcases radiant, frost-white luster and sharp design definition. The fields are highly reflective, with nearly prooflike depth of mirroring, which is significant considering no Prooflike or Deep Mirror Prooflike coins have been certified finer than MS65. A lack of major abrasions completes the eye appeal. Census: 16 in 66, 1 finer (7/14). NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS66
High-Grade, Condition Rarity

3276 **1892-CC MS66 PCGS Secure. CAC.** The Treasury releases were relatively meager for this Carson City date, and no examples remained (well, just one coin) for the GSA hoard sales, confirming the rarity of the issue in high grades. Brilliant and frost-white, this example is boldly struck and well-preserved, with an untouched cheek on Liberty and only marginal weakness over the ear.

Mint luster rolls over the surfaces in cartwheel fashion. A bit of reflectiveness in the fields displays the frosted motifs to their full advantage. Premium Gem examples such as this impressive coin always bring a premium price, with fewer than fifty coins graded this fine or higher by both services combined. Population: 27 in 66 (1 in 66+), 2 finer (7/14). NGC ID# 255M, PCGS# 7214

1892-O Morgan, MS65
Outstanding Quality for the Grade

3277 **1892-O MS65 PCGS.** The 1892-O is known for being weakly struck with luster that is "often grainy and unattractive," according to Bowers. This weakness, coupled with light to moderate bagmarks, accounts for the scarcity of Gem examples and the drastic rarity of finer pieces. This representative is an unusually attractive example, showcasing vibrant, frosty mint bloom and remarkably clean surfaces, even for the Gem grade level. The eagle's breast and the hair above Liberty's ear are weak, as is normal, and this seems to be the only characteristic of the coin that precludes a finer grade. The surfaces are nearly brilliant, with faint traces of light golden color overall. PCGS has certified just six numerically finer representatives (7/14). NGC ID# 255N, PCGS# 7216

1893-CC Morgan Dollar, MS63
Pleasing Final-Year CC-Mint Example

3278 **1893-CC MS63 PCGS.** An attractive example from the Carson City mint facility's final Morgan dollar issue. Bright and brilliant, with intensely frosty mint luster and modestly abraded surfaces that account for the Select Mint State grade designation. The low mintage of 677,000 pieces does not fully explain this issue's overall scarcity, especially in Uncirculated condition. NGC ID# 255S, PCGS# 7222

1893-CC Morgan, Toned MS64
Final-Year Carson City Issue

3279 **1893-CC MS64 PCGS.** The 1893-CC was the final silver dollar issued at the famous Carson City Mint, and is widely popular among numismatists both young and old. Most examples, however, are heavily abraded, as Bowers elaborates on in *A Guide Book of Morgan Silver Dollars:* "A piece MS63 or finer, with minimum bagmarks, is a numismatic find and is very special. Discount poor strikes and 'baggy' coins, and you'll find that remaining pieces in the marketplace are few and far between."

This example exhibits vivid blue-gray and aquamarine hues around the margins, with pale lavender-gray in the centers, while strong luster cartwheels beneath the patina. The strike is pleasing, and any grade-limiting abrasions are well-hidden by the rich coloration. PCGS has certified only 12 numerically finer representatives (7/14). NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS62 Prooflike
Conditionally Scarce Date from Carson City

3280 **1893-CC MS62 Prooflike NGC.** The untoned ice-gray and silver-white surfaces of this Mint State dollar display astonishing prooflikeness in the fields. Softly struck over the centers, with a moderately scuffy appearance in the left obverse field and on Liberty's cheek that limits the grade. This final-year issue from the Carson City Mint is wildly popular with type collectors, at almost any grade level. Census: 40 in 62 Prooflike, 18 finer in Prooflike (7/14). NGC ID# 255S, PCGS# 7223

1893-O Dollar, MS62
Substantially Prooflike, Lustrous

3281 **1893-O MS62 PCGS.** A brilliant, silver-white example, nearly entirely prooflike on the reverse and semiprooflike on the obverse. Numerous small abrasions define the assigned grade, typical for this New Orleans issue that is usually bagmarked and weakly struck. This example, however, is sharply detailed on both sides, with only a touch of blending over Liberty's ear. Vibrant luster is exceptional for the issue. NGC ID# 255T, PCGS# 7224

1893-O Dollar, MS62
Low-Mintage, New Orleans Issue

3282 **1893-O MS62 PCGS.** Golden-brown toning colors the borders on both sides of this frosty Uncirculated dollar, yielding to brilliant interiors. As one would expect from a New Orleans issue, the strike is somewhat shallow over the high points. Scattered abrasions are minimal for the grade. Overall, this is a nice representative from a mintage of only 300,000 coins — one of the lowest Morgan dollar production totals in the series. NGC ID# 255T, PCGS# 7224

1893-S Morgan Dollar, VF25
Important Low-Mintage Key Issue

3283 **1893-S VF25 NGC.** According to the Second Edition of *A Guide Book of Morgan Silver Dollars* (2005): "The majority of known pieces, into the thousands, are in the single grade category of Very Fine." This issue had the lowest business strike mintage of the entire series, and is one of the most important key issues among all Morgan dollars. This example has a somewhat dull brownish-gray appearance, but the unmarked surfaces are smooth and the level of design detail that remains evident is ample for the grade. Most important of all, it has been authenticated as genuine by a reliable third-party grading service. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF30
A Collectible Key Date Example

3284 **1893-S VF30 NGC.** The 1893-S Morgan dollar issue distinguishes itself from other dates in the series in two important ways: its low mintage (100,000 coins) and its extensive circulation, possibly in the Rocky Mountain area in the 1920s. This example offers uniformly steel-gray patina over each side. Although evidence of circulation is apparent, a significant amount of detail remains. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF45
A Pleasing and Affordable Example

3285 **1893-S XF45 PCGS.** This issue, with the lowest business strike mintage in the series of 100,000 pieces, is widely acknowledged as a major key date among all Morgan dollars. This is a relatively affordable piece with very decent details for the grade, and mildly subdued cream-gray surfaces that exhibit a few wispy hairlines and a handful of scattered, superficial contact marks. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF45
Lowest-Mintage Morgan Issue

3286 **1893-S XF45 NGC.** The San Francisco Mint struck 100,000 Morgan dollars in 1893, the lowest production total in the entire series. Coins from the issue typically display a sharp strike, as is the case with this partly lustrous Choice XF example. An expected amount of wear is present over each side, and the surfaces are free from any distracting abrasions. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF45
Lightly Worn Series Key

3287 **1893-S XF45 PCGS.** A Choice XF example of this key Morgan issue. Lightly toned on each side with underlying brightness. A couple of small abrasions are located on the obverse. Only light friction is seen over the highpoints of the devices. Always in demand by advanced collectors.
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6959. NGC ID# 255U, PCGS# 7226

1894 Morgan, MS63
Vibrant, Frosty Luster

3288 **1894 MS63 NGC.** The 1894 Morgan boasts the second-lowest business strike mintage in the series (just 110,000 coins), and is proportionately popular in Mint State condition. This frost-white example is remarkably attractive for the grade, with only minor, scattered surface grazes accounting for the grade. The eagle's breast and the hair above Liberty's ear show a touch of softness, though not enough to detract. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS64
Rare in Finer Grades

3289 **1894 MS64 PCGS.** With the second-lowest business strike mintage of the series (only 110,000 pieces), the 1894 is one of most popular Philadelphia-issued Morgan dollars. This frosty near-Gem example displays radiant, untoned luster and well-defined relief elements. Light, scattered surface disturbances preclude a full Gem grade assessment. PCGS has encapsulated only 26 numerically finer representatives (7/14). NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS64+
Conditionally Rare Low-Mintage Issue

3290 **1894 MS64+ PCGS. CAC.** According to the Second Edition of Bowers' *Guide Book of Morgan Dollars* (2005): "The 1894 is the first true key date in the Philadelphia lineup of Morgan dollars. This year the mintage dropped to just 110,000 coins, or less than a third of the 1893, itself a small figure, indeed the smallest circulation strike figure in the series except for the 1893-S. Examples are elusive in all grades. from well-worn on up."

This is an impressive high-end example of the date, with technical and visual quality that seem very near to being Gemlike. One tiny nick just above Liberty's eye, and a faint adjacent luster graze, are likely the reason for a near-Gem assessment by PCGS, which is qualified by the important + designation; making this piece one of the top forty examples at PCGS. Population: 13 in 64+, 26 finer (7/14).
NGC ID# 255V, PCGS# 7228

1894-O Morgan Dollar, MS64
Unusually Vivid Eye Appeal

3291 **1894-O MS64 PCGS.** The New Orleans Mint produced just over 1.7 million Morgan dollars in 1894, and most examples are poorly struck with below-average eye appeal. This near-Gem representative is a pleasing exception. Although the hair over Liberty's ear and the eagle's breast feathers appear lightly impressed, the remaining design elements show bold detail. Softly frosted luster covers brilliant surfaces with areas of golden-orange and ice-blue coloration, primarily on the obverse. Abrasions are lightly scattered throughout, and a tick on Liberty's cheek is noted for accuracy. PCGS has seen 11 numerically finer submissions (7/14).
NGC ID# 255W, PCGS# 7230

1895-O Dollar, AU58
Low-Mintage, Scarce in Mint State

3292 **1895-O AU58 PCGS.** This issue is readily available in circulated grades, but it becomes a noteworthy rarity in mint condition. The current example is near the top-of-the-line in terms of affordability, for this date and mint. It is relatively well-struck for a New Orleans Mint product, with only minor weakness obverted in the centers. Light cream-gray toning is observed across each side, along with scattered minor marks and a few wispy hairlines. NGC ID# 255Y, PCGS# 7236

1895-S Dollar, Frosty MS63
Better S-Mint Morgan

3293 **1895-S MS63 PCGS.** A desirable issue from a mintage of only 400,000 coins. Thick mint frost covers the devices with semiprooflike fields on this brilliant Select example. The devices are typically well-defined with minor shallowness over the high points, and abrasions are scattered evenly throughout. A few small planchet flakes are seen between the E and P on the obverse. NGC ID# 255Z, PCGS# 7238

1895-S Dollar, Well-Struck MS63
Minimally Abraded for the Issue

3294 **1895-S MS63 PCGS.** Pleasing luster emanates from the silver-gray surfaces of this Select Morgan that display whispers of soft russet patina that mostly gravitates to the margins. The design features are well-struck, including relatively strong definition in the hair above Liberty's ear and on the eagle's breast feathers. Bowers (2007) writes that: "Mint State 1895-S dollars are well known for being extensively bagmarked, some actually appearing quite abused." The few scattered marks limit the grade, but are certainly less plentiful and severe than typically encountered on this date. NGC ID# 255Z, PCGS# 7238

1895-S Morgan, MS63
Scarce S-Mint Issue

3295 **1895-S MS63 PCGS Secure.** The 1895-S Morgan boasts a low mintage of only 400,000 coins, and most Mint State survivors are heavily bagmarked. Bowers writes: "A piece MS63 or finer, with minimum bagmarks, is a numismatic find and is very special." This example displays semiprooflike fields with strong, frosty luster over the devices. Grade-defined abrasions are minor, and a blush of light golden color adds to the overall appeal. NGC ID# 255Z, PCGS# 7238

1896 Morgan Dollar, MS67+
Impressive, Lovely Type Coin

3296 **1896 MS67+ PCGS.** The 1896 was a reasonably high-mintage issue that followed a proof-only date (1895), and has proven to be a popular selection for type collectors that is readily available up to and including the MS66 grade level. As a Superb Gem this Philadelphia Mint date becomes much scarcer, and the + designation by PCGS further elevates the conditionally impressive status of this lovely example. It is essentially untoned, save for a slight degree of butter-yellow color on the left side of the reverse, with sharply struck design features and remarkably clean surfaces. Population: 20 in 67+, 2 finer (7/14). NGC ID# 2562, PCGS# 7240

1896-O Dollar, MS63
Lustrous and Distraction-Free

3297 **1896-O MS63 PCGS.** This New Orleans issue is one of the rarest and most expensive Morgan dollars at grade levels exceeding MS62; and examples graded MS64 or finer are elusive and likewise very costly. This bright, satiny example is essentially untoned, save for faint golden border accents on the obverse, and the full mint luster is flashy and unbroken from rim-to-rim. Unlike many, it is reasonably well-struck and only weak in a few central areas. Both sides are free of unsightly abrasions or other surface distractions. NGC ID# 2563, PCGS# 7242

1896-S Dollar, MS64
Lustrous and Carefully Preserved

3298 **1896-S MS64 PCGS.** This is a brilliant, satiny example from San Francisco that shows intense mint luster and carefully preserved surfaces. A bit of wispy chatter on Liberty's cheek and in the left obverse field area seems to keep the piece from a Gem grade. The central design elements are softly struck, but the remaining motifs are boldly rendered. NGC ID# 2564, PCGS# 7244

1898 Morgan Dollar, MS67
None Numerically Finer at PCGS

3299 **1898 MS67 PCGS.** The 1898 Morgan dollar was a particularly well-produced issue and even Superb Gem examples are not really rare. The issue is unknown in grades above MS67, however. This spectacular Superb Gem displays sharply detailed design elements, vibrant mint luster, and well-preserved brilliant surfaces. Population: 71 in 67 (3 in 67+), 0 finer (7/14). NGC ID# 2568, PCGS# 7252

1898 Silver Dollar, MS67
None Certified Finer

3300 **1898 MS67 PCGS.** Neither PCGS nor NGC list a higher-graded example of this Philadelphia issue, splitting honors of "finest graded" among multiple MS67 grading events. No doubt some multiple submissions are included in the population, since the incentive for a higher grade is substantial at this level. The present coin is a properly grade Superb Gem — brilliant and lustrous, with excellent surfaces and no technical distractions other than slight blending above Liberty's ear. An attractive example. Population: 71 in 67 (3 in 67+), 0 finer (7/14). NGC ID# 2568, PCGS# 7252

1898 Morgan, MS66 Deep Mirror Prooflike
Only One Finer Within the Designation

3301 **1898 MS66 Deep Mirror Prooflike PCGS.** Ex: The Michigan Collection. This is a crisply detailed example of this Philadelphia issue, with outstanding reflectivity beneath light patina. The color is mainly pale silver-gray but considerable bluish elements are seen on the reverse, with areas of gold at the margins. A shallow luster scrape is noted at Liberty's frosted jaw, but the portrait is free of significant abrasions. Population: 13 in 66 Deep Mirror Prooflike, 1 finer (7/14).
Ex: Long Beach Signature (Heritage, 6/2010), lot 1191. NGC ID# 2568, PCGS# 97253

1898-O Morgan
Tied for Finest, Superb Gem Prooflike

3302 **1898-O MS67 Prooflike PCGS. CAC.** The 1898-O is challenging to locate in high grades with Prooflike qualities, as is further seen by the certified population figures; PCGS has certified only two coins in MS67 Prooflike, with none finer, and NGC has seen only three in this grade, also with none finer (7/14). The eye appeal of this piece is simply outstanding, with bold devices and pleasing cameo contrast. Close examination is needed to find any grade-limiting surface flaws, and none are readily apparent to the unaided eye. NGC ID# 2569, PCGS# 7255

1898-S Morgan Dollar, MS66
Condition Rarity in Finer Grades

3303 **1898-S MS66 PCGS.** The 1898-S Morgan dollar is a very scarce issue in MS66 and finer examples are extremely rare. This delightful Premium Gem exhibits well-detailed design elements and vibrant mint luster, under shades of golden-brown and pink toning. The well-preserved surfaces reveal no mentionable distractions. Population: 73 in 66 (4 in 66+), 3 finer (7/14). NGC ID# 256A, PCGS# 7256

1898-S Dollar, MS64+ Deep Mirror Prooflike
Beautifully Contrasted

3304 **1898-S MS64+ Deep Mirror Prooflike PCGS.** Few 1898-S Morgan dollars exhibit prooflike surfaces, and even fewer can boast of a Deep Mirror Prooflike designation. This remarkably contrasted example features golden-brown toning at the borders that blend to fully brilliant interiors. The thickly frosted devices are well-struck with trivial incompleteness at the centers. Population: 34 in 64 (1 in 64+) Deep Mirror Prooflike, 7 finer (7/14). NGC ID# 256A, PCGS# 97257

1900-S Morgan Dollar, MS66+
Only Two Finer at PCGS

3305 **1900-S MS66+ PCGS. CAC.** This high-end Premium Gem displays vivid shades of golden-brown and lavender toning, with more color on the obverse. The design elements are well-detailed, with just a touch of softness on the hair above the ear, and vibrant mint luster shines through the patina. PCGS has graded two numerically finer examples (7/14). NGC ID# 256H, PCGS# 7270

1901-S Morgan, MS65
Seldom Seen Finer

3306 **1901-S MS65 PCGS. CAC.** Ex: The Michigan Collection. The 1901-S is fairly scarce within the context of S-mint Morgans from the turn of the century. The lustrous surfaces of this Gem are essentially untoned and exhibit relatively well-impressed design elements, though the hair above Liberty's ear and the eagle's breast are characteristically soft. A few light roller marks are visible on the obverse. Pleasing overall eye appeal. Only 35 pieces have been graded numerically finer at PCGS (7/14).
Ex: Long Beach Signature (Heritage, 2/2010), lot 700. NGC ID# 256L, PCGS# 7276

1902-S Morgan, MS66
Rare Numerically Finer

3307 **1902-S MS66 PCGS.** The 1902-S Morgan had a moderately low mintage of little more than 1.5 million pieces, and survivors are proportionately elusive in the finer Mint State grades. This piece exhibits a thin ring of lemon-gold peripheral toning, though the surfaces are otherwise brilliant. Semiprooflike reflectivity in the fields complements satiny devices, though the central design elements show a touch of the usual softness. Population: 44 in 66 (2 in 66+), 4 finer (7/14). NGC ID# 256P, PCGS# 7282

1903-S Dollar, Nearly Brilliant MS63

3308 **1903-S MS63 PCGS.** A bold striking for this difficult, late-date issue, though the centers are somewhat soft. The lustrous surfaces are just a few light blushes of golden patina from full brilliance and wispy abrasions are primarily seen in the lower left portion of the obverse. Scarce in Select Uncirculated condition.
Ex: Long Beach Signature (Heritage, 9/2004), lot 8909, which realized $7,187.50. NGC ID# 256T, PCGS# 7288

1903-S Morgan Dollar, MS66
Impressive, Conditionally Scarce

3309 **1903-S MS66 PCGS.** A satiny Premium Gem example with excellent aesthetic appeal. The surfaces of this lovely piece are fully brilliant with no evidence of toning on either side. This piece exhibits full mint brilliance and sharp design details. It is only the few hair strands over Liberty's ear that show any evidence of actual weakness; the eagle's breast feathers — located near the center of the reverse opposite Liberty's ear — appear to be a trifle flat, but this is only a manifestation of the new C4 reverse type introduced a couple of years earlier, with the breast feathers not fully detailed on the die. The eagle's arrowheads are likewise a trifle flat, but only in the centers. This piece is simply gorgeous, and the excellent luster quality highlights the clean, unmarked surfaces on both obverse and reverse. Population: 35 in 66 (2 in 66+), 4 finer (7/14).
Ex: *Charlotte ANA Money Show (Heritage, 4/2007), lot 1390. From The Pannonia Collection.* NGC ID# 256T, PCGS# 7288

1904-S Dollar, MS63
Well-Preserved and Attractive

3310 **1904-S MS63 PCGS. CAC.** This is a rare date in Uncirculated condition and is especially challenging at the Gem level of preservation or finer. Bowers had this to say about the 1904-S, in the Second Edition of his *Guide Book of Morgan Dollars* (2005): "The 1894-S is a numismatic delight. Most are well struck, lustrous, and pleasing to the eye."

The present example fits Bowers' description to a tee, and also shows attractive light toning, mainly near the peripheries; along with well-preserved surfaces that only display a handful of minuscule contact marks.

NGC ID# 256W, PCGS# 7294

1904-S Silver Dollar
Elusive Near-Gem Example

3311 **1904-S MS64 PCGS.** Few abrasions of any kind are visible across the fields and devices of this scarce, near-Gem San Francisco dollar. The strike is noticeably shallow at the centers, likely accounting for the assigned grade, but a thin patina of amber-gold toning with nice underlying luster adds to the appeal. Although 2.3 million pieces were struck, the lack of Mint State examples makes this a key date in the series, always in strong demand. NGC ID# 256W, PCGS# 7294

1904-S Dollar, Lustrous MS64
Semikey Issue

3312 **1904-S MS64 PCGS.** This is the last year of Morgan dollar production until 1921. The 1904-S is one of the semikeys to the series. Bowers (2007) asserts that "in comparison to the demand for them, Mint State pieces are elusive." The lustrous surfaces of this near-Gem are nearly untoned except for an occasional wisp of light gold color. A modicum of detail is noted in the hair over Liberty's ear, an area that is typically flat on this date. Most of the eagle's breast feathers are indistinct. NGC ID# 256W, PCGS# 7294

1904-S Morgan, MS65
Pleasing for the Issue

3313 **1904-S MS65 PCGS.** The 1904-S Morgan is one of the more challenging San Francisco issues in the series to locate in Mint State. This Gem example is a typical coin in regards to strike, with a touch of softness on the hair immediately above Liberty's ear and on the eagle's breast, though the surfaces are free of any major abrasions, and a degree of semiprooflike mirroring in the obverse field adds to the overall visual appeal. At first glance the coin appears nearly untoned, though a hint of light golden color is seen upon closer inspection. PCGS has certified 11 numerically finer examples (7/14). NGC ID# 256W, PCGS# 7294

1904-S Dollar, MS66
Last of the Condition Rarities

3314 **1904-S MS66 NGC.** Had the Mint and Anthony de Francisci, sculptor of the Peace dollar, been able to keep on-schedule, the 1904-S dollar would have been the end of the Morgan series. Even with the various 1921 issues, though, it is still the last of the significant condition rarities, holding that status at the Premium Gem level where this coin lies. Broad cartwheel luster is flashy at certain angles. Silver interiors give way to dotted gold and steel-blue patina along much of the margins. The strike is a trifle soft on the central high points but the overall eye appeal is excellent. Census: 5 in 66 (1 in 66 ★), 1 finer (7/14). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1878 Morgan Dollar, PR66 Cameo
8 Tailfeathers, VAM-14.8

3315 **1878 8TF PR66 Cameo NGC. VAM-14.8.** Blunt upper beak. The key diagnostic here is the doubled spike in front of Liberty's eye and the string of small die chips below it. David Bowers writes in his *Silver Dollars and Trade Dollars of the United States*: "Probably 300 to 500 1878 8 TF Proof dollars were minted. The number is not known, and estimates have ranged from about 250 upwards. Today, Proofs are rare."

This delightful Premium Gem Cameo displays whispers of barely discernible gold color at the margins. The design elements are well brought up, including the hair over Liberty's ear and the eagle's breast feathers. Impeccably preserved surfaces reveal just a few minor ticks on the cheek. Light roller marks are visible on the chin. Census: 12 in 66 Cameo, 6 finer (7/14).
From The Pannonia Collection. PCGS# 87311

1879 Morgan Dollar, PR66
Deeply Toned

3316 **1879 PR66 PCGS. CAC.** Walter Breen estimated that 250 proofs were struck in the first quarter, another 500 specimens were struck in the second quarter, and 100 coins were melted, resulting in a net mintage of 650 proofs. Based on the certified population data, Bowers believes the actual figure is closer to 1,100 proofs. In any event, this Premium Gem displays cobalt-blue and mint-green patina with rose-violet accents. The strike shows minor softness on the central devices, while the remaining devices are crisply impressed. Population: 12 in 66, 7 finer (7/14). NGC ID# 27Z2, PCGS# 7314

1879 Morgan, PR65 Cameo
Uncommonly Contrasted

3317 **1879 PR65 Cameo PCGS.** The 1879 is the second-year of issue and generally available, but Cameo examples are rare. This Gem proof exhibits heavily frosted devices and reflective fields that generate infrequently encountered contrast. Each well-preserved side remains brilliant and free of any noticeable impairments. Population: 10 in 65 Cameo, 25 finer (7/14). PCGS# 87314

1880 Morgan Dollar, PR68 Cameo
Highest Proof Production

3318 **1880 PR68 Cameo NGC Details.** An exquisite Superb Gem Cameo proof, this 1880 Morgan dollar exhibits impressive field-to-device contrast between the deeply mirrored fields and the satiny devices. Both sides are brilliant and untoned, save for the faintest peripheral champagne toning that hugs the borders. Mint records show a proof production of 1,355 1880 Morgan dollars, alongside 1,987 proof Trade dollars. That quantity was the highest proof production in both series and signifies a substantial demand from contemporary collectors. Census: 15 in PR68 (3 in PR68 ★), 1 finer (7/14).
From The Pannonia Collection.

1882 Morgan Dollar, PR68
Among the Finest Certified, Ex: Jack Lee

3319 **1882 PR68 NGC. CAC.** Ex: Jack Lee. A generous mintage of 1,100 proof Morgan dollars was achieved in 1882, with most (if not all) of the coins issued as part of silver proof sets for the year. The mintage was produced to a high standard of quality, but few survivors can match the quality and eye appeal of the coin offered here. The design elements are fully struck and frosty and close inspection with a loupe reveals no mentionable surfaces flaws. The surfaces are completely brilliant and the fields are deeply reflective, but a little hazy in some places. Overall eye appeal is terrific. This coin will be a welcome addition to the finest collection or Registry Set. Census: 7 in 68 (1 in 68 ★), 0 finer (7/14).
From The Pannonia Collection. NGC ID# 27Z6, PCGS# 7317

1891 Morgan Dollar, PR66
Only 650 Proofs Struck

3320 **1891 PR66 PCGS. CAC.** Ice-blue, orange, and rose-violet iridescence progress outwardly to cobalt-blue toning when held at the correct angle. The Mint struck 650 Morgan dollar proofs in 1891, and examples are frequently seen with slight weakness at the centers. Such is the case with this Premium Gem, though the remaining design features are sharply defined. Marks are virtually non-existent, and the eye appeal is strong. Population: 19 in 66 (1 in 66+), 3 finer (7/14). NGC ID# 27ZL, PCGS# 7326

1892 Morgan Dollar, PR66
An Outstanding, Toned Example

3321 **1892 PR66 PCGS.** This proof issue had a relatively high mintage of 1,245 pieces, explained, according to Bowers, by the introduction of the new Barber dime, quarter dollar, and half dollar coins. This is a toned specimen that will attract attention for its coloration as well as its outstanding preservation. A mark on the eagle's left breast seems to be mint-made. Population: 21 in 66, 15 finer (7/14). NGC ID# 27ZM, PCGS# 7327

1895 Dollar, Brilliant PR63+
'King of the Morgan Dollars'

3322 **1895 PR63+ PCGS. CAC.** The Philadelphia Mint did not issue silver dollars for general circulation in 1895, and produced only 880 proofs for sale to the collectors of the period. As a result, the 1895 Philadelphia issue is the sole proof-only date of the series and, in the words of Q. David Bowers, "is far and away the rarest date in the series." Ownership of an attractive 1895 proof is widely regarded as the mark of an advanced Morgan dollar collector, and gives a certain feeling of accomplishment to the series completist.

An examination of auction prices realized for proof coins between 2010 and 2014 yields some interesting finds. On average, examples graded PR60 to PR64 have realized between $35,402 and $48,156 with a low price variance for pieces certified PR61 to PR64. In Gem proof condition, mean prices realized in the last five years jumps significantly to $81,595. We conclude that this Plus-designated and CAC-approved Select representative offers an excellent opportunity for the discerning collector to acquire a higher-end piece with strong value for the grade.

The surfaces of this proof gleam with brilliance and are devoid of any toning. Moderately frosted design features show strong definition overall and contrast pleasingly against the reflective fields, with only minor strike incompleteness over Liberty's ear. Two small planchet voids between the AT in STATES and over the M in AMERICA serve as a future pedigree markers. Overall, this is a highly appealing example of a famed Morgan dollar rarity. NGC ID# 27ZR, PCGS# 7330

1895 Morgan Dollar, PR64 Cameo
Sought-After Proof-Only Issue

3323 **1895 PR64 Cameo NGC.** Within the Morgan dollar series, few dates are as desired as the 1895 Philadelphia proof issue. Confusion reigns regarding whether or not the Mint actually struck circulation strikes in 1895. Records show a production figure of 12,000 coins, and researchers have put forth several theories to explain why examples have yet to come to light. Mass-melting under the Pittman Act of 1918 may have destroyed the reported 12,000-coin mintage, while clerical error suggests no circulation strikes were minted in the first place. Either way, this proof issue is the only option for collectors looking to complete a date and mintmark set. Although a mintage of 880 specimens is not impressive in itself compared to other proof mintages in the series, demand for the date is unparalleled — the reason for which it has been dubbed "King of the Morgan Dollars."

The 1895 Morgan dollar is of such a storied past that it ranks 66th among Jeff Garrett and Ron Guth's *100 Greatest U.S. Coins*. It leaves in its wake such legendary issues as the 1797 half dollar (68), the 1851 and 1852 Seated dollars (81-82), as well as the 1854-O, 1856-O, and 1861-S Paquet Reverse double eagles (97-99). Still, Morgan dollar collectors would likely argue that it should rank atop the list.

This sharp near-Gem example is exhibits strong Cameo contrast between the mirrored fields and the thickly frosted devices, while a few grade-defining hairlines are only visible with a loupe. A veil of light golden toning blankets each side, attesting to the originality of the surfaces. Census: 34 in 64 Cameo (1 in 64+★ Cameo), 55 finer (7/14). PCGS# 87330

1898 Morgan Dollar, PR67 Ultra Cameo
Only 735 Pieces Struck

3324 **1898 PR67 Ultra Cameo NGC.** Only 735 proof Morgan dollars were struck in 1898 but the issue was well-produced and survivors show uniformly high quality and exceptional eye appeal. Michael Fuljenz opines, "This date was probably the best made in the entire series."

The present coin stands out above all but a few examples of this remarkable date. The design elements are fully struck, with intricate detail on the strands of hair above Liberty's ear and the feathers on the eagle's breast. The devices are richly frosted and contrast profoundly with the deeply mirrored fields to produce a startling white-on-black cameo effect when the coin is tilted in the light. Close inspection with a loupe reveals no mentionable surface flaws and the brilliant surfaces show no trace of toning. Eye appeal is extraordinary. Census: 21 in 67 Ultra Cameo (1 in 67+ Ultra Cameo, 3 in 67 ★ Ultra Cameo, 2 in 67+★ Ultra Cameo), 2 finer (7/14). PCGS# 97333

1899 Dollar, PR65 Deep Cameo
Exceptional Contrast

3325 **1899 PR65 Deep Cameo PCGS.** This is a gorgeous Deep Cameo Gem proof from a mintage of 846 specimens. PCGS has certified 244 non-Cameo proofs, 47 Cameo proofs, and only 7 Deep Cameo proofs in all grades, underscoring the rarity of this coin. The untoned surfaces show intense reflectivity in the fields and thick frost over the razor-sharp devices. Population: 3 in 65 Deep Cameo, 3 finer (7/14). PCGS# 97334

1902 Morgan, PR65 Cameo
Rare With Field-Motif Contrast

3326 **1902 PR65 Cameo NGC. CAC.** Struck during a period when the Mint made no effort to produce contrasted devices on its proof coins, the proof 1902 Morgan is exceedingly rare with a Cameo designation from the grading services. In fact, NGC and PCGS combined have awarded the designation to just 10 coins in all grades (7/14). Lovely golden toning warms the fully mirrored fields of this Gem example, while the surfaces are free of all but a few wispy hairlines in the left obverse field, which are only detectable with a loupe. As is characteristic of this issue, the eagle's breast and the hair immediately above Liberty's ear are not quite full, though this hardly affects the immense visual appeal. Census: 3 in 65 Cameo, 4 finer (7/14). PCGS# 87337

1921 Zerbe Proof Morgan Dollar, PR63
Iridescent, Reflective Fields

3327 **1921 Zerbe PR63 PCGS. CAC.** The debate continues about the proof status of the issue, although the sharpness of the hair detail suggests something more than simply a semiprooflike business strike. The fields show shallow prooflikeness and attractive iridescence. Like other Zerbe proofs, a die line extends from the second U of UNUM to the rim. Lilac and gold hues migrate across the reflective surfaces. A few wispy lines are minor considering the assigned grade. This is a "double green" example, in a PCGS green label holder with the green CAC label for quality. Population: 17 in 63, 43 finer (7/14). NGC ID# 257A, PCGS# 7341

1921 Zerbe Proof Morgan Dollar, PR65+
A Wonderfully Preserved Example

3328 **1921 Zerbe PR65+ PCGS. CAC.** The controversy will probably never end regarding whether or not Zerbe proofs were really struck as proofs, and even whether they were specifically struck for Farran Zerbe. Nor is there likely to be a consensus anytime soon about how many such coins were actually struck, although it seems likely that somewhere between 100 and 125 pieces are known today. The diagnostics for Zerbe proofs have been widely published, and there is no need to go into them here. This particular piece is sharply defined throughout with bright, untoned surfaces. The fields are deeply mirrored, but of course not of the same texture as Chapman proofs. This is one of the most attractive Zerbe proofs we have seen in some time, and we expect strong bidding on this special dollar. Population: 14 in 65 (2 in 65+), 8 finer (7/14). NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

1921 Peace Dollar, Bright MS66
Better Struck Than Usual

3329 **1921 MS66 PCGS.** The 1921 Peace dollar, from a production just exceeding 1 million pieces, was widely saved at the time of issue and is easily obtainable through the Gem level of preservation, after which the population declines significantly. The issue is in high demand due to it being the first year of the series and its high-relief design. The bright silver-gray surfaces of this Premium Gem yield pleasing luster and exhibit well-struck devices except for the usually seen lack of hair detail over Liberty's ear. Yet this area is not completely flat as seen on many surviving examples as it is entirely separated from Liberty's face and neck and shows a modicum of internal detail. PCGS has seen only seven specimens finer (7/14). NGC ID# 2U4E, PCGS# 7356

1924-S Dollar, Well-Struck MS65

3330 **1924-S MS65 PCGS.** The 1924 issue from San Francisco is usually poorly struck. The current Gem offering is a refreshing exception. Its above-average strike shows strong hair detail at Liberty's ear. Additionally, most of the eagle's plumage is well-defined. Lustrous surfaces display just a few whispers of light gold color. Some minute grade-consistent marks are visible, mostly on the reverse. Population: 79 in 65 (1 in 65+), 5 finer (7/14). NGC ID# 257K, PCGS# 7364

1925 Peace Dollar, Immaculate MS67 Quality

3331 **1925 MS67 PCGS. CAC.** There is nothing "typical" about this 1925 Peace dollar, but because of its immaculate preservation and outstanding mint luster it would make a perfect type coin. Peace dollars are seldom encountered in Superb condition. Only 72 pieces of this issue have been certified in MS67 with a single coin finer (7/14). Each side is brilliant, the mint luster is bright and softly lustrous, and the strike is complete.
Ex: Central States Signature (Heritage, 4/2011), lot 5961. NGC ID# 257L, PCGS# 7365

1925-S Peace Dollar, MS65
Conditionally Scarce

3332 **1925-S MS65 NGC.** The 1925-S Peace dollar is an available issue through MS64, but in MS65 the certified population plunges to just 63 coins at NGC, with none finer (7/14). This example displays strong, frosty mint luster, with just a touch of pale pinkish-gold color detected upon closer examination. The strike is slightly soft in the centers, but not to an unsightly degree. NGC ID# 257M, PCGS# 7366

1934-S Peace Dollar, MS64
Popular Series Key

3333 **1934-S MS64 PCGS.** Faint gold, lilac, and iridescent toning adds to the aesthetic appeal of this otherwise brilliant and sharply struck near-Gem. The 1934-S is traditionally considered one of the keys to a Peace dollar set. While there are other condition rarities in MS64 or finer grades, only the 1928 and 1934-S are elusive in all grades. *Ex: Long Beach Signature (Heritage, 2/2009), lot 2066.* NGC ID# 257Z, PCGS# 7377

GOLD DOLLARS

1849 Open Wreath Gold Dollar, MS67
Just One Coin Finer at Both Services

3334 **1849 Open Wreath MS67 PCGS. CAC. Breen-6003.** Close star, heavy date. Several varieties exist for the denomination's introductory year. The first 1,000 coins were struck from dies that lacked James Longacre's L initial on the truncation of the bust. When the dies cracked, Mint officials added the L and later closed the wreath. The Philadelphia Mint struck far and way the most gold dollars in 1849 (688,567 coins, including all varieties), and the branch mint products are elusive. As a result, P-mint examples often represent the Type One series.

Orange-gold surfaces exhibit occasional copper-red and lavender accents, giving this Superb Gem pronounced visual appeal. Each side is boldly impressed, and only the lower wreath shows trivial strike incompleteness. Close inspection with magnification fails to reveal any mentionable flaws. This is the finest 1849 Open Wreath, With L gold dollar we have offered, and the finest example to cross the auction block in 22 years. Housed in a green label holder. Population: 1 in 67, 1 finer (7/14). NGC ID# 25B9, PCGS# 7502

1852 Gold Dollar, MS65
Excellent Type Coin

3335 **1852 MS65 PCGS. CAC.** With a substantial mintage in excess of 2 million coins, the 1852 gold dollar is often selected for type representation. This radiant Gem example showcases razor-sharp motifs and nearly unabraded surfaces. Rich yellow-gold patina and semiprooflike fields further increase the eye appeal. Population: 46 in 65 (1 in 65+), 22 finer (7/14). NGC ID# 25BP, PCGS# 7517

1855-C Gold Dollar, MS61+
Conditionally Rare, Single-Year Issue

3336 **1855-C MS61+ NGC. Variety 2.** The Mint made several modifications to the gold dollar in 1854, resulting in the Type Two design. Striking difficulties limited the production of Type Two gold dollars to a single year at the North Carolina branch mint, and only 9,803 pieces were struck. The result is a highly collectible Charlotte issue prized by both date and type collectors. The design elements exhibit typical incompleteness at the centers, LIBERTY is faintly visible, and clash marks occur over each side. Deep orange-gold surfaces show partial luster remaining and reveal just a few wispy marks. This is the sole MS61 representative with a Plus designation at NGC, and only four examples are certified finer (7/14). NGC ID# 25C5, PCGS# 7533

1877 Gold Dollar, MS68
Tied for Finest at PCGS and NGC

3337 **1877 MS68 PCGS. CAC.** A multitude of factors make the 1877 gold dollar popular among collectors. This Type Three issue is one in a string of low-mintage gold dollar dates from the 1870s. The Mint struck only 3,900 pieces, and only 325 coins are thought to survive. Additionally, the 1877 date itself is desirable, as other denominations of the year claim low mintages.

This flawless representative is sharply struck with only typically seen softness on the C in AMERICA. Coruscating luster and rich orange-gold color blend over each side. The surfaces are decidedly prooflike in appearance, as the deeply reflective fields surround heavily frosted design motifs. A wonderfully appealing example, housed in a green label holder. Population: 3 in 68, 0 finer (7/14). NGC ID# 25DF, PCGS# 7578

1883 Gold Dollar, MS67
Lustrous, Red-Gold Patina

3338 **1883 MS67 PCGS. CAC.** This Superb Gem gold dollar is an excellent example of the 1883 date, which is known for its rich, coppery-red toning and frosted surfaces. Other than a single tiny, dark spot on the reverse near the right bow tip, there are no often-seen copper alloy stains to disturb the lustrous fields. Slight irregularity is seen among the denticles on the right reverse rim, as struck, but this is typical of the date and does not distract. The letters ERTY of LIBERTY are partially missing, a characteristic of the die and not due to strike weakness. The eye appeal is outstanding. NGC ID# 25DM, PCGS# 7584

1856 Gold Dollar, PR66+ Deep Cameo
First Type Three Issue
Finest Certified at PCGS

3339 **1856 Slanted 5 PR66+ Deep Cameo PCGS.** The year 1856 was in many ways a transitional year at the nation's mints. Preparations were under way to do away with the filthy and unpopular "old copper" half cents and cents, and accordingly the Philadelphia Mint struck a large number of pattern Flying Eagle cents made of copper-nickel, in a new, small-size format. The arrows at the date from 1853-1855 on minor silver coinage, signifying a reduced silver content, were removed in this year. The newly opened San Francisco Mint struck its first dimes and quarter eagles, along with the only Indian Princess, Small Head (Type Two) gold dollars produced in 1856. Meanwhile, the newly designed Indian Princess, Large Head (Type Three) gold dollars were produced at the Philadelphia and Dahlonega mints.

The Philadelphia Mint manufactured more than 1.76 million business strike gold dollars during 1856, in two styles, with the 5 in the date either upright or slanted. An unknown but small number of proofs was also produced, usually estimated at 10 to 15 pieces. Most other coin denominations, with a couple of exceptions, from 1850 to 1856 show slanted 5s, while they disappear altogether by 1857. A popular numismatic chestnut holds that Mint Engraver James B. Longacre preferred his 5s slanted, while other mint personnel favored the upright 5s. For much more on the phenomenon of slanted or italic 5s, see the article "A New Slant on Coins of 1850-56" by Craig Krueger and John W. Dannreuther in The Numismatist, June 2002. Krueger and Dannreuther draw a distinction between "slanting" and "italic" numerals, and note that they are mutually exclusive: "Slanting" numerals can be non-italic, and some upright numerals show italic characteristics.

Although Walter Breen believed that the Upright 5 gold dollar in the Floyd T. Starr sale (Stack's, 10/1992) was a proof, Jeff Garrett and Ron Guth's recently released Gold Encyclopedia states categorically that the piece was a prooflike business strike, and that all proofs are of the "Slant 5" style. The current specimen shows the date low and slanting upward to the right, a diagnostic for genuine proofs, but beyond that it shows the unmistakable characteristics of proof coinage.

The surfaces exhibit rich reddish-gold coloration. The fields show the deep mirrors one would expect from a proof, and the devices are nicely frosted and give the coin a two-toned appearance. One interesting aspect seen on this piece is light die clashing in the reverse fields. This was a common problem on Type Two gold dollars, and it appears that mint personnel continued to consider a planchet optional before striking even in the first year of Type Three production. Population: 1 in 66 (1 in 66+) Deep Cameo, 0 finer (7/14).

Ex: FUN Signature (Heritage, 1/2007), lot 3364. NGC ID# 25DX, PCGS# 97606

1860 Gold Dollar, PR65 Ultra Cameo
High Mintage, Low Survival Rate

3340 **1860 PR65 Ultra Cameo NGC.** The 1860 proof gold dollar enjoyed an unusually high mintage of 154 pieces. Perhaps Mint Director James Ross Snowden was anticipating larger numbers of collectors to buy proof gold in 1860, the same way he overanticipated the demand for silver and minor proofs. It is likely that many specimens went unsold and were melted after the end of the year. Only 15 to 20 individual proof gold dollars are believed known today. This is one of the finest with its essentially defect-free surfaces and sharply contrasting fields and devices. A couple of tiny lint marks and planchet voids appear on each side. Census: 3 in 65 Ultra Cameo, 3 finer (7/14). PCGS# 97610

1876 Gold Dollar, PR65 Ultra Cameo
American Centennial Memento

3341 **1876 PR65 Ultra Cameo NGC.** In 1876 officials from the Centennial Exposition in Philadelphia invited Mint officials to set up a coinage display, but they declined. Nonetheless, the 1876 gold proof coins saw a marked increase to 45 pieces of each denomination from the 20-coin proof gold mintages that bookend it on either side. The greater production was likely in anticipation of higher demand due to the Centennial. While some examples were likely melted as unsold later, the significance of the date also likely meant that the remaining specimens were likelier to be preserved. Somewhere around 25 to 35 pieces appear to survive today. This piece boasts optimal contrast over orange-gold surfaces that reveal a bold strike and no singular marks. A loupe reveals a few field hairlines of little account. Census: 3 in 65 Ultra Cameo, 4 finer (7/14). NGC ID# 25EK, PCGS# 97626

1825 Capped Head Left Quarter Eagle, MS61 BD-2, Rare in Mint State

3342 **1825 MS61 NGC. BD-2, High R.4.** Bass-Dannreuther Die State a/a. The key diagnostics for BD-2 include a recut 5 in the date and the reverse fraction centered under the arrow fletchings. The mintage of just 4,434 coins is low in an absolute sense, but the date is one of the more available issues in this challenging Capped Head Left series. Dannreuther (2006) suggests that 2,000 to 3,000 coins were struck from this die pair and that approximately 80 to 100 coins survive in all grades.

The prooflike surfaces of this Uncirculated representative offer bright yellow-gold coloration and radiant luster throughout. The devices exhibit needle-sharp striking detail with just a touch of high-point softness over the eagle's shield. Small ticks and wispy marks are lightly scattered over each side. Census: 13 in 61, 11 finer (7/14). NGC ID# 25FG, PCGS# 7664

First United States Mint

1827 Quarter Eagle, MS63
Last Open Collar Issue
BD-1, Only Dies for the Date

3343 **1827 MS63 PCGS. BD-1, R.5.** Bass-Dannreuther Die State a/c. The 1827 Capped Bust Left quarter eagle claims a recorded mintage of 2,800 pieces,but some of those coins may have been dated 1826. A single die variety is known for the date, classified as the BD-1 variety in the Bass-Dannreuther series reference. The BD-1 is a scarce-to-rare variety, with a surviving population of 45-55 examples in all grades. This was the only use of the obverse die, but the hardy reverse was used previously to strike both the 1825 BD-3 and the 1826/6 BD-1 varieties.

The quarter eagle was not a popular denomination in the early 19th century, as it was too large for the typical everyday purchase made by individual citizens, but too small to be useful in large transactions conducted by merchants and bankers. The quarter eagle was produced only sporadically during this era, and mintages were uniformly small. In addition, almost all U.S. gold coins of the 1820s were exported or melted because their intrinsic value was greater than their face value. As a result, the Capped Bust Left , Large Dentils quarter eagle is one of the most elusive design types in the U.S. gold series, and none of the dates from the 1820s are easily located. The Mint began using the close collar technology on quarter eagles in 1829,making the 1827 the final date of its type, another important consideration for type collectors.

This lovely Select example is just outside the Condition Census for the issue. The surfaces display a frosty, orange-gold appearance with even tan-gold overtones on the obverse. There is modest reflectivity in the fields and the devices are crisply defined throughout. Both sides are equally free of mentionable abrasions. *Ex: FUN Signature (Heritage, 1/2001), lot 8064.* NGC ID# 25FJ, PCGS# 7666

1830 Quarter Eagle, XF45
BD-1, Low-Mintage Issue

3344 **1830 XF45 ANACS. BD-1, R.4.** Bass-Dannreuther Die State a/a. This is the only known die pair and the only known die state for the issue. The U in UNITED is recut, a characteristic that fades with the continued use of the reverse die over a five-year period. Green-gold colors each side of this Choice XF representative. The stars show full centers and both Liberty's hair and the eagle's feathers are well-detailed with slight friction. As one would expect for the grade, abrasions are scattered lightly throughout with a small gouge to the left of S1 in STATES. An extremely scarce representative from a mintage of only 4,540 coins.
From The Valley View Life Collection, Part Two. NGC ID# 25FL, PCGS# 7670

1831 Capped Bust Left Quarter Eagle, MS63
BD-1, Reduced Diameter

3345 **1831 MS63 NGC. BD-1, R.4.** Bass-Dannreuther Die State a/a. The only dies for the date. According to Garrett and Guth's *Encyclopedia of U.S. Gold Coins:* "The 1831 quarter eagle is comparable in rarity (and in the number of surviving examples) to the 1830 issue, but the total number of Mint State 1831 examples is higher, as is the general quality." They further explain that the prevalence of mint condition examples and the scarcity of circulated coins indicates that pieces outside of collections were likely destroyed. Of the 4,520 quarter eagles struck, John Dannreuther (2006) estimates that 110 to 125 coins survive in all grades.

This Select representative features warm orange-gold color, vivid luster, and moderate prooflike reflectivity. Liberty's hair curls, as well as the eagle's talons and feathers show strong definition, while a handful of abrasions define the grade. Census: 7 in 63, 20 finer (7/14). NGC ID# 25FM, PCGS# 7671

1834 Classic Quarter Eagle, MS62
Small Head Subtype

3346 **1834 MS62 PCGS. Breen-6138, Variety 1, R.1.** Small Head subtype. The year 1834 saw both the introduction of the Classic Head quarter eagle design and a significant increase in the issue's mintage (112,234 coins). Prior to 1834, the highest production of quarter eagle occurred in 1807, when the Mint struck 6,812 pieces. This Mint State representative features a pinpoint-sharp strike and luminous luster over pleasing, green-gold surfaces.
From The Valley View Life Collection, Part Two. NGC ID# 25FS, PCGS# 7692

1836 Quarter Eagle, MS64
Exceptional Quality
Block 8, Variety 15

3347 **1836 Block 8 MS64 PCGS. Breen-6144, Variety 15, R.2.** An unusually nice example of a Classic Head date typically encountered in AU. Rich lemon-gold toning is predominant but leaves a blush of ice-blue at the obverse center. Both sides are remarkably clean, even for the MS64 level, with contact limited to trivial ticks on the field above the eagle's neck. The strike is crisp, if not quite full on the forehead curls and eyebrow. More quarter eagles were struck in 1836 than in all other years of the type combined, yet high-grade pieces are decidedly rare. Population: 9 in 64, 4 finer (7/14).
Ex: Orlando FUN Signature (Heritage, 7/2010), lot 4535, which realized $13,800.
From The Pannonia Collection. PCGS# 97694

1839-C Classic Head Quarter Eagle, AU58
Variety 24, Scarcer Die Pair

3348 **1839-C AU58 NGC. Breen-6149, Variety 24, R.4.** The obverse die is shared with Variety-23 (recut date) but the reverse is unique to this die marriage. Of the two Classic Head quarter eagles struck at the Charlotte Mint, the 1839-C is more readily available (18,140 coins minted), although in higher grades it becomes more elusive than the 1838-C issue. Winter (2008) suggests that 70 to 100 examples are known in About Uncirculated condition. This is a lightly abraded green-gold slider that shows ample luster across the motifs and margins. Well-struck except on the stars. The shallow strike-through on the cheek is as made and often seen on this scarce Charlotte die variety. Census: 65 in 58 (1 in 58 ★), 16 finer (7/14). NGC ID# 25G4, PCGS# 7699

1839-O Quarter Eagle, AU55
Only O-Mint Classic Two and a Half

3349 **1839-O AU55 NGC. Variety 27, R.3.** The High Date, Wide Fraction variety. The 1839-O is the sole New Orleans issue of the Classic quarter eagle series, and type demand is substantial from Southern gold collectors. The present piece is crisply struck and exhibits unabraded straw-gold surfaces. We note only a pair of small obverse rim nicks near 12 o'clock. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

1842-C Two and a Half, AU55
One of the Rarest C-Mint Issues

3350 **1842-C AU55 NGC. Variety 1.** According to Doug Winter (2008): "The 1842-C is one of the rarest quarter eagles from this mint. It is also one of the rarest coins of any denomination produced in Charlotte." Partial mint luster remains within the protected areas of the typically impressed design features, and light orange-gold color blankets each minimally marked side. Of the original 6,729-coin mintage, CoinFacts estimates that only 115 pieces survive in all grades. Census: 9 in 55, 11 finer (7/14). NGC ID# 25GH, PCGS# 7724

1844-C Quarter Eagle, AU50
Scarce Charlotte Mintmark

3351 **1844-C AU50 NGC. Variety 1.** Light green-gold paints each side of this lightly circulated Charlotte Mint product. From a mintage of 11,622 pieces, large quantities of 1844-C quarter eagles enjoyed commercial usage, making the issue scarce above Extremely Fine condition. The design features are typically struck with shallowness over Liberty's curls, the stars, as well as the eagles's wingtips and claws. The legends and most dentils, however, appear sharp. Abrasions are lightly scattered, but none are singularly distracting. Winter estimates that 21 to 24 coins survive in AU and only four to six pieces are extant mint condition. NGC ID# 25GU, PCGS# 7735

1861 Type Two Quarter Eagle, MS66
One Finer at NGC and PCGS Combined

3352 **1861 New Reverse, Type 2 MS66 NGC.** Old Reverse examples are substantially scarcer in absolute terms, however, the Premium Gem here offered is a significant condition rarity. NGC has seen just six submissions in MS66 and not a single coin finer (7/14). This remarkably preserved, Registry-quality representative features razor-sharp design definition with full radial lines on the stars. The surfaces show attractive yellow-gold color and pale rose accents. NGC ID# 25JX, PCGS# 7794

1875-S Two and a Half, MS62
Conditionally Rare S-Mint Issue

3353 **1875-S MS62 NGC.** A paltry total of 400 P-mint quarter eagles applies significant pressure to the 11,600 coins struck in San Francisco in 1875. Examples from this scarce date are usually found well-worn, and Uncirculated pieces such as this are rare. Swirling luster and orange-gold color characterize the surfaces, while the devices show strong definition overall. Only the date and the eagle's left (facing) leg are a trifle incomplete. Census: 8 in 62, 1 finer (7/14). NGC ID# 25KT, PCGS# 7823

1882 Quarter Eagle, MS65
Fully Prooflike, Cameo Contrast

3354 **1882 MS65 PCGS.** A scant mintage of just 4,000 business strike quarter eagles was produced in 1882, and Mint State survivors are seldom seen, especially at the Gem grade level. This piece appears to have been one of the first coins struck, as the fields are so deeply mirrored and the devices are so frosty that at first glance the coin appears to be a proof. A lack of any surface flaws and warm honey-gold color further heighten the immense visual appeal. Population: 8 in 65, 2 finer (7/14). NGC ID# 25L6, PCGS# 7834

1893 Quarter Eagle, MS66
Surprising Condition Rarity

3355 **1893 MS66 PCGS.** Exceptionally clean, frosted surfaces display intense orange-gold toning with olive and lilac highlights, making this Premium Gem example extra appealing. The strike is bold throughout. With a mintage rivaling several of the more-common later dates in the series, high-grade Mint State pieces are surprisingly rare for the issue. This example is one of the few coins PCGS has seen in MS66 condition, and just one example is listed numerically finer. Population: 20 in 66, 1 finer (7/14). NGC ID# 25LH, PCGS# 7845

1898 Two and a Half, MS66+
Sharp, Deeply Frosted Appeal

3356 **1898 MS66+ PCGS. CAC.** A thick coating of mint frost creates the satinlike, softly lustrous appeal of this fully struck quarter eagle. Just 24,000 pieces were struck for the date, and although considered "common" for type, it is nowhere close to common in this condition. PCGS has awarded just two coins the Plus designation for high quality — the upper end of the Premium Gem grade. Population: 37 in 66 (2 in 66+), 9 finer (7/14). NGC ID# 25LN, PCGS# 7850

1903 Quarter Eagle, Vibrant MS67+
An Ideal Type Coin

3357 **1903 MS67+ PCGS. CAC.** The 1903 quarter eagle, from a production of 201,060 pieces, is one of the most common dates of the Liberty Head series. PCGS and NGC have graded thousands of examples through Gem condition, and even Premium Gems have a certified population approaching 600 specimens. It is only at the MS67 level that this issue becomes challenging.

The yellow-gold surfaces of this high-end Superb Gem radiate vibrant luster and exhibit boldly struck design elements. Impeccable preservation rounds out the coin's superior eye appeal, helping to account for the CAC endorsement. This is an ideal type coin for a high-grade collection. Population: 65 in 67 (2 in 67+), 0 finer (7/14). NGC ID# 25LU, PCGS# 7855

PROOF LIBERTY QUARTER EAGLES

1894 Liberty Quarter Eagle, PR66
Rare Example With Ultra Cameo Surfaces

3358 **1894 PR66 Ultra Cameo NGC.** A moderate mintage of 122 proof Liberty quarter eagles was achieved in 1894, and the survival rate was relatively high. Perhaps 50-70 examples survive today in all grades, but an unusually large percentage of survivors show signs of circulation. Jeff Garrett and Ron Guth estimate 25% of the coins offered at public auction in recent years have been mishandled. In addition, several specimens are impounded in institutional collections. The 1894 is definitely a rare issue at the Premium Gem grade level, with the Ultra Cameo designation.

The present coin is a delightful Premium Gem, with impeccably preserved yellow-gold surfaces and razor-sharp definition on all design elements. The deeply mirrored fields contrast profoundly with the frosty devices to produce a dramatic cameo effect. Overall eye appeal is terrific. Census: 7 in 66 Ultra Cameo (1 in 66+ Ultra Cameo, 1 in 66 ★ Ultra Cameo), 9 finer (7/14). NGC ID# 288H, PCGS# 97920

1898 Quarter Eagle, PR66 Deep Cameo
A Stunning Representative

3359 **1898 PR66 Deep Cameo PCGS.** The Philadelphia Mint struck 165 quarter eagle proofs in 1898, of which 110 are estimated to survive today in all grades, according to CoinFacts. PCGS has certified 66 proofs, and just 28 have been awarded the Deep Cameo designation. Of those 28 coins, five examples are in PR66 (one in 66+) and only seven are finer (7/14). The majority of these coins are tightly held, understandably so, and any opportunity to acquire one should not be missed.

This is a stunning representative with remarkable contrast. The thickly frosted devices appear suspended over reflective jet-black fields, imparting vivid visual appeal to each side. The surfaces are essentially pristine and a loupe reveals only a few minute wispy marks. NGC ID# 288M, PCGS# 97924

1898 Quarter Eagle, PR66 Ultra Cameo
Exceptional, Impressive High-Grade Example

3360 **1898 PR66 Ultra Cameo NGC. CAC.** According to the *Encyclopedia of U.S. Gold Coins 1795-1933* (Garrett and Guth, 2008): "Although the number of examples offered at auction in the last two decades is on the high side, many of the coins are mishandled pieces. Just six or seven choice coins have been sold. The population numbers are also highly inflated by resubmissions. It can be estimated that only 35 to 40 coins remain in all states of preservation."

The beauty of this example is undeniably great, and the technical attributes of the piece are also noteworthy. The razor-sharp strike definition is essentially full on both sides. Tremendous deep-mirror reflectivity sparkles in the fields and the surfaces overall seem distraction-free and nearly as struck. Some unusual die chips are noted near and within the letters of STATES, as well as RICA, but these mint-made elements are not of any great significance. Census: 10 in 66 Ultra Cameo (1 in 66+ Ultra Cameo), 22 finer (7/14).
From The Pannonia Collection. NGC ID# 288M, PCGS# 97924

1901 Two and a Half, PR64 Cameo
Only One Piece Finer at PCGS

3361 **1901 PR64 Cameo PCGS.** Despite a mintage of only 223 proofs, this issue claims the highest production figure in the entire proof Liberty quarter eagle series. As the Cameo designation suggests, this gorgeous near-Gem demonstrates bold contrast between the deeply mirrored fields and frosty devices. The surfaces offer rich yellow-gold color with reddish accents. Population: 7 in 64 Cameo, 1 finer (7/14).
From The Valley View Life Collection, Part Two. NGC ID# 288R, PCGS# 87927

1906 Quarter Eagle, PR64 Cameo
Excellent, Late-Date Type Issue

3362 **1906 PR64 Cameo PCGS. CAC.** The Mint abandoned the polishing of devices on proof gold after 1903. While a short-lived experiment, the resumption of contrasted surfaces only allowed a few short years for collectors to acquire a proof Liberty quarter eagle before Pratt's Indian design was adopted in 1908. The official mintage for the 1906 was 160 proofs, and there seems to be a higher-than-usual number of survivors for this date. This is a spectacularly deep cameo that has a slight reddish tint to the otherwise yellow-gold color. Close examination with a loupe reveals a few faint hairlines, but there are no singular contact marks worthy of mention on either side. The intense golden patina is outstanding. Population: 7 in 64 Cameo, 16 finer (7/14).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4677. From The Pannonia Collection. NGC ID# 288W, PCGS# 87932

1907 Quarter Eagle, PR63 Cameo
Conditionally Scarce Final Year of Type

3363 **1907 PR63 Cameo PCGS.** The fantastic sharpness of detail exhibited by this pretty coin should be seen with the coin in-hand, in order to fully appreciate the crisp outlining and deep impression of every design feature. An elaborate, lariat-like lint mark resides on the left reverse field, between the eagle's wing and TED. The richly frosted, golden devices are beautifully contrasted over the watery, jet-black fields. A great coin with tremendous visual appeal. One small contact mark, on Liberty's cheek, limits the grade. Population: 3 in 63 Cameo, 29 finer (7/14). NGC ID# 288X, PCGS# 87933

INDIAN QUARTER EAGLES

1908 Indian Quarter Eagle, MS66
High-End Type Representative

3364 **1908 MS66 PCGS.** While certainly not the most plentiful from an absolute standpoint (that honor goes to the 1925 and later issues), the 1908 quarter eagle is the most easily obtainable in MS66 condition, making this first-year issue ideal for type purposes. This example is remarkably well-preserved, as the grade suggests, and displays shimmering green-gold luster. The eagle's wing is softly defined, an effect of poor engraving of the die and not striking pressure. This characteristic was corrected on the 1909 dies. PCGS has seen just two numerically finer representatives (7/14). NGC ID# 288Y, PCGS# 7939

1908 Indian Head Quarter Eagle
First-Year Premium Gem

3365 **1908 MS66 PCGS.** First-year production issues faced the new Indian Head design when the Philadelphia Mint struck 564,800 quarter eagles. Improper die preparation resulted in some softness on the eagle's shoulder and wing. This Premium Gem demonstrates the weakness on the wing, but is sharply struck otherwise and the sunken design elements are sharp and attractive. Peach-gold surfaces display frosted luster and orange accents over the multilevel devices. Seldom seen any finer, with just five examples in a higher numeric grade by PCGS and NGC combined (7/14). NGC ID# 288Y, PCGS# 7939

1908 Indian Quarter Eagle, MS66
Excellent First-Year Type Coin

3366 **1908 MS66 NGC.** The innovative incuse Indian design was introduced in 1908, making the issue an important one for type purposes. The 1908 is scarce at the MS66 grade level, and finer coins are virtually unobtainable. The obverse design elements of this delightful Premium Gem are sharply detailed, but the detail on the eagle's wing is softly rendered, due to some incompleteness in the die. The well-preserved greenish-gold surfaces radiate vibrant mint luster and eye appeal is terrific. NGC has graded three numerically finer examples (7/14). NGC ID# 288Y, PCGS# 7939

1911-D Quarter Eagle, AU58
Attractive Key-Date Example

3367 **1911-D AU58 NGC.** Bold mintmark. The 1911-D is the cornerstone issue in Bela Lyon Pratt's quarter eagle series because of its low mintage (55,600 coins). This near-Mint example boasts honey-gold surface coloration with rose accents. Slight friction occurs over otherwise strongly defined devices, and partial luster remains in the recesses. NGC ID# 2894, PCGS# 7943

1911-D Indian Two and a Half, MS60
Strong D Example

3368 **1911-D MS60 NGC.** Strong D. With the lowest mintage of the series (only 55,600 coins), the 1911-D is the most sought-after Indian quarter eagle. Two varieties are known, differentiated by the clarity of the mintmark, and while the Weak D variety is scarcer, the Strong D variety is more desirable among date collectors. This example exhibits well-struck devices and even yellow-gold patina. Scattered abrasions define the grade, but none are individually distracting. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS60
Eye-Appealing for the Grade

3369 **1911-D MS60 NGC.** Far more eye appeal is evident here than the grade might imply, for collectors who want a technical Mint State example rather than a AU or near-Mint piece. The surfaces are well-struck on this key date, and attractive orange-gold color is present, but a couple of dark planchet voids are present, clearly as made at the Mint. Minor ticks appear on the Indian's cheek, not overt. NGC ID# 2894, PCGS# 7943

1911-D Indian Quarter Eagle, MS61
Popular Series Key

3370 **1911-D MS61 NGC.** A desirable Mint State bold D specimen, this coin exhibits a sharp strike and light khaki-gold surfaces. Although a few tiny scattered marks are present, there are none worthy of individual mention on this lovely piece representing the key date 1911-D quarter eagle. The 1911-D mintage consisted of a mere 55,680 coins. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS62
The 'Strong D' Variant

3371 **1911-D MS62 PCGS. CAC.** Strong D. This is a pleasing lower-grade Mint State example of this key-date Indian quarter eagle, with a bold strike, rich green-gold color, and surprisingly few surface abrasions. The Denver Mint struck only 55,600 examples, and survivors draw strong collector demand in all grades. NGC ID# 2894, PCGS# 7943

1911-D Indian Quarter Eagle, MS63
Low-Mintage Series Key

3372 **1911-D MS63 PCGS. Strong D.** The 1911-D is the rarest Indian half eagle in absolute terms, from a series-low mintage of 55,680 pieces. Long acknowledged as the key to the series, the issue is always in demand from 20th century gold collectors. Examples in lower Mint State grades can be located with patience, but the 1911-D becomes scarce at the MS63 level.

This attractive Select example displays light orange-gold surfaces with a few highlights of green. Both sides show a few minor contact marks with strong mint luster throughout. The design elements are sharply detailed and the all-important mintmark is boldly rendered. NGC ID# 2894, PCGS# 7943

1911-D Indian Half Eagle, MS63
In-Demand Key Date

3373 **1911-D MS63 NGC.** The purchaser of this Select 1911-D quarter eagle will be well on his/her way to completion of a complete Indian Head set of the denomination, as the 1911-D is the sole key to the series, both an absolute and conditional rarity. Struck to the extent of only 55,600 pieces, the 1911-D was a rarity virtually from the day it was struck. This Select Mint State example will benefit any set in which it resides, showing glowing orange-gold coloration with a bold strike and mintmark (especially important). A tiny tick under the chieftain's eye and two small reeding marks on the reverse are the only mentionable signs of contact. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS65
Undisputed Series Key

3374 **1911-D MS65 NGC.** The late Paul M. Green turned his attention to the 1911-D quarter eagle in his "Item of the Week" column for the edition of *Numismatic News* dated September 17, 1996. He begins with a simple assertion: "Key-date gold coins are often overlooked and underpriced." He continues by noting that while the various copper and silver series, particularly more modern ones, are accessible to a broad range of collectors, gold coinage demands a substantial budget. Green does highlight the Indian quarter eagle series, however, as a potential exception. It is short, and in his words, "supplies of all dates from the Indian Head quarter eagles ... are ample with the exception of one."

Then this:

> "In all cases the single exception is the 1911-D. The 1911-D had a total mintage of 55,680 pieces, making it far and away the lowest production date of that type. It had not become any more common over the years. It always has, and always will be the key date in the Indian Head quarter eagle set. Its prices routinely run four or five times higher than the prices of common dates. None question that it is the key date to the set and worth the price."

The intervening years have widened the gap between the 1911-D quarter eagle and its peers, validating Green's assertions from 1996. The 1911-D is rarely encountered in Gem condition, in large part because of the way these coins were designed. The sunken relief places the fields as the high points, and extreme care had to be taken so they were not abraded. This is a truly impressive example that shows clear fields, the only exception being a short diagonal mark on the reverse above and to the left of the motto. Light, even reddish-gold color is seen over each side. The diagnostic partial wire rim is easily seen on the right side of the obverse. The striking details are sharp, but not quite fully brought up on the lowest feather in the headdress. Census: 76 in 65 (2 in 65+, 1 in 65 ★), 2 finer (7/14).

Ex: Long Beach Signature (Heritage, 2/2010), lot 1514.

From The Pannonia Collection. NGC ID# 2894, PCGS# 7943

1914 Quarter Eagle, Well-Struck MS64+
Challenging Any Finer

3375 **1914 MS64+ PCGS.** Pleasing luster emanates from both sides of this high-end near-Gem, each of which displays soft reddish-gold patina that assumes slightly deeper hues on the reverse. The design features are well-struck, including the eagle's shoulder feathers. A few minuscule marks are of little consequence. As-made die scratches are visible through UNUM. The 1914 is challenging to locate any finer, as PCGS has graded only 58 pieces higher and NGC 47 better (8/14). NGC ID# 2898, PCGS# 7946

THREE DOLLAR GOLD PIECES

1854 Three Dollar Gold, Lustrous MS64
Upper-End for the Grade

3376 **1854 MS64 PCGS. CAC.** Shimmering yellow-gold luster encompasses each side of this sharply struck near-Gem type representative. Surface abrasions are at a minimum, with the overall eye appeal being unusually high for the grade level. The 1854 had the highest mintage of the series (more than 138,000 coins), but PCGS has certified only 33 survivors that are numerically finer than the present example (7/14). NGC ID# 25M3, PCGS# 7969

1854-O Three Dollar Gold, AU50
Sole O-Mint Issue of the Denomination

3377 **1854-O AU50 NGC. Variety 2.** The 1854-O had a small mintage of only 24,000 pieces, and ranks as the only three dollar gold piece struck at the New Orleans facility. The issue is moderately available in lower circulated grades, but Mint State pieces are rare in any condition. This pleasing AU representative shows signs of heavy die polishing in the obverse legend and lower reverse wreath, not uncommon for the issue, but actual wear is minimal. The surfaces are pleasingly clean and display original green-gold color. NGC ID# 25M5, PCGS# 7971

1859 Three Dollar, MS64
Lustrous and Semireflective

3378 **1859 MS64 PCGS.** The 1859 three dollar gold, struck to the extent of 15,558 pieces, would be considered a low-mintage emission in most U.S. coin series, but in the context of three dollar issues, it is a rather moderate mintage — especially given the minuscule productions that would occur toward the end of the series. This 1859 three is better-defined than usually seen. The characteristic "swirl" of luster is present but softer than usual, offset by semireflectivity in the fields. Yellow-gold surfaces show touches of orange at certain angles and glimpses of blue at others. An eye-appealing near-Gem. Population: 16 in 64 (1 in 64+), 8 finer (7/14). NGC ID# 25MD, PCGS# 7979

1860 Three Dollar Gold, MS63
Low-Mintage, Early Issue

3379 **1860 MS63 PCGS.** Unlike many later dates in the three dollar gold series, the 1860 seems to have circulated extensively at the time of issue. As a result, the date is even more difficult to locate than the small mintage of 7,036 pieces suggests. An attractive Select example, this coin displays well-detailed design elements with just a touch of softness on the ribbon bow. The lustrous surfaces are free of large or distracting surface marks. Population: 17 in 63, 18 finer (7/14). NGC ID# 25ME, PCGS# 7980

1863 Three Dollar, AU55
A Perennially Popular Issue

3380 **1863 AU55 PCGS.** The 1863 three dollar saw a low production of 5,000 pieces. This along with the important Civil War date makes this issue highly popular among some collectors. The honey-gold surfaces of this Choice AU specimen show luster residing in the protected areas, and the design elements are well-detailed despite high-point wear. A few light contacts are not serious. This issue is typically clashmarked on both sides, and the present coin is no exception. Population: 38 in 55, 56 finer (7/14). NGC ID# 25MJ, PCGS# 7984

1878 Three Dollar Gold, MS64+
Excellent Type Coin

3381 **1878 MS64+ PCGS.** With a reported mintage of 82,304 pieces, the 1878 three dollar gold piece is one of the most available dates of the series. High-end Choice examples, like the present coin, are always in demand from type collectors. This well-detailed specimen exhibits a touch of softness on the central devices, with vibrant satiny mint luster and only minor signs of contact. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, Lustrous MS64

3382 **1878 MS64 NGC. CAC.** This is a popular emission among type collectors because of its relatively high mintage (82,304 coins) and survival rate in Mint State. The lower-wreath features bold definition on the leaves and bow, as do Liberty's headdress plumes and hair curls. Each carefully preserved side is awash in frosty luster and rose-gold coloration. Strong eye appeal. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS64+
Good for Type

3383 **1878 MS64+ PCGS. CAC.** With the anticipation of parity between gold and paper currency, the Mint struck an inordinate number of three dollar coins with the expectation of impending demand. However, the demand never materialized and most of the 82,304 coins were stored away in vaults. This appealing near-Gem features coruscating luster that illuminates green- and rose-gold surfaces. Availability in high grades makes this an ideal type representative. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS65
Lustrous Type Representative

3384 **1878 MS65 PCGS. CAC.** Struck to the extent of 82,304 pieces (a substantial sum for the series), the 1878 three dollar gold piece is the oft-selected date to represent the type. Shimmering, frosty luster and rich orange-gold color provide this example with outstanding eye appeal, while the lack of any mentionable surface abrasions confirms the high technical quality demanded by the MS65 grade level. Conditionally finer examples are elusive. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar Gold, MS62
Only 3,000 Examples Struck

3385 **1879 MS62 PCGS.** The dollar gold piece production plummeted in 1879 to just 3,000 coins (down from 82,304 pieces the year before), but enough were saved by dealers and speculators that Mint State examples are moderately collectible today. This piece shows bold design definition and substantial prooflike mirroring in the fields, not uncommon for examples of a low-mintage issue. Scattered abrasions contribute to the technical grade, but warm honey-gold luster delivers a pleasing degree of eye appeal. NGC ID# 25N2, PCGS# 8001

1881 Three Dollar Gold, MS64
Only One Finer at PCGS

3386 **1881 MS64 PCGS. CAC.** The appeal of the 1881 three dollar issue begins and ends with the mintage: just 500 business strikes. The paltry number gives the date instant appeal in any grade, though it is more accessible than earlier rarities at the various Mint State levels. This is an attractive MS64 coin that adds condition rarity to the low-mintage appeal. Semireflective fields are pale yellow-gold and offer slight contrast with the subtly frosted texture of the well-defined devices. The coin is minimally marked and would make an excellent addition to a specialized series collection. Population: 6 in 64, 1 finer (7/14).
From The Pannonia Collection. NGC ID# 25N4, PCGS# 8003

1883 Three Dollar Gold Piece, MS62
Only 900 Business Strikes Minted

3387 **1883 MS62 PCGS.** This is one of few regular issue U.S. gold coins that had a three-digit business strike mintage, just 900 coins. Even with the additional 89 proofs, the total production was less than 1,000 coins. The example offered here is an attractive Mint State piece with the reflective yellow-gold surfaces typical of nearly every survivor. Faint hairlines and minuscule marks define the grade. Population: 36 in 62, 56 finer (7/14). NGC ID# 25N6, PCGS# 8005

1885 Three Dollar, AU58
Just 801 Coins Struck

3388 **1885 AU58 PCGS.** A well-known date for its low mintage of only 801 coins, all of which were delivered in March 1885. This near-Mint example offers deep orange-gold coloration and a prooflike appearance, characteristic of the issue. The headdress plumes, Liberty's hair, and the reverse wreath show a typically sharp strike with minor friction. Wispy marks are lightly scattered over each side. *From The Valley View Life Collection, Part Two.* NGC ID# 25N8, PCGS# 8007

1886 Three Dollar, MS62
Rare any Finer

3389 **1886 MS62 PCGS.** The dies previously used to strike proofs were delivered on December 10th and the 1,000-coin mintage was delivered later that month. Consequently, distinguishing between proofs and business strikes proves difficult. Such is the case with this orange-gold example, featuring undeniable prooflike reflectivity and a sharp strike. A few grade-consistent marks occur throughout. Population: 23 in 62 (1 in 62+), 13 finer (7/14). *From The Valley View Life Collection, Part Two.* NGC ID# 25N9, PCGS# 8008

1888 Three Dollar Gold, MS66
Lustrous, Colorful Example

3390 **1888 MS66 PCGS. CAC.** While mintages for three dollar gold coins had been all but nominal in the years after 1878, the issues of 1887 and 1888 had significantly higher mintages — 5,000 pieces in the case of the latter date — which suggests at least a hint of elevated demand. By 1889, though, the denomination was back to irrelevance (and soon to be eliminated by coinage legislation).

This Premium Gem hails from the penultimate year, a well-struck example with swirling and dynamic luster. Yellow, orange-gold, and peach shadings mingle on each side, and copper-red elements are present along the reverse rims. Housed in a green label holder. PCGS has graded only two coins numerically finer (7/14). NGC ID# 25NB, PCGS# 8010

1889 Three Dollar Gold, MS63
Low-Mintage Final Issue

3391 **1889 MS63 PCGS.** The unpopular three dollar gold denomination was discontinued after 1889 with a small mintage of 2,300 pieces. Peach-gold and apricot patina resides on the lustrous surfaces of this Select specimen that exhibits well impressed design elements. A few scattered marks do not detract.. NGC ID# 25NC, PCGS# 8011

1860 Three Dollar Gold Piece, PR67
Rare Early Proof Gold Issue
Finest Certified Cameo Example

3392 **1860 PR67 Cameo NGC.** The official mintage figures for the three earliest wide-release proof three dollar gold issues — the 1859, 1860, and 1861 — are likely gross mintages rather than net; in the example of the 1860 proof, Garrett and Guth write that despite a stated mintage of 119 pieces, "the true mintage is probably somewhere between 40 and 60 Proofs." That figure is more in line with stated production figures from 1862 to 1864, which ranged 35 to 50 pieces.

The authors make further relevant notes about the 1860 three dollar gold proof, stating that on average, "this date appears at auction less than once a year." Early collectors prized the lower denomination gold issues but most found it too expensive to systematically collect contemporary eagles and double eagles. As a result, gold proof sets were frequently broken up, with owners retaining the lower denominations and disposing of the tens and twenties for a nominal profit, or just spending the larger coins. The 1860 Three dollar gold piece began appearing individually at auction at an early date, with a typical description appearing in lot 452 of the Catalogue of Coins and Medals (Edward Cogan, 9/1869), "1860 Three Dollar piece; beautiful Proof and scarce." The coin sold for a respectable $6, not bad for a coin that was less than ten years old at the time. Recent sales include the prior appearance of the present coin in our April 2011 Central States Signature Auction, Where it realized $83,375.

The mirrors on each side of this Premium Gem specimen have intense sun-yellow color that borders on orange, while the devices show a distinctly lighter tone in addition to their ample frost. The strike is crisp as expected, and though a few tiny lint marks and other imperfections are present (such as a small depression near 3 o'clock on the reverse), the surfaces are carefully preserved overall, with only minor clouding and other flaws precluding an even finer designation. Census: 1 in 67 Cameo, 0 finer (7/14).
Ex: FUN 2005 (Heritage, 1/2005), lot 30433; Central States Signature (Heritage, 4/2011), lot 5364, realized $83,375. NGC ID# 289Y, PCGS# 88023

Outstanding 1882 Three Dollar Gold PR65 ★ Ultra Cameo, Finest Certified

3393 **1882 PR65 ★ Ultra Cameo NGC.** The three dollar proofs of 1882 had a mintage of only 76 pieces. They were apparently saved in relatively large numbers, as NGC and PCGS have graded 77 specimens, some of which are surely resubmissions. The two services, however, have seen just three Ultra/Deep Cameos, with the current Gem the finest of the three. Moreover, this particular coin is the only 1882 three dollar assigned NGC's coveted Star designation.

Beautiful brass-gold color adorns both sides, each of which projects outstanding field-motif contrast. A powerful strike manifests itself in crisp delineation on the design features, and both faces are impeccably preserved. A tiny, inoffensive toning spot above the 1 in the date may well preclude an even higher numerical grade. The technical quality and aesthetic appeal of this specimen cannot be stressed enough. Census: 1 in 65 Ultra Cameo (1 in 65 ★ Ultra Cameo), 0 finer (7/14).
From The Pannonia Collection. NGC ID# 28AR, PCGS# 98046

1884 Three Dollar, PR65 Ultra Cameo Ex: Reed, Just 106 Proofs Issued

3394 **1884 PR65 Ultra Cameo NGC.** Ex: Reed. An outstanding Gem with smooth sun-gold fields and a virtually full strike. Only the field near the U in UNITED retains a hint of the planchet texture. The low mintage 1884 has a mintage of just 1,000 business strikes and 106 proofs. Some of the proofs were eventually mishandled, since PCGS has certified seven pieces as PR58. Specimens with prominent contrast comprise only a small portion of the issue. NGC has certified just five examples as Ultra Cameo, and PCGS has graded six pieces as Deep Cameo, with some resubmissions likely over the past 15 years. Census: 3 in 65 Ultra Cameo, 1 finer (7/14).
Ex: Byron Reed Collection (Christie's, 10/1996), lot 92.
From The Pannonia Collection. NGC ID# 28AT, PCGS# 98048

1795 Small Eagle Five, BD-4, AU55
Choice Early Type Representative

3395 **1795 Small Eagle AU55 NGC. BD-4, R.5.** Bass-Dannreuther Die State d/a, with a thin die crack from the rim, through star 12, and slightly into the field. This is the third and final use of this obverse die, and the only use of this reverse, which is seen here in an early state. BD-4 is one of the more often seen of the 12 varieties for the 1795 Small Eagle half eagle, but it still ranks as R.5 in all grades. John Dannreuther notes, *Early U.S. Gold Coin Varieties:*

> "When discussing the availability of these early gold coins, it must be remembered that it is relative, as the number in existence for this variety likely is fewer than 75. Most series would consider a coin with fewer than 75 known quite a rarity — among early half eagles, it is considered available!"

This Choice AU representative retains tinges of luster in the recesses, while yellow-gold patina encompasses each side. Light high-point wear on the central devices accounts for the grade, though the surfaces exhibit only minor consequential abrasions. Overall, this is a pleasing example of this early Small Eagle type. NGC ID# 25ND, PCGS# 8066

1798 Half Eagle, AU53
Elusive Heraldic Eagle, Large 8, BD-5

3396 **1798 Large Eagle, Large 8, 13 Star Reverse AU53 NGC. BD-5, High R.5.** Bass-Dannreuther Die State c/b. A respectable mintage of 24,867 Capped Bust Right half eagles was produced in 1798. Eight die varieties are known for the date, one with the old Small Eagle reverse and seven with the Heraldic Eagle motif. This coin represents the Heraldic Eagle BD-5 variety, with a large 8 in the date and the reverse stars arranged in a perfect cross pattern. The BD-5 is a scarce-to-rare variety with a surviving population of just 30-40 examples in all grades. The BD-5 probably accounted for 2,250-3,250 pieces of the reported mintage. This was the only use of the obverse die, but the reverse was employed again to strike the 1799 BD-2 variety.

The present coin is an attractive AU53 example, with well-detailed design elements that show a touch of the always seen softness on the centers. Harry Bass noted this issue was , "Shallowly hubbed or lapped." A long obverse die crack is evident from star 7 across the bust to 8 in the date, with another in the field below ER in LIBERTY. The lightly abraded greenish-gold surfaces retain considerable amounts of original mint luster. NGC ID# 25NN, PCGS# 8078

1799 Half Eagle, Rare BD-1, AU55
Small Stars Reverse

3397 **1799 Small Stars Reverse AU55 NGC. BD-1, High R.5.** Bass-Dannreuther Die State b/d, with the reverse die crack extending through the eagle's beak and down into the shield; the obverse die crack along the bottom of stars 10 through 13 has not yet formed. This is the first and only use of this obverse die, but this tail die was previously used to strike the BD-8 variety of the 1798 half eagle, when it was heavily clashed. As a result, this 1799-dated coin exhibits the faint silhouette of the 1798 date on the upper reverse, as transferred from the reverse's earlier usage. A pleasing example of this rare variety, this piece exhibits nearly complete detail on each side, with minimal surface distractions. Bright yellow-gold patina blankets each side, giving this coin a pleasing level of eye appeal. Census: 10 in 55, 34 finer (7/14). NGC ID# 25NT, PCGS# 8081

1800 Capped Bust Right Half Eagle, AU55
Blunt 1, BD-5 Variety

3398 **1800 AU55 PCGS. CAC. BD-5, High R.3.** Bass-Dannreuther Die State d/a. Mintage of half eagles increased dramatically in 1800 to a substantial 37,628 pieces. Five die varieties are known for the date, four with a Blunt 1 in the date and one with a Pointed 1. This coin represents the BD-5 variety, with a Blunt 1 and both feet of the final A in AMERICA touching the eagle's claw. The BD-5 variety has a surviving population of 175-250 examples in all grades and probably accounts for 7,500-12,500 pieces of the reported mintage. The obverse die was used to strike all four Blunt 1 varieties of the date, but this was the only use of the reverse.

The present coin is a lightly worn Choice AU specimen, with a scattering of minor abrasions and a minor obverse rim bruise at 6 o'clock. The pleasing orange-gold surfaces retain traces of original mint luster. This attractive representative will be a welcome addition to a fine collection of early gold. NGC ID# 25NW, PCGS# 8082

1802/1 Half Eagle, AU58
Scarce BD-2 Example

3399 **1802/1 AU58 PCGS. BD-2, High R.4.** Bass-Dannreuther Die State b/c. The 1802/1 Capped Bust Right half eagle claims a large mintage for the series, at 53,176 pieces. Eight die varieties are known for the date, all produced using two overdated obverse dies from 1801 paired with seven different reverse dies. This coin represents the very scarce BD-2 variety with a surviving population of 75-100 examples in all grades. The BD-2 probably accounted for 5,000-7,500 pieces of the reported mintage. This obverse die was used to strike five different varsities of the date, but the reverse developed a cud and was only used on this variety.

The present coin offers well-detailed design elements with a trace of wear on the high points. The light orange-gold surfaces are lustrous, with a scattering of minor abrasions and the reverse shows the lump break above the wing that identifies the late die state. A cud above OF is partially obscured by the holder. NGC ID# 25NX, PCGS# 8083

1803/2 Five Dollar, AU50
BD-4, Superior Strike Detail

3400 **1803/2 AU50 PCGS. BD-4, R.4.** Bass-Dannreuther Die State d/c. A cud occurs below much of the date. Mint official employed dies from 1802, resulting in the popular overdate variety. Two obverse dies were used, and this coin shows the only one with full serifs on the T in LIBERTY. The surfaces exhibit splendid light green-gold color and a significantly sharper strike than is typically encountered. Each side shows a few wispy marks that do not overly detract.
From The Valley View Life Collection, Part Two. NGC ID# 25NY, PCGS# 8084

1803/2 Five, AU Details
BD-4, A Collectible Representative

3401 **1803/2 — Mount Removed — NGC Details. AU. BD-4, R.4.** Bass-Dannreuther Die State b/c. This early half eagle exhibits bright yellow-gold surfaces and pleasing AU Details. As noted on the holder, the rims show evidence of removal from a mount, particularly on the reverse. Wispy hairlines appear on each side and a small reeding mark occurs on Liberty's cheek. Nevertheless, this is a collectible example of Robert Scot's Capped Bust Right, Heraldic Eagle Reverse design.

1803/2 Half Eagle, AU55
BD-4, A Nice Unimpaired Example

3402 **1803/2 AU55 NGC. BD-4, R.4.** Bass-Dannreuther Die State c/c. A die crack appears at the base of the date and extends nearly to star 1, though it is faint. This date is popular for a number of reasons. All coins feature a prominent overdate with a 2 clearly visible beneath the 3 from the reuse of 1802 dies. In addition, although its mintage is lower than other issues (33,506 coins), it does claim a substantial number of certified examples and is often found in type specialists' collections.

This is a beautiful and unimpaired Choice About Uncirculated coin that displays reddish-gold coloration throughout. The surfaces are uniformly struck with just one area of softness over the eagle's neck. This lightly circulated representative shows minimal abrasions and is free of any adjustment marks. NGC ID# 25NY, PCGS# 8084

1804 Half Eagle, AU Details
Small 8 Over Large 8, BD-6

3403 **1804 Small 8 Over Large 8 — Ex-Jewelry, Cleaning — ANACS. AU Details, Net AU50. BD-6, R.5.** Bass-Dannreuther Die State a/b. Variety BD-6 features a small 8 over large 8 and a large 4 in the date. The upright over the E in STATES is positioned to the left over the break in the clouds. The obverse is free of clashing, die cracks, and lapping, while the reverse shows numerous die cracks and clash marks. Light green-gold colors each side of this sharply struck representative. The noted cleaning is not overly distracting and the edges are minimally affected by the coin's removal from jewelry. *From The Valley View Life Collection, Part Two.* NGC ID# 25NZ, PCGS# 8086

1805 Capped Bust Five, MS61
Scarce BD-2 Variety

3404 **1805 MS61 NGC. BD-2, R.4.** Bass-Dannreuther Die State d/a. A substantial mintage of 33,183 Capped Bust Right half eagles was accomplished in 1805, with five die varieties known for the date. This coin represents the BD-2 variety, with a perfect 1 in the date and the leaf free of the I in AMERICA. The BD-2 is a scarce variety, with a surviving population of 100-150 examples in all grades. The obverse die was used previously to strike the BD-1 variety of this date, while the remarkable reverse was used on the three following varieties of 1805 and the BD-1 variety of 1806.

The present coin retains much of its original mint luster and the pleasing antique-gold surfaces are lightly abraded. The design elements are sharply detailed and a die break shows on the obverse through the 0 in the date and the bust. A few faint traces of planchet adjustment marks are visible with magnification on the upper reverse. Census: 24 in 61 (2 in 61+), 85 finer (7/14). NGC ID# 25P4, PCGS# 8088

1810 Five, Bold AU58
Small Date, Tall 5, BD-1

3405 **1810 Small Date, Tall 5 AU58 PCGS. BD-1, High R.3.** Bass-Dannreuther Die State c/c. Diagnostic rust lumps on each side. In *Early U.S. Gold Coin Varieties* (2006), John W. Dannreuther explains that this variety must "have been struck on at least two occasions, as the dies are both found without and with rust lumps. This indicates that there was a production run, the dies were removed and improperly stored, and then they were used again for other production."

This near-Mint Capped Bust Left half eagle is beautifully preserved. The yellow-gold surfaces show occasional green and reddish tints and significant luster remains. The devices appear sharply impressed throughout with only trivial friction over the high points preventing an Uncirculated designation. Population: 12 in 58, 44 finer (7/14).

From The Valley View Life Collection, Part Two. NGC ID# 25PE, PCGS# 8106

1810 Half Eagle, AU58
Large Date, Large Five, BD-4

3406 **1810 Large Date, Large 5 AU58 NGC. BD-4, R.2.** Bass-Dannreuther Die State a/a. No die cracks or clash marks occur on either side. The nomenclature associated with the Large 5 variety has caused confusion among even the most prominent numismatists like Newcomer and Breen. Harry Bass was correct to refer to it as a Fat or Squat 5. Regardless, this partially lustrous, near-Mint example shows light green- and yellow-gold surfaces with well-struck devices and lightly scattered marks throughout. This variety's relative availability makes it excellent for type purposes. NGC ID# 25PG, PCGS# 8108

1810 Capped Bust Left Five, MS63
Popular BD-4 Variety

3407 **1810 Large Date, Large 5 MS63 NGC. BD-4, R.2.** Bass-Dannreuther Die State a/a. A substantial mintage of 100,287 Capped Bust Left half eagles was accomplished in 1810, with four known die varieties for the date. Most of the mintage, probably 75,000-90,000 pieces including the present coin, represented the BD-4 variety, with large numerals in the date and a squat 5 in the denomination. The 1810 BD-4 is one of the most available varieties of the design and is often the choice of type collectors seeking an example of the Capped Bust Left half eagle. The obverse die was previously used to strike the 1810 BD-3 variety and this was the only use of the reverse.

This impressive Select specimen is sharply detailed in most areas, with just a touch of softness on the eagle's claws and the top arrow fletching. The lustrous greenish-gold surfaces show only minor signs of contact and visual appeal is quite strong. Census: 29 in 63 (2 in 63+), 32 finer (7/14). NGC ID# 25PG, PCGS# 8108

1813 Half Eagle, AU Details
Scarcer BD-2 Variety

3408 **1813 — Scratch — PCGS Genuine. AU Details. BD-2, R.4.** Bass-Dannreuther Die State d/b. This variety is the scarcer of the two from 1813, with the first S in STATES more-or-less centered above the E in PLURIBUS. The scratch referred to PCGS is a thin, relatively unobtrusive pinscratch located in the lower left reverse field. The design motifs are boldly struck, and the green-gold surfaces display red-orange and purple-red accents near and surrounding the devices. The piece has a somewhat lackluster appearance, but, other than the previously-mentioned pinscratch, there are few noticeable surface marks. NGC ID# 25PM, PCGS# 8116

1813 Five Dollar, BD-1, Unc Details
First-Year Capped Head Representative

3409 **1813 — Altered Surfaces — ANACS. Unc Details, Net MS60. BD-1, R.2.** Bass-Dannreuther Die State a/a. This is a first-year example of the Capped Head design and the only available date of the type. Both BD-1 and BD-2 share the same obverse, while this variety shows the first S in STATES over the right edge of the E in the ribbon. The green-gold surfaces show sharp detail on the devices, although it appears a buffing tool was used to eliminate evidence of friction in the fields, as noted on the holder.
From The Valley View Life Collection, Part Two. NGC ID# 25PM, PCGS# 8116

1813 Half Eagle, BD-1, Mint State Sharpness
Ideal for Type Representation

3410 **1813 — Improperly Cleaned — NGC Details. Unc. BD-1, R.2.** Bass-Dannreuther Die State a/a, with no signs of clashing or lapping. With 450 to 650 examples believed to survive in all grades, BD-1 ranks as the only variety of the modified Capped Bust type that is moderately available for type purposes. This unworn piece is lightly cleaned, but retains hints of luster in the protected regions, and displays pleasing green-gold patina overall. The strike is well-executed, and significant abrasions are minimal. NGC ID# 25PM, PCGS# 8116

1820 Capped Head Five, Unc Details
Curl 2, Large Letters, BD-5

3411 **1820 Curl 2, Large Letters — Improperly Cleaned — NGC Details. Unc. BD-5, R.6.** Bass-Dannreuther Die State b/b. A truly large mintage of 263,806 Capped Head Left half eagles was accomplished in 1820, with nine die varieties known for the date. All varieties are scarce-to-rare in today's market, with some being very rare. This coin represents the rare BD-5 variety, with the lowest curl mostly over the 2 in the date and the arrow pointing to the top of I in AMERICA. The BD-5 has a surviving population of 20-25 examples in all grades and probably accounted for 30,000-40,000 pieces of the reported mintage. The obverse die was also used to strike the BD-6 variety of this date, while the reverse was also employed on the BD-4 and BD-7 varieties of 1820, and the BD-1 variety of 1826.

The present coin retains all original design detail and shows a few interesting clash marks in the upper obverse field. The bright yellow and greenish-gold surfaces show a few minor contact marks and an unnatural sheen that indicates a light cleaning at some point. This still-attractive specimen should find a home in a fine collection of early gold.

LIBERTY HALF EAGLES

1840-C Five Dollar, AU50

3412 **1840-C AU50 NGC. Variety 2.** Pockets of sun-gold luster illuminate the margins, while the remainder of the coin has olive toning. Uncommonly free of abrasions, given its brief stint in antebellum commerce. The strike is crisp on the wings, but the curls near the ear and the lower portion of the eagle are lightly brought up. A better Charlotte issue with a scant production of 18,992 pieces. The two known die pairs are approximately equal in rarity and share similar characteristics. NGC ID# 25SD, PCGS# 8196

1842-D Half Eagle, AU55
Small Date, Small Letters Variant

3413 **1842-D Small Date AU55 NGC. Variety 7-E.** The Dahlonega Small Date five is scarce in AU or finer conditions, and Choice AU coins are challenging to find. We typically see only one or two such examples per year at most. This medium-gold example is well-struck for the issue, with only small abrasions dotting the lightly circulated surfaces. Nice details and a bit of mint luster remain. Census: 22 in 55, 31 finer (7/14). NGC ID# 25SX, PCGS# 8210

1843 Medium D Half Eagle, Conditionally Scarce AU58
Minimally Abraded for the Issue

3414 **1843-D Medium D AU58 PCGS. Variety 10-G.** The upright of the Medium D mintmark is centered over the right diagonal of the V in FIVE. The 1843-D half eagle, from a generous mintage exceeding 98,000 pieces, is fairly common for a Dahlonega Mint issue, particularly through Extremely Fine. High-end About Uncirculated pieces are scarce, while Mint State coins are rare and mostly confined to MS63 and below.

The yellow-gold surfaces of this near-Mint specimen display luster in the recessed areas and exhibit well-struck devices, including the feathers on the eagle's legs, elements that are often weak (Winter, 2013). Distributed marks are consistent with a briefly circulated coin, but these are fewer and less severe than the very heavy, deep abrasions seen on the majority of survivors. Population: 9 in 58, 12 finer (7/14). NGC ID# 25T4, PCGS# 8215

1844 Half Eagle, MS63
Prooflike, Condition Rarity

3415 **1844 MS63 PCGS.** The Mint produced 340,330 half eagles in 1844 and the issue is significantly more challenging than 1843- and 1847-dated coins. Additionally, the issue is scarce across all grade levels but becomes rare in MS63. This piece displays luminous yellow-gold surfaces with impressive prooflike reflectivity and contrast. Full stars, hair detail, and feather definition further enhance the appeal of this Select piece. Population: 4 in 63, 5 finer (7/14).
From The Valley View Life Collection, Part Two. NGC ID# 25T7, PCGS# 8219

1846 Large Date Half Eagle, MS62
One of the Ten Finest-Graded at PCGS

3416 **1846 Large Date MS62 PCGS. CAC.** "In Mint State, this issue is quite rare with fewer than two dozen coins graded at that level," according to Garrett and Guth (2008). There are two known date logotypes (designated as Large and Small), and the Small Date is much scarcer. This Large Date example is boldly struck with shimmering satiny mint frost and light lime-gold toning. Both sides display a few small marks and wispy hairlines, and faint die rust is noted near several of the lower obverse stars. Population: 8 in 62, 2 finer (7/14). NGC ID# 28BG, PCGS# 8226

1852-C Half Eagle, MS64
One Numerically Finer at NGC

3417 **1852-C MS64 NGC. Variety 1.** The 1852-C Liberty half eagle claims the second-highest mintage of the series at 72,574 pieces and the issue has a surviving population of 300-350 pieces in all grades. While circulated examples are not difficult to locate, Mint State specimens are elusive, and the 1852-C is very rare at the MS64 grade level.

This impressive Choice example offers well-detailed design elements and lightly marked greenish-gold surfaces that show prooflike reflectivity in sheltered areas. Overall eye appeal is outstanding. This coin should find a home in a fine collection of Southern gold. Census: 10 in 64 (1 in 64 ★), 1 finer (7/14). NGC ID# 25UB, PCGS# 8251

1854-C Half Eagle, MS60
Weak C Mintmark

3418 **1854-C Weak C MS60 NGC. Variety 2.** The mintmark was lightly entered and has low relief but most of its outline is apparent when viewed beneath a loupe. All examples struck by this die pair qualify as Weak C, although some are housed in undesignated '54-C holders. This sun-gold representative has a good strike for a Charlotte issue, though the fletchings and forehead curls show usual incompleteness. Marks are minimal save for a small obverse rim nick at 8:30. The reverse exhibits occasional minor granularity. PCGS# 98257

1854-D Half Eagle, Bold AU58

3419 **1854-D Large D AU58 NGC. Variety 36-AA.** The 1854-D is one of the more frequently encountered D-mint half eagles. The mintage was 56,143 pieces, and it is estimated that 135-175 AU examples may still exist. This is a sharply struck example with full star centers, significant detail on Liberty's hair curls, and distinct dentils. The light yellow- and green-gold surfaces retain traces of original mint luster and are minimally abraded. An attractive near-Mint Dahlonega representative that exhibits a lightly repunched mintmark. NGC ID# 25UK, PCGS# 8258

1854-D Weak D Half Eagle, MS61
Rare in Mint Condition

3420 **1854-D Weak D MS61 NGC. Variety 37-DD.** The D mintmark is barely visible, centered over VE in FIVE. The 1854-D half eagle is one of the more available issue from the Georgia mint in circulated grades, though Mint State coins are rare. Doug Winter (2013) estimates that only 15 to 25 coins survive in all Uncirculated grades. This MS61 representative exhibits a surprisingly sharp strike. The legends, stars, olive leaves, claws and dentils are bold, save for a few areas of minor softness. Yellow-gold blankets each side, with frosty luster and minimal marks. Census: 1 in 61, 0 finer (7/14). PCGS# 98258

1855-C Half Eagle, MS60
Rare in Mint State

3421 **1855-C MS60 NGC. Variety 1.** This is an early die state before the rim break develops over AMERICA. The 1855-C half eagle is a popular Charlotte issue with a mintage of only 39,788 pieces. Winter estimates as few as 175 to 225 examples are extant, and goes on to say that Mint State survivors are "extremely rare." This lovely orange-gold piece shows pleasing luster and semiprooflike fields, while the only mentionable strike weakness is seen on the eagle's neck and talons, as is typical. Census: 3 in 60 (1 in 60+), 11 finer (7/14). NGC ID# 25UR, PCGS# 8262

1855-O Half Eagle, Well-Struck AU50
A Low-Mintage Issue, Elusive in All Grades

3422 **1855-O AU50 PCGS. Variety 1.** The only known variety. The 1855-O half eagle came from a low production of 11,100 pieces and has a low survival rate. Examples are elusive in all levels of preservation. PCGS and NGC combined have graded only 113 examples in all grades, a mere six of which are in mint condition, none finer than MS62.

The present AU offering displays orange- and yellow-gold surfaces that retain luster in the protected areas. The design elements are well-defined, including the curls around Liberty's face, the star centers, and the feathers on the eagle's legs, all areas that tend to be weak on many coins. The neck feathers are a tad soft as typically seen. Distributed minute marks are consistent with light circulation. Population: 10 in 50, 18 finer (7/14). NGC ID# 25UT, PCGS# 8264

1867 Half Eagle, MS61
Rare, None Certified Finer

3423 **1867 MS61 PCGS.** Not only is this coin tied for the finest-known 1867 half eagle, only three Mint State coins in any grade are certified by both services combined — all MS61 coins, and all by PCGS. We are aware of just one other comparable example, which is the Harry Bass, Jr. coin sold by Bowers and Merena in 1999. It, too, was graded MS61 PCGS.

The current coin was formerly the sole Mint State example at NGC, but it has since crossed over to PCGS. Judging from the photograph of the former Bass coin, this example shows a stronger strike on the eagle, and the coin is boldly struck on all the motifs. Original orange-gold toning covers both sides, with elements of prooflike surface remaining. The expected abrasions are present, but there are no severe marks and the luster is bright and full. This is one of several rare half eagle issues from the 1860s and it is extremely desirable as such — a candidate for the finest-known of the date, and one of the rarest coins in this sale. Population: 3 in 61, 0 finer (7/14). NGC ID# 25W3, PCGS# 8313

1868-S Five Dollar, MS61
Remarkable S-Mint Rarity

3424 **1868-S MS61 NGC.** The 1868-S half eagle saw an increase over the meager mintages of the previous San Francisco issues, to some 52,000 pieces; most survive today, however, in well-circulated condition. This Mint State example is a surprise, as NGC and PCGS show six grading events combined in the MS61 level with none finer. Many of the S-mint half eagles from the 1850s and 1860s are unknown — or virtually unknown, depending on the issue — in Uncirculated condition.

The present 1868-S, according to the NGC *Census*, is among the highest-graded of the issue at that service. As expected for the MS61 grade level, this piece shows a few bagmarks and ticks. However, the reddish-orange surfaces accented with lilac tinges show a surprisingly robust strike for an S-mint half eagle of this vintage, and strong eye appeal is furthered by a pleasing amount of mint luster on both sides. An important offering of this S-mint conditional rarity. Census: 4 in 61, 0 finer (7/14). NGC ID# 25W6, PCGS# 8316

1870 Liberty Five
Near-Mint Half Eagle Rarity
Just 4,000 Pieces Struck

3425 **1870 AU58 PCGS.** Only two Mint State examples are certified (both are MS61 PCGS coins), making this near-Mint example a true rarity and among the finest known. Garrett and Guth comment, "The 1870 half eagle is very underrated in all grades." The present coin is semiprooflike and only a few abrasions are distributed across both sides. Nice mint luster remains. The strike is bold, muted by just a touch of wear. Population: 4 in 58, 2 finer (7/14). NGC ID# 25W9, PCGS# 8319

1879 Liberty Five Dollar, MS64+
Conditionally Rare

3426 **1879 MS64+ PCGS. CAC.** The 1879 half eagle issue (301,920 coins) is somewhat more available than its San Francisco counterpart, especially in mint condition, and significantly more common than the rare 1879-CC five dollar issue. This Choice representative features sharply defined hair curls, stars, olive leaves, and claws. Frosty luster and lemon-gold color combine over each minimally marked side. Population: 17 in 64 (4 in 64+), 4 finer (7/14). NGC ID# 25X7, PCGS# 8348

1879 Five Dollar, MS65
Conditionally Challenging Issue

3427 **1879 MS65 NGC.** The mintage of the 1879 was a substantial 301,920 pieces, and in lower grades it is easily locatable. However, at the Gem level there are only a handful of coins known with the major services having certified only seven total (three at PCGS, four at NGC), one coin is finer (7/14). Fully and intricately detailed on each side, the mint luster is soft and frosted and each side shows a pronounced overlay of reddish patina. Exceptional quality.
Ex: Long Beach Signature (Heritage, 9/2004), lot 7571. NGC ID# 25X7, PCGS# 8348

1893 Liberty Five, MS66
Only Two Graded Finer at NGC

3428 **1893 MS66 NGC.** An amazing Premium Gem, this 1893 half eagle challenges the finest certified examples, with the combined NGC and PCGS population data showing 13 graded MS66, and only three pieces that are finer (7/14). The surfaces show rich orange-gold luster with mostly bold details and slight weakness on the first three stars. Exceptional eye appeal. Census: 8 in 66, 2 finer (7/14). NGC ID# 25YA, PCGS# 8383

1906-S Five Dollar Gold, MS65
Undervalued Issue

3429 **1906-S MS65 NGC.** According to Garrett and Guth, "Although the 1906-S half eagle is not rare in most grades, it is certainly underpriced in the higher states of preservation. The date sells for a very small premium, but it is many times rarer than the 1901-S and 1903-S half eagles." Their *Encyclopedia of U.S. Gold Coins* was written in 2006. Today, the two services combined have certified just eight coins numerically finer than this MS65 example -- far scarcer than most "common" date half eagles. This highly lustrous representative is fully struck and an attractive, satiny honey-gold coin, still undervalued for its low population in Gem condition. Census: 9 in 65, 3 finer (7/14).

1871 Half Eagle, PR65 Cameo
Finest Certified at PCGS
Ex: Garrett-Bass

3430 **1871 PR65 Cameo PCGS. CAC.** Garrett and Guth give a great summation of the proof 1871 half eagle's allure, saying the date "is another of the very low-mintage issues of the 1870s that seldom appear on the market. The original mintage for the issue was just 30 coins, and it is probably that fewer than 10 coins still survive. One coin is in the collection of the Smithsonian, and another example resides with the American Numismatic Society." The authors go on to enumerate the privately held examples they know, including those of Byron Reed, Harry W. Bass, Jr. (the present coin and one impaired specimen), and the Trompeter coin. We have compiled a roster of all specimens known to us below.

While Heritage has handled the Trompeter specimen on a private basis, the present coin is the only example Heritage has presented at auction (this is its second Heritage appearance). Considering the million-plus entries for coins in Heritage's Permanent Auction Archives, this is a great testament to the true rarity of the proof 1871 half eagle, both in terms of absolute rarity and infrequency of appearance on the market.

This coin traces its history to two of the greatest U.S. gold collections of all time, the Garrett and Bass Collections. The pleasing yellow-gold surfaces have a handful of very light hairlines, though nothing to seriously jeopardize the PR65 Cameo designation of this moderately contrasted coin. Both sides are stunningly beautiful, and with its amazing aesthetics and undeniably rarity, this coin should prove irresistible to the proof gold connoisseur. Population: 1 in 65 Cameo, 0 finer (7/14).

Roster of 1871 Proof Half Eagles

1. PR65 Cameo PCGS. T. Harrison Garrett; Robert Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection (Stack's, 3/1976), lot 442; Harry W. Bass, Jr.; Bass Collection, Part IV (Bowers and Merena, 11/2000), lot 508; Rarities Sale (Bowers and Merena, 1/2008), lot 534; Chicago Signature (Heritage, 8/2011), lot 7564. **The present coin.**

2. PR65 uncertified. Possibly George Seavey, part of a complete proof set ordered directly from the Mint in 1871; Seavey Descriptive Catalog (William Strobridge, 6/1873), lot 833; Lorin G. Parmelee, who purchased Seavey's collection intact before the date of the sale; Parmelee Collection (New York Coin & Stamp, 6/1890), part of lot 1376; Harlan P. Smith; John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr. in 1942, via Stack's; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 524.

3. Proof 65 uncertified. ANA Convention Auction (Steve Ivy, 8/1980), lot 259; Ed Trompeter; Heritage Auctions, circa 1999; private collection.

4. Choice Proof uncertified. Byron Reed; City of Omaha; Durham Western Heritage Museum; Byron Reed Collection (Christie's-Spink America, 10/1996), lot 141.

5. Brilliant Proof uncertified. Nathan M. Kaufman; Kaufman Collection (RARCOA, 8/1978), lot 839.

6. PR53 PCGS. ANA Convention Sale (Stack's, 8/1971), lot 2212; Harry W. Bass, Jr.; Bass Collection, Part II (Bowers and Merena, 10/1999), lot 1173.

7. PR45 uncertified. Brilliant-Sieck Collections (Bowers and Merena, 1/1992), lot 2790.

8. PR64 Cameo uncertified. A specimen in the National Numismatic Collection at the Smithsonian Institution.

9. Proof uncertified. R.C.H. Brock; J.P. Morgan; American Numismatic Society.

Additional Appearances

A. Proof. Heman Ely; Ely Collection (W. Elliot Woodward, 1/1884), lot 950, part of a six-piece gold proof set.

B. Proof. Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 422, part of a six-piece gold proof set.

C. Proof. William B. Wetmore Collection (S.H. & H. Chapman, 6/1906), lot 155, part of a six-piece gold proof set.

D. Proof. William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 1692.

E. Impaired Proof, XF. Milton A. Holmes Collection (Stack's, 10/1960), lot 3549, possibly number 6 or 7 above.

F. Impaired Proof. Samuel Wolfson Collection (Stack's, 10/1962), lot 499, possibly number 6 or 7 above. PCGS# 88466

1883 Liberty Half Eagle, PR55
Only 20 to 30 Proofs Extant

3431 **1883 PR55 NGC.** The Mint struck 61 proofs in 1883, but the issue's survival rate is conservatively 50%. On average, CoinFacts, Akers, and Breen estimate that between 20 to 30 specimens survive in all grades. The strike is predictably razor-sharp, and considering the number of abrasions one would expect of an AU55 representative, this proof shows minimal marks. This is a seldom-offered opportunity to obtain a very rare Liberty half eagle proof, and the first time an example has crossed the auction block since 2003. NGC ID# 28CL, PCGS# 8478

1896 Liberty Half Eagle, PR65+ Ultra Cameo
Rare 19th Century Gold Proof

3432 **1896 PR65+ Ultra Cameo NGC.** One of 103 proofs of this 1890s date struck in the half eagle denomination, this carefully preserved specimen displays the kind of assertive eye appeal that demanding collectors desire. The deeply mirrored fields provide vivid contrast to the sharply defined devices, with a suggestion of deeper gold in the field increasing the attraction. The frost on the Liberty bust is especially outstanding. Proof mintages in this era were uniformly low and fell even lower after 1896. Researchers have found that significant numbers of proofs failed to sell in most years, and the unsold remainders were melted to liberate precious metal for use in later years' proof production. Census: 1 in 65 Ultra Cameo (1 in 65+ Ultra Cameo), 9 finer (7/14). NGC ID# 28D2, PCGS# 98491

1898 Half Eagle, PR65 ★ Ultra Cameo
Impressive Contrast

3433 **1898 PR65 ★ Ultra Cameo NGC.** Mint records show a proof production of just 75 Liberty half eagles, and today, about 50 of those pieces survive, with a combined NGC and PCGS population of 69 submissions. That population includes 43 pieces designated as Cameo or Ultra/Deep Cameo. Collectors who seek a single exceptional representative with impressive Cameo contrast, such as the present PR65 ★ Ultra Cameo piece, will find 1898 to be an excellent date for consideration. This piece has amazing contrast with highly lustrous yellow-gold devices and deeply mirrored fields. Close examine reveals trivial, grade-consistent hairlines and contact marks that will keep the price more affordable than other, numerically finer examples. Census: 3 in 65 Ultra Cameo (1 in 65 ★ Ultra Cameo), 10 finer (7/14).
From The Pannonia Collection. NGC ID# 28D4, PCGS# 98493

INDIAN HALF EAGLES

1908 Indian Head Half Eagle, MS65
Sharp, Richly Toned Example

3434 **1908 MS65 PCGS.** The first year of Bela Lyon Pratt's distinctive recessed design and incuse lettering protected by lightly textured, mattelike fields. This is an unusually well-produced example, notable for the full-feathered Indian bonnet and a boldly feathered shoulder on the reverse eagle. A few tiny field marks define the assigned grade, although the original orange-gold patina and sharp luster suggest extra attention for outstanding eye appeal. Just 22 pieces are certified numerically finer by PCGS (7/14). NGC ID# 28DE, PCGS# 8510

1909-O Half Eagle, AU58
Only O-Mint Indian Five

3435 **1909-O AU58 PCGS.** The New Orleans Mint struck a small mintage of 34,200 Indian half eagles in 1909, during its final year of coinage operations. Most examples seen are in middle circulated grades and the issue is quite elusive in Mint State. The 1909-O is always in demand from mintmark type collectors, as well as series enthusiasts, as it is the only Indian half eagle from the famous Southern facility.

The present coin is an attractive near-Mint example that shows just a trace of wear on the sharply impressed design elements. The vivid greenish-gold surfaces retain much original mint luster and only a few minor abrasions are evident. Population: 87 in 58, 71 finer (7/14). NGC ID# 25ZK, PCGS# 8515

1913-S Half Eagle, Rare MS64
High-End for the Grade

3436 **1913-S MS64 PCGS. CAC.** The 1913-S half eagle comes with a reputation for being poorly made. In his A *Handbook of 20th-Century United State Gold Coins, 1907-1933*, David Akers writes of this issue: "The strike is typically only average to good and the mintmark is usually very weak and little more than a shapeless 'blob.' Problems near the border indicate die deterioration and the luster is nearly always sub-par."

Akers' profile is not germane to the near-Gem in the current offering. First of all, the mintmark is bold and clearly defined. Second, the overall strike is sharp, including that on all of the peripheral elements. Excellent definition is also apparent on the eagle's plumage and on most of the feathers of the headdress. Finally, the luster is anything but "subpar;" indeed, it is bright and invigorates the apricot-gold surfaces that are laced with hints of light green. A few inoffensive handling marks in the raised, exposed fields just barely preclude an even higher grade. Population: 16 in 64, 2 finer (7/14).

Ex: Central States Signature (Heritage, 4/2008), lot 2460.
From The Pannonia Collection. NGC ID# 25ZP, PCGS# 8526

PROOF INDIAN HALF EAGLE

1908 Half Eagle, PR67
Stunning First-Year, Matte Proof Indian Five
Essentially Perfect Surfaces

3437 **1908 PR67 NGC.** This was the first year of issue for the European-inspired matte finish, a process that was not entirely new to the Mint but one that had previously been limited to medals. The matte finish took collectors by surprise, and it did not take long for them to express their dissatisfaction to Mint officials, who made a change in 1909 and 1910 to the so-called Roman Gold finish. Of the 167 proof half eagles that were struck in 1908, it is estimated that only 100 examples were actually distributed, the remainder being melted. Combining the data from both of the major services, one comes up with a total of 147 coins certified. We suspect there is a large number of resubmissions within the numbers certified, and believe probably far less coins — perhaps as few as 50 or so individual examples — are known today once the many resubmissions are backed out. Most survivors are lower in grade than this coin. This is one of the finest examples known with 11 other pieces so graded and just one piece certified finer (7/14).

This example has the typical khaki coloration common to 1908 proof gold and the coarser-grain finish always seen on the date. The striking details show definition that only a proof is capable of displaying, with intricate detailing on all the design elements. Each side is devoid of any noticeable shiny spots or contact marks and the cheek of the Indian is smooth and unaffected by even the tiniest contact mark. This is essentially a perfectly preserved proof.
Ex: Columbus, OH CSNS Signature (Heritage, 4/2006), lot 2901; Milwaukee CSNS Signature (Heritage, 5/2010), lot 2275. From The Pannonia Collection. PCGS# 8539

EARLY EAGLES

1795 Draped Bust Eagle, VF20
Rare BD-5, 13 Leaves

3438 **1795 13 Leaves VF20 PCGS. BD-5, R.5.** Bass-Dannreuther Die State e/c. This is the final use of the this obverse die, in an extreme late die state; previously employed for BD-2 and BD-3, this die underwent several lappings to the point where it now exhibits diminished definition on several stars. This reverse was also paired with a different obverse to strike BD-4, and is easily attributed by the presence of an oblong die lump in the field near the first A in AMERICA. This marriage is the second-rarest of the date, as only 35 to 45 representatives are believed extant. This is a pleasing mid-grade piece, with light wear appropriate for the grade. Parallel adjustment marks (as made) are seen on the obverse from the rim between 2 and 3 o'clock to the portrait, but the surfaces are otherwise smooth. The patina is deep yellow-gold, and the eye appeal is high for the grade. NGC ID# 25ZT, PCGS# 8551

1799 Eagle, AU Details
BD-8, Irregular Date Variety

3439 **1799 Small Stars Obverse — Damaged — ANACS. AU Details, Net AU58. BD-8, R.5.** Bass-Dannreuther Die State c/b. The date is irregularly placed with the 17 tilted far right and the 7 higher than the 1. Jagged die crumbling in the C of AMERICA also confirms the variety. The 1799 eagle is known with 10 die pairs, eight of which show Small Stars obverse. The other two 1799 varieties and all remaining eagles through 1804 feature the Large Stars obverse. CoinFacts estimates that 500 Small Stars eagles exist in all grades, while Dannreuther (2006) estimates that only 45-55 BD-8 coins are extant.

This example exhibits bright yellow-gold surfaces and good definition over the design elements. Partial luster remains in the protected regions. A few gouges on the obverse, most prominently located near star 6 and between the L and I in LIBERTY, account for the Details grade.

From The Valley View Life Collection, Part Two. PCGS# 98562

LIBERTY EAGLES

1843 Eagle, AU58
Ex: *S.S. Republic*

3440 **1843 AU58 NGC.** Ex: *S.S. Republic*. This is a boldly detailed, near-Mint example of this elusive Philadelphia issue, pedigreed to the famous *S.S. Republic* discovery. The surfaces are moderately abraded, as is typical of this grade level and also of this issue in general, but substantial prooflike mirroring in the fields balances the visual appeal. Unlisted in the *Cherrypickers' Guide*, the date is mildly repunched north. Census: 16 in 58 (1 in 58 ★), 4 finer (7/14). NGC ID# 262P, PCGS# 8588

1846 Ten Dollar, AU55
Eye-Appealing Example, Elusive Any Finer

3441 **1846 AU55 NGC.** The 1846 eagles are seldom seen at this grade level, understandably, given the mintage of a tad more than 20,000 pieces, most of which are well-circulated. This Choice AU example boasts considerable eye appeal via a sharp strike and light field chatter rather than mentionable marks. Census: 13 in 55, 9 finer (7/14). NGC ID# 262W, PCGS# 8594

1846 Ten Dollar, AU55
Scarcely Seen Finer

3442 **1846 AU55 NGC.** The Philadelphia mint coined 20,095 eagles in 1846 compared to the Louisiana facility's 81,780-piece production total. Examples are seldom-seen above the Extremely Fine grade level, and NGC has certified only 13 examples in Choice AU with nine coins finer (7/14). This representative offers well-struck design features over green-gold surfaces. Myriad abrasion appear throughout. NGC ID# 262W, PCGS# 8594

1861-S Liberty Eagle, AU53
Low-Mintage Branch Mint Issue

3443 **1861-S AU53 NGC.** The mintage of Liberty eagles increased significantly at the San Francisco Mint in 1861, but still amounted to just 15,500 pieces. This attractive AU53 specimen displays well-detailed design elements, with just a trace of wear, and lightly abraded greenish-gold surfaces that retain significant amounts of original mint luster. Census: 15 in 53, 34 finer (7/14). NGC ID# 2648, PCGS# 8634

1883-CC Eagle, AU55
Rare, Low-Mintage Carson City Issue

3444 **1883-CC AU55 NGC. CAC. Variety 3-D.** Prooflike surfaces retain much of their reflectivity despite light abrasions. The Carson City mintage of just 12,000 pieces yielded few survivors in AU or better conditions. This Choice AU offers considerable remaining luster and generous eye appeal, with original orange-gold surfaces and sharp details. The abrasions are minor and less frequent than expected for the grade and mint. An opportunity for the perceptive collector of rare date gold. Census: 32 in 55, 16 finer (7/14). NGC ID# 2667, PCGS# 8700

1891-CC Ten Dollar Gold, MS63
Seldom Seen Finer

3445 **1891-CC MS63 PCGS. CAC. Variety 2-B.** The mintage of 103,732 is generous by Carson City standards, but Select Uncirculated coins are scarce and the issue is nearly unobtainable any finer. This CAC-approved example is lustrous and and attractive, with a bold strike on all of the motifs. Only a few distributed, tiny marks disturb the frosted fields and sharp devices. Population: 65 in 63 (1 in 63+), 3 finer (7/14). NGC ID# 266U, PCGS# 8720

1892-S Ten Dollar, MS64
Exceedingly Rare in This Grade

3446 **1892-S MS64 PCGS.** The 1892-S eagle is available to a certain extent in lower Mint State grades, but the certified population plunges dramatically at the MS64 grade level where PCGS and NGC combined have only encapsulated four coins (three at PCGS and one at NGC), with just one PCGS MS65 coin finer (7/14). This lovely Choice example displays frosty hues of orange and green-gold toning, with razor-sharp design elements. Light, scattered abrasions on the obverse preclude a finer grade, though this coin hardly lacks, as it is only the second MS64 coin we have ever offered at auction. NGC ID# 266Y, PCGS# 8724

1899-S Eagle, MS64
Attractive Toning Accents

3447 **1899-S MS64 PCGS.** Full cartwheel luster wheels across the surfaces of this attractive ten, with reddish-gold color mixing with lilac and green accents for exceptional eye appeal. A strong strike delivers bold details on the eagle and Liberty's portrait. There are no major abrasions, but a few wispy marks account for the grade. The fantastic toning and luster suggest a higher designation than near-Gem. NGC ID# 267L, PCGS# 8744

1901 Ten Dollar, MS66
Ideal Type Representative

3448 **1901 MS66 PCGS. CAC.** Predominantly lemon-gold coloration exhibits hints of deeper orange-gold and lavender accents toward the center. This fully struck and frosty Premium Gem, from a generous mintage of 1.7 million coins, presents an excellent opportunity to acquire an attractive type representative from the Liberty eagle series. Housed in a green label holder. Population: 31 in 66 (1 in 66+), 1 finer (7/14). NGC ID# 267P, PCGS# 8747

1901-S Ten Dollar, MS66
Lustrous and Sharply Struck
A Popular Type Coin

3449 **1901-S MS66 PCGS.** The 1901-S ten dollar, from a production exceeding 2.8 million pieces, is one of the most common dates in the series. PCGS and NGC have graded more than 34,000 coins in all grades. The population declines significantly in MS66 to about 400 examples, and higher-grade specimens are very rare..

Intense luster radiates from both sides of this Premium Gem offering, each of which displays well-cared-for, yellow-gold surfaces blushed with rose-violet. The design elements are sharply struck, further enhancing the coin's eye appeal. Some light die cracks are visible at the margins. This is a great coin for a high-grade type collection. Just 22 examples have been certified finer by both services (8/14). NGC ID# 267S, PCGS# 8749

1902 Eagle
Plus-Graded, Near-Gem Example

3450 **1902 MS64+ PCGS. CAC.** An historically scarce date in the series despite its post-1900 date. Garrett and Guth state, "Examples in MS63 are scarce, but not too hard to find. On the other hand, MS64 and MS65 examples are very rare..." This near-Gem example displays exceptionally nice surfaces and stunning eye appeal. The fields and motifs are frosty and lustrous, with a full strike providing razor-sharp details. One or two tiny marks and some pinprick alloy spots visible with a glass, but the coin is otherwise virtually pristine. Population: 20 in 64 (3 in 64+), 3 finer (7/14). NGC ID# 267T, PCGS# 8750

1896 Liberty Eagle, PR66
Only 78 Pieces Struck
Ex: Trompeter

3451 **1896 PR66 PCGS. CAC.** The high quality of proofs from 1896 and 1898 is well known, reaching a high-water mark in these years, thus making these dates the obvious choices for type collectors. The mintage for the 1896 proof ten was 78 pieces. Of that number there have been 44 submission events over the past 28 years to both of the major services. If one subtracts perhaps a quarter of that number as resubmissions that have not been removed from the population data, there should be around 33 individual pieces extant today. This is slightly higher than Akers and Breen's estimates from two to three decades ago of 20-25 pieces, but a little lower than the current PCGS CoinFacts estimate of 35-45 examples known.

This is the Ex: Trompeter coin. The pedigree identifiers are unmistakable, even though it is not designated as such on the insert. What is curious is the lack of a Cameo or even Deep Cameo designation. The coin was designated as a Cameo when we handled it in 1999, and the contrast is strong between the fields and devices on each side. The physical description from 1999 is just as valid today and we repeat it here:

> "This sparkling coin has incredibly deep mirrors that provide a nearly black backdrop to the frosted golden devices seen on each side. There are some light, almost imperceptible hairlines in the fields. The only visual distractions we see are a couple of tiny contact marks to the left of the 11th star, and an almost invisible scratch from the border to the right of the 6 in the date vertically to Liberty's hair curl."

This is a terrifically attractive coin and one that was a part of one of the premier collections of proof gold assembled in the past hundred years. Population: 1 in 66, 0 finer (7/14).
Ex: Trompeter Collection (Heritage, 1/1999), lot 8258; Stamford Coinfest Signature (Heritage, 10/2010), lot 4929, realized $63,250. From The Pannonia Collection. NGC ID# 28G3, PCGS# 8836

1898 Eagle, PR66 ★ Ultra Cameo
Rare 19th Century Proof
Seldom Encountered Finer

3452 **1898 PR66 ★ Ultra Cameo NGC.** The 1898 Liberty eagle is a rare issue in proof format, thanks primarily to its low mintage of just 67 pieces, the lowest production total of any Philadelphia Mint proof ten from 1895 to the end of the series in 1907. Thankfully, the issue has a relatively high survival rate, thanks to collectors like Virgil Brand, James Ten Eyck, John M. Clapp, William Forrester Dunham, Nathan M. Kaufman, and David S. Wilson, who all purchased gold proof sets directly from the Mint in 1898 and carefully preserved them for future generations of collectors.

The 1898 is probably more elusive than current population data would suggest, but it is still one of the more available proofs of the pre-1900 era. The NGC Census Report records 24 submission events, while the PCGS Population Report lists 27 examples in all grades. The grades are spread out from PR55 to PR68. Jeff Garrett and Ron Guth opine:

> "The certified population ballooned in this year, probably because of resubmissions, but the variety of grades is so well-dispersed that it is impossible to determine where the numbers have been inflated. There are probably 30-40 coins known today, which is still a very tiny number."

In addition to a number of impaired specimens, the small supply of 1898 proofs is further limited by the presence of several coins in institutional holdings, including two examples in the National Numismatic Collection at the Smithsonian Institution.

The present coin is a delightful Premium Gem, with the coveted Star designation that confirms its outstanding quality and visual appeal. The design elements are fully struck, with a thick coat of mint frost that creates profound cameo contrast with the deeply mirrored fields. The well-preserved surfaces show the slight orange-peel texture of the finest 19th century proofs and close inspection with a loupe reveals no mentionable distractions. Census: 3 in 66 Ultra Cameo (2 in 66 ★ Ultra Cameo), 6 finer (7/14).
From The Pannonia Collection. NGC ID# 28G5, PCGS# 98838

1899 Liberty Eagle, PR67 Ultra Cameo
Only 86 Pieces Struck
One Numerically Finer at NGC

3453 **1899 PR67 Ultra Cameo NGC.** The 1899 eagle saw a proof production that was slightly higher (by a couple of dozen pieces) than the previous couple of years, and it appears a tad more frequently at auction than some of the earlier dates in the series. Garrett and Guth remark that "hardly any were spent (unlike in previous years)."

This piece represents one of the few finest examples remaining of the issue. PCGS has seen two in the grade of PR67 Deep Cameo with none finer; NGC accounts for two in PR67 Ultra Cameo, including the present coin, with one PR67 ★ Ultra Cameo and one PR68 ★ Ultra Cameo finer, making six grading events in all in PR67 and PR68. How many of those top-graded submissions in Ultra/Deep Cameo represent *different coins* is a matter for conjecture.

Only a few collectors purchased complete gold proof sets in the era around the turn of the century, and large denomination gold proofs were seldom ordered separately. As a result of the low demand, gold proofs commanded only a small premium over face value in the early 1900s. The complete four-piece 1899 gold proof set in lot 359 of the David S. Wilson Collection (S.H. Chapman, 3/1907), with a face value of $37.50, realized only $50 when it was bought in by S.H. Chapman. Things are much different today, as collectors value gold proofs over almost all other issues because of their rarity and aesthetic appeal. The NGC-graded PR68 ★ Ultra Cameo 1899 proof eagle in our May 2008 Long Beach Signature realized $149,500.

The present coin exhibits medium yellow-gold device high points that are thickly frosted and contrast starkly against the reflective, jet-black fields on both sides, well into the Ultra Cameo contrast level rather than a "just made it" coin. The strike is full front and back. It requires a strong loupe to see two tiny marks beneath Liberty's chin and a small tick in the right obverse field near star 12, picayune signs of contact that are undistracting but which will serve as pedigree markers. The reverse shows a small indent, as made, at the tip of the olive stem.

This coin will be a welcome addition to a fine collection or Registry Set. NGC ID# 28G6, PCGS# 98839

1907 Wire Rim Ten Dollar, Rare MS66
Sought-After First-Year Issue
Satiny, Nearly Flawless Example

3454 **1907 Wire Rim MS66 PCGS. CAC.** Self-referencing his previous works was a fairly common occurrence for Augustus Saint-Gaudens. A passage in his son, Homer's, *Reminiscences from 1913,* tells of the multiple uses of the eagle motif that Augustus ultimately placed on the reverse of the 1907 Wire Rim ten:

> "The conception of the standing eagle he drew from a design he had often used on such work as the Shaw Memorial, the medal struck to commemorate the inauguration of President Roosevelt [actually designed by Adolph Weinman], and the shield of the monument to President Garfield in Fairmount Park, Philadelphia."

What Homer Saint-Gaudens did not know is this standing eagle was obviously based on a similar eagle on the shekel of Tyre. This ancient influence demonstrates the wide-ranging familiarity Saint-Gaudens had with ancient sources, including not only sculpture, but also coinage.

When the eagle debuted on the United States' ten dollar gold piece in 1907 (along with an Indian Head motif that was, coincidentally, modeled after Saint-Gaudens' earlier rendition of Nike on the General Sherman Monument, completed in 1905), it shared to a certain extent, the bold relief of the double eagle issue of the same year. As with the double eagle, however, it became clear that such high relief designs could not be produced with consistency, and so the designs were modified accordingly after only 500 examples of the High Relief, Wire Edge variety were struck.

Today, this issue is the closest thing to the sculptor's original idea that numismatists can acquire, and its scarcity in all grades only adds to its immense allure. This representative displays richly satiny, yellow-gold luster, with almost no disturbances observed upon close examination. The devices are boldly impressed, and the eye appeal is seemingly unmatched. For the advanced Indian gold specialist, this remarkable coin will prove to be a rich reward to a long and patient search. Population: 16 in 66, 6 finer (7/14).
From The Pannonia Collection. NGC ID# 268B, PCGS# 8850

Outstanding MS66 1907 No Periods Eagle

3455 **1907 No Periods MS66 PCGS.** This is actually the Charles Barber-modified design of Augustus Saint-Gaudens, with the triangular stops or periods removed on either side of TEN DOLLARS and the central hair and eagle-feather details softer than on the With Periods variants. As the first business-strike issue of the new design that is generally available, the 1907 No Periods is a perennially popular—as well as still quite beautiful—gold type coin, one that appears well poised for future appreciation. The present example offers beautiful, highly lustrous honey-gold surfaces with superb eye appeal. The eagle shows a few small ticks under a loupe, but the piece is overall outstanding, with unbroken, mattelike luster.
From The Pannonia Collection. NGC ID# 28GF, PCGS# 8852

1908 Ten Dollar, MS63
Minimally Marked, No Motto Coin

3456 **1908 No Motto MS63 PCGS.** Subdued mint luster and soft strikes often inhibit the issue from commanding the respect it deserves. Select No Motto examples such as this are scarce and anything finer proves challenging. The surfaces exhibit softly frosted luster and typical strike definition with surprisingly few marks. Overall, this is an excellent type representative. NGC ID# 28GG, PCGS# 8853

1908-D Indian Eagle, MS64
Surprisingly Elusive Motto Variant

3457 **1908-D Motto MS64 NGC.** The 1908-D Indian eagle, with the motto IN GOD WE TRUST on the reverse, is much more difficult to locate than its mintage of 836,500 pieces would suggest, especially in high Mint State grades. At the Gem level and above, the With Motto issue is almost as rare as its No Motto counterpart, which has a mintage only one fourth its size. The reason for this equivalent rarity probably lies in the different distribution of the two issues and disproportionate melting of the With Motto pieces at a later time.

The present coin is an attractive Choice example, with sharply detailed design elements and vibrant mint luster throughout. The light yellow-gold surfaces are free of mentionable distractions and show pleasing hints of rose. and green. Eye appeal is outstanding. Census: 22 in 64 (1 in 64+), 11 finer (7/14). NGC ID# 28GK, PCGS# 8860

1908-S Ten Dollar, MS62+
Low-Mintage Issue

3458 **1908-S MS62+ PCGS. CAC.** The 1908-S is the first of several low-mintage San Francisco issues within this relatively short but challenging series. This Uncirculated representative offers coruscating luster, rich peach and olive toning, a good strike, and only minor marks. Most '08-S tens are in circulated grades, due to the hard money tradition of the West. NGC ID# 28GL, PCGS# 8861

1910-S Indian Eagle, Lustrous MS63

3459 **1910-S MS63 PCGS.** The 1910-S Indian eagle can be located with little searching in the lower Mint State grades, but it quickly becomes scarce at the MS63 level and finer coins are decidedly rare. This highly lustrous piece displays bright yellow-gold color and is unusually clean for the grade. Only a touch of minor softness is noted on the tip of the eagle's facing shoulder. PCGS has seen 31 numerically finer examples (7/14). NGC ID# 268D, PCGS# 8867

1911 Ten Dollar, MS65
Smooth, Wheat-Gold Surfaces

3460 **1911 MS65 NGC.** The lustrous, wheat-gold surfaces of this Indian Head Gem feature sharp definition on Liberty's hair and the eagle's feathers. Each side is smooth, and a loupe reveals just a small graze above Liberty's nose. The issue's 505,500-coin mintage and this example's aforementioned attributes make it an appropriate type candidate. NGC ID# 28GT, PCGS# 8868

1911-D Ten Dollar Gold, MS61
Highly Sought Issue

3461 **1911-D MS61 PCGS. CAC.** A combination of low mintage and low survival ranks this issue among the most highly sought representatives of the Indian Head eagle series. Just 30,100 pieces were struck, and many of those were lost to circulation attrition. The issue is extremely rare in high Mint State grades, but somewhat more available in lower Uncirculated conditions such as this MS61 coin.

A bold strike is seen on both the Indian's bonnet and on the eagle. The surfaces are typically textured and lustrous. A few light abrasions account for the assigned grade. This coin received the CAC "green bean" for quality. NGC ID# 28GU, PCGS# 8869

Low-Mintage 1911-D Eagle, MS63

3462 **1911-D MS63 PCGS.** Though mintage is far from the sole determinant of rarity in late-date American gold, with just 30,100 pieces struck, the 1911-D ten dollar gold is one of the most challenging Saint-Gaudens issues, and even Select examples are condition rarities. Garrett and Guth (2006) ascribe immense importance to this issue, proclaiming that "[a]ll Indian Head eagle collections are judged to some degree on the quality of the 1911-D issue."

A touch of haze has settled over the surfaces of this luminous piece, predominantly yellow-gold with a touch of wheat. Liberty's cheek is clean, and at first glance, the piece appears much finer than its Select designation. Only on closer inspection does one identify the wispy, grade-defining abrasion present in the left obverse field. The reverse is rotated approximately 20 degrees counterclockwise. Population: 34 in 63, 17 finer (7/14).
From The Pannonia Collection. NGC ID# 28GU, PCGS# 8869

1915-S Indian Head Ten Dollar, MS65 Outstanding Visual Appeal, Ex: Kutasi

3463 **1915-S MS65 PCGS.** Ex: Kutasi. The 1915-S is both an absolute and condition rarity in the ten dollar Indian series. Only 59,000 pieces were struck, and apparently few were shipped overseas. No hoards are mentioned in the literature and few Uncirculated pieces known. PCGS has certified only five coins at the Gem grade level and just three coins finer (7/14).

This is a particularly clean and attractive example. The surfaces show pronounced granularity (not always the case on 1915-S tens) with satiny mint luster. Both sides exhibit lovely peach-gold and mint-green color with occasional whispers of lilac interspersed, and each is impeccably preserved. The latter is a significant attribute because most Mint State 1915-S survivors display "numerous abrasions" (David Akers, *20th Century United States Gold Coins*, p. 193). The only identifiers that can be reliably used for pedigree purposes are a short horizontal mark below Liberty's eye and a tiny alloy stain at 5 o'clock on the obverse. The design features are sharply impressed, and overall this Gem exhibits outstanding technical quality and aesthetic appeal.
Ex: Thaine Price Collection (Akers, 5/1998), lot 65; William Michael Thomas (Stack's, 1/2004), lot 3026; Kutasi Collection (Heritage, 1/2007), lot 3185;
From The Pannonia Collection. NGC ID# 28H6, PCGS# 8879

1930-S Indian Ten Dollar, MS65
Sought-After San Francisco Issue
Outstanding Visual Appeal

3464 **1930-S MS65 PCGS. CAC.** Following a 10-year hiatus, Indian gold eagle production at the San Francisco Mint resumed in 1930, but output was anything but substantial. Production totaled just 96,000 pieces, and for the most part, these were unneeded in daily commerce, and nearly the entire mintage was stored in bank and Treasury vaults where it remained when the gold confiscation order was enacted. Still, more examples of this issue escaped melting than of its double eagle counterpart. Garrett and Guth write in their *Encyclopedia of U.S. Gold Coins:*

> "Not many examples circulated, but enough were saved prior to the gold call-in of 1933 to satisfy collector demand. In overall terms of rarity, this date ranks a little behind the 1920-S, with just a few hundred known in all, and those are scattered over the grading spectrum."

The scarcity of the 1930-S ten dollar increases substantially the further one travels up the grade scale, and in Gem condition, the date becomes a genuine rarity. In *Indian Gold Coins of the 20th Century*, Fuljenz writes:

> "Many 1930-S Eagles were roughly handled and as a result, the surfaces are often heavily abraded. It appears that a few small hoards have been found on which the surfaces are much cleaner and these pieces were probably not thrown loosely into bags as with other surviving examples."

The piece here-offered is most certainly a survivor from one of these better-preserved groups, as the surfaces, aside from a few grade-consistent ticks on the cheek, are incredibly clean. The luster is vibrant and thickly frosted, showcasing beautiful green, rose, and apricot-gold hues over each side. The devices are boldly impressed, and when held in-hand, the overall visual appeal is seemingly unrivaled. The Indian gold specialist will find much to love about this truly exceptional coin, from the final S-mint issue of the series. Population: 15 in 65 (1 in 65+), 6 finer (7/14).
From The Pannonia Collection. NGC ID# 28HA, PCGS# 8883

1850 Double Eagle, AU53
Popular First-Year Type

3465 **1850 AU53 PCGS. CAC.** The visual appeal of this first regular-issue double eagle is strong, as affirmed by the green label CAC sticker. Reddish-gold color paints each side, with green accents throughout. Partial luster remains and is most noticeable around the reverse. Small abrasions are lightly scattered over the surfaces, but only a shallow scrape above TWENTY merits mention. NGC ID# 268F, PCGS# 8902

1852 Double Eagle, MS62
FS-301, Boldly Repunched Date

3466 **1852 Repunched Date, FS-301, MS62 PCGS.** All four date digits are obviously repunched north. One of the relatively few repunched date varieties of gold coins to attain the prestige of a *Cherrypickers'* listing. Despite the 1851 advent of the San Francisco Assay Office, more than 2 million 1852 twenties were struck. Most pieces likely contained bullion mined from West Coast fields. The 1852 is available in circulated grades but Mint State coins are rare. The present lustrous lemon-gold twenty has relatively few marks, none of which merit individual description. PCGS# 145729

1853 Liberty Head Twenty, AU58
Attractive, Natural Surfaces

3467 **1853 AU58 NGC.** Attractive, medium-gold surfaces show much remaining mint luster and a natural patina, suggesting this is an original near-Mint coin that avoided seawater immersion. A few tiny marks are distributed across the surfaces, but less than those that are seen on many lower-grade Mint State coins. Sharp details remain despite brief circulation. NGC ID# 268M, PCGS# 8908

1854 Double Eagle, AU55
Exceptional, Original Patina

3468 **1854 Large Date AU55 NGC.** Glowing mint luster remains over much of the surfaces of this Choice AU twenty. This is the Large Date variety — a considerably scarcer, major variety than its Small Date counterpart. Small Date grading events outnumber Large Date appearances 8 to 1 at the two major grading services combined.

Only a few 1854 double eagles were recovered from the various shipwrecks regardless of the date variety. The exceptional, original patina on this example suggests it spent its life on land, circulating only briefly before being put away with careful preservation. The surfaces are minimally abraded for the assigned grade. A few lilac and orange highlights enhance the bold motifs of this particularly appealing Large Date twenty. Census: 49 in 55, 29 finer (7/14). PCGS# 98911

1854-S Twenty, MS62
Likely S.S. *Yankee Blade* Coin

3469 **1854-S MS62 NGC.** In 1854, the San Francisco Mint opened and began producing coins from California gold rush yields. Production focused on double eagles, of which 141,468 were struck. In that same year, the S.S. *Yankee Blade* smashed onto a rock off the coast of Santa Barbara and sank. Along with 900 passengers (most of whom survived), the ship was carrying $152,000 in gold coins. In 1977, a recovery of the shipwreck produced some 250 1854-S double eagles, this example likely among them.

Several characteristics identify this coin as a shipwreck example. Uncirculated representatives were virtually unknown prior to the discovery of the sunken ship. Additionally, the surfaces of this piece feature granularity typically seen on recovered coins. A series of obverse and reverse die cracks, as well as a broken A in STATES only add to the likelihood that this piece is in fact from the S.S. *Yankee Blade*. Orange-gold coloration and a full strike further add to the appeal of this historic S-mint twenty. NGC ID# 268U, PCGS# 8913

1956-S Double Eagle, MS62
Gorgeous Orange-Gold Surfaces

3470 **1856-S MS62 PCGS Secure.** In 1856, the San Francisco Mint was hard at work producing double eagles, and it exceeded the million-coin mark for the first time. Although S-mint twenties were being struck en masse, most pieces entered into circulation on the West Coast, and mint condition representatives were rare prior to the discovery of the Fort Capron Hoard in the early 1970s and the *S.S. Central America* in 1988.

This Uncirculated example boasts lustrous orange-gold surfaces with mint-green accents and moderate granularity, indicative of a seawater coin. The design motifs are boldly defined with full star centers. A few wispy grazes are scattered over each side, but they are undistracting. Population: 17 in 62, 12 finer (7/14).
From The Pannonia Collection. NGC ID# 2692, PCGS# 8919

1857-S Double Eagle, MS65
Exceptional Visual Appeal

3471 **1857-S Spiked Shield MS65 NGC. Variety 20A.** The "Spiked Shield" variety, with two short die scratches to the left of and piercing the reverse shield. This is the most often seen of the eight different varieties discovered in the more than 5,000 1857-S double eagles recovered from the *S.S. Central America* shipwreck. The quantity and incredible condition of the coins recovered made the date one of the most famous and cherished in the series, and Gem examples always seem to find a ready market. This piece, while not pedigreed to the shipwreck, exhibits the shimmering, softly frosted luster typical of the pieces recovered, with rich apricot-orange coloration over both sides. The strike is sharp and surface abrasions are almost nonexistent. Census: 67 in 65 (1 in 65+, 2 in 65 ★), 31 finer (7/14). PCGS# 70000

1857-S Double Eagle, MS67
Spiked Shield, Among the Finest Certified
Ex: *S.S. Central America*

3472 **1857-S Spiked Shield MS67 NGC. Variety 20A.** Ex: *S.S. Central America*. In 1856, two years after the facility first opened, double eagle production at the San Francisco Mint reached nearly 1.2 million coins. One year later in 1857, Gold Rush yields continued to ensure the West Coast mint as the preeminent facility for the coinage of twenty dollar gold pieces. In that year, output declined somewhat to 970,500 coins, still more than double the number of examples minted in Philadelphia.

On August 20th, 1857, 2.6 million dollars in gold, including thousands of freshly struck 1857-S twenties, set sail aboard the *S.S. Sonora* from San Francisco en route to Panama City. Upon arrival, the gold was transferred 48 miles by rail to Aspinwall and loaded onto the *S.S. Central America*. After refueling in Havana, the ship continued its journey northward to New York City. Off the coast of the Carolinas, a hurricane engulfed the treasure-laden ship, and on the evening of the September 12th, the steamer slipped 7,200 feet beneath the surface of the sea, taking with it the treasure and hundreds of passengers.

Most of the 5,400 double eagles recovered from the wreckage in 1988 feature the so-called "Spiked Shield" variety. As is the case with this Superb Gem, two die scratches occur to the left of and penetrate the eagle's shield. Additionally, the majority of the coins range in condition from MS63 to MS65. Premium Gems are scarce, and anything finer is rare. The NGC *Census* reports only seven coins in MS67, with none finer (7/14).

This beautiful Type One representative is immaculately preserved. Frosty luster abounds over rose-gold surfaces that feature fully struck design elements. Aside from a few minute ticks scattered over each side, only two wispy grazes near (UNITE)D S(TATES) merit mention. Overall, this Superb Gem presents a remarkable opportunity to acquire one of the finest examples from a famous S-mint issue and a historically significant piece within the larger context of U.S. numismatics. PCGS# 70000

1857-S Liberty Double Eagle, MS65
Ex: *S.S. Central America*

3473 **1857-S Bold S MS65 PCGS. Variety 20B.** Ex: *S.S. Central America*. Like most Type One double eagles, the 1857-S was extremely rare in high grade before recent shipwreck finds augmented the small supply of Mint State specimens. The present coin is one of the more than 5,000 examples of this issue that were aboard the famous *S.S. Central America* when the ship sank. Many high-quality coins have been recovered over the years and vigorous salvage efforts are still underway today.

The coin offered here is a spectacular Gem, with well-preserved orange-gold surfaces and sharply detailed design elements throughout. Vibrant mint luster adds to the outstanding eye appeal. The 1857-S is listed among the *100 Greatest U.S. Coins* because of the profound effect it has had on the collection of double eagles in recent years. *From The Pannonia Collection*. PCGS# 70001

1857-S Double Eagle, AU58
Ex: *S.S. Central America*

3474 **1857-S Broken A AU58 PCGS. Variety 20E. CAC.** Ex: *S.S. Central America*. SSCA 1470. When the *S.S. Central America* sank in transit from Havana, Cuba to New York City it was carrying more than 5,000 1857-S double eagles. Many coins showed the A in STATES with a broken crossbar like the coin here offered. This near-Mint example features lustrous and well-defined surfaces with lightly scattered abrasions over each side. The eye appeal is excellent. PCGS# 70004

1862-S Twenty, AU55
Strong Original Appeal

3475 **1862-S AU55 NGC.** For those who have an aversion to seawater, this is a refreshingly original double eagle with Choice, untouched patination and ample signs of domestic circulation. The surfaces display several marks and light abrasions, but the natural orange-gold surfaces are imbued with nice remaining mint luster. Bold details survive despite five points of wear. NGC ID# 269N, PCGS# 8938

1865-S Liberty Twenty, MS63
Ex: *S.S. Brother Jonathan*

3476 **1865-S MS63 NGC.** Ex: *Brother Jonathan*. Once a major rarity, the Type One 1865-S double eagles are now hotly contested but available issues, due to the recovery of several hundred examples from the foundered vessel, which sank on July 30 of the same year that this coin was minted. The cartwheel luster is soft but thorough on both sides of this resplendent Select Mint State example, with the typical orange-gold color of most specimens. Interesting die cracks and breaks appear on the reverse. One from the top of the first S in STATES meanders through all the letters in TATES OF AME, in some places quite heavy and meeting a second right-angle crack at its termination. Smaller cracks appear elsewhere. This is clearly a die that was close to shattering when it struck this lovely coin. NGC ID# 269V, PCGS# 8944

1866-S With Motto Twenty, AU55
First-Year, Type Two Issue

3477 **1866-S Motto AU55 NGC.** Small Squat S. The widespread commercial use of hard money on the West Coast explains the availability of heavily circulated examples from this first-year, With Motto issue. However, lightly circulated representatives like this Choice AU coin are scarce. Significant luster remains and illuminates surfaces the exhibit well-struck devices with minor softness over the centers. An expected number of abrasions occur throughout. NGC ID# 269Y, PCGS# 8950

1871-S Twenty, MS61
Type Two, Scarce in Mint State

3478 **1871-S MS61 NGC. CAC.** Small Squat S mintmark. A lustrous example, lightly abraded but less so than normally seen in this grade. This heavily exported issue is notably scarce in Mint State, as are all Type Two (With Motto) double eagles. Attractive, medium-gold surfaces display abundant mint frost and cartwheel luster. Census: 65 in 61, 21 finer (7/14). NGC ID# 26AC, PCGS# 8962

1871-S Double Eagle, MS63
Conditionally Rare

3479 **1871-S MS63 NGC.** The 1871-S is similar in rarity to many other Type Two double eagles in that it can be easily located in VF to AU grades, but becomes increasingly scarce in succeeding Mint State levels and is exceedingly rare in MS63 or finer. NGC has encapsulated just three pieces in this grade and only one finer, while PCGS has seen only one coin in this grade, and also one finer. No Gem examples are known to survive. This shimmering example exhibits frosty honey-gold luster and well-detailed design elements. A few scattered, grade-consistent abrasions are present, the most notable being an old, small cut on Liberty's jaw, which is not overly detracting. NGC ID# 26AC, PCGS# 8962

1873-CC Twenty, XF45
Low-Mintage, Carson City Date

3480 **1873-CC XF45 PCGS. Variety 1-A.** Some examples of the 1873-CC Liberty double eagle surfaced in European holdings in the 1990s, but the issue is still somewhat scarce in high grades. This attractive Choice XF specimen offers lightly abraded greenish-gold surfaces with much original mint luster and outstanding eye appeal for the grade. NGC ID# 26AJ, PCGS# 8968

1874-S Type Two Twenty, MS62
Small Squat S Mintmark

3481 **1874-S MS62 PCGS.** Small Squat S. At least three different mintmark styles were used on 1874-S twenties. The Block S and Broad S are approximately equal in scarcity, but the present mintmark size is rare for the issue, and likely from a single holdover reverse die. This apricot-gold double eagle has good luster and the expected number of obverse abrasions. None are noticeable aside from a narrow scratch between the first two stars. Population: 58 in 62, 4 finer (7/14). NGC ID# 26AR, PCGS# 8972

1875 Double Eagle, MS62+
Lustrous High-End Example

3482 **1875 MS62+ PCGS. CAC.** An olive-gold piece that exhibits a crisp strike and shimmering luster. Abrasions are uncommonly minimal on the reverse, although the obverse displays scattered contact. Given the sizeable spread in cost between MS62 and MS63 examples of this Type Two issue, the MS62+ grade may be ideal for many collectors of the popular series. Population: 10 in 62+, 73 finer (7/14). NGC ID# 26AS, PCGS# 8973

1875-CC Double Eagle, Well-Struck AU55

3483 **1875-CC AU55 PCGS. Variety 4-A.** The die line within the R of LIBERTY and another above E in AMERICA attribute the variety. Traces of luster reside in the recessed areas of this Choice AU twenty dollar. Well-struck, and revealing light scattered marks consistent with brief circulation. This is the most available Carson City double eagle from the 1870s. NGC ID# 26AT, PCGS# 8974

1876-CC Liberty Twenty, AU53
Once Rare, Now Available

3484 **1876-CC AU53 NGC. Variety 7-C**. The outflow of double eagles from the Carson City Mint went to Europe and South America, with many examples returning in previous decades into collector hands. While old collections struggled to find an example, current numismatists can have their pick of repatriated survivors. This attractive AU coin displays apricot-gold coloration and olive-gold accents. Luster remains at the margins. Abrasions are minimal considering its likely globetrotting past. NGC ID# 26AW, PCGS# 8977

1883-CC Double Eagle, Attractive AU53

3485 **1883-CC AU53 NGC. Variety 2-A.** The variety shows two small die chips between stars 8 and 9, and the second C in the mintmark is partially over the D in DOLLAR. After Comstock yields had diminished by the early 1880s, they staged a minor comeback. Consequently, deposits at the Carson City Mint increased from 1882 through 1884. This coin, from a mintage of 59,962 examples, exhibits yellow-gold color over surfaces that retain a significant amount of luster. The devices show sharp definition with only a touch of friction over the high points. NGC ID# 26BH, PCGS# 8999

1885-CC Twenty, AU55
Key Carson City Issue

3486 **1885-CC AU55 NGC. Variety 1-A.** A lightly circulated example of this scarce Carson City date, one of the few survivors from a mintage of just 9,450 pieces. Most examples are heavily bagmarked and abraded — either by rough handling at the mint, or from bag transportation overseas.

This Choice About Uncirculated coin, however, shows only minor marks over its natural, medium-gold surfaces. Olive-gold accents add appeal, and the mint luster remains surprisingly strong. Most aspects of the bold strike are intact. This is the scarcest Carson City double eagle from the 1880s, a coin that is always in demand. NGC ID# 26BN, PCGS# 9004

1887-S Twenty, MS62
Cartwheel Luster

3487 **1887-S MS62 NGC.** The stars show full centers, and Liberty's hair is strongly defined. Only the eagle's claws are softly struck. Booming luster and orange-gold color combine to imbue this Mint State twenty with strong eye appeal. Abrasions are lightly scattered throughout. NGC has certified only 23 examples in numerically finer grades (7/14). NGC ID# 26BS, PCGS# 9007

1889-S Liberty Twenty, MS64
Conditionally Very Rare in Finer Grades

3488 **1889-S MS64 NGC.** The 1889-S Liberty double eagle enjoyed a substantial mintage of 774,700 pieces and the issue is not difficult to locate in lower Mint State grades, thanks to the repatriation of many examples found in overseas holdings in recent years. The 1889-S is rare at the MS64 grade level, however, and finer examples are very rare. The present coin is an attractive Choice example, with sharply detailed design elements and pleasing yellow-gold surfaces that show only minor signs of contact. A few minor marks in the left obverse field, near Liberty's chin, can serve as pedigree markers. Vibrant mint luster enhances the outstanding eye appeal. Census: 24 in 64, 7 in 64+, 2 finer (8/14). NGC ID# 26BW, PCGS# 9012

1890-S Double Eagle, MS64+
Notable Condition Rarity

3489 **1890-S MS64+ NGC. CAC.** This San Francisco issue is virtually unavailable in full Gem condition, making high-end near-Gem coins always in strong demand. This lustrous and Choice example is brilliant and virtually unmarked. The lightly frosted fields emit bold cartwheel luster, white the strike is absolutely full. All of Liberty's hair strands and curls are fully brought up. The eagle is bold from feathers to fletchings.

A "condition rarity" of the highest order, it is likely no more than a dozen or so finer coins exist of this surprisingly challenging S-mint date. Census: 12 in 64 (5 in 64+), 2 finer (7/14). NGC ID# 26BZ, PCGS# 9015

1904 Liberty Double Eagle, MS65
Ideal Issue for Type Representation

3490 **1904 MS65 PCGS. CAC.** The 1904 boasts the highest mintage of the Liberty double eagle series (more than 6 million coins), and is readily available in grades through MS65. As a result, the date is widely popular for type purposes. This piece shows frosty, orange-gold luster and well-defined motifs. A few ticks on the cheek preclude an even finer grade, though the overall quality is superior to that which is typically seen on this type. NGC ID# 26CY, PCGS# 9045

1904 Double Eagle, MS66
Gorgeous, Undisturbed Example

3491 **1904 MS66 PCGS.** Among the many thousands of Uncirculated survivors of this most available Liberty double eagle, the natural tendency for these soft, heavy gold coins to pick up a few abrasions along the way is almost inescapable. Endowed with a strong strike and vibrant, satiny luster, this lovely Premium Gem is even more remarkable in its lack of surface marks. Of equal importance, the sole mentionable disturbance is an out-of-the-way milling mark hidden in Liberty's hair. Had this mark been placed smack-dab in the middle of Liberty's cheek, the numeric grade would have surely been penalized. An outstanding, nearly unsurpassable type coin.
Ex: *FUN Signature (Heritage, 1/07), lot 3249.*
From The Pannonia Collection. NGC ID# 26CY, PCGS# 9045

1907-S Double Eagle, MS64+
Radiantly Lustrous

3492 **1907-S MS64+ PCGS. CAC.** A mintage of more than 2 million coins ensured the survival or moderately large numbers of this San Francisco issue, but those certified finer than this Plus-graded coin are decidedly rare. Vibrant orange-gold mint bloom engulfs each side, delivering excellent visual appeal. Surface disturbances are minor and the design elements are boldly impressed. PCGS has certified only nine numerically finer representatives (7/14). NGC ID# 26D9, PCGS# 9054

PROOF LIBERTY DOUBLE EAGLES

1885 Double Eagle, PR61 Ultra Cameo
Exceedingly Rare as a Proof

3493 **1885 PR61 Ultra Cameo NGC. CAC.** Business strike double eagles of 1885 were produced to the extent of only 751 coins, a memorably low number, even if not as small as the 571 circulation strikes made in 1882. Accordingly, the 1885 business strike is extremely elusive in high grade, putting added pressure on proofs of this date. This PR61 example is one of only 77 proofs produced for the year 1885, and is one of only 11 such coins graded in total at NGC. Four of those are Ultra Cameos, with this example exceeded by three other coins (7/14). The surfaces of this proof show considerable contact both in the fields and on the devices, mostly on the obverse, thus the PR61 grade. However, the splendid, profound cameo contrast makes partial amends. The fields display distinctive orange-peel effect, a characteristic seen on many, if not most proof gold coins from roughly 1870 to 1900. It was caused by annealing the gold planchets in a furnace that had previously been heated to a higher temperature for a base metal. The annealing furnace had not cooled sufficiently for the lower temperature required for gold planchets, creating a crinkled or orange-peel effect. This piece retains considerable appeal despite its low grade, as evidenced by the CAC designation. Census: 1 in 61 Ultra Cameo, 3 finer (7/14).
Ex: Houston Signature (Heritage, 12/2009), lot 2124. PCGS# 99101

1895 Liberty Double Eagle, PR65 Cameo
Only 51 Examples Struck
Tied for Finest Certified

3494 **1895 PR65 Cameo NGC.** The proof mintage of the 1895 Liberty Head double eagles was a meager 51 pieces, so we are surprised to read in the second edition of the Garrett-Guth *Gold Encyclopedia:*

> "The Proof 1895 double eagle is another issue that is surprisingly difficult to locate. Very few examples have been offered for sale in recent decades. The population numbers are at a moderate level, but they do not take into account multiple resubmissions. There are also a few impaired examples in the numbers."

In fact, it would *surprise us if the issue were* easy *to locate*. Undoubtedly many examples have been lost to attrition, whether it be melting as unsold at the Mint (a common practice of the time, but one where the melted pieces went reported nonetheless), being spent during World Wars or the Great Depression, or simply through careless handling or being carried as a pocket piece. The Breen *Proof Encyclopedia* puts the gold double eagle in the same class as the gold eagle, estimating perhaps 25-35 survivors of each.

The combined NGC/PCGS population data show 32 specimens in non-Cameo, Cameo, and Deep/Ultra Cameo, with duplications certain, so the Breen estimate appears to be essentially correct. The PCGS CoinFacts website pegs the survival even lower, at 20-24 pieces, including certified and raw pieces.

The present Gem Cameo example offers yellow-gold surfaces that display a slight, even layer of pale reddish color. The surfaces are deeply mirrored and noticeably contrasted. The only mentionable contact is a few tiny diagonal marks that angle up and to the right from the top of the 9. Census: 3 in 65 Cameo, 0 finer (7/14). PCGS# 89111

1898 Liberty Twenty, PR64 Ultra Cameo
Popular, Well-Produced Issue
Only 75 Examples Struck

3495 **1898 PR64 Ultra Cameo NGC. CAC.** A small proof mintage of 75 Liberty double eagles was accomplished in 1898, most of them issued as part of four-piece gold proof sets. Although collecting large denomination gold coins did not become popular in this country until the late 1930s, a few elite collectors, like Virgil Brand, John M. Clapp, David S. Wilson, James Ten Eyck, and William Forrester Dunham had begun to order gold proof sets systematically from the Mint every year to update their collections by the late 1890s. Most of these sets were broken up in later years, and the eagles and double eagles were often disposed of cheaply, or even just spent, as there was little premium attached to them at the time. As a result, a number of survivors are known in impaired condition. Probably no more than 35-40 examples survive today in all grades, and several specimens are impounded in institutional collections. Two coins are included in the National Numismatic Collection at the Smithsonian Institution.

The proof coins of 1898 were some of the best-produced issues of the 19th century. Unimpaired survivors are of uniformly high quality, with outstanding eye appeal. This coin exhibits razor-sharp definition on all design elements, with full star centers and fine detail in Liberty's hair and the eagle's feathers. The devices have a thick coat of mint frost that contrasts boldly with the deeply mirrored fields to produce a startling gold-on-black cameo flash when the coin is tilted in the light. The pleasing yellow-gold surfaces have the slight orange-peel texture of the best 19th century proofs and a small mark in the lower-right obverse field serves as a pedigree marker. Census: 4 in 64 Ultra Cameo, 9 finer (7/14).
From The Pannonia Collection. NGC ID# 26EK, PCGS# 99114

MCMVII High Relief, Wire Rim Twenty, MS65
Extraordinary Mint Luster

3496 **1907 High Relief, Wire Rim MS65 PCGS.** During the Neoclassical period, beginning in the 1740s in Europe and continuing in this country until the early 1900s, drawings were distilled down to their barest essence. Neoclassical figures were eventually emphasized by starkness and simplicity with a total lack of modeling and perspective. An example of this severity is the three cent nickel, the only perspective given the portrait of Liberty is through the striking process itself, which would bring up the portrait from the surrounding field. In a reaction to the Neoclassicism Augustus Saint-Gaudens saw in the École des Beaux Arts and later stays in Paris, he developed a method of sculpting that broke with the Neoclassical tradition. This method was best described by his son, Homer, in his collaborative biography of his father. In *Reminiscences*, published in 1913, Homer explained, "after he had built up a careful nude of the Victory, he could cut remorselessly into her body to give a natural appearance to her drapery." This subtractive process working in clay, resulted in a figure that could approximate the "wet linen" appearance of marble statues from Classical Greece. The result was a figure of Liberty with deeply recessed lines in the drapery, a figure that could simulate the Nike of Samothrace in the Louvre. The resultant figure that was one that was easily adaptable to the Sherman Group at the entrance to Central Park, the Albright Caryatids, or the striding figure of Liberty on the 1907 double eagle.

This is a wonderful Gem example that displays remarkably thick, satiny luster. Each side is virtually free from coin-to-coin contact, and the strike details are complete in all areas — a result of the numerous blows from a hydraulic press used to strike all High Relief twenties.

From The Pannonia Collection. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, AU Sharpness
Flat Rim Variant

3497 **1907 High Relief, Flat Rim — Improperly Cleaned — NGC Details. AU.** Somewhat scarcer than its Wire Rim counterpart, this Flat Rim High Relief twenty is sharply lustrous — perhaps too much so, since the surfaces are deemed by NGC to have been cleaned to unnatural brightness. Few marks are seen on the concave fields, and the high-relief motifs are smoothly rendered. The high point on Liberty's knee is flat, as is the top edge of the eagle's forward wing, a combination of the cleaning and wear. Still, this is an opportunity to acquire a pleasing High Relief Saint-Gaudens double eagle at an attractive price. PCGS# 9136

1907 High Relief Twenty, Satiny MS64
Flat Rim Variant

3498 **1907 High Relief, Flat Rim MS64 PCGS.** The distinction between Flat Rim and Wire Rim High Relief twenties is not arbitrary, but it is definitely one of degree. Almost all Flat Rim coins show some trace of the wire rim, and similarly most Wire Rim pieces have less-than-complete extruded metal around each side. The story has been repeated many times of Mint Director Frank Leach's communiqué to Superintendent John Landis about elimination of the "burrs" on the edge of the High Reliefs. Leach not only wanted defective coins set aside, but he also wanted to know who was responsible for not carrying out his previous orders to fix the extruded metal between the die faces and collar.

The issue quickly faded in significance to Mint officials once the coins were released and universally acclaimed for their artistic merit. Eventually Flat Rim and Wire Rim twenties became popular collectible variants of these impressive coins. This is a fully defined example that displays the usual bright, satiny mint luster with just a hint of pale reddish patina. Significant portions of the rims on each side show "flatness."

From The Pannonia Collection. PCGS# 9136

LIBERTY
MCMVII

MCMVII High Relief Saint-Gaudens Double Eagle, PR68 ★
One of the Finest-Known Proof Strikings
From the Legendary Captain North and Bass Collections

3499 **1907 High Relief PR68 ★ NGC.** The earliest die impressions of Augustus Saint-Gaudens' majestic double eagle designs were in the form of about 16 to 22 proofs that were produced with an extremely high, medallic relief. These were struck primarily for presentation to Theodore Roosevelt, and while the President readily approved the commencement of their coinage, efficient large-scale production was not mechanically possible. The Ultra High Relief proofs, as they have been called, required nine to 10 impressions from the dies with 172 tons of force on a large medal press to fully bring up the designs (per Breen), and the coins had to be annealed between successive blows to relieve stress that would cause cracking; this procedure encompassed generous amounts of time and significantly slowed production.

When regular coinage finally commenced for business strikes, the coins were given a flat border (the earlier pieces had been coined with no border), and the relief was lowered just a trifle. These changes allowed the designs to be more-or-less brought up with just three die impressions, per the research of Roger Burdette, essentially cutting production time in half. This variant was produced to the extent of 12,367 pieces, but it too was then deemed too inefficient for mass-production, and the high relief idea was scrapped completely.

The Ultra High Relief coins are all considered to be proof or presentation strikes, but no records are known confirming the production of "regular" High Relief proofs, and therefore their existence is highly controversial. Akers writes in *A Handbook of 20th Century United States Gold Coins,* second edition (2008):

> "All High Relief Double Eagles were struck in the same manner, and there are no distinguishing characteristics that positively identify certain examples as proofs. Nevertheless, NGC has certified some High Relief Double Eagles as proofs. PCGS, on the other hand, will not grade any High Relief Double Eagle as a proof."

NGC's criteria for discerning proofs from business strikes consists of five key diagnostics, which are laid out in detail in Dr. Robert Loewinger's *Proof Gold Coinage of the United States:*

> "1) Extreme sharpness in all details, both at the centers and toward the peripheries.
> 2) The complete absence of die erosion or distortion.
> 3) Numerous, raised, die-polishing lines on both sides. These appear in a random, swirling pattern. While also evident on currency strikes, these are particularly bold on Proofs.
> 4) Uniformly satiny surfaces, without any of the radial flowlines that produce conventional Mint luster.
> 5) A build-up of metal just inside both borders, though especially evident on the reverse. This appears as a slightly raised ridge forming a concentric circle with the coin's border. It probably resulted from the extreme compression to which the Proofs were subjected by additional strikes."

These diagnostics, when viewed collectively, are characteristic of a coin that received more die impressions than did normal business strikes. This is consistent with Breen's statement that the proofs "... appear to have received 6 or 7 blows from the dies rather than the normal [3 to] 5." By definition, a proof is a coin that was struck multiple times with specially prepared dies on a carefully selected planchet. The dies used for the High Relief proofs were apparently unfinished, but this was more than likely intentional, as such manufacture produced a proof with a distinctly satiny finish, just like the one that was later utilized for proof coins in 1909 and 1910. The similarity of this finish to the surfaces of normal business strikes, however, ultimately led to its discontinuance in 1910, and this similarity is also likely the cause of much of the confusion surrounding the proof High Reliefs.

Produced on several occasions for presentation purposes, according to Breen, the proof High Reliefs were coined in unknown, but small numbers. NGC has encapsulated 239 specimens, per the *Census Report,* though it is likely that a number of these are the result of resubmissions. Furthermore, in his *Handbook,* Akers notes:

> "Most examples have at least a few scattered contact marks or other light blemishes. NGC has certified several examples in the Proof-65 to Proof-69 grade range, however, so it is possible to obtain a virtually pristine coin with patience."

The present offering is just such a piece, as it is one of just two certified at the PR68 grade level, and is the only one of those to receive a Star designation. The only numerically finer example is none other than the legendary PR69 Flat Rim proof (7/14), offered in Heritage Auctions' November 2005, sale of The Phillip H. Morse Collection, lot 6529, where it brought an impressive $534,750.

The design elements of this piece exhibit a degree of sharpness that is, in a word, incredible; the fingers on Liberty's torch hand are bold and fully rounded, the toes are produced in bold relief, the stars around the border and the capitol building are sharply defined, and the finer gown lines are brought up to an extent not seen on normal business strikes. On the reverse, the eagle is struck to a full bas-relief appearance, and the tailfeathers are well-delineated. As is diagnostic, the satiny yellow-gold surfaces exhibit fine, swirling die-polishing lines, and the metal build up around the reverse border, while not overly pronounced, is present. The edge lettering is sharply defined, and parallel, horizontal striations from the collar (another diagnostic of proofs, per Breen) are seen around the circumference.

This coin's proof pedigree traces back to the legendary Captain Andrew North Saint-Gaudens gold set, which, according to the research of Burdette, possibly originated from the personal collection of Chief Engraver, Charles Edward Barber. The set has been heralded as "the rarest set of gold coins in the world," and won the blue ribbon for "Excellency of Exhibit" when it was displayed by Stack's at the 1956 ANA convention in Chicago. It consisted of seven double eagles, including two Ultra High Reliefs, and four eagles, all in simply remarkable condition and encased in a custom-made leather box. The set remained intact, housed in private collections, until NERCG purchased it in April 1980 for $1 million and distributed the pieces to various collectors. The High Relief Wire Edge proof, as well as its proof Flat Edge counterpart, was purchased from NERCG by Harry W. Bass, Jr. at the New York Metropolitan coin show that same month, and remained in that famous collection until Bowers and Merena auctioned it in November 2000.

Here, this legendary specimen is finally offered once more to numismatic historians and collectors. Tracing its origin to one of the greatest gold collections of all time, this piece is undoubtedly a proof presentation striking, and one of the finest Saint-Gaudens double eagles we have ever offered.

Ex: Possibly from Chief Engraver Charles Barber; Captain Andrew North cased set; Stack's exhibited the case at the 1956 ANA convention; private collection; Stack's again offered the set in April 1980; purchased by NERCG for $1,000,000; purchased by Harry W. Bass, Jr. (4/1980); Harry W. Bass, Jr. Collection (Bowers and Merena, 11/2000), lot 954.

From The Pannonia Collection. PCGS# 9132

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Twenty, MS67
Wells Fargo, Nevada

3500 **1908 No Motto, Wells Fargo Nevada MS67 NGC.** Short Rays obverse, the usual subtype for the high grade Wells Fargo holdings. The Long Rays subtype was regarded as more available prior to disbursement of the famous hoard. The present butter-gold Superb Gem is pristine save for unobtrusive contact on the feathers of the back wing. The strike is good, although the branch hand and leg feathers show minor blending. PCGS# 99142

1908 No Motto Twenty, MS67
Wells Fargo Hoard

3501 **1908 No Motto, Wells Fargo Nevada MS67 PCGS.** Ex: Wells Fargo Nev Gold. The Wells Fargo Hoard was an almost unfathomable quantity of 1908 No Motto double eagles. Reports of the quantity are usually pegged at 10,000 to 20,000 pieces, and nearly all were high grade coins, including nearly 1,000 pieces that PCGS graded MS67, and more than 100 finer examples. Those quantities may have temporarily suppressed the market, but type collectors and specialized collectors acquired nearly every piece, and today, coins such as the present Superb Gem are in high demand. This piece has frosty orange-gold luster with a strong strike and pristine surfaces. *From The Pannonia Collection*. PCGS# 99142

1908-S Double Eagle, AU58
Better San Francisco Issue

3502 **1908-S AU58 NGC.** With a mintage of only 22,000 pieces, the 1908-S is a challenging issue within the Saint-Gaudens double eagle series. This near-Mint representative exhibits pleasing yellow-gold color and nearly complete detail. Light, scattered abrasions accompany the grade, though none are individually detracting. NGC ID# 26FA, PCGS# 9149

1909/8 Saint-Gaudens Twenty, MS64
Popular Overdate, FS-301

3503 **1909/8 MS64 PCGS. FS-301.** The 1909/8 Saint-Gaudens double eagle is always in demand as the only overdate in the 20th century U.S. gold series. The issue is scarce at the MS64 grade level and finer examples are rare. This attractive Choice example offers vivid orange-gold surfaces, with just a few minor contact marks on both sides. The design elements are sharply detailed throughout and the undertype 8 shows plainly below the primary digit. Vibrant mint luster radiates from both sides and a few hints of rose add to the outstanding visual appeal. PCGS has graded 25 numerically finer examples (7/14). NGC ID# 26FC, PCGS# 9151

1910 Double Eagle, MS65
Only Four Numerically Finer at PCGS

3504 **1910 MS65 PCGS.** The 1910 Saint-Gaudens double eagle is one of the more often-seen issues from the period, but it becomes elusive in MS65, and finer pieces are genuinely rare. Rich orange-gold overtones complement satiny honey-gold luster on this example, while the design elements are sharply impressed and the surfaces are void of any major imperfections. PCGS has certified just four numerically finer representatives (7/14). NGC ID# 26FF, PCGS# 9154

1913-S Saint-Gaudens Twenty, MS65
Only One Finer Coin at PCGS

3505 **1913-S MS65 PCGS Secure. CAC.** Ex: Duckor. The 1913-S double eagle had a mintage of just 34,000 coins, the third-lowest mintage of any double eagle behind the 1907 High Relief and the 1908-S. The only other San Francisco issue with a five-figure mintage was the 1930-S. Although certain other issues, such as the 1909, 1914, and 1915 are rarer, the mintage alone suggests an important, conditionally rare Saint-Gaudens double eagle.

The survival rate of the 1913-S was higher than for most other issues. In his *Complete Encyclopedia*, Walter Breen reported that many 1913-S double eagles were imported from French banks in the mid-1950s, usually showing extensive bagmarks. The quantity of exports was considerable, with most remaining pieces stored in Treasury vaults until they were melted in the 1930s. A few well-heeled collectors ordered coins from the San Francisco Mint at the time of issue, and those pieces are probably the source of the few surviving Gems, such as the present specimen.

Deep reddish-gold at the lower obverse complements lighter lilac-gold in the upper portions. A few stray marks on the obverse are consistent with the Gem grade, and tiny abrasions are well-distributed among the eagle feathers. The strike is not quite full but close, with softness on Liberty's nose, the sandal, and the Capitol dome. A long lateral die crack traverses the sun at the lower reverse. Population: 23 in 65, 1 finer (7/14).
From The Pannonia Collection. NGC ID# 26FR, PCGS# 9163

1914 Double Eagle, MS64+
Scarce in Higher Grades

3506 **1914 MS64+ NGC.** This date is easily obtainable in Choice condition, but the present coin is one of only 17 MS64 examples awarded a Plus designation at NGC (7/14), and numerically finer coins are scarcely seen. Deep honey and rose-gold hues encompass each side and surface abrasions are minimal. Some high-point softness is noted on Liberty's knee and torch hand, though not to a readily noticeable extent. NGC has certified 26 numerically finer coins (7/14). NGC ID# 26FS, PCGS# 9164

1914-S Saint-Gaudens Twenty, MS66
Just One Coin Numerically Finer

3507 **1914-S MS66 NGC.** Finely textured fields and devices provide the perfect palette for explosive mint luster and iridescent colors, making this outstanding Premium Gem twenty a visual delight. The strike is bold and beautiful, while any marks are microscopic and a non-factor. PCGS has seen no coins numerically finer; and NGC shows just a single higher-graded coin in MS67 (7/14). NGC ID# 26FU, PCGS# 9166

1920 Saint-Gaudens Double Eagle, MS64+
Prohibitively Rare Any Finer

3508 **1920 MS64+ PCGS.** Jeff Garrett calls this date the "ultimate condition rarity of the series," and for good reason; it is easily obtainable in grades through MS64, but in MS65 only eight coins have been certified (one at PCGS and seven at NGC), and none are known finer (7/14). In that light, this Plus-graded MS64 coin becomes all the more desirable. Satiny green-gold luster showcases wisps of rose-gold color over the central regions, while the strike is bold and the surfaces are free of heavy abrasions. NGC ID# 26FY, PCGS# 9170

1922-S Double Eagle, MS65
Heavily Melted Issue
Conditional Rarity

3509 **1922-S MS65 PCGS.** The 1922-S Saint-Gaudens double eagle falls into the category of "unheralded rarity" at the Gem level, where PCGS has certified only 14 submissions including the present piece, with but two finer. Why is this issue overlooked? Several reasons, beginning with the fact that it is not a member of the monomint 1921 date, one of the few years in the series in which but a single mint struck examples of the twenty. The issue is also likely confused and obfuscated by both the 1922 Philadelphia and the mintmarked 1923-D issues, both common by series standards.

As with many issues in the Saint-Gaudens twenties, the 1922-S has a deceptively high mintage exceeding 2.6 million pieces, which masks the fact that the date suffered heavy melting during the post-1933 era. Finally, the 1922-S still boasts a survivorship of just over 2,000 certification events at NGC and PCGS combined — certainly including duplications — but the vast majority of those pieces fall into the lower Mint State grades, up to and including MS64. It is only at the Gem level where the 1922-S emerges as a conditionally rare coin, one whose certified populations suddenly fall off a cliff (NGC has similarly seen only a 14 submissions in MS65, with three in MS66). David Akers writes of the issue:

> "The 1922-S is nearly always very sharply struck. The surfaces are frosty and usually have well above average lustre for the series. The color, particularly on most top grade specimens, is characteristically excellent, usually a rich greenish gold with orange highlights or a deep yellow gold with a coppery tint. Many specimens have noticeable reddish or orange copper spots. Some specimens have a noticeable inner 'rim' (die bulge) just inside the normal rim that runs through the stars and tops of the reverse letters and across the sun. Rounded, almost beveled, rims are seen on many examples of this issue."

The present Gem PCGS example exhibits original surfaces with softly frosted mint luster. Rich rose-gold and lilac colors intermingle over each side, and there are no noticeable abrasions. The sharp strike throughout has produced a generous wealth of detail, including full columns on the Capitol building. Population: 14 in 65, 2 finer (7/14).
From The Pannonia Collection. NGC ID# 26G4, PCGS# 9174

1926-D Double Eagle, MS62
Minimally Abraded for the Issue
A Semikey Date in the Series

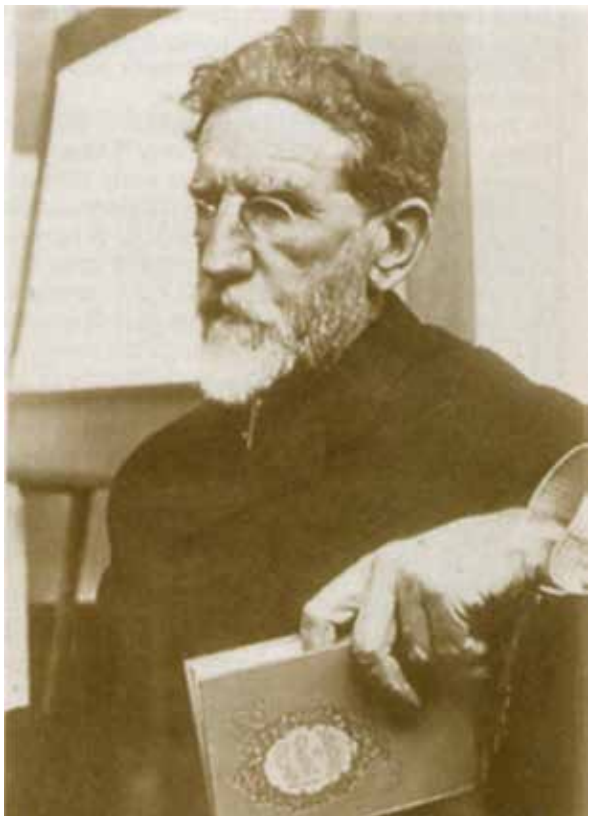

3510 **1926-D MS62 PCGS.** Most of the 481,000-piece mintage of the 1926-D double eagle was melted in the 1930s. The few survivors were either found overseas or were held back by a handful of wealthy collectors. PCGS and NGC have, to date (7/14), certified a mere 290 examples in all levels of preservation, making this a semikey issue in the Saint-Gaudens series. Mint State specimens are mostly in the MS60 to MS63 range, and only 31 near-Gems have been seen, along with three Gems and two Premium Gems (the latter five all PCGS-graded).

The yellow-gold surfaces of this MS62 offering display hints of lavender-rose along with tiny freckles of apricot throughout the obverse and along the upper- and right- reverse margin. The design elements are well-struck except for the usually seen softness on the Capitol building. Scattered minute marks are perhaps fewer than what might be expected for an MS62, and are definitely fewer and less severe than typically seen on this date. Indeed, Akers (2008) writes: "It is nearly impossible to locate a 1926-D Double Eagle whose surfaces are not noticeably abraded." NGC ID# 26GE, PCGS# 9184

1926-S Double Eagle, MS64+
Elusive Branch Mint Representative

3511 **1926-S MS64+ PCGS Secure. CAC.** The *Guide Book* mintage of more than 2 million pieces is a mere historical footnote. The majority 1926-S twenties were melted by the Treasury following Roosevelt's gold recall in 1933, as was the case for most other branch mint double eagles from the 1920s. A few hundred examples have made their way back to America from their sanctuary in foreign bank vaults, but PCGS has certified only 35 pieces finer than the present coin (7/14). This is a lustrous and minimally abraded representative. The surfaces exhibit sharply detailed design elements and warm honey-gold coloration. Only a handful of tiny rim nicks prevent a Gem designation.
Ex: Long Beach Signature (Heritage, 6/2010), lot 1963.
From The Pannonia Collection. NGC ID# 26GF, PCGS# 9185

Augustus Saint-Gaudens

1930-S Saint-Gaudens Double Eagle, MS65
Major San Francisco Rarity
Exceptional Visual Appeal

3512 **1930-S MS65 PCGS.** Gold coin production at the San Francisco Mint was sporadic in the years leading up to the gold confiscation of 1933. Ten dollar pieces, aside from a small spurt of 96,000 pieces in 1930, had not been coined since 1920, half eagles had last been produced in 1916, and quarter eagles had not been struck since 1879. The double eagle was the only gold denomination that was produced on a regular basis (until 1927), but many of these coins were either exported to European countries or held in bank vaults as backing for the various gold certificates that were widely infiltrating the economy.

By 1928, however, double eagles were in ample supply in Western vaults, and therefore further coinage was unneeded. In 1930, one last production run of just 74,000 pieces was accomplished at San Francisco. Closely following the stock market crash the year before, however, virtually the entirety of this mintage remained in bank or Treasury vaults until Franklin D. Roosevelt issued Executive Order 6102 in 1933, prohibiting the private ownership of gold bullion. Virtually all examples were recalled and destroyed, with only a few escaping into private hands. Garrett and Guth write in their *Encyclopedia of U.S. Gold Coins:*

> "The 1930-S double eagle is a significant rarity ... Those that did survive were likely held by American coin collectors or dealers, and it is almost certain that none were shipped overseas from this Western mint."

The exact number of survivors is unknown, though PCGS estimates as few as 50 to 75 examples are extant in all grades. The certified population data seems to substantiate this figure, as PCGS and NGC combined have encapsulated only 67 pieces in all grades (7/14) and, as the issue in general never circulated, virtually all of these are in Mint State condition.

The Gem example here-offered is truly exceptional in every respect. Frosty lime-gold mint bloom illuminates wisps of peach over each side, with an area of deeper apricot color seen in the upper-left obverse region. The strike is bold throughout, and surface flaws are nearly nonexistent. A couple small, faint grease ribbons in the left obverse field (as struck) are noted, but hardly inhibit the immense visual appeal. For the advanced Saint-Gaudens gold specialist, this piece represents a rare and important opportunity to acquire an example of the final San Francisco gold issue. Population: 10 in 65 (1 in 65+), 5 finer (7/14).
From The Pannonia Collection. NGC ID# 26GM, PCGS# 9191

1931 Saint-Gaudens Double Eagle, MS65
Beautifully Preserved, Ex: Norweb
Significant Late-Series Rarity

3513 **1931 MS65 PCGS. CAC.** Ex: Norweb. The 1931 double eagle was issued at the height of the Great Depression, a time when the need for large numbers of high denomination gold coins was dwindling. As a result, virtually the entire mintage of nearly 3 million coins was left unwanted in bank and Treasury vaults when the executive order came from Franklin Delano Roosevelt to recall all non-numismatic gold coins. Garrett and Guth estimate as few as 200 to 300 pieces escaped, and the PCGS website estimates only 100 to 150 survive today. PCGS and NGC combined, however, have encapsulated just 109 representatives in all grades (7/14), a number that likely still includes an unknown number of resubmissions.

Dr. Charles W. Green's study of Mint records in the 1940s, suggests that only 45 of these survivors were ever actually distributed through official channels, and it is likely that the remaining extant pieces were spared from the melting pots by Treasury officials or Mint employees who recognized the coins' pending rarity. Furthermore, as the coins did not circulate in America, and since none were apparently shipped overseas for trade, all but one example (a sole AU58 coin at PCGS) rank in the Mint State grade range. The Smithsonian Institution contains three pieces, the finest of which grades MS67, per Garrett and Guth.

When found, this issue is usually seen with excellent eye appeal; the typical piece is sharply struck, with frosty luster and attractive color ranging from light green-gold to deeper orange-gold. The example here-offered is an excellent representative of that quality. The surfaces seem to glow with nearly undisturbed mint frost, and radiant yellow-gold surfaces exhibit hints of light green and rose hues. A few small ticks along Liberty's right (facing) leg preclude a technically finer grade, though these seem to have no effect on the simply immense visual appeal. Population: 25 in 65, 10 finer (7/14).

Ex: The Norweb Collection.

From The Pannonia Collection. NGC ID# 26GN, PCGS# 9192

1931-D Saint-Gaudens Twenty, MS65
Heavily Melted Issue
Sought-After Series Rarity

3514 **1931-D MS65 PCGS Secure.** On April 5, 1933, President Franklin D. Roosevelt signed Executive Order 6102, prohibiting the "... hoarding of gold coin, gold bullion, and gold certificates within the continental United States by individuals, partnerships, associations, and corporations ..." The official reasoning behind the order was that it was believed by the President that public hoarding of gold coins during the height of the Great Depression was starving the economy and making the economic situation worse. Exceptions were made for jewelry, art-related, and industrial uses of gold, as well as for gold coins deemed to have a recognized numismatic value as collectibles. Obviously, recently minted double eagle issues, such as the 1931-D, still sitting in bank and Treasury vaults, were not protected by these provisions.

The 1931-D had a total production of only 106,500 coins, but its surviving population is surprisingly similar to that of the 1931 Philadelphia issue, of which nearly 3 million examples were coined. Furthermore, the circumstances surrounding the survival of negligible numbers of the 1931-D were similar to those of its Philadelphia counterpart, and nearly all known survivors are in the Mint State grade range. Most, however, are lightly to moderately abraded, and grade no finer than MS64. At the Gem level, this date becomes significantly scarcer than the 1931.

Certified population figures report the existence of 134 examples in all grades, slightly more than are purportedly certified of the 1931, but this figure likely includes a number of resubmissions. In MS65, PCGS reports just 16 submissions of the 1931-D (1 in 65+), with just four finer (7/14).

This piece displays the bold strike that is typical of the issue, with satiny orange and lemon-gold hues encompassing each side. A few grade-consistent surface ticks are detected upon close examination, though the overall quality is exceptional and the eye appeal is equally high. For the advanced Saint-Gaudens double eagle specialist, this lustrous Gem will prove to be most satisfactory.

From The Pannonia Collection. NGC ID# 26GP, PCGS# 9193

1900 Lafayette Dollar, MS65+
DuVall 2-C, Sharply Struck

3515 **1900 Lafayette Dollar MS65+ PCGS. DuVall 2-C.** The Lafayette dollar is a unique coin in American numismatics, as it is the only coin ever issued by the United States Mint that, in a technical sense, bears no date. The Lafayette Memorial Commission desired that the coins be dated 1900 to coincide with the construction of a memorial statue of the general (depicted on the reverse of the coin), which was to be erected during the Universal Exposition held in Paris that year. The coins needed to be struck in December 1899, however, and it was against Mint policy to antedate a coin. The solution came in the addition of the legend ERECTED BY THE YOUTH OF THE UNITED STATES IN HONOR OF GEN. LAFAYETTE / PARIS 1900 to the reverse around the depiction of the statue. Thus, from a technical standpoint, the date refers to the erecting of the memorial, and not the production of the coin.

This piece is one of just eight MS65 examples to receive a Plus designation from PCGS (7/14), and finer pieces are seldom seen. Mottled olive-gold and sea-green toning encompasses each side, while the strike is bold and the preservation is excellent. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS65
Lustrous and Attractively Toned

3516 **1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 2-C.** The Lafayette dollar was not a sell-out success at the time of issue, and it would prove to be the last commemorative silver dollar minted for the United States until 1983. Of the estimated 36,000 pieces issued, many of them were significantly abraded or otherwise troubled before they ever left the mint, due to poor production quality and unintentional ill-treatment. This immensely lustrous Gem is better-preserved than most. Rich green-gold and emerald shadings embrace each side. Well struck with only a few light flaws on Washington's cheek that are consistent with the grade assigned. Housed in a green label holder. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS66
Comprehensive Multicolor Patina
Better DuVall 3-D

3517 **1900 Lafayette Dollar MS66 PCGS. CAC. DuVall 3-D.** This is a scarce die pairing among the four die marriages — from among four obverse and five reverse dies — known for the Lafayette dollars, a factor that should further increase demand for this high-grade specimen. The DuVall 3 obverse shows the AT in STATES recut at their bases, paired with the D obverse displaying a thin stem with a leaf over the 9 in 1900. Delicate patina on each side of this piece comprises silver, powder-gray, sky-blue, and amber-gold, with top-notch underlying luster and equal eye appeal. The exposed high points on each side are remarkably free from contact. A coin that would be difficult to impossible to upgrade. Population: 90 in 66 (5 in 66+), 5 finer (7/14).

Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3956, which realized $21,850.

From The Pannonia Collection. NGC ID# 28N8, PCGS# 9222

1935/34-S Boone Bicentennial Half, MS67+
Only Two Finer Coins at PCGS

3518 **1935/34-S Boone MS67+ PCGS. CAC.** The 1935-S Daniel Boone Bicentennial half dollar with the added "small" 1934 date had a mintage of only 2,004 coins, not only one of the lowest regular issue mintages in the classic commemorative series, but in all of 20th century numismatics. Not surprisingly, almost the entire mintage survives, many in high grades, though this in no way affects the immense demand from specialists. This Plus-graded Superb Gem, however, is bested by just two coins at PCGS (7/14), and is almost flawlessly preserved, as should be expected. The strike is sharp, with frosty, pastel-toned mint luster and just a few tinges of amber-gold toning around the peripheries. Population: 18 in 67 (3 in 67+), 2 finer (7/14). NGC ID# 28JL, PCGS# 9264

1936 Cincinnati Half Dollar, MS67
Among the Finest Certified

3519 **1936 Cincinnati MS67 PCGS.** The Cincinnati Music Center half dollars were struck at all three mints, but were only sold in three-coin sets, of which just 5,000 were distributed. This brilliant, satiny Superb Gem is one of just eight so-graded examples of the Philadelphia issue at PCGS (1 in 67+), and none are finer. The devices are well-struck and, as is expected at this grade level, the preservation is exceptional. NGC ID# 28JZ, PCGS# 9283

1892 Columbian Half, MS67
Delicately Toned

3520 **1892 Columbian MS67 PCGS.** This first-year commemorative half exhibits a band of multicolor toning around the largely brilliant obverse in shades of sea-green, magenta, and ice-blue. The reverse shows glimpses of rose, orange-brown, and blue color. This satiny Superb Gem is fully struck and nearly pristine. Population: 26 in 67 (4 in 67+), 0 finer (7/14). NGC ID# 26H5, PCGS# 9296

1892 Columbian Half Dollar, MS67
None Numerically Finer

3521 **1892 Columbian MS67 PCGS. CAC.** This commemorative half dollar, contemporarily referred to as a souvenir coin, was issued to celebrate the 400th anniversary of Columbus' landing in the New World. The 1892-dated coins were first struck on November 19, 1892, just weeks after the opening of the World's Columbian Exposition in Chicago. A total of 950,000 1892 halves were distributed for one dollar each. For years, the major certification services did not recognize proofs, although this has since changed.

While this Superb Gem is designated as Uncirculated, the surfaces are undeniably prooflike in appearance, and this is likely one of the first examples struck after the Mint produced 103 proofs. The heavily frosted devices contrast pleasingly against the mildly reflective fields, imbuing this coin with CAC-approved visual appeal. Sharply detailed and essentially pristine, neither PCGS nor NGC have certified an example in a higher numeric grade (7/14). NGC ID# 26H5, PCGS# 9296

1893 Columbian Half Dollar, MS67
Conditionally Rare Second-Year Variety

3522 **1893 Columbian MS67 PCGS.** This was the first commemorative half dollar type produced in the U.S., and this version from 1893 is a second-year "variety" by virtue of its differing date from the 1892 coins. This conditionally rare Superb Gem exhibits pleasing ocean-blue and pastel amber coloration over the obverse, and similar ocean-blue toning combined with central tan patina on the reverse. Sharply struck, highly lustrous, and blemish-free. A great coin. Population: 17 in 67 (2 in 67+), 0 finer (7/14). NGC ID# 26H6, PCGS# 9297

1893 Columbian Half Dollar, MS67
Tied for Finest at PCGS

3523 **1893 Columbian MS67 PCGS. CAC.** Congress authorized the production of 5 million commemorative half dollars to be issued in conjunction with the World's Columbian Exposition held in Chicago in 1893. About 950,000 were coined during the close of 1892 (and therefore bear that date), but the other 4 million-plus coins were struck in 1893; of the latter pieces, however, more than 2.5 million were later melted as unsold, which left the net 1893 mintage at little more than 1.5 million coins, and still others were distributed into circulation at face value. Still, survivors are plentiful in virtually all grades, with the issue only becoming truly rare at the MS67 grade level; PCGS has certified a paltry 17 coins in this grade, and none finer (7/14). This piece exhibits radiant mint luster, with delightful two-toned color; the obverse displays delicate aquamarine and green-gold hues in the recesses around the border, with dusky lavender-gray color in the center, while the reverse has the same array, though the peripheral hues are instead a warm golden-orange hue. Despite its higher mintage, the 1893 is actually scarcer in this lofty grade than is the 1892 issue. NGC ID# 26H6, PCGS# 9297

1922 Grant With Star Half Dollar, MS65
An All-Brilliant Example

3524 **1922 Grant With Star MS65 NGC.** The surfaces are bright and beautiful, snow-white on this brilliant Gem, a great-looking specimen for those who prefer untoned coins. A loupe reveals the extensive, swirling die polish lines the issue often displays, but no mentionable signs of contact appear on either side. The next grade level is far more elusive and pricey, making this a tempting potential acquisition. NGC ID# 28KC, PCGS# 9307

1922 Grant With Star Half Dollar, MS66
Lustrous and Well-Preserved

3525 **1922 Grant With Star MS66 PCGS.** Ex: Young Collection. According to Dave Bowers, writing in *Commemorative Coins of the United States* (1991): "The 1922 Grant 'star' half dollar in Mint State is one of the very rarest pieces of the series simply because the mintage was low and most pieces did not sell to collectors." Early in the life of the Grant With Star half dollar obverse die, it clashed, and was then lapped by the press operator. As a result, most examples display prominent obverse die polish lines along with clash marks near the nose and chin. The present high-grade and satiny example is from that die state. Peripherally toned golden-brown, rose-red, and lavender, this Premium Gem specimen is pleasingly lustrous and minimally abraded. Population: 40 in 66 (6 in 66+), 5 finer (7/14). NGC ID# 28KC, PCGS# 9307

1935 Hudson Commemorative, MS67
Splendid Visual Appeal

3526 **1935 Hudson MS67 NGC. CAC.** Iridescent toning occurs peripherally around the obverse in shades of jade-green, magenta, and orange, while the interior remains mostly brilliant. The reverse is lightly patinated with splashes of golden-russet color. Softly frosted luster enlivens the carefully preserved surfaces of this Superb Gem Hudson commemorative, further enhancing its strong eye appeal. This coin is among the finest numerically certified at both NGC and PCGS (7/14). NGC ID# 28KF, PCGS# 9312

1925 Lexington-Concord Half, MS67
Only One Certified Numerically Finer

3527 **1925 Lexington MS67 PCGS.** The Lexington-Concord Sesquicentennial half dollar is rare at the MS67 grade level, and finer coins are virtually nonexistent. This example is well-struck, with mottled olive-gold and amber toning over each side. The preservation is excellent, and the eye appeal is quite pleasing. Population: 18 in 67 (3 in 67+), 1 finer (7/14). NGC ID# 28KK, PCGS# 9318

1920 Maine Centennial Half Dollar, MS67
Satiny-Silver Appeal

3528 **1920 Maine MS67 PCGS. CAC.** A light dusting of amber-gold patina shows on the margins of this Superb Gem Maine half, but overall the impression is silver-white brilliance. Few of the production problems that plague the issue are seen on the surfaces of this smooth and pristine example. Die finishing marks are at a minimum, and there are no overt handling marks that are often seen. The strike is bold except for the usual blending of the branches on the pine tree and the moose below. Population: 38 in 67 (4 in 67+), 0 finer (7/14). NGC ID# 28KN, PCGS# 9326

1920 Maine Centennial Half, MS67
None Numerically Finer at PCGS

3529 **1920 Maine MS67 PCGS. CAC.** The Maine Centennial half dollar was intended to be sold at the centennial celebration in Portland in 1920, but it arrived too late to be distributed as planned, and was instead sold by the state treasurer throughout the following years. The designs were prepared by Anthony de Francisci, who is more widely known for his depiction of Liberty on the Peace dollar of the following year. This Maine Centennial half displays bold design definition and warm olive-gold toning, the colors most prominent on the reverse. Population: 38 in 67 (3 in 67+), 0 finer (7/14). NGC ID# 28KN, PCGS# 9326

1921 Missouri Centennial Half, MS66
Among the Finest Certified at PCGS

3530 **1921 Missouri MS66 PCGS.** Two varieties of the Missouri Centennial half dollar were issued, one with a small, incused 2x4 notation in the left obverse field, meant to symbolize Missouri's stance as the 24th state admitted into the Union, and one without this marking. The plain variety, here represented, was struck second, but was the first to be distributed. This coin displays lovely champagne toning overall, with deeper amber and aquamarine hues seen around the peripheries. The strike is bold and no significant surface abrasions are seen with the unaided eye. Population: 37 in 66, 0 finer (7/14). NGC ID# 28KS, PCGS# 9330

1921 Missouri Half, MS66
Lightly Toned, Boldly Struck

3531 **1921 Missouri MS66 PCGS.** Ex: Guttag Family. From a mintage just more than 10,000 coins, this Premium Gem Missouri commemorative half is tied with 37 others as the finest certified at PCGS (7/14). Pale lilac patina is accented in the centers of each side by amber-gold and iridescent colors. Contact marks are inconsequential on this boldly struck piece. NGC ID# 28KS, PCGS# 9330

1921 Missouri 2★4 Half, MS66
Tied for Finest at PCGS

3532 **1921 Missouri 2x4 MS66 PCGS.** The obverse (2★4) side is a rather consistent pinkish-silver, while the reverse shows cascading vertical waves of silver alternating with amber-gold. The good strike and paucity of mentionable contact puts this Premium Gem PCGS example in a tie with 31 other submissions at that service, and none are finer (7/14). A key to the commemorative half series, as is the non-2★4 version in this grade. NGC ID# 28KR, PCGS# 9331

1938 Specimen New Rochelle, New York Half Dollar, SP66
Brilliant, Beautifully Preserved Presentation Piece

3533 **1938 New Rochelle SP66 NGC. CAC.** This issue commemorating the 250th anniversary of New Rochelle, New York's founding was sponsored by the Westchester County Coin Club. A total of 25,015 coins were struck in 1937, including 15 pieces for the Assay Commission; 9,749 unsold examples were later melted. There were 50 "presentation" or specimen coins produced for distribution to local dignitaries, members of the Coinage Committee, and members of the aforementioned coin club. These coins were struck on proof planchets using polished dies.

This is a flashy, brilliant example with snow-white surfaces that are highly reflective and show the expected die striations in the fields. Razor-sharp strike definition imparts a full impression of Gertrude K. Lathrop's original design, and there are no distracting contact marks or other problems found on either side of the coin. An attractive example that the early silver commemorative specialist or the loyal resident of New Rochelle should find intriguing. NGC Census: 6 in SP66, 5 finer (7/14). NGC ID# 28KU, PCGS# 9335

1921 Pilgrim Tercentenary Half, MS67+
Only One Finer at PCGS

3534 **1921 Pilgrim MS67+ PCGS.** The original Pilgrim Tercentenary half dollars of 1920 bore the dual date 1620 - 1920 on the reverse, but when production continued the following year, the date 1921 was added to the obverse field. The Mint struck 100,000 examples of the latter issue (plus 53 coins for assay purposes), but 80,000 were left unsold and were later melted. High-grade survivors are widely collected by classic commemorative specialists, and those grading as high as the present coin are decidedly scarce. This piece boasts satiny, virtually undisturbed mint luster and fully defined motifs. Splashes of deep olive, amber, and green-gold encompass portions of each side, though primarily in the margins. Population: 34 in 67 (2 in 67+), 1 finer (7/14). NGC ID# 28LD, PCGS# 9360

1937 Roanoke, MS68
Remarkable, Outstanding Example

3535 **1937 Roanoke MS68 PCGS.** This is a truly remarkable coin, and worthy of the MS68 grade designation by PCGS. The intense, frosty mint luster is unusual and an outstanding attribute of this Superb example. The surfaces are silver-white and seem immaculate, even under magnification. A great coin that should appeal to the early silver commemorative Registry Set specialist. Population: 15 in 68 (1 in 68+), 0 finer (7/14). NGC ID# 28LH, PCGS# 9367

1927 Vermont Sesquicentennial Half, MS67
Only One Numerically Finer at PCGS

3536 **1927 Vermont MS67 PCGS. CAC.** Authorized by congress in 1925, the Vermont Sesquicentennial half dollar was issued to commemorate the 150th anniversary of the independence of Vermont. The Superb Gem representative here-offered exhibits a bold strike throughout, with satiny luster and pale olive-gold toning on each side. Population: 30 in 67 (2 in 67+), 1 finer (7/14). NGC ID# 28M6, PCGS# 9401

1947 Booker T. Washington Half, MS67
None Certified Finer

3537 **1947 Booker T. Washington MS67 PCGS. CAC.** The 1947 Booker T. Washington commemorative half dollars were only sold in three-coin sets, with each mint producing just 6,000 coins. PCGS and NGC combined have encapsulated only 14 examples of the Philadelphia issue in MS67 (seven at each service), and none have been deemed finer (7/14). This representative displays softly frosted, nearly untoned mint luster, with deep orange-gold and olive hues seen in the recesses around the borders. The strike is well-executed, and the surfaces are nearly pristine. NGC ID# 28MA, PCGS# 9408

1947-D Booker T. Washington Half, MS67
Incredibly Frosty Mint Bloom

3538 **1947-D Booker T. Washington MS67 PCGS. CAC.** Production of Booker T. Washington commemorative half dollars at the Denver Mint dropped to just 6,000 coins in 1947 (down from 50,000 during the introductory year), though the coin would still remain in regular production through 1951. This impressive piece is incredibly frosty, with virtually undisturbed surfaces and seemingly unrivaled eye appeal. Essentially untoned, this coin ranks with just six others as the finest certified at PCGS (7/14). NGC ID# 28MB, PCGS# 9409

1950 Booker T. Washington Half, MS67
Tied for Finest Certified

3539 **1950 Booker T. Washington MS67 PCGS. CAC.** The 1950 Booker T. Washington commemorative half dollar had a mintage of 12,000 pieces (plus four coins for assay purposes), though it is believed as many as half of those struck were later melted as unsold. This MS67 piece is one of just eight so-graded examples at PCGS, and is bested by none (7/14). Faint pastel hues are detected throughout the almost flawless surfaces, though the luster is otherwise brilliant. This is a well-struck piece, worthy of the finest classic commemorative collection. NGC ID# 28MK, PCGS# 9420

1950-S Booker T. Washington Half, MS68
The Single-Finest Coin Certified

3540 **1950-S Booker T. Washington MS68 NGC.** This amazing MS68 Booker T. Washington commemorative half is the finest example we have offered and the single-finest coin certified at NGC and PCGS combined (7/14). The largely brilliant and immaculately preserved surfaces display faint marginal toning in shades of rose-violet and apricot. An important Registry opportunity. NGC ID# 28MM, PCGS# 9422

1953-S Washington-Carver Half, MS67
Splendid Original Color and Superior Preservation

3541 **1953-S Washington-Carver MS67 PCGS. CAC.** For some reason, many of the Washington-Carver halves that survive in high grade — a minority of those existing — display splendid original coloration. Between the remarkable color and the excellent surface preservation required for a high grade, this small minority of Washington-Carver coins forms a memorable and exclusive subset in the silver commemorative series that collectors eagerly pursue. This Superb Gem 1953-S is one such memorable example. Bountiful cartwheel luster radiates from each side, despite a moderate layer of pale peripheral copper color surrounding pale jade-green centers on each side. As expected, the few marks visible at all are of no significance. Population: 9 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 28N2, PCGS# 9440

1936 York County Tercentenary Half, MS68
Conditionally Rare, Tied for Finest at PCGS

3542 **1936 York MS68 PCGS. CAC.** Blushes of deep orange and apple-green frequent the borders of this highly lustrous and fully struck silver commemorative. The toning pattern is suggestive of a coin that has resided in an original cardboard holder for many years. The fields are immaculate, and the grade is only limited by faint contact on the county seal. Population: 25 in 68, 0 finer (7/14).
Ex: Sterling Collection, Dallas Signature (Heritage, 11/2007), lot 1679; Central States Signature (Heritage, 4/2009), lot 3419; Long Beach Signature (Heritage, 6/2010), lot 1342.
From The Pannonia Collection. NGC ID# 28N7, PCGS# 9449

COMMEMORATIVE GOLD

1903 Louisiana Purchase/Jefferson Gold Dollar, MS67
Marvelous, Richly Toned Example

3543 **1903 Louisiana Purchase/Jefferson MS67 PCGS. CAC.** Only a few dozen pieces of this first gold dollar issue are certified at the Superb Gem level at each service, and they are in hot demand from collectors of the complete commemorative gold set, as well as the various small-denomination commemorative gold coins. This marvelous example shows deep, rich reddish-orange color prevailing, with nary a mark visible even under a loupe. This is one of only 47 with the CAC sticker (7/14).
Ex: *ANA Signature (Heritage, 8/11), lot 5060.*
From The Pannonia Collection. NGC ID# 26HA, PCGS# 7443

1903 Louisiana Purchase, McKinley Gold Dollar
Beautifully Preserved MS67+

3544 **1903 Louisiana Purchase/McKinley MS67+ PCGS. CAC.** Struck to commemorate the Louisiana Purchase, this high-end Superb Gem Louisiana Purchase McKinley gold dollar showcases rich honey-gold luster and nearly flawless surfaces. The issue was one of two special gold dollars issued for the Louisiana Purchase Exposition, held in St. Louis in 1904, the other featuring a portrait of Thomas Jefferson who was president during the period when the Louisiana Territory was acquired. Both issues were distributed in equal numbers (17,500 coins), and are relatively similar in high-grade scarcity today. Population: 94 in 67 (2 in 67+), 2 finer (7/14). NGC ID# 26HB, PCGS# 7444

1904 Lewis and Clark Gold Dollar, MS66+
Exceptional Visual Appeal, Scarce Any Finer

3545 **1904 Lewis and Clark MS66+ NGC. CAC.** This is an unusually radiant, nearly flawless example of this popular early gold commemorative. Rich golden luster engulfs each side, with razor-sharp design definition throughout. A touch of the usual surface roughness seen in the recesses around the border legends, but this is undetectable to the unaided eye. NGC has encapsulated only 30 numerically finer representatives (7/14). NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Dollar
Splendid Superb Gem

3546 **1904 Lewis and Clark MS67 PCGS. CAC.** A simply astounding survivor of this prized gold dollar issue, the first of two bearing the dual-portrait Lewis and Clark design. While the 1904 has a better overall survival rate than its 1905 counterpart, the 1904 remains a condition rarity at the MS67 level and is nearly unobtainable any finer. This Superb Gem offers bright lemon-gold luster that reflects upon the remarkable surface quality. The strike is bold, with the fine details of the hair and clothing readily appreciable, and the overall eye appeal is stunning. Population: 18 in 67 (1 in 67+), 1 finer (7/14).
Ex: Houston Signature (Heritage, 12/2009), lot 1333.
From The Pannonia Collection. NGC ID# 26HC, PCGS# 7447

1905 Lewis and Clark Gold Dollar
Extremely Rare Superb Gem

3547 **1905 Lewis and Clark MS67 NGC.** The 1905 Lewis and Clark gold dollar is a heavily melted and elusive commemorative gold issue, the second date of a design that was unpopular even in its first go-round. Farran Zerbe, the famous early numismatist who is so prominently associated with the early commemorative gold issues he promoted, made a serious miscalculation when he overanticipated demand for the Lewis and Clark gold dollars, even when *every single previous commemorative design* had either been released to circulation or partially melted. The latter was the fate of both Lewis and Clark dates, leaving both elusive today, but the 1905 especially so.

This focus on melting and overall rarity does not even begin to cover the rarity of the early gold commemoratives in high grades, of course. The 1905 Lewis and Clark gold dollar is especially susceptible to the trend; at the Superb Gem level, for instance, there are only seven coins in the combined certified population, none of them modified by Plus or Star designations, and there are zero coins numerically finer (7/14).

This example is one of the seven, and by extension it is one of the most magnificent Lewis and Clark gold dollars a collector will ever see. Swirling luster is primarily canary-yellow with hints of honey and peach, and the sharply detailed devices are as carefully preserved as the smooth fields. The few grade-defining faults on each side are the merest quibbles. An excellent choice for the commemorative gold enthusiast who collects at the highest levels.
From The Pannonia Collection. NGC ID# 26HD, PCGS# 7448

1915-S Panama-Pacific Gold Dollar
Immaculate Superb Gem

3548 **1915-S Panama-Pacific Gold Dollar MS67 PCGS.** A wonderfully smooth and lightly frosted example of the Panama-Pacific gold dollar, with superb coloration and immaculate surfaces. Although many of this issue are bothered by friction on the obverse, this example is free of any marks or distractions. The portrait of the laborer is bold and fully struck, and the reverse is equally sharp. Although Farran Zerbe's ambitious plans were not fully realized, a net mintage of 15,000 pieces was accomplished from an original production of 25,000 gold dollars. This is one of the finest survivors from the mintage — none are certified numerically higher by either PCGS or NGC (7/14).
From The Pannonia Collection. NGC ID# 26HE, PCGS# 7449

1915-S Panama-Pacific Quarter Eagle
Gorgeous Premium Gem

3549 **1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC.** The obverse design features Columbia riding a hippocampus, symbolizing the link between the Atlantic and Pacific oceans. The caduceus in her hand is thought to represent the victory by Colonel William Gorgas and the Army Medical Corps over the yellow fever and malaria outbreaks that affected workers during the building of the Panama Canal. This lustrous, orange-gold Premium Gem commands strong visual appeal. The devices are boldly impressed, and marks are invisible to the unaided eye. PCGS has certified 35 pieces in finer numeric grades (7/14). NGC ID# 26HK, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS67
Tied for Finest Certified at PCGS

3550 **1915-S Panama-Pacific Quarter Eagle MS67 PCGS. CAC.** The 1915-S Panama-Pacific quarter eagle, featuring an obverse design by Mint Chief Engraver, Charles Barber, is a fairly modernistic design for Barber, who would pass away two years later at age 77. The figure of Columbia riding a hippocampus, a mythological sea monster with the foreparts of a horse and the hindquarters of a fish, plays nicely into the nautical theme of the Panama-Pacific International Exposition. The reverse design is more pedestrian, a recycled eagle by George T. Morgan first used on 1877 pattern half dollars.

The present Superb Gem Pan-Pac quarter eagle is one of only 35 submissions in this grade at PCGS, and there are none finer (7/14). Softly glowing, thorough luster radiates throughout each side, complementing light orange-gold color and a virtual absence of contact. A prize example of this popular commemorative design.
From The Pannonia Collection. NGC ID# 26HK, PCGS# 7450

1915-S Panama Pacific Fifty Dollar Gold, MS65
The Scarcer Round Variant

3551 **1915-S Panama-Pacific 50 Dollar Round MS65 PCGS.** In addition to their extremely low mintages, part of the celebrity of the 1915-S Panama-Pacific fifty dollar coins today stems from the poor reputation of the numismatic promoter and huckster *par excellence*, Farran Zerbe. Zerbe (1871-1949) joined the ANA in 1900, serving as first vice president from 1904 to 1907 and president from 1907 to 1909. Despite this prestigious resume, Zerbe was responsible for the sour taste in collectors' mouths left by several early commemorative gold dollar issues. Take, for example, the 1903 Louisiana Purchase-McKinley and Jefferson gold dollars. Those first commemorative gold dollars were authorized to the extent of 250,000 pieces, of which 215,000 had to eventually be melted as unsold. Zerbe offered the coins for $3 each — a price that collectors deemed excessive, at three times face value. Zerbe submitted articles and press releases to *The Numismatist*, touting the investment potential of the coins. Nonetheless, within a year of their issue, the coins' prices fell to $2 or less. Bowers writes in *A Guide Book of United States Commemorative Coins:*

> "All of this hoopla did not sit well with many collectors and dealers. In particular, Thomas L. Elder, a dealer whose business was just beginning to become important on the national scene, later wrote a virulent condemnation, stating that Zerbe, contrary to all standards of numismatic professionalism, was simply a huckster who engaged in misleading advertising and promotions."

The 1904-05 Lewis and Clark Exposition gold dollars were also associated unofficially with Zerbe, and sales were muted at best after the 1903 debacle. More than a decade later, when the 1915 Panama-Pacific Exposition rolled around, Bowers writes:

> "Zerbe's reputation in the numismatic community was so poor that when the ANA decided to hold its annual numismatic convention in San Francisco in 1915, only a handful of members showed up, fewer than 20 in all — setting a record for poor attendance unequalled before or since."

None of Farran Zerbe's hucksterism was needed to sell these large-diameter gold pieces. For those with pockets deep enough, the coins' inherent beauty was enough; yet, it also helped that the Panama-Pacific gold coins also celebrate the Panama Canal completion, a current event of monumental national importance. This Gem is a virtually perfect example of the rarest of all commemorative gold coins, and a fitting testament to the achievement. The surfaces exude bright mint frost and yellow-gold color, with overall exceptional quality.
From The Pannonia Collection. NGC ID# 26HM, PCGS# 7451

1915-S Octagonal Panama-Pacific Fifty Dollar, MS64
Magnificent Large-Diameter Gold Commemorative

3552 **1915-S Panama-Pacific 50 Dollar Octagonal MS64 NGC. CAC.** The Panama Canal, arguably the greatest man-made wonder of the modern world, was officially opened in August 1914, and became a landmark event in the history not only of the United States, but of the international trade world in general. To celebrate this milestone, the United States began preparations for the Panama-Pacific International Exposition, which was to be held in San Francisco the following year. This Exposition, however, was planned to dwarf all previous major fairs held in the United States, even the prestigious 1876 Centennial Exhibition and the 1893 World's Columbian Exposition. The Exposition, taking the general appearance of a miniature city when completed, was situated in Golden Gate Park in San Francisco, and occupied some 635 acres of ground.

By 1915, it was commonplace to issue a series of commemorative coins in conjunction with major expositions, not only to be used as souvenirs, but also to procure the necessary funding to build the fair. On January 16, 1915, congress authorized the production of not one, but four different commemorative denominations - silver half dollar, gold dollar, gold quarter eagle, and gold fifty dollar. The coins were released by the Treasury at face value, and the Exposition was allowed to charge whatever it wanted to collectors and fair-goers.

Of the four denominations, the fifty dollar gold pieces are by far the rarest and most prestigious, containing nearly two and a half ounces of gold each. Congress authorized the production of 3,000 examples, which were coined in two different types: round, and octagonal (1,500 pieces each). The sale price set by Farran Zerbe, who was placed in charge of public distribution, was $100 per coin, or twice face value (although this purchase included an example of each of the lower denominations at no additional cost); while not unusually high from a percentage viewpoint, the high dollar-count limited sales somewhat, with the result that only 645 examples of the octagonal version and 483 examples of the round variant were ever distributed, and the remainder was melted.

Today, the octagonal version is slightly more available than is the round, though both pieces are collectively known as the rarest and most prestigious gold commemoratives ever issued by the United States. This example of the octagonal variety is a beautifully preserved representative, with satiny, honey-gold luster and remarkably clean surfaces. The advanced commemorative gold specialist will find it challenging to locate a visually finer piece.
From The Pannonia Collection. NGC ID# 26HN, PCGS# 7452

1922 Grant No Star Gold Dollar
Remarkable Superb Gem

3553 **1922 Grant No Star MS67 PCGS. CAC.** Essentially flawless surfaces characterize this beautiful Superb Gem, issued to raise money for a Grant memorial in Point Pleasant, Ohio. Only 5,000 No Star examples were distributed, and the variety is slightly scarcer than the earlier With Star variant. Deep orange-gold color and vibrant luster blend over each side. This piece is among the finest coins certified at PCGS (7/14). NGC ID# 26HJ, PCGS# 7458

1922 Grant No Star, MS67
Exceptional Orange-Gold Patina

3554 **1922 Grant No Star MS67 PCGS. CAC.** Although the No Star variant is not always as highly sought as its With Star counterpart, it is actually rarer in high grades such as this Superb Gem by about 40% at PCGS. This highly lustrous jewel displays wonderful, bold orange and lemon-gold highlights on the obverse and an intricately struck reverse with radiant orange accents. It would be difficult to surpass the eye appeal of this exceptional example. None are certified numerically higher by PCGS (7/14).
From The Pannonia Collection. NGC ID# 26HJ, PCGS# 7458

PROOF COMMEMORATIVE GOLD

1903 Louisiana Purchase Jefferson Dollar
Deeply Mirrored PR64 Cameo

3555 **1903 Jefferson PR64 Cameo PCGS. CAC.** Although it perhaps goes largely forgotten today, the Louisiana Purchase was undoubtedly the most significant single real estate transaction in American history, doubling the size of the American continent by adding essentially all the land between the Mississippi River and the Rocky Mountains. It is only fitting that such a monumental event would be commemorated numismatically — so far — in two different centuries. In 1903 through 1905 it was the Louisiana Purchase-Jefferson/McKinley and Lewis and Clark Exposition gold dollars, and in 2004-2006 it was the various numismatic delicacies including the Lewis and Clark Bicentennial silver dollar, the Westward Journey nickels depicting Jefferson, and others.

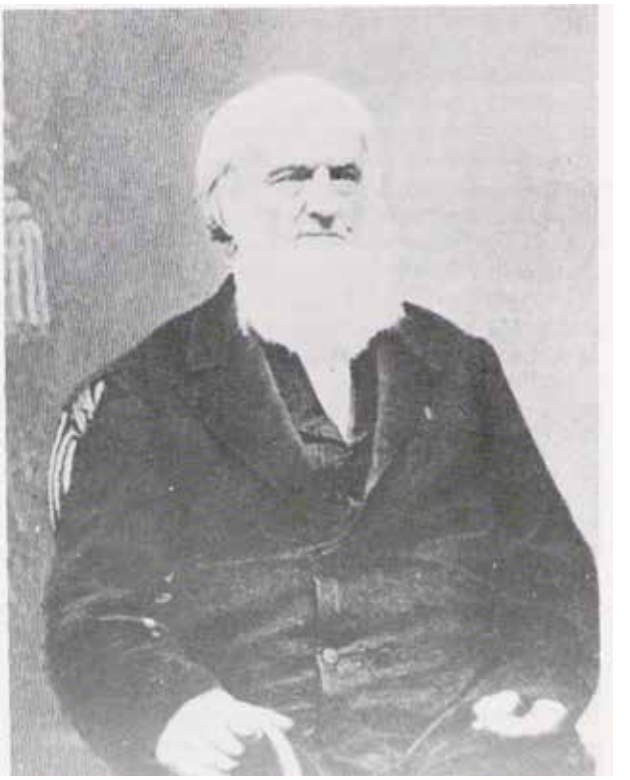

While many numismatists consider the 1848 CAL. quarter eagles to be America's first true commemorative coin, those pieces entailed no complete overhaul or design change. The 1903 gold dollars were specifically designed as true commemoratives, and the Mint recorded only 100 proofs each struck of the Jefferson and McKinley designs. Survival rates appear virtually identical for the two designs in proof format. In PR64 Cameo this is the only piece so certified at PCGS, superseded by five PR65 Cameo coins and two examples in PR66 Cameo (7/14).

When viewing this piece there is no doubt about its status as a proof. The fields are deeply reflective, and the devices show a noticeable amount of mint frost that provides the Cameo designation. Rich orange-gold color is seen over each side of this lovely, contrasted proof.
Ex: Phoenix Signature (Heritage, 3/2008), lot 2000; Long Beach Signature (Heritage, 9/2011), lot 3913.
From The Pannonia Collection. PCGS# 87482

1850 Moffat & Co. Five, XF45 K-7, Reddish-Gold Surfaces

3556 **1850 Moffat & Co. Five Dollar XF45 PCGS. K-7, R.4.** Small eagle variety with the leaf trio centered under S in S.M.V. and the berry over FI in FIVE. This is an important Gold Rush souvenir from the esteemed firm of Moffat & Co. The firm produced five and ten dollar gold coins 1849 and 1850 that traded at full face value, an unusual occurrence for territorial gold. In 1851, coinage production ended when Moffat & Co. received a federal contract to operate a U.S. Assay Office. The attractive surfaces feature reddish-gold color and pleasing detail. Listed on page 384 of the 2015 *Guide Book*. *From The Valley View Life Collection, Part Two.* PCGS# 10243

John Little Moffat

1851 Humbert Fifty Dollar, Lettered Edge, 880 Thous MS61
One of the Better-Known Examples of the K-2 Variety

3557 **1851 Humbert Fifty Dollar, Lettered Edge, 880 Thous. MS61 NGC. K-2, R.5.** No 50 on reverse. This is an outstanding Mint State example of the famous fifty-dollar 'slugs', produced in great numbers in San Francisco, between 1850 and 1855. Most of these pieces were later melted to produce smaller-denomination gold coins that were more circulation-friendly, explaining their great rarity today.

The production of these first types, with '50' and '880 fineness' hand-stamped onto the obverse die, was labor-intensive indeed. The D and C on the obverse were intentionally left blank to allow for odd denominations of dollars and cents to be punched, although only the fifty dollar denomination was actually created (again, with 50 and the 880 fineness each hand-stamped onto the obverse die).

The present K-2 1851 Lettered Edge Humbert fifty, of 880 thousandths fineness, is certified MS61 by NGC: an example of remarkable quality. The Lettered Edge type — rather than '50' on the center of the reverse, the K-2 and similar varieties show a motif of tight concentric circles with 24 small triangular shapes displayed along the outer edge — is seen more often than the 'With 50' type, but these slugs are seldom seen in Mint State, regardless of Kagin variety. This specimen is well-struck on some of the areas that are typically weak, including the eagle's head, wing feathers, and tailfeathers; while the highest portion of the central obverse design remains somewhat flat. The luster quality on both sides of the piece is appealing, displaying a combination of satiny and semi-reflective elements that illuminate the lightly abraded green-gold surfaces. A great representative of this famous, rare type that is guaranteed to receive considerable interest when it crosses the auction block. Census: 4 in 61, 11 finer (7/14).
From The Pannonia Collection. PCGS# 10196

1851 Humbert Fifty, VF25
K-7 Variety, Reeded Edge
Classic California Slug

3558 **1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. VF25 NGC. K-7, R.4.** In his book, *California Coiners and Assayers*, author Dan Owens cites a passage from the *Pacific News* dated February 1, 1851 discussing Congressional authorization for the U.S. Assay Office in San Francisco to strike gold bars and ingots:

> "... a gentlemen of integrity and experience Augustus Humbert, Esq., was duly appointed to execute the trust of supervising the coinage of these bars and ingots, and affixing the stamp which should determine their genuineness. The dies for this purpose — the striking of the $50 pieces — have been procured, and the first coin produced by them was shown us yesterday..."

The small-sized inner circle and the ribbon positioned close to the engine turning on the reverse distinguish the K-7 variety from the K-6 variant. This classic Gold Rush era representative features bright green- and yellow-gold surfaces and a predictable number of bumps and abrasions for the grade. The outer legends appear largely worn-away, although the date is partially visible. The eagle and rock show distinct outlines and little interior detail. Overall, this is an ideal entry point into the Territorial Gold fifty dollar series. Listed on page 385 of the 2015 *Guide Book*. PCGS# 10214

1852 Assay Office Fifty Dollar, .887, AU Details
K-13, Attractive and Impressive In This High Grade

3559 **1852 Assay Office Fifty Dollar, 887 Thous. — Improperly Cleaned — NGC Details. AU. K-13, R.5.** When this fifty-dollar ingot was created by the firm previously known as Moffat & Company — now operating as the United States Assay Office of Gold — the large "slugs", as they were known, had nearly exhausted their usefulness and would soon be replaced by ten and twenty-dollar gold coins. Some additional fifty-dollar pieces were produced, even into 1853, but the local business community in San Francisco, as well as the general public, had clearly indicated their preference for the smaller-denomination coins that would make local commerce so much easier to conduct.

This AU Details example has a pleasingly smooth appearance and suffers little from the aftereffects of an alleged cleaning. The green-gold surfaces display scattered abrasions, as expected for a lightly-circulated item, and a slight loss of detail perhaps from the original strike definition. An attractive ingot of considerable historic value, certain to hold great appeal for collectors and dealers in these rare, esoteric pieces from the days of the California Gold Rush.

1852 U.S. Assay Office $50, K-13, Unc Details
Later Issue, Scarcer Kagin Variety

3560 **1852 Assay Office Fifty Dollar, 887 Thous. — Edge Repair — PCGS Genuine. Unc Details. K-13, Low R.5.** This is an attractive example of the now-famous fifty-dollar "slugs" that were produced in great numbers during the early years of the California Gold Rush (1849-1854). The Gold Rush occurred in a remote location, far from the nearest official U.S. coinage facility, resulting in complications that arose from the need for local circulating money. Numerous foreign coins were used for the purpose, while officials struggled to convince federal authorities of a better solution: an official U.S. mint facility located in San Francisco. That facility did not materialize until 1854, and in the meantime the so-called United States Assay Office of Gold was one of the forerunners that served as a temporary stopgap measure.

This green-gold piece is bright and has a flashy appearance that is quite unusual for this type, examples of which ordinarily present satiny, rather muted surfaces. The design features are well-impressed, save for some of the secondary peripheral legends. Small-to-moderate abrasions pepper the front side of the piece, but are not necessarily an indicator of circulation, as acknowledged by PCGS with their "Unc Details" designation. Considering the paucity of Uncirculated examples, this piece may be considered conditionally scarce, even if it is net-graded due to an Edge Repair.

A rare fifty-dollar slug or ingot that represents a tremendous amount of numismatic interest for the serious Territorial Gold specialist. PCGS# 10016

1852 Assay Office Ten, Choice AU
K-12a, Attractive Toning

3561 **1852 Assay Office Ten Dollar AU55 PCGS. CAC. K-12a, R.4.** An attractively toned representative with orange-gold centers and plum-red margins. Sharply defined with only slight wear on the eagle's legs and fletchings. Ample luster remains, and the quality is exceptional for the Choice AU grade. The reverse is virtually devoid of contact. Obverse marks are minor and mostly confined to the field near AMERICA. The late die state with faint beads, Kagin-12a(2). Struck shortly after John Little Moffat's retirement from his historic assay firm. Listed on page 387 of the 2015 *Guide Book*. Population: 29 in 55, 29 finer (7/14). PCGS# 10001

1852 Wass, Molitor & Co. Five Dollar, AU50
Small Head, K-1
Rarely Seen Territorial Issue

3562 **1852 Wass Molitor Five Dollar, Small Head AU50 PCGS. K-1, R.6.** Hungarian immigrants Samuel C. Wass and Agoston P. Molitor arrived in San Francisco in 1850-1851 and eventually opened an assaying office on Montgomery Street. By 1852, the firm had established a reputation for quality, and in an article dated January 8th, 1852, the *San Francisco Herald* described Wass, Molitor's role in producing much-needed small gold coins for West Coast circulation:

> "The very serious inconveniences to which the people of California have been subjected through the want of a mint, and the stream of unwieldy slugs that have been issued from the United States Assay Office have imperatively called for an increase of small coin. The well known and highly respectable firm of Wass, Molitor & Co. have come forward in this emergency, and are now issuing a coin of the value of $5 to supply the necessities of trade...The mechanical execution of the coin issued by these gentlemen certainly reflects the highest credit upon their skill."

The 1852 Wass, Molitor & Co. Small head five is a very rare issue in all grades, and only handful of examples are known to exist. PCGS reports 11 grading events. The service has certified three pieces in AU50 and four coins finer. The NGC *Census* shows a single coin certified Very Fine (7/14)

The obverse depicts the standard half eagle design with W.M. & CO in place of LIBERTY on the coronet. The reverse features the the usual eagle bearing a shield, as on the regular issue U.S. coins. IN CALIFORNIA GOLD takes the place of UNITED STATES OF AMERICA, and the standard FIVE DOLLARS appears below. This remarkable About Uncirculated survivor features a typical strike with weakness on stars and the lower portion of the eagle. Yellow-and green-gold color blankets surfaces that exhibit partial luster in the recesses, and a number of ticks and marks are scattered throughout.

Ex: Louis Eliasberg, Sr.; Eliasberg Estate; Eliasberg Collection, Part I (Bowers and Merena, 5/1996), lot 356. PCGS# 10339

1852 Wass Molitor Ten Dollar
Small Head, K-3, AU50
One of the Finer Examples Known of This Rare Type

3563 **1852 Wass Molitor Ten Dollar, Small Head AU50 NGC. K-3, R.6.** The "plugged obverse" die variety. According to Kagin (1981): ("presumably an 1851 date was on the die and the numeral 1 was drilled out and replaced with a 2.)" The *Guide Book* refers to this variety as a "Small Head" type, which Kagin dislikes, preferring to refer to it as "Long Neck/RE/Large Close Date". It is similar to the K-2 variety, but the bust is larger and the tip is rounded and over the 1 in the date.

This piece is typically soft over the central design elements (from die lapping or polishing), with high-point wear from circulation that further reduces the available detail. All of the major motifs remain evident, however, even if the higher points of the design are somewhat faint. There are a number of trivial nicks and abrasions on each side, indicating that this coin actually served, however briefly, in the channels of commerce; probably in the San Francisco area. A rare and highly desirable item that should be of great interest to the Territorial Gold specialist. Census: 2 in 50, 3 finer (7/14). PCGS# 10345

COINS OF HAWAII

1880 Wailuku Plantation Token, XF45
Half Real, M. 2TE-7

3564 **1880 Wailuku Plantation Half Real XF45 PCGS. M. 2TE-7.** The Wailuku Plantation was an early cane sugar farm operated by American businessmen. The half real, a Mexican silver denomination, traded for 6 1/4 cents in U.S. money. Struck by a local blacksmith, tokens from the Wailuku Plantation are rare today, although several die varieties are known. This ebony-brown example has an even strike and has slightly granular surfaces. Careful inspection reveals a few faded field marks on the reverse. Listed on page 414 of the 2015 *Guide Book*. Population: 1 in 45, 1 finer (7/14). PCGS# 600509

1891(93) Huth Medal, PR63 Deep Cameo Queen Liliuokalani, Bruce X-M1

3565 **1891 Queen Liliuokalani Pattern Silver Dollar, M. 2MH-1, Bruce X-M1, PR63 Deep Cameo PCGS.** Wealthy London coin collector Reginald Huth commissioned this medal in 1893. A total of 50 coins were struck, most of which were distributed to friends and associates. It commemorates the reign of Hawaiian Queen Liliuokalani, who ascended to the throne in 1891 following her brother's death. In 1893, a group of American businessmen, led by Minister John L. Stevens, overthrew the Queen and ruled as a provisional government for five years before Hawaii received Territory status in 1898.

These pieces appear in the PCGS *Population Report* that details six certified examples under four different PCGS coin numbers. Those coins are graded PR65+ Cameo, PR65, PR63 Deep Cameo (2), PR62, and PR60 (7/14).

The obverse features a bust of Queen Liliuokalani facing left with the Latin inscription LILIUOCALANI DEI GRATIA. The reverse shows the Hawaiian islands within a raised inner-circle representing a globe, and the outer legends read HAWAIARVM REGINA 1891. AKAHI DALA. This deeply contrasted representative exhibits thick mint frost over high-relief devices and deeply mirrorlike fields. The interiors remain mostly brilliant, while the peripheral recesses show darker purple-blue patina. A few wispy marks are scattered over each side, visible only with magnification, and they are undistracting. PCGS# 800185

PATTERNS

1838 Half Dollar, Judd-73 Restrike All-Brilliant, Deeply Reflective PR66

3566 **1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR66 NGC.** A draped bust of Liberty faces left on the obverse, with a flying eagle dominating the reverse. Struck in silver with a reeded edge. This restrike has five different die cracks on the reverse, in addition to tiny specks of die rust on both fields. The surfaces are all-white and deeply mirrored and this Premium Gem shows a better strike than usually seen. Among the finest certified examples of this popular early silver pattern.
From The Pannonia Collection. PCGS# 11288

1855 Flying Eagle Cent in Copper-Nickel Alloy Judd-171, MS62

3567 **1855 Flying Eagle Cent, Judd-171, Pollock-196, Low R.7, MS62 NGC.** The obverse features an eagle flying to the left, surrounded by 13 stars with the date at the bottom. The reverse shows a wreath with four leaves under the E in STATES. Struck in copper-nickel alloy with a plain edge. The holder indicates that this is Judd-171 (60% copper and 40% nickel) but it may be Judd-171A, struck in German silver (75% copper, 12% nickel, 13% zinc). Metallurgical analysis is required to make a definitive determination. According to USPatterns.com and the Judd reference (tenth edition), it is thought that examples struck in German silver are originals and coins struck in bronze are restrikes, although some bronze coins may be originals. Like this piece, bronze restrikes should show evidence of clashed dies. The surfaces display beige-tan patina and a uniformly incomplete strike. PCGS# 11736

1864 Dime Struck in Copper
PR65 Red, Judd-381

3568 **1864 Ten Cents, Judd-381, Pollock-449, R.7, PR65 Red PCGS. CAC.** Regular dies trial issue for the Seated dime. Struck in copper with a reeded edge. Watery sunset-orange surfaces have mellowed slightly with delicate lilac patina. A tiny lamination beneath TE in UNITED serves to identify this elusive off-metal striking. Population: 3 in 65 Red, 0 finer (7/14).
Ex: Dallas Signature (Heritage, 10/2006), lot 2379; ANA Signature (Heritage, 8/2008), lot 2725; Long Beach Signature (Heritage, 6/2011), lot 4419. PCGS# 80552

1865 Seated Dollar Struck in Copper
PR66 Red and Brown, Judd-435

3569 **1865 One Dollar, Judd-435, Pollock-508, Low R.7, PR66 Red and Brown NGC.** The obverse die is the design used for regular-issue coinage of silver dollars in 1865. The reverse die is the design adopted for use in 1866 with a scroll containing the motto IN GOD WE TRUST added above the eagle's head. Struck in copper with a reeded edge. There are approximately one dozen examples of Judd-435 extant, a larger number than one would expect from a dies trial issue. A spectacular strike complements virtually unblemished fields. The natural mint color is highlighted with glints of violet and blue.
Ex: The Frederick Taylor Collection (Bowers and Merena, 3/1987), lot 586; Queller Family Collection (Heritage, 1/2009), lot 1642; FUN Signature (Heritage, 1/2011), lot 5350. PCGS# 70620

1865 With Motto Ten Dollar, Struck in Copper PR64 Red and Brown, Judd-450

3570 **1865 Ten Dollar, Judd-450, Pollock-522, High R.6, PR64 Red and Brown NGC.** This transitional eagle shows the normal obverse and IN GOD WE TRUST on the reverse above the eagle. Struck in copper with a reeded edge. The design was adopted for use in 1866. USPatterns.com notes that over a dozen examples are known. This piece offers rich copper-orange coloration with sea-green and purple accents on each side. The devices are fully struck, and only a few carbon specks appear throughout. PCGS# 70637

1866 No Rays Shield Nickel Judd-507, PR65 Cameo

3571 **1866 Shield Five Cents, Judd-507, Pollock-591, R.5, PR65 Cameo PCGS.** Struck in nickel with a plain edge. This is a prototype of the proof 1867 No Rays Shield nickel with the stars above the word CENTS pointing between the E and N and between the T and S. This is believed to be the first No Rays die, according to Saul Teichman. All other No Rays reverse dies have the stars above the word CENTS pointing to the E and T. This reverse was used on many 1866 nickel patterns including Judd-507 through Judd-509. It was also used to strike some regular 1867 proofs in nickel. This is a brilliant example that features deeply mirrored fields and noticeable mint frost on the devices, generating the cameo effect. An exceptional transitional nickel pattern. PCGS# 60703

1866 Dollar, PR64 Brown Trial Strike in Copper, Judd-541

3572 **1866 Dollar, Judd-541, Pollock-606, Low R.6, PR64 Brown PCGS.** This is a trial piece made from the regular dies. Struck in copper with a reeded edge. These were likely issued for sale to collectors, as such practices were commonplace at the time. The surfaces feature reddish-brown color and fully struck devices. A few small ticks are scattered over each side but do not diminish the appeal of this example. PCGS# 60739

1870 William Barber-Designed Dime, PR67 Judd-831, Finest Certified

3573 **1870 Ten Cents, Judd-831, Pollock-921, High R.6, PR67 NGC. CAC.** A William Barber seated Liberty obverse. She faces left and supports a shield in her right hand. Her left hand holds an olive branch. A free-standing liberty pole is present behind the shield. Usual Seated dime reverse. Struck in silver with a reeded edge. Richly patinated lilac-red, navy-blue, and peach-gold with the deepest shades on the obverse. This is the single-finest certified specimen of Judd-831 at either major service (7/14). PCGS# 61075

1870 Aluminum William Barber Half Dollar Judd-931, PR66 Cameo

3574 **1870 Judd-931, Pollock 1037, High R.7, PR66 Cameo PCGS Secure. CAC.** Ex: Stonewall Collection. William Barber's Seated Liberty design, interesting for its placement of the shield behind her legs. The reverse displays an agricultural wreath more suitable for a lower denomination, along with the legends STANDARD and 50 CENTS. An inappropriate pairing of dies, since UNITED STATES OF AMERICA does not appear on either side. Struck in aluminum with a reeded edge. This piece is remarkably unaffected by post-striking impairments. The only ones that are faintly visible are a tiny rim ding over star 4 and a couple of light contact marks on the flag of the 5 in the denomination on the reverse.
Ex: Long Beach Signature (Heritage, 2/2006), lot 2493, where it brought $12,650.
From The Pannonia Collection. PCGS# 861177

1870 Standard Silver Half in Silver
Judd-952, PR65

3575 **1870 Standard Silver Half Dollar, Judd-952, Pollock-1095, Low R.7, PR65 PCGS. CAC.** The obverse shows a bust right of Liberty. She wears a diadem inscribed LIBERTY, with the hair tied in a bun. The peripheral legends include UNITED STATES OF AMERICA and IN GOD WE TRUST, the latter within a scroll. The reverse displays the denomination 50 CENTS and the date 1870 within a wreath of cotton and corn. STANDARD is centered on the upper border. Struck in silver with a plain edge. The surfaces are beautifully toned in shades of golden and lilac with bright underlying mirrors in the fields. PCGS# 61198

1870 Aluminum Standard Silver Half
Judd-986, PR66 Cameo
Exceptional Contrast

3576 **1870 Standard Silver Half Dollar, Judd-986, Pollock-1107, High R.7, PR66 Cameo PCGS. CAC.** Ex: Denali Collection. Liberty faces right and wears a diadem inscribed LIBERTY. Ex: Denali Collection. Her hair is tied up in a bun. IN GOD WE TRUST is below within a scroll, and UNITED STATES OF AMERICA completes the obverse legend. The reverse features a wreath of oak and laurel leaves, with 50 CENTS crowded inside and the date below. STANDARD SILVER frames the wreath. Struck in aluminum with a plain edge. This obverse/reverse design combination was struck in silver, copper, aluminum, and a single white metal piece. All are rare with fewer than a half-dozen examples confirmed. The surfaces of this piece exhibit strong field-to-device contrast on each side. There are no signs of oxidation, and few irregularities are noted. A squiggly lint mark occurs between the D and S in UNITED and STATES, and a small patch of planchet porosity is noted above the top right wreath end.
Ex: Chicago Signature (Heritage, 8/2011), lot 7737. PCGS# 800047

1870 Standard Silver Dollar in Silver
Judd-996, PR64

3577 **1870 Standard Silver Dollar, Judd-996, Pollock-1127, High R.7, PR64 NGC.** William Barber's Liberty design appears surrounded by 13 stars on the obverse. The reverse shows a wreath of corn and cotton around the legends. Struck in silver with a reeded edge. USPatterns.com estimates that perhaps a dozen pieces are known. The fields are brightly reflective on each side with even gray patina over the obverse and a mostly brilliant reverse. Fully struck in all areas and essentially problem-free.
Ex: Bowers and Ruddy Rare Coin Review *44, p. 6; Steig Collection (Bowers and Ruddy, 9/1982), lot 1798; Rusbar Collection (Bowers and Merena, 9/1990), lot 772; Lemus/Queller Collection / FUN Signature (Heritage, 1/2009), lot 1775.* PCGS# 61243

1870 Standard Dollar, PR64 Red and Brown
Judd-998, Struck in Copper

3578 **1870 Standard Silver Dollar, Judd-998, Pollock-1129, R.7, PR64 Red and Brown PCGS.** This Standard dollar depicts Liberty seated, her right hand resting on a shield and holding a ribbon, her left hand holding an olive branch, and a Liberty pole and cap in the background. The central motif on the reverse is the denomination 1 DOLLAR, surrounded by a broad wreath of cotton and corn, and STANDARD at the top. Struck in copper with a reeded edge. About a dozen examples are believed known of this dollar pattern. Considerable mint red survives with slightly mellowed surfaces on each side. The devices are sharply defined, and there are only the slightest traces of carbon specks. Population: 3 in 64 Red and Brown, 0 finer (7/14). PCGS# 71245

1871 Copper Quarter Eagle
Judd-1164, PR66 Red and Brown Cameo
Probably the Finest Known

3579 **1871 Quarter Eagle, Judd-1164, Pollock-1306, R.7, PR66 Red and Brown Cameo NGC.** Ex: Lemus. Regular dies trial for the 1871 Liberty quarter eagle. Struck in copper with a reeded edge. This is an extremely rare striking, and probably a numismatic flight of fancy actually produced for sale to collectors. The current offering was part of a small group of U.S. gold patterns offered in the T. Henry Allen sale by Stack's in February 1977. It was described by that cataloger as "proof, almost full mint color. Rarely seen in this lovely state of preservation." It would have been more accurate to write, "rarely seen *at all.*"

This is an incredible Premium Gem proof with full cameo contrast and essentially brilliant red surfaces. Only a hint of light brown toning appears on the design elements with splashes of pale violet patina. A boldly detailed, glittering proof that is probably the finest known example of Judd-1164. We have records of three examples of the variety, two in copper and one gilt.
Ex: Lemus/Queller Collection / FUN Signature (Heritage, 1/2009), lot 1820; FUN Signature (Heritage, 1/2011), lot 5372. PCGS# 71426

1872 Judd-1234 Quarter Eagle in Aluminum PR63 Deep Cameo

3580 **1872 Quarter Eagle, Judd-1234, Pollock-1376, R.8, PR63 Deep Cameo PCGS Secure.** A rare aluminum pattern struck with the regular quarter eagle dies of 1872. Reeded edge, as normal. This variety is often described as being a regular die trial piece, though the information on USPatterns.com suggests these off-metal "trials" were deliberately produced for sale to collectors. Examples were produced in aluminum and copper, and both are exceedingly rare, with fewer than four of each confirmed to exist. This example of the aluminum variant is one of only two that have been certified by the leading certification services, with the other being an NGC PR65 Ultra Cameo coin (7/14). The fields are deeply mirrored and deliver exceptional contrast against the softly frosted devices. A few scattered marks limit the grade, but the strike is full and this remains an incredibly attractive example of this extremely rare pattern. PCGS# 509827

1873 Trade Dollar, PR64 Judd-1276, Silver With Reeded Edge

3581 **1873 Trade Dollar, Judd-1276, Pollock-1418, R.5, PR64 PCGS.** Struck in silver with a reeded edge. The obverse depicts Liberty facing left surrounded by 13 stars, while the reverse shows the required legends set within a laurel wreath. According to USPatterns.com: "This is one of the designs that was sold by the mint in 6 piece sets for $30. The sets were made in silver with both plain and reeded edges, copper, and aluminum." The surfaces show golden-orange patina and rose accents when held at the correct angle. Population: 8 in 64, 5 finer (7/14). PCGS# 61561

1873 Bailly-Designed Trade Dollar Judd-1281, Deeply Mirrored PR65

3582 **1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR65 NGC.** The obverse, designed by J. A. Bailly, features a coiled hair bust of Liberty facing left. The reverse mimics the 'Amazonian' pattern silver dollar save for a reduction in the size of the eagle and the addition of the motto E PLURIBUS UNUM above and the weight and fineness below. Struck in silver with a reeded edge. The fields are deeply mirrored and mostly untoned, while the color that is present surrounds the devices. PCGS# 61566

1877 Half Union, PR63
Very Rare Fifty Dollar Pattern
Judd-1549a, Copper Gilt

3583 **1877 Fifty Dollar, Judd-1549a Gilt, Pollock-1722, Low R.7, PR63 PCGS.** In their 1913 pattern reference, Edgar Adams and William Woodin wrote:

> "1877. In this year was struck at the mint two of the rarest and most interesting pattern coins of the whole series. They were of a denomination higher than any coin of regular issue, being of fifty dollars value, and are regarded by all collectors as the most desirable coins ever issued at the United States Mint."

The fifty dollar patterns, named half unions, were struck in both Large and Small Head varieties, both types using a common reverse. One specimen of each design was struck in gold (Judd-1546 and Judd-1548) and a small number of copper examples of each design were also produced (Judd-1547 and Judd-1549). Some of the copper coins, including the present Small Head Judd-1549 specimen, were gilt, but it is not clear if this was done at the Mint or later.

The idea for the $100 union and $50 half union gold coinage originated during the California Gold Rush in the 1850s. By the time the San Francisco Mint opened in 1854, most of the familiar Assay Office fifty dollar slugs (struck with semi-official status in 1851 and 1852) had either been exported to pay off large transactions or turned in to be melted for smaller denomination coins that were more convenient for everyday purchases. Since paper money was nonexistent in the California economy during the Gold Rush era, the need for larger denomination gold coins was keenly felt by merchants and bankers who conducted large transactions in the course of their business. These businessmen petitioned Senator William Gwin and Secretary of the Treasury James Guthrie to authorize the striking of fifty dollar gold coins of the same shape and fineness as the United States double eagle. Gwin introduced a bill to provide for the minting of large denomination gold coinage as follows:

> "That there shall be coined and issued by the United States, or by such of the branch mints as the Secretary of the Treasury shall direct, a gold coin of the weight of 2,580 grains, of the value of one hundred dollars, and another of the weight of 1,290 grains, of the value of fifty dollars, each of which coins shall be of the standard fineness now prescribed by law for the gold coins of the United States."

Gwin's bill passed in the Senate on June 16, 1854, but it failed in the House. The private San Francisco firm of Wass, Molitor & Co. struck large numbers of fifty dollar gold pieces in 1855 to serve the purpose the half unions were intended for and the large gold coins were never officially issued by the United States.

Many years later, in 1877, the half union patterns were struck at the Philadelphia Mint during the directorship of Henry Richard Linderman. Linderman was a clerk at the Mint in 1855, and may have remembered the half union proposal from his early days in government service. He had many patterns struck for unofficial reasons during his later terms as Mint Director and formed a spectacular collection of his own, mostly of pattern and restrike issues. The half unions were apparently a "pet project" of Linderman's, according to the editor of the 10th edition of the Judd reference, as there was no pressing need for the large gold coins in 1877.

Impressions from the dies for the half union were reportedly sent to Linderman on August 30, 1877, so the patterns must have been struck in late August. The two gold half unions weigh 1289.1 and 1287.3 grains respectively, in line with the specifications outlined in Gwin's 1854 bill. Mint correspondence of the time indicates that Mint personnel feared such large gold coins would be especially vulnerable to rim filing and being hollowed out and filled by base metal, such as lead. The project was soon abandoned as impractical, and the copper patterns were clandestinely marketed to favored collectors. Chief Coiner A. Louden Snowden acquired the two gold half unions, which were supposed to be melted, by paying the Mint Director the bullion value and a charge for pattern pieces. He later sold these coins to William Woodin, future Secretary of the Treasury, with coin dealer John W. Haseltine acting as intermediary. A scandal ensued when the transaction was made public and a complicated series of legal maneuvers and under-the-table deals resulted in Woodin returning the half unions in exchange for a treasure trove of other patterns, presumably also acquired by Snowden during his tenure as Chief Coiner, and later Superintendent, at the Philadelphia Mint. The gold half unions are safely ensconced in the National Numismatic Collection at the Smithsonian Institution today. USPatterns.com suggests fewer than a dozen examples of Judd-1549 survive today, with one specimen in the Smithsonian and another in the Connecticut State Library. About half the known specimens are gilt.

The early history of the present coin is unknown, but it appeared in lot 2587 of the Royal Sale (B. Max Mehl, 3/1948), where it was part of the consignment of Dr. Christian Allenburger, of Columbus, Nebraska:

> "1877 Fifty-Dollars. Beautiful head of Liberty with diadem inscribed LIBERTY. Thirteen stars, date below. Reverse, large eagle similar to the type on our Double Eagles; motto above. Legend, UNITED STATES OF AMERICA. FIFTY DOLLARS. Milled edge. Struck in copper and gilted. AW-1501. Only about fifteen specimens minted in all. Of highest historical interest and, of course, excessively rare. I doubt if more than two specimens have been offered at auction in the past more than thirty years. A beautiful and thrilling coin to own. Am informed that a specimen sold for over $1,000.00 in the past two or three years, but its auction record is not that high. The last specimen I offered was in the great Olsen Collection of Pattern coins where a similar specimen brought $525.00"

The coin was purchased for the fabulous collection of King Farouk of Egypt. When his government was overthrown in a military coup in the early 1950s, his collections were sold in a series of auctions that were a sensation at the time and still resonate today. Lot 2019 of the Palace Collections of Egypt (Sotheby's, 2/1954) contained both this coin and an example of Judd-1547, the Large Head half union in copper. The lot sold to U.S. collector Robert Schermerhorn, one of the few Americans to attend the sale in Cairo. This piece was later offered in lot 1352 of the 1979 ANA Auction by one of our predecessor companies, New England Rare Coin Auctions, passing through a few unknown intermediaries to our present consignor.

At two inches in diameter and 1/8 of an inch thick, the size of this marvelous coin is truly majestic. The star and letter punches are from the set used on double eagles, and they are dwarfed by the extensive fields of the half union, appearing quite tiny around the peripheries. The design elements exhibit razor-sharp definition throughout, and the well-preserved surfaces are smooth and evenly colored. Like most gilt coins, the luster is a little flat and matte-like, rather than vibrant. The gold plating has worn thin in a few spots on the rim, and there is a small smudge in the left obverse field. Two tiny lintmarks, one touching Liberty's curls about level with star 3, and another touching the curl slightly above star 1, act as pedigree markers. Eye appeal is tremendous. Beautifully preserved and rarely offered, this lot represents an important opportunity for the advanced pattern specialist. Population: 3 in 63, 0 finer (7/14).

1878 Dollar Pattern in Silver
Judd-1554, Pollock-1733, PR66 Cameo

3584 **1878 Dollar, Judd-1554, Pollock-1733, R.5, PR66 Cameo NGC.** The head of Liberty is large and faces left with IN GOD WE TRUST at the top and the date below, similar to the pattern fifty dollar gold pieces from 1877. The reverse has a spread-winged eagle with E PLURIBUS UNUM in Gothic lettering above. UNITED STATES OF AMERICA is at the top and ONE DOLLAR on the bottom rim. This is the Pollock variety with star 13 close to the curl and the upright of the B in PLURIBUS beneath the right foot of the second T in STATES. Struck in silver with a reeded edge. A rare pattern that enjoys considerable popularity due to the kinship in obverse design with the famous half union patterns. Light golden overtones drape the considerable mirrors and the modestly frosted devices.
From The Pannonia Collection. PCGS# 61915

1878 Barber Dollar in Copper
Judd-1555, R.7, Unc Details

3585 **1878 Dollar, Judd-1555, Pollock-1734, Low R.7 — Spot Removals — NGC Details. Unc.** The head of Liberty faces left, with IN GOD WE TRUST above and the date 1878 below. Liberty wears a coronet inscribed LIBERTY. Thirteen stars at the border are arranged seven left, six right. The N of IN is close to the coronet point, and star 13 is close to the lowest hair curl. There are five beads above the Y in LIBERTY. On the reverse an eagle with drooping wings occupies the center, with UNITED STATES OF AMERICA and ONE DOLLAR, the latter in minuscules, at the rim. E PLURIBUS UNUM appears arcing in a Gothic font above the eagle. The upright of the B in PLURIBUS is centered under the tip of the right bottom serif on the second T of STATES, and the M in UNUM is slightly left of center of the M in AMERICA. Struck in copper with a reeded edge.

The most obvious sign of spot removal is a single spot on Liberty's neck. Otherwise, this is a wonderful example of Barber's "rejected dollar" design. Both sides have fully mirrored fields beneath olive-gold and lilac toning.
Ex: Houston Signature (Heritage, 12/2009), lot 1469.

1878 Goloid Dollar, PR64
Ex: Lemus, Judd-1557

3586 **1878 Goloid Dollar, Judd-1557, Pollock-1749, Low R.6, PR64 NGC.** Ex: Lemus. Thirteen stars surround Liberty facing left on the obverse. On the reverse the center reads GOLOID / 1—G. / 24—S. / .9 FINE. / 258 GRS. within a circle of 38 stars. UNITED STATES OF AMERICA is above, ONE DOLLAR below. It is estimated that two dozen examples of J-1557 and J-1558 exist combined. Struck in goloid alloy with a reeded edge. The surfaces are mostly silver with accents of amber and gold and some small dark toning areas on the obverse that are not particularly bothersome. Census: 1 in 64, 0 finer (7/14).
Ex: The Garrett Collection (Bowers and Merena, 3/1980), lot 1052; Brown and Sheldon Collections (Bowers and Merena, 11/1983), lot 4651; Four Landmarks Sale (Bowers and Merena, 3/1989), lot 40; Lemus/Queller Collection / FUN Signature (Heritage, 1/2009), lot 1893. PCGS# 61919

1879 Washlady Quarter Pattern, PR65
Popular Judd-1590

3587 **1879 Washlady Quarter Dollar, Judd-1590, Pollock-1783, High R.6, PR65 PCGS.** Barber's "Washlady" design. The head of Liberty faces left with the motto IN GOD WE TRUST above and 1879 below. She is wearing a headband inscribed LIBERTY. The headband is ornamented with ears of wheat, cotton leaves, and bolls. There are 13 stars at the border arranged 7 left and 6 right. This is paired with a reverse that has an erect eagle with spread wings holding an olive branch in its right talon and three arrows in its left. Above is the legend UNITED STATES OF AMERICA and the motto E PLURIBUS UNUM, below is the denomination QUAR. DOLLAR. Struck in silver with a reeded edge. The outer two thirds of each side is layered in rich steel-blue and golden-brown toning. Minor softness is noted on the hair above the ear and on the eagle's legs. A beautifully patinated example of this popular pattern design. Population: 1 in 65, 5 finer (7/14).
Ex: FUN Signature (Heritage, 1/2005), lot 30626; Denver ANA Signature (Heritage, 8/2006), lot 5803; FUN Signature (Heritage, 1/2007), lot 1558.

1879 Judd-1591, Pollock-1784 Quarter, PR64 Brown
Famous Washlady Design

3588 **1879 Washlady Quarter Dollar, Judd-1591, Pollock-1784, Low R.7, PR64 Brown PCGS.** The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has an eagle clutching an olive branch and three arrows. The UNITED STATES OF AMERICA legend and E PLURIBUS UNUM motto follow inside the upper reverse border with the denomination expressed as QUAR. DOLLAR below. Struck in copper with a reeded edge.

While ridiculed at the time of issue, the Washlady quarter has become one of the most beloved and widely collected of all patterns. The name apparently was given by David Proskey at the F.W. Doughty auction in 1891. Apparently Proskey thought Liberty's hair was disheveled and resembled that of a washlady.

The fields show exceptional depth of reflectivity in spite of the significant layers of blue, violet, and brown toning on each side. The devices also have a noticeable amount of mint frost, and the contrast between the fields and devices. The only "flaw" that we see that could be used for pedigree purposes is a J-shaped lint mark above the second A in AMERICA.
From The Pannonia Collection. PCGS# 61968

1879 Washlady Half Dollar Pattern, PR66
Judd-1597, Tied for Finest Certified at NGC

3589 **1879 Washlady Half Dollar, Judd-1597, Pollock-1791, High R.6, PR66 NGC.** The Charles Barber Society Lady design, popularly called the Washlady, although it is an unfortunate misnomer. Liberty's lush hair is piled atop her head, with IN GOD WE TRUST above and stars seven left, six right. On the reverse a perched eagle holds an olive branch with seven leaves. Three arrows pass behind the wing. UNITED STATES OF AMERICA and HALF DOLLAR are at the rim, with the Latin motto in a wide inner arc above the eagle. Struck in silver with a reeded edge.

This impressive Gem offers well-detailed design elements, with a touch of softness on the central reverse. The fields are brightly reflective, under vivid shades of pale gold and cobalt-blue toning. Census: 2 in 66, 0 finer (7/14).

Ex: Lenox Lohr; Byron Johnson Collection (Robert L. Hughes, 1/1979); Abner Kreisberg and Jerry Cohen, operating as the Coin Gallery; purchased privately by Morris Evans; Rarities Sale (Bowers and Merena, 8/1998), lot 2095. The plate coin on the USPatterns.com website. From The Pannonia Collection. PCGS# 61975

1879 Judd-1599, Pollock-1794 Half Dollar, PR64
Morgan's Obverse Design

3590 **1879 Morgan Half Dollar, Judd-1599, Pollock-1794, High R.6, PR64 PCGS. CAC.** The obverse is dominated by a portrait of Liberty nearly identical to that on the Morgan dollar, but appropriately reduced in size for the half dollar denomination. The peripheral inscription E PLURIBUS UNUM and the accompanied stars differ in placement from the Morgan dollar. The reverse features an eagle with partially spread wings, holding an olive branch in the right talon and a trio of arrows in its left claws. IN GOD WE TRUST is widely spaced below, along with the denomination and UNITED STATES OF AMERICA. Struck in silver with a reeded edge. A softly struck piece but with clear proof surface, this near-Gem specimen has rich silver, gold, lavender, violet, and blue patina. As a Morgan-portrait example in an alternate denomination, this pattern has broader collector appeal than many of its peers, pushing demand beyond what the very rare supply can handle.

From The Pannonia Collection. PCGS# 61977

1879 Morgan Dollar Pattern in Silver
Judd-1611, Extraordinary PR68 Cameo

3591 **1879 Morgan Dollar, Judd-1611, Pollock-1807, Low R.7, PR68 Cameo NGC.** The obverse is that of the regular-issue Morgan dollar, while the reverse shows a statuesque eagle perched, head facing left, with downward-pointed wings, clutching an olive branch and three arrows. UNITED STATES OF AMERICA and ONE DOLLAR encircle the border. Struck in silver with a reeded edge.

This "near-Morgan dollar" poses an interesting contrast with the adopted design. The obverse is as-issued. The eagle on this reverse shows considerable differences, the shape of the head and the center breast, in particular, approach the circulation design, but are still noticeably different. The result of Morgan's efforts was an eagle that was described as "scrawny." About a dozen pieces are extant of this variety, and it is known in both copper and silver.

This is the finest example known of this popular Morgan dollar pattern. A PR67 is recorded at both NGC and PCGS, these are the closest contenders and neither of these pieces are designated as a Cameo. The fields are deeply mirrored with noticeably contrasting mint frost over the devices. When examined with a strong loupe there are simply no contact marks or other imperfections apparent on either side. Even the striking details are complete. When closely examined one notices just the slightest accent of golden patina on each side, but the coin primarily presents as brilliant because of the exceptional depth of mirrored reflectivity in the fields. Morgan dollar collectors take an interest in such patterns as this as it allows the student of the series to trace the progression of various concepts through to the adopted design.

From The Pannonia Collection. PCGS# 61989

1880 Goloid Metric Dollar, PR66 Cameo
Judd-1645, Tied for Finest Certified
Ex: Woodin, Judd

3592 **1880 Metric Dollar, Judd-1645, Pollock-1845, High R.6, PR66 Cameo NGC.** Ex: Lemus. On the obverse, the head of Liberty faces left and 13 stars encircle the rim with the motto above and date below the portrait. The reverse offers a wreath of cotton and wheat and an inner circle of dots enclosing the legends. Struck in goloid with a reeded edge. The High R.6 rarity rating makes this pattern, while nonetheless rare, among the more available goloid metric designs. USPatterns.com estimates that more than a dozen pieces are known. Silver-gold patina cover both sides with remarkable field-device contrast present throughout. The golden hues deepen near the rims into cinnamon and russet. A small patch of hazy ice-blue beneath Liberty's chin serves as a pedigree marker, along with a thin, curved lintmark in the obverse field between star 5 and the nose. Remarkably attractive. This is the finest example certified at NGC (with or without Cameo), tied with one non-Cameo PR66 coin at PCGS (7/14).

Ex: William H. Woodin; Dr. J. Hewitt Judd; Stack's (10/1986), lot 108; Lemus/Queller Collection, FUN Signature (Heritage, 1/2009), lot 1931. PCGS# 62030

1880 Metric Dollar in Copper
Judd-1646, PR65 Brown
Ex: Lemus

3593 **1880 Metric Dollar, Judd-1646, Pollock-1846, Low R.6, PR65 Brown NGC.** Ex: Lemus. The obverse shows Liberty facing left surrounded by 13 stars. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. Struck in copper with a reeded edge. This is one of the most available 1880 goloid metric patterns, though it is still rare by any conceivable U.S. coin standard. Approximately two dozen pieces are extant.

Medium copper-orange coloration dominates with glimpses of forest-green near the rims. Generous eye appeal is present throughout. A small dark spot between stars 6 and 7 serves as a pedigree marker. Sharply struck and attractive.

Ex: Gaston DiBello Collection (Stack's, 5/1970), lot 447; Crouch (Superior, 6/1977), lot 558; Auction '85 (Superior, 7/1985), lot 846; Lemus/Queller Collection / FUN Signature (Heritage, 1/2009), lot 1932. PCGS# 62031

1882 Transitional Liberty Nickel
Judd-1680, PR67+ Cameo

3594 **1882 Liberty Head Five Cents, Judd-1680, Pollock-1882, Low R.6, PR67+ Cameo NGC. CAC.** Ex: Exemplar Collection. The portrait of Liberty is identical to the adopted design of 1883, but here it is surrounded by UNITED STATES OF AMERICA instead of stars, and shows the date (1882) below. The border denticles are quite wide. The reverse features a wreath of corn and cotton encircling a large Roman numeral V. The motto E PLURIBUS UNUM is above. Struck in nickel with a plain edge. The fields are well-mirrored, the strike complete in all areas, and there is just the slightest hint of lilac-golden toning present. PCGS# 62085

1884 'Holey' Cent Pattern
Judd-1721, PR68 Cameo

3595 **1884 Judd-1721, Pollock-1929, R.6, PR68 Cameo PCGS.** Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. A curious feature of these patterns is that the hole in the center appears to be hand-cut. On this piece it is almost perfectly done. A nice complement to the near-perfect preservation of this pattern's surfaces. Each side is mostly brilliant, but there are just the faintest milky flecks and dabs of golden color evident when closely examined. PCGS# 391598

GSA DOLLARS

1879-CC GSA Dollar, MS63
VAM-4, Lightly Repunched Mintmark

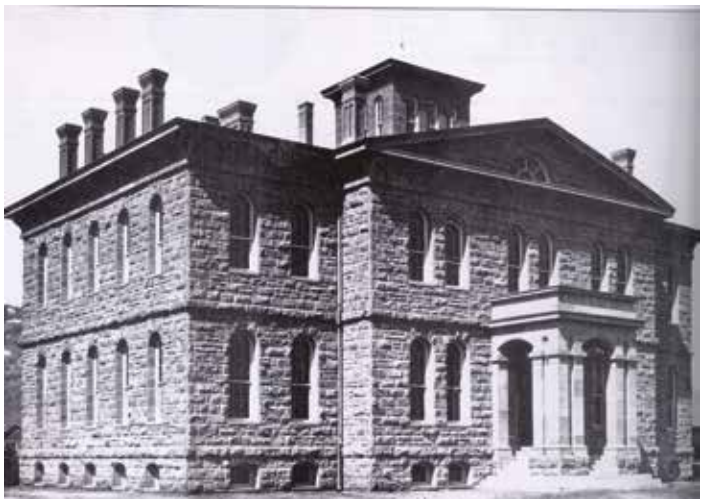

3596 **1879-CC MS63 NGC. VAM-4.** Butter-gold toning illuminates the left reverse margin and the field near the profile, but the remainder of this lustrous GSA dollar is brilliant. The reverse is close to pristine while the portrait exhibits expected grazes. The box of issue is included, along with a certificate, although the serial number of the latter has been removed. PCGS# 407086

1879-CC GSA Dollar, MS64
Challenging Semikey

3597 **1879-CC MS64 PCGS. VAM-4.** Light chestnut patina visits this key date GSA dollar. Dynamic cartwheel sheen illuminates lightly marked fields and motifs. The strike shows minor inexactness at the centers and on the claws but most of the design is boldly impressed. The mintmark is lightly repunched, described in the VAM reference as "right C doubled on left inside." Die lines down from the base of Liberty's nose provide additional VAM markers. Among Carson City dollars, the 1879-CC ranks among the most coveted, trailing only the key 1889-CC. Many within GSA holders were broken out for certification during the late 20th century, increasing the scarcity of those that remain as issued. No box or certificate accompanies.

Carson City Mint

SESSION TWO

COLONIALS

3598 **(1670-75) St. Patrick Farthing VF20 PCGS. Breen-211, W-11500.** Breen's "sea beasts" entry with a pair of slender objects beneath the king. The brass splasher overlaps all but the lower left corner of the crown. Well defined for the type with bold legends and clear harp strings. The walnut-brown and steel-gray surfaces are moderately granular. Listed on page 41 of the 2015 *Guide Book*. PCGS# 42

3599 **(1670-75) St. Patrick Farthing VF25 NGC. Breen-208, W-11500.** This is a well-detailed example, although the surfaces are uniformly granular and dark. The *Whitman Encyclopedia of Colonial and Early American Coins* says, "The typical St. Patrick's coin is likely to be dark color, often oxidized, and to show extensive use in circulation." Although this coin shows minimal evidence of circulation, the other two characteristics are clearly evident. Only vague remnants of the brass splasher appear as a reddish accent on the high points of the crown. The coin was remarkably well-centered when struck, however, and would have received a much higher grade if not for the environmental factors affecting the surfaces. It is one of the many Nothing Below King sub-varieties. Listed on page 44 of the 2015 *Guide Book*. PCGS# 42

3600 **(1670-75) St. Patrick Farthing — Altered Surfaces — PCGS Genuine. XF Details. Breen-208, W-11500.** Deep greenish-brown and burgundy patina blankets each side, with moderate granularity seen in the recessed regions. PCGS notes that the surfaces have been altered, likely an attempt to smooth out signs of corrosion. While not outright attractive, this coin exhibits the typically seen appearance of most St. Patrick farthings. Listed on page 41 of the 2015 *Guide Book*. PCGS# 42

3601 **(circa-1828) American Plantations 1/24 Part Real, Restrike MS61 PCGS. N. 4-E, W-1155, R.5.** Ex: Eric Newman. An evenly struck, unmarked, and unworn example. Protected areas retain glimpses of the initial silver-white luster, although the high points and open fields are oxidized charcoal-gray. Listed on page 41 of the 2015 *Guide Book*. PCGS# 52

1939-P Half Sou Marque, Vlack-309, MS64 From the French Colonies

3602 **1739-P French Colonies Half Sou Marque MS64 PCGS Secure. Breen-677, Vlack-309, R.5.** Struck at Dijon, France, as evidenced by the P mintmark. The 1840 issues of the half sou marque are by far the most often seen, and any of the 1739 issues are rare. This piece is one of just five P-mint examples certified by PCGS (interestingly, all are in Mint State); most survivors are well-worn. Substantial silvery-blue luster shines through a touch of gunmetal toning, and the design elements are boldly impressed. The mintmark is widely repunched south. Listed on page 53 of the 2015 *Guide Book*. Population: 2 in 64, 1 finer (7/14). PCGS# 158665

Rhode Island Ship Token, AU55 Brass, No Wreath, Betts-562

3603 **1778-1779 Rhode Island Ship Token, No Wreath, Brass AU55 PCGS. Betts-562, W-1730, R.3.** The intermediate variety of the Rhode Island Ship medal, with VLUGTENDE removed from the obverse exergue, and without a wreath below the ship. The left obverse and central reverse are golden-brown while the remainder of the medal is deep gunmetal-gray. A lightly circulated and minimally abraded example. Listed on page 50 of the 2015 *Guide Book*. PCGS# 588

3604 **1788 Massachusetts, Period XF40 PCGS. Ryder 3-A, W-6210, Low R.4.** An unusually bold, problem-free Massachusetts cent, this example of the scarce Ryder 3-A variety displays smooth surfaces and rich auburn-brown patina. Wear is minimal, with most design elements complete. Listed on page 59 of the 2015 *Guide Book*. PCGS# 948

3605 **1747 Machin's Mills Halfpenny VF25 PCGS. Vlack 1-47A, W-7660, R.5.** The sole King George II variety produced by the private New York Machin's Mint. A well defined and moderately granular walnut-brown example. The reverse is somewhat misaligned toward 1 o'clock but the legends are complete. Listed on page 67 of the 2015 *Guide Book*. PCGS# 445

3606 **1786 New Jersey Copper, Narrow Shield, Straight Plow Beam AU53 NGC. Maris 14-J, W-4810, R.1.** An olive-brown representative with glimpses of faded red in design recesses. Several degrees off center toward 7:30, but the date is intact and the other legends are mostly complete. Void of relevant marks. Listed on page 69 of the 2014 *Guide Book*. PCGS# 45423

3607 **1787 New Jersey Copper, Small Planchet, Plain Shield XF40 PCGS. Maris 44-d, W-5235, R.4.** A scarce variety, of which Bowers writes: "A half dozen or so Extremely Fine coins are the finest." This piece is boldly double-struck, an interesting but not particularly unusual characteristic for a New Jersey copper. A pair of raised, crisscrossing curved lines are also seen in the reverse shield. The patina is light chocolate-brown, with hints of silvery-blue color seen when tilted beneath a light. The obverse rim is weak, but the date is identifiable. This is a highly intriguing New Jersey copper. Listed on page 70 of the 2015 *Guide Book*. PCGS# 506

1785 Landscape Vermont Copper, XF40 VERMONTS, RR-2

3608 **1785 Vermont Copper, VERMONTS XF40 NGC. RR-2, Bressett 1-A, W-2005, R.2.** Ex: Eric P. Newman. An early die state without a hint of the eventual tornado-shaped break through the date. A glossy dark brown medal-turn Landscape copper. Mint-made planchet flaws, typical for the variety, are noted near LIC and EL. Marks are confined to a pair of thin lines on the upper left obverse field. Listed on page 72 of the 2015 *Guide Book*. PCGS# 539

3609 **1786 Vermont Copper, VERMONTENSIUM XF45 PCGS. RR-6, Bressett 4-D, W-2020, R.2.** The popular Landscape Vermont die variety with a "jumping" fourth tree. Evenly struck and unmarked with moderately granular medium brown surfaces. The reverse shows ideal centering, while the obverse is several degrees off center toward 6 o'clock with the base of the date off the flan. Listed on page 72 of the 2015 *Guide Book*. PCGS# 545

3610 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF20 PCGS. N. 12-S, W-6805, R.5.** A very scarce Fugio die combination. An evenly circulated walnut-brown copper. Marks are inconsequential for the grade aside from an unobtrusive line on the base of the 1 o'clock ring. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

3611 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF20 NGC. N. 22-M, W-7020, R.5.** A chocolate-brown Fugio copper with glimpses of orange along the obverse periphery. A slight rim clip, as made, at 11:30. As usual for N. 22-M, the coin has close to medal turn and displays heavy clash marks on the reverse. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

3612 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF30 NGC. N. 22-M, W-7020, R.5.** A lightly worn example with smooth, problem-free surfaces. The color is light chocolate-brown, with subtle bronze hues seen in the recesses when tilted beneath a light. Strong detail remains for the grade. There is a small planchet lamination on the reverse rim near 10 o'clock. Struck from rotated dies. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

3613 **1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars VF35 PCGS. N. 15-Y, W-6915, R.2.** The only Fugio marriage with two eight-pointed stars on the reverse label, apparently an unauthorized embellishment by the die engraver. This nicely defined olive-brown cent has a few scattered thin marks and a subtle spot beneath the S in STATES. Listed on page 88 of the 2015 *Guide Book*. PCGS# 898

3614 **Undated Washington Liberty & Security Penny AU58 PCGS. Baker-30, W-11050, R.2.** Plain rims, lettered edge. The Liberty and Security pennies were struck in England in 1795 and circulated extensively. They are considered part of the Conder series. This reddish-brown, near-Mint representative exhibits sharp detail overall with soft rims around the lower-left reverse. Listed on page 84 of the 2015 *Guide Book*. PCGS# 767

3615 **Undated Washington Success Medal, Large Size, Reeded Edge XF45 PCGS. Baker-266, W-10915, R.6.** Scarcer than Baker-265, Baker-266 shares the same obverse die but has a different portrait with greater hair definition. The brassy olive-green and mahogany-brown surfaces are smooth save for faint marks on the right obverse field. Listed on page 84 of the 2015 *Guide Book*. PCGS# 780

HALF CENTS

1793 C-2 Half Cent, VG Details

3616 **1793 C-2, B-2, R.3 — Smoothed — Genuine PCGS. VG Details.** A medium brown introductory year half cent. The fraction and UNITED STATES OF are bold. The remaining legends are faint but fully readable. The evenly granular surfaces lack abrasions but have been burnished. A challenging single-year type coin. Our EAC grade Good 4.

1797 Half Cent, VF30 Plain Edge, C-2

3617 **1797 Plain Edge, C-2, B-2, R.3, VF30 PCGS. CAC.** A pleasing olive-brown half cent with minimal marks and good eye appeal. The strike is generally crisp, although there are remnants of the planchet surface on the portrait high points and opposite near the LF and NT in HALF CENT. Per Manley, the bold linear die crack on the lower right reverse is present on all examples. Our EAC grade VF20. PCGS# 35104

3618 **1800 C-1, B-1, R.1, AU58 PCGS. CAC.** Manley Die State 4.0. This is a dark chocolate-brown representative that showcases areas of lighter copper-orange coloration. Strong detail remains over Liberty's hair, the wreath, and the legends on each side, save for a touch of softness on OF. Overall, this is an attractive near-Mint example with CAC-approved appeal. Our EAC grade VF30. PCGS# 35119

3619 **1802/0 Reverse of 1802, C-2, B-2, R.3, — Environmental Damage — PCGS Genuine. XF Details.** Manley Die State II. The underlying 0 is plainly visible around the outside of the primary 2 in the date. The surfaces exhibit deep greenish-brown patina with substantial evidence of corrosion around the relief elements, as noted by PCGS. The detail, however, is bold. Our EAC grade VG8. PCGS# 35125

3620 **1804 Spiked Chin, C-6, B-6, R.2, AU50 PCGS.** Manley Die State 9.0 to 9.5. A "piece out" is over the first A in AMERICA, in addition to the larger breaks over MERIC and on the lower right reverse margin. More die states have been mapped out for the cud-plagued C-6 than any other half cent variety. A chocolate-brown representative with strong detail and no detracting abrasions. Our EAC grade VF30. PCGS# 35161

3621 **1825 C-2, B-2, R.1, MS63 Brown PCGS. CAC.** Manley Die State II. Certified as Brown, but with a distinctly reddish-brown patina with subtle mint luster shining through. The design elements are well-defined, save for those on the reverse that define the die state. The surfaces are smooth and somewhat glossy. Our EAC grade AU50. PCGS# 35249

1829 Half Cent, MS65 Brown
C-1, Lustrous, Attractive Color

3622 **1829 C-1, B-1, R.1, MS65 Brown PCGS. CAC.** Manley Die State 2.0, clashed near the profile and the H, F, and C in HALF CENT. A beautiful golden-brown Gem with hints of sea-green and mahogany. Pristine aside from a short hair-thin line near star 12. The strike is good, although peripheral elements appear slightly blurred, as made and due to the later die state. Our EAC grade MS60. PCGS# 35267

3623 **1855 C-1, B-1, R.1, MS66 Brown NGC.** Golden-brown and forest-green toning grace this coruscating and unmarked high grade type coin. The strike is bold at the centers although the margins show incompleteness. Our EAC grade MS60. PCGS# 35333

LARGE CENTS

1793 Wreath Cent, VF Details
S-8, Vine and Bars Edge

3624 **1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Environmental Damage — PCGS Genuine. VF Details.** The familiar diagonal die crack through the central reverse distinguishes S-8.
All legends are sharp and Liberty's eye is clear. A walnut-brown representative with pitting on the left obverse field. The reverse rim has three small knocks between 1 and 3 o'clock. Our EAC grade VG7. PCGS# 35456

3625 **1794 Head of 1793, S-19b, B-3b, R.4 — Environmental Damage — PCGS Genuine. VF Details.** The Edge of 1794 has an upturned leaf after the word DOLLAR. This deep steel-gray cent is evenly granular aside from moderate pitting on the right obverse. All legends are readable and no marks are conspicuous. Our EAC grade VG10. PCGS# 35519

1794 Cent, Choice VF
Head of 1794, S-54

3626 **1794 Head of 1794, S-54, B-46, R.3, VF35 PCGS. CAC.** A charming medium brown Liberty Cap cent. Well detailed except for weakness on the tops of AMERICA. Field marks are minimal and verdigris is absent, though we note minor rim knocks at 9 o'clock on the obverse and at 2, 8, and 10 o'clock on the reverse. A moderately scarce Sheldon variety. Our EAC grade Fine 15. PCGS# 35624

1802 S-232 Cent, AU53
T Over Y Mint Blunder

3627 **1802 S-232, B-12, R.1, AU53 PCGS.** A distinctive Sheldon variety, since the T in LIBERTY is cut over a Y, and a row of dentils is clashed between the wreath and AMERICA. From a middle die state that lacks the break over the AT in STATES. A medium olive-brown representative with smooth surfaces save for a faded mark above the N in ONE and a pair of thin lines on the left obverse field. Our EAC grade VF30. PCGS# 36305

3628 **1804 S-266c, B-1, R.2 — Environmental Damage — PCGS Genuine. VG Details.** All four date digits are clear on this key date cent. The die rotation and dual cuds also confirm the coveted variety. The deep brown surfaces are granular and exhibit occasional green verdigris along with numerous pinscratches. Our EAC grade Fair 2. PCGS# 36422

3629 **1804 S-266c, B-1, R.2, — Smoothed — PCGS Genuine. Fine Details.** This piece is from a late die state, with heavy rim breaks above the RTY in LIBERTY and MERIC in AMERICA. Dark surfaces show signs of smoothing, though a slight degree of remaining porosity is seen upon close examination. The borders are generally strong, though the rim grows weak above STATES on the reverse. Struck from mildly rotated dies. Our EAC grade AG3. PCGS# 36422

3630 **1814 Plain 4, S-295, B-2, R.1 — Obverse Tooled — ANACS. MS60 Details.** Upon a cursory inspection, this nicely struck sea-green and deep brown example appears nearly devoid of contact. Close evaluation reveals careful smoothing near the profile, perhaps to remove the "beard" associated with late die states of S-295. Our EAC grade XF40. PCGS# 36517

3631 **1819/(8) Large Date, N-2, R.1, MS64 PCGS.** The left borders are golden-brown, but the remainder of this coruscating Matron Head cent displays deep gunmetal toning. Marks are virtually absent and the eye appeal is imposing. Our EAC grade MS60. PCGS# 36631

3632 **1823 Restrike — Planchet Flaw — PCGS Genuine. Unc Details. N.3, R.2.** Restrikes were known as early as 1862 and exist in both copper and silver. This copper example shows the typically seen cracked obverse, a broken rim between stars 3 and 6, and rust spots on the reverse. A linear planchet flaw occurs on the obverse, extending from star 1 to the left of Liberty's nose. Boldly detailed and brown overall with original red color and mint luster remaining in the hidden regions. Our EAC grade MS60. PCGS# 81627

3633 **1830 Large Letters, N-4, R.2, MS64 Brown PCGS.** Lengthy die cracks on both sides allow prompt attribution. A well struck and lustrous mahogany-brown and sea-green near-Gem. A lens reveals infrequent minor contact and a few tiny dark freckles. Our EAC grade MS62. PCGS# 36946

3634 **1837 Head of 1838, N-11, R.1, MS65 Brown PCGS.** Lengthy reverse die cracks and bold repunching on stars 9 and 10 confirm the Newcomb pairing. A magnificent deep olive-brown Gem with unimportant peripheral incompleteness of strike. Housed in a rare doily label PCGS holder. Our EAC grade MS60. PCGS# 37138

1846 Cent, MS65 Brown
N-6, Small Date

3635 **1846 Small Date, N-6, R.1, MS65 Brown PCGS. CAC.** Grellman Die State b. The 46 in the date is clearly repunched south. A lustrous olive-brown and mahogany Gem with hints of faded red throughout the margins. Essentially unabraded aside from faint contact on the bridge of the nose and the reverse rim at 2 o'clock. Our EAC grade MS60. PCGS# 403868

3636 **1849 N-12, R.1, MS64 Red and Brown NGC.** Grellman Die State b. A semicircular die line on the cheek identifies this collectible Newcomb marriage. The obverse is dusky tan-brown and olive-green. The reverse is orange-gold aside from peripheral aquamarine. Lustrous and nearly unabraded. The strike is sharp save for a few obverse star centers. Our EAC grade MS60. PCGS# 405665

3637 **1850 N-7, R.2, MS65 Red and Brown PCGS. CAC.** Grellman Die State b. Recesses areas are rose-red. The open fields and high points are medium brown. The dentils are lightly brought up but the remainder of the Gem is crisp. Lustrous and unabraded with pleasing eye appeal. Our EAC grade MS63. PCGS# 405881

3638 **1850 N-7, R.2, MS64 Red PCGS.** Weakly struck, as is typical of the variety, especially around the borders, with metal flow lines in the fields. Radiant luster engulfs this Choice example in coppery-red brilliance, though a speckling of faint toning spots is noted on each side upon close examination. Our EAC grade MS63. PCGS# 405882

3639 **1850 N-21, N-10, R.2, MS64 Red PCGS.** Rim die breaks on the reverse at 12 and 2 o'clock are characteristic of N-10, the later die state of N-21. This fire-red and lilac near-Gem has a mark-free appearance and sweeping cartwheel luster. Our EAC grade MS60. PCGS# 405912

3640 **1851 N-15, R.4, MS67 Brown NGC.** Grellman Die State b. Rich ocean-blue dominates but plum-red is also present, especially on the obverse. A lens reveals only trivial contact, and the sole spot is small and located near the C in CENT. Our EAC grade MS62. PCGS# 406689

1852 N-5 Cent, MS66+ Brown
Rich Steel-Blue Toning

3641 **1852 N-5, R.2, MS66+ Brown PCGS.** Grellman Die State a with short die lines from the dentils below star 13. This beautiful cent possesses booming luster and outstanding preservation. Primarily steel-blue but mint red outlines raised elements. The strike is good though the right-side dentils are mushy. A loupe reveals minor reverse flecks. Our EAC grade MS63. PCGS# 147241

3642 **1852 N-8, R.2, MS66 Red and Brown NGC.** Ex: Adam Mervis Collection. Grellman Die State c. Nearly imperceptible die cracks near stars 5 and 13 allow attribution of this high grade large cent. Both sides display considerable brick-red, though the portrait and open obverse field have mellowed, as has the field below CENT. Abrasions are absent aside from a minute tick below star 13 and a trivial line on the reverse rim at 12:30, which we mention solely as identifiers. A mint-made strike-though affects Liberty's neck and bust truncation. Our EAC grade MS64. PCGS# 147251

FLYING EAGLE CENTS

3643 **1857 MS64 NGC.** Hub Type of 1857. Lovely coppery-bronze luster envelops each side of this sharply struck near-Gem in frosty brilliance. A few minor surface grazes preclude a finer grade, though the eye appeal is superior to most MS64 examples seen. NGC ID# 2276, PCGS# 2016

3644 **1857 MS64 NGC.** Hub type of 1857. This highly attractive near-Gem exhibits luminous bronze-gold luster, with rings of orange and green-gold toning around the peripheries on each side. The eagle's tail and corresponding portion of the wreath are slightly soft, as usual, though the strike is otherwise pleasing. A thin die crack extends from the obverse rim at 3:30, through the tailfeathers and talons, and into the field above the date. NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent
Gem Type Coin

3645 **1857 MS65 NGC.** Hub Type of 1857. This sharply struck piece displays glowing bronze-orange luster and beautifully clean surfaces. A couple faint carbon flecks can be located with a loupe, but the eye appeal is hardly inhibited. NGC has encapsulated only 14 numerically finer representatives (7/14). NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent, MS65
FS-105, Doubled Die Obverse

3646 **1857 Doubled Die Obverse MS65 PCGS. Snow-3, FS-105.** The eagle's beak and UNITED STATES OF AMERICA show die doubling, and the wing tip is broken. This Gem represents the first readily collectible date in the short-lived Flying Eagle cent series. The lustrous, golden-tan and orange-brown surfaces are sharply detailed with only lightly scattered ticks. A few specks of aqua residue occur over each side. Encapsulated in an old green label holder. In all varieties, PCGS has certified only 14 coins numerically finer (7/14). PCGS# 410231

3647 **1858 Small Letters MS64 PCGS. CAC.** Low Leaves, Open E in ONE. A scarce subtype, since most 1858 cents have a closed E in ONE. A splendid honey-gold near-Gem with vibrant luster and an intricate strike. Exceptional quality for the designated grade. NGC ID# 2279, PCGS# 2020

PROOF FLYING EAGLE CENT

1856 Proof Flying Eagle Cent, Snow-3
Very Good Details

3648 **1856 Snow-3 — Damaged — NGC Details. Proof, VG.** Although designated as a proof by NGC, the Snow-3 variety is associated with business strikes struck in 1856 for distribution to Washington officials. Their purpose was to demonstrate the new small cent denomination, replacing the cumbersome large cent in use since 1793. Once the Flying Eagle cent became commonplace in commerce, many of those officials spent their unappreciated gift. The present example likely shares that route to circulation. All legends are bold, but the walnut-brown surfaces exhibit toned-over abrasions, perhaps made by an unbelieving finder. The obverse rim has a cut over the RICA in AMERICA.

INDIAN CENTS

1859 Indian Cent, MS65
Bold Strike and Eye Appeal

3649 **1859 MS65 PCGS.** Perennially popular as a one-year type issue, this lustrous Gem example stands up well among other high-grade examples both for its technical merit and its outstanding eye appeal. The strike is full throughout, and reddish-orange accents visit the reflective fawn-bronze surfaces. Mark-free except for a tiny spot near the F in OF. NGC ID# 227E, PCGS# 2052

3650 **1861 MS65 PCGS.** Golden-tan color overall shows occasional copper-orange accents and cartwheel luster throughout. This is a sharply struck Gem and a somewhat better date among Variety Two Indian Head cents. NGC ID# 227G, PCGS# 2061

3651 **1861 MS65 NGC.** Eagle Eye Photo Seal, card included. Coruscating luster accompanies unblemished orange-gold and olive-green surfaces. Glimpses of carbon are noted within the shield. A fully struck and virtually mark-free Gem. NGC ID# 227G, PCGS# 2061

3652 **1862 MS66 PCGS.** Struck to full definition, with strong tan-gold luster and seemingly flawless surfaces. A degree of semiprooflike reflectivity is seen in the fields, while a shallow planchet void is noted below the E in CENTS. Population: 84 in 66 (7 in 66+), 11 finer (7/14). NGC ID# 227H, PCGS# 2064

3653 **1864 Bronze No L MS66 Red and Brown NGC.** The No L variant. Tinges of coppery-red color accent highly lustrous, burgundy surfaces on each side of this boldly struck Premium Gem example. Light clash marks are noted on the reverse, though the surfaces are void of carbon spotting. Census: 70 in 66 Red and Brown, 5 finer (7/14). NGC ID# 227L, PCGS# 2077

3654 **1866 MS66 Brown NGC.** Substantial remnants of coppery-orange color remain in the recesses on each side (primarily on the reverse), while strong luster illuminates glossy burgundy-brown patina over the remainder of the surfaces. The design elements are fully struck, and the eye appeal is simply exceptional. Struck from mildly rotated dies. Census: 7 in 66 Brown, 0 finer (7/14). NGC ID# 227P, PCGS# 2085

3655 **1867 MS64+ Red PCGS.** Sharply struck with bright mint frost and beautiful light coloration. Unmarked and nearly free of carbon on both sides. Population: (1 in 64+) Red, 22 finer (7/14). NGC ID# 227R, PCGS# 2090

3656 **1868 MS66 Red and Brown PCGS. CAC.** A gorgeous piece with full strike definition (except on the upper right quadrant of the reverse shield and the nearby wreath leaves) and pleasing sunset-gold and salmon-red patina across both sides. Intensely lustrous, carbon-free and mark-free. Population: 5 in 66 Red and Brown, 0 finer (7/14). NGC ID# 227S, PCGS# 2092

3657 **1869/69 FS-301, Snow-3, MS63 Red and Brown NGC.** The 6 and 9 in the date are noticeably repunched south on this popular variety. This piece is well-struck throughout the headdress feathers and on the ribbon, and displays tinges of coppery-orange luster in the recesses around soft bronze-brown toning. A few deeper toning spots are noted on the lower obverse. PCGS# 37475

3658 **1873 Doubled LIBERTY, Snow-1, FS-101 — Planchet Flaw, Struck-Through Obverse — PCGS Genuine. VF Details.** A fairly deep and rectangular strike-through, 5 mm x 2 mm, affects the RICA in AMERICA. A walnut-brown and steel-blue example of the famous key variety. Die doubling is obvious on the L in LIBERTY, as well as Liberty's eye and lips. A few specks of debris near OF and ONE CENT.

3659 **1877 VF35 NGC. CAC.** The 1877 Indian cent is the most sought-after issue of the series. This Choice VF specimen displays glossy brown surfaces, with just a few insignificant abrasions, and evenly worn design elements. NGC ID# 2284, PCGS# 2127

1877 Indian Cent, AU50 Green Label Holder

3660 **1877 AU50 PCGS. CAC.** Shallow N in ONE. A splendid chocolate-brown example of the famous series key. Slight wear on the diamonds confirms a brief stay in circulation. The dies were slightly out of axial alignment, since two-thirds of the coin is intricately struck while the upper right obverse and lower right reverse show incompleteness. Encased in a green label holder. NGC ID# 2284, PCGS# 2127

3661 **1877 AU53 PCGS.** The N in ONE is shallow at the bottom, as is diagnostic of genuine 1877 cents. This well-detailed AU representative displays even medium-brown color and is free of environmental impairments. NGC ID# 2284, PCGS# 2127

3662 **1880 MS65 Red PCGS. CAC.** Deep orange-gold luster illuminates virtually undisturbed surfaces on each side of this Gem representative, while the devices are firmly impressed and there are only a couple faint toning flecks in the lower-right obverse field. Population: 44 in 65 Red, 18 finer (7/14). NGC ID# 2287, PCGS# 2138

3663 **1884 MS65 Red PCGS. CAC.** Eagle Eye Photo Seal, card included. From lemon-gold to apricot and orange, this Gem explores different ranges of "Red" but never goes outside. The luster is intense and flashy, and the surfaces are carefully preserved. Population: 36 in 65 Red, 17 finer (7/14). NGC ID# 228B, PCGS# 2150

3664 **1888 MS65 Red PCGS. CAC.** The Philadelphia Mint coined more than 37 million Indian cents in 1888, but high-grade Red survivors are nonetheless elusive. This stunning Gem exhibits frosty, copper-pink and deeper orange mint luster over each side, with bold design motifs. Excellent eye appeal will capture the connoisseur's attention. Population: 30 in 65 Red, 14 finer (7/14). *Ex: Santa Clara Signature (Heritage, 11/2002), lot 5270; Chicago Signature (Heritage, 8/2011), lot 3131.* NGC ID# 228G, PCGS# 2168

1894 Cent, MS64 Red and Brown Doubled Date, FS-301

3665 **1894 Doubled Date MS64 Red and Brown PCGS. FS-301.** The most dramatic repunched date variety of the Indian cent series. Repunched northeast with a broad spread. Lavender-brown and orange-gold compete for territory across this satiny and well struck near-Gem. Free from marks although a gray spot is noted at 1 o'clock on the reverse. PCGS# 92188

3666 **1899 MS66 Red PCGS.** The obverse displays rich copper-orange hues while the reverse features light tan and red coloration. The four diamonds on Liberty's hair ribbon are sharply defined, as are the headdress feathers. This is an excellent type representative, and PCGS has certified only 13 coins in higher numeric grades (7/14). NGC ID# 228U, PCGS# 2204

3667 **1899 MS66 Red PCGS.** This Premium Gem cent is a splendid representative from a mintage of 53 million coins. The surfaces feature vivid copper-orange color and swirling mint luster with light green and magenta highlights. Only a tiny tick on Liberty's cheek prevents an even higher grade. NGC ID# 228U, PCGS# 2204

3668 **1899 MS66 Red PCGS.** Lustrous, copper-red surfaces reveal lime-green accents on each side. Liberty's headband shows strong detail on the feathers, and four full diamonds appear on the ribbon. This immaculately preserved Premium Gem is free of any noticeable marks or carbon specks, and PCGS has seen only 13 submissions numerically finer (7/14). NGC ID# 228U, PCGS# 2204

3669 **1899 MS66 Red PCGS.** Warm bronze-gold hues blend into frosty, coppery-red mint luster on each side of this boldly struck Premium Gem. A couple minor grazes on the cheek preclude an even finer grade assessment, though a distinct lack of carbon spotting gives this piece superior eye appeal. Only 13 coins have graded numerically finer at PCGS (7/14). NGC ID# 228U, PCGS# 2204

3670 **1905 MS66 Red PCGS.** The Philadelphia Mint accomplished an impressive mintage of nearly 81 million Indian Head cents in 1905. However, few examples are so well-preserved as this lustrous, copper-red Premium Gem. PCGS has seen just one numerically finer submission (7/14). NGC ID# 2292, PCGS# 2222

1905 Indian Cent, MS66+ Red Only One Numerically Finer at PCGS

3671 **1905 MS66+ Red PCGS. CAC.** A few tiny flecks of deeper color appear on both sides of this handsome Premium Gem specimen, exhibiting even orange-red color overall. The strike is sharp and the luster strong. The few marks present are minuscule. Population: 47 in 66 (2 in 66+) Red, 1 finer (7/14).
Ex: Baltimore Auction (Bowers and Merena 11/2009), lot 274. NGC ID# 2292, PCGS# 2222

1909 Indian Head Cent, MS66+ Red
Ideal Final-Year Type

3672 **1909 MS66+ Red PCGS. CAC.** This outstanding final-year representative exhibits copper-orange color and beams with radiant mint luster. Each side shows crisp definition, notably on Liberty's headdress and hair ribbon, as well as on the lower portion of the wreath. PCGS has certified only six submissions finer (7/14). NGC ID# 2297, PCGS# 2237

3673 **1909-S MS64 Red and Brown PCGS. CAC.** Substantial coppery-red and bronze-gold luster emanates from beneath speckled burgundy overtones on this well-preserved Choice example. The tips of the headdress feathers are softly defined, a characteristic of genuine 1909-S Indian cents. A couple faint carbon specks are seen upon close examination. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

1862 Indian Head Cent, PR65
Significant Field-Device Contrast

3674 **1862 PR65 PCGS. CAC.** The Philadelphia Mint struck 550 Indian Head proofs in 1862, and coins are usually seen in the PR63 to PR65 range. This issue enjoys a reputation for strike quality, featured on this carefully preserved Gem. Significant field-device contrast and golden-tan coloration account for the CAC approval sticker. PCGS has certified 26 examples finer (7/14). NGC ID# 229C, PCGS# 2259

3675 **1863 PR65 NGC.** An early Indian cent issue and the final date in which the the copper-nickel metallic composition was utilized exclusively for the type; to be replaced in 1864 by bronze. The proof mintage was a mere 460 pieces. This is a lustrous Gem with rich coloration and impressively clean surfaces. The feathertips of the Indian's headdress are softly struck, but most of the remaining design elements are boldly defined. Census: 31 in 65, 6 finer (7/14). NGC ID# 229D, PCGS# 2262

3676 **1863 PR65 Cameo NGC.** A beautifully preserved Gem proof, this Cameo representative displays ample reflectivity in the fields and full definition on all design elements. Faint lavender-gray and sun-gold hues intermingle over each side. Census: 11 in 65 Cameo, 9 finer (7/14). PCGS# 82262

1877 Indian Cent, PR62 Brown
Popular Proof Issue

3677 **1877 PR62 Brown PCGS.** The scarcity of high-grade business strikes makes the proofs of this key-date issue all the more sought-after by date collectors. This piece is boldly struck throughout, with fairly clean surfaces, given the grade. Glossy olive-brown patina blankets most of each side, with tinges of golden luster remaining in the protected areas. Population: 5 in 62 Brown, 58 finer (7/14). NGC ID# 229W, PCGS# 2318

1877 Cent, Lustrous PR64 Brown
In Demand by Date Collectors

3678 **1877 PR64 Brown PCGS. CAC.** Orange-gold luster envelops the obverse of this near-Gem proof and gravitates to the reverse border, ceding to brownish-mauve toning in the center. The design elements are well-struck, including most of the feather tips. Neither side reveals mentionable contacts or carbon. This issue is in demand by date collectors, some of whom prefer to substitute a proof for the more expensive business strike. Population: 29 in 64 Brown, 14 finer (7/14). NGC ID# 229W, PCGS# 2318

1884 Cent, Outstanding PR67 ★ Red
The Sole Finest at NGC

3679 **1884 PR67 ★ Red NGC.** Even though 3,942 proofs were struck of the 1884 cent, few have survived with full red and pristine, sparkling surfaces such as this Superb Gem that was assigned the coveted Star designation. The design elements are impressively brought up, including sharpness on all four diamonds, and their mildly frosted finish yields relatively strong contrast with the deeply mirrored fields. Both faces are bright orange-red with no mentionable defects. An outstanding example of this underappreciated date in the proof series. Census: 1 in 67 ★ Red, 0 finer (7/14).
Ex: Long Beach Signature (Heritage, 6/2005), lot 5188; FUN Signature (Heritage, 1/2008), lot 2696. NGC ID# 22A5, PCGS# 2341

LINCOLN CENTS

1909 VDB Lincoln Cent, Vibrant MS65+ Red
FS-1101, Doubled Die Obverse
Seldom Seen Finer

3680 **1909 VDB Doubled Die Obverse MS65+ Red PCGS Secure. FS-1101.** The prominent die doubling on this popular variety is most easily seen on all four numerals of the date and RTY of LIBERTY. The design elements of this attractive high-end Gem are sharply detailed, showing fine definition on Lincoln's hair, and the VDB initials are boldly visible. The original red surfaces display vibrant mint luster. Although PCGS has seen 17 examples in MS65 Red, this is the sole example certified MS65+ Red, and only seven Red pieces at that service are numerically finer (7/14). It has been more than three years since we offered an MS66 Red example of the FS-1101. PCGS# 82425

1909 VDB Lincoln Cent, MS66 Red
FS-1101, Doubled Die Obverse

3681 **1909 VDB DDO MS66 Red ANACS. FS-1101.** The doubling is most evident on the date and LIBERTY, though it is also detected on the bowtie. This radiant bronze-gold example displays additional hues of coppery-orange on the reverse, with an orange-gold and deep violet crescent around the upper-right obverse border. Surface abrasions are minimal, as the grade suggests, and only a few faint freckles are noticed under a lens. PCGS# 82425

3682 **1909-S VDB AU58 NGC.** Deep burgundy-brown toning encompasses much of the reverse and forms parallel, broken ribbons across the obverse, while the remainder of each side is lustrous and brassy in color. Only a brush of high-point friction keeps this piece from a Mint State grade. NGC ID# 22B2, PCGS# 2426

3683 **1909-S VDB AU58 NGC.** A pleasing, near-Mint example of this famous key-date issue, this lovely coin exhibits rich bronze-brown patina over each side, with hints of luster remaining the crevices of the design. Only a brush of actual wear is seen over the high points, and the surfaces are free of environmental impairments. NGC ID# 22B2, PCGS# 2426

3684 **1909-S VDB AU58 ANACS.** Glossy burgundy-brown patina blankets both sides of this nearly uncirculated example. A smooth, problem-free representative of this popular key-date San Francisco issue. NGC ID# 22B2, PCGS# 2426

3685 **1909-S VDB MS64 Brown PCGS.** Glowing bronze-brown luster illuminates well-preserved, carbon-free surfaces on each side of this sharply defined example. The coin is certified as Brown, but still displays substantial golden color, particularly on the obverse. NGC ID# 22B2, PCGS# 2426

3686 **1909-S VDB MS63 Red and Brown PCGS.** The obverse is orange-gold and close to full Red, while the reverse displays ample lime-green shades. Well struck and mark-free with a few tiny reverse flecks. Housed in a green label holder. NGC ID# 22B2, PCGS# 2427

3687 **1909-S VDB MS63 Red and Brown ANACS.** This is a glossy, minimally abraded example of this widely popular key-date Lincoln cent. Tinges of bronze-gold luster highlight deep burgundy overtones on the obverse, while the reverse is brighter, with equally strong luster. NGC ID# 22B2, PCGS# 2427

3688 **1909-S VDB MS63 Red and Brown NGC.** This deeply struck example of the key-date 1909-S VDB Lincoln cent displays rich amber-orange coloration and a lack of major surface abrasions. A few small, scattered carbon specks are present, none of which are individually noteworthy. NGC ID# 22B2, PCGS# 2427

3689 **1909-S VDB MS64 Red and Brown PCGS.** Still quite Red with significant Brown coloration to the high points. The design elements appear sharply struck with bold detail and distinct designer initials. Overall, an immensely appealing example of this Lincoln cent series key date. NGC ID# 22B2, PCGS# 2427

3690 **1909-S VDB MS64 Red and Brown NGC.** Bronze-gold mint luster graces each side of this piece, giving it a nearly full Red appearance. The strike is well-executed, and the surfaces are unusually clean for the grade. A lens reveals only a few faint carbon specks on the upper-left reverse, though these are undetectable to the unaided eye. NGC ID# 22B2, PCGS# 2427

3691 **1909-S VDB MS64 Red and Brown NGC.** An appealing representative of this important key date, with rich red-brown coloration and tremendous mint luster. A few wavy lines in the right obverse fields are likely faint fingerprint fragments, perhaps preventing a Gem grade designation by NGC. NGC ID# 22B2, PCGS# 2427

3692 **1909-S VDB MS64 Red and Brown PCGS. CAC.** Warm glints of bronze-gold mint luster accent light chocolate-brown toning over portions of each side. The devices are well-defined, and no signs of carbon are immediately obvious. This is a pleasing Red and Brown example of this key-date Lincoln cent. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown
Shimmering Key Date

3693 **1909-S VDB MS65 Red and Brown PCGS.** This shimmering key date Gem is orange and fire-red with hints of lilac on the vest and obverse field. Essentially bereft of abrasions. The strike is bold, even on the important VDB initials, which sometimes come blurry due to their placement near the rim. The initials were removed later in 1909, but reappeared on Lincoln's bust truncation in 1918. NGC ID# 22B2, PCGS# 2427

3694 **1909-S VDB MS64 Red PCGS.** Vibrant bronze-gold luster illuminates surfaces that are unusually clean for the grade level. A partial print is seen on the upper-left portion of the obverse, though it is faint, and this remains an exceptionally pleasing example of this key-date Lincoln cent. NGC ID# 22B2, PCGS# 2428

3695 **1909-S S Over Horizontal S MS66 Red PCGS. FS-1502.** The apricot-gold and wheat-grain surfaces are lustrous and virtually devoid of contact. Boldly struck and nearly unimprovable. Population: 51 in 66 (2 in 66+) Red, 0 finer (7/14). PCGS# 92434

3696 **1910 MS66+ Red PCGS. CAC.** A gorgeous piece with light reddish-gold surfaces imbued with pleasing accents of mint-green. Intensely lustrous and boldly struck, a conditionally scarce example of this second-year Lincoln cent issue. Population: 5 in 66+ Red, 26 finer (7/14). NGC ID# 22B5, PCGS# 2437

3697 **1911-D MS65 Red PCGS. CAC.** Luminous coppery-gold luster enlivens each side of this Gem representative, while the strike is bold and only a few faint carbon specks are discernable. The 1911-D is a slightly scarcer date in Mint State condition, as PCGS has encapsulated only 24 Red examples in grades numerically finer than this piece (7/14). NGC ID# 22B8, PCGS# 2446

1914-D Cent, MS62 Brown
Low-Mintage Key Date

3698 **1914-D MS62 Brown PCGS.** This low-mintage issue was not widely known to collectors until the date appeared in coin albums in the 1930s. By that time most examples had circulated, making Mint State coins a rare find. Purple, rose, and ice-blue accent otherwise chocolate-brown surfaces. The devices are well-struck with a bit of typical softness on Lincoln's beard and shoulder. NGC ID# 22BH, PCGS# 2471

1914-D Lincoln Cent, MS63 Red
Low-Mintage, D-Mint Issue

3699 **1914-D MS63 Red PCGS.** This satiny key date claims a relatively low mintage of just under 1.2 million coins. The copper-red surfaces exhibit bold definition on Lincoln's hair and beard, while the O in ONE and PL in PLURIBUS show trivial incompleteness. Tiny carbon specks are peppered over each side. NGC ID# 22BH, PCGS# 2473

3700 **1915-D MS65 Red PCGS.** This is a lustrous, copper-orange Gem with lime-green and magenta accents. The issue circulated widely until the 1950s and remains plentiful up to MS64. In Gem, the date is very scarce, and Premium Gems are decidedly rare. NGC ID# 22BL, PCGS# 2482

1916-D Lincoln Cent, MS65 Red
Conditionally Rare Example

3701 **1916-D MS65 Red PCGS.** Early branch mint Lincoln cents with full mint Red surfaces are hard to come by. This Gem representative displays strong luster and intense orange coloration over each side. The strike detail is above-average, as many coins were struck from widely spaced dies. Population: 54 in 65 (2 in 65+) Red, 15 finer (7/14). NGC ID# 22BP, PCGS# 2491

1916-D Cent, MS65 Red
Copper-Orange Color

3702 **1916-D MS65 Red PCGS.** The issue's mintage of nearly 36 million coins does not allude to the scarcity of Gems with original Red coloration. This representative offers satiny luster and well-struck devices over copper-orange surfaces that show only a few tiny ticks. Population: 54 in 65 (2 in 65+) Red, 15 finer (7/14). NGC ID# 22BP, PCGS# 2491

3703 **1917 MS66 Red PCGS.** Rose and peach accents complement light copper-orange coloration overall. Lincoln's beard and hair exhibit bold definition, as do the legends and wheat ears. A few carbon specks occur throughout. Still, comparable Premium Gems are scarce and anything finer is rare. PCGS has seen just 17 coins in higher numeric grades (7/14). NGC ID# 22BS, PCGS# 2497

3704 **1920 MS66+ Red PCGS. CAC.** This is a better date, with just ten examples rated as Red Superb Gems at both services combined. The current piece is well struck with beautiful mint frost and gorgeous orange-red coloration. Both sides of the coin are free of the smallest distraction: a trio of flyspecks on the right obverse field are minuscule. Population: 4 in 66+ Red, 7 finer (7/14). NGC ID# 22C3, PCGS# 2524

3705 **1921-S MS65 Red and Brown PCGS.** Golden copper-brown color dominates over each side of this S-mint Gem. The mintmark is bold, as are Lincoln's beard and hair. A few tiny ticks and carbon specks appear throughout. Still, PCGS has seen only 40 MS65 examples in the Red and Brown category with none finer (7/14). NGC ID# 22C7, PCGS# 2535

3706 **1922 No D, Strong Reverse, FS-401, XF45 NGC.** TRUST and the final date digit are bold, diagnostic for the desirable Strong Reverse No D. A golden-brown cent with pleasing detail, glimmers of luster, and a few small obverse field marks. PCGS# 37676

3707 **1922 No D, Strong Reverse, FS-401, XF45 PCGS. CAC.** The 1922 No D Lincoln cent is a prized issue in the series, with three varieties known to present-day numismatists. The most desirable of these varieties is designated the Strong Reverse by PCGS, and was created when the D mintmark was effaced from an obverse die that was polished to remove clashmarks. The present coin shows light, even wear on the devices, with smooth, light brown surfaces, and no trace of the D mintmark.
Ex: Stamford Signature (Heritage, 10/2010), lot 3894. PCGS# 37676

3708 **1923 MS66+ Red PCGS. CAC.** Radiant, coppery-orange luster engulfs each side of this high-end Premium Gem, while the surfaces are virtually free of carbon spotting, and the strike is well-executed. PCGS has seen 14 numerically finer submissions (7/14). NGC ID# 22CA, PCGS# 2545

3709 **1925 MS67 Red PCGS.** Radiant bronze-gold peripheral hues give way to rich coppery-orange luster in the central regions, and only faint signs of carbon are detected with a loupe. The surface quality is outstanding and Lincoln's shoulder is particularly clean. This Registry-quality piece is tied for the finest certified at PCGS (7/14). NGC ID# 22CF, PCGS# 2560

3710 **1925 MS67 Red PCGS.** Blazing sun-red mint bloom delivers incredible eye appeal on this boldly struck Superb Gem. A small, shallow strike-through is noted below the G in GOD, and a couple faint specks are seen with a loupe, but these are hardly worthy of mention. This piece is tied numerically with the example in the current highest-rated Registry Set. Population: 63 in 67 Red, 0 finer (7/14). NGC ID# 22CF, PCGS# 2560

3711 **1928 MS67 Red PCGS. CAC.** An exceptional, radiant Superb Gem, this CAC-approved 1928 Lincoln cent displays vibrant bronze-gold luster around the margins with deeper coppery-orange hues in the centers. Carbon spotting is seemingly nonexistent, and even with a loupe it is difficult to find any grade-limiting surface flaws. Population: 62 in 67 (2 in 67+) Red, 0 finer (7/14). NGC ID# 22CR, PCGS# 2587

3712 **1934 MS67+ Red PCGS. CAC.** An essentially flawless example with copper-orange color and coruscating luster. This Superb Gem is sharply struck with strong eye appeal, and PCGS has graded only eight coins finer (7/14). NGC ID# 22D9, PCGS# 2635

1936 Lincoln Cent, MS67+ Red
Registry Set Essential

3713 **1936 MS67+ Red PCGS. CAC.** Rich coppery-orange and bronze-gold hues blend together over each side of this well-detailed Superb Gem, with the former color being the more dominant. The surfaces are nearly perfect, with a couple minute specks (one below Lincoln's chin and the other next to the right base of the N in CENT) being the only perceivable flaws. PCGS has certified a number of examples in MS67, but this coin is one of only four to receive a Plus designation, with none finer (7/14). This piece is also less than half of a grade point finer than the representative in the current highest-rated Registry Set. NGC ID# 22DE, PCGS# 2650

1936-S Lincoln Cent, MS67 Red
Among the Finest Certified

3714 **1936-S MS67 Red PCGS.** Despite significant numbers of full Red Mint State survivors, only 49 1936-S cents have been certified at the MS67 grade level by PCGS, with none finer (7/14). This piece displays radiant coppery-orange luster, with only a few minute carbon specks detected upon close examination. This coin represents an important opportunity for the Registry Set collector, as it is tied numerically with the example in the current highest-rated Registry Set. NGC ID# 22DG, PCGS# 2656

1936-S Cent, MS67 Red
Registry Set Candidate

3715 **1936-S MS67 Red PCGS.** Vibrant coppery-red mint luster engulfs each side of this Superb Gem. The strike is boldly impressed, with good definition over the O in ONE, which is usual weak. A few faint toning flakes are noted on the reverse, but do not distract. The 1936-S cent is encountered with some frequency at the MS67 Red grade level, but none have graded finer at either PCGS or NGC (7/14). NGC ID# 22DG, PCGS# 2656

1936-S Cent, MS67 Red
A Registry-Quality Coin

3716 **1936-S MS67 Red PCGS.** Collectors actively set aside coins from this issue, and examples are readily obtainable across most grade levels today. However, those seeking a finer representation will encounter some difficulty: this coin is among the finest certified at both major grading services (7/14). Each side shows softly frosted luster and blazing copper-red coloration. Sharply struck with only a few carbon specks. NGC ID# 22DG, PCGS# 2656

1938 Cent, MS67+ Red
Just One Coin Finer

3717 **1938 MS67+ Red PCGS. CAC.** As the high mintage (over 156 million coins) suggests, Premium Gems remain common, and even Superb Gems are available. However, only five coins have earned the Plus designation at PCGS, and only one example has been certified finer at PCGS and NGC combined (7/14). Frosty luster covers pumpkin-gold surfaces that show occasional light-green accents. Marks are virtually non-existent. NGC ID# 22DL, PCGS# 2668

1942-S Cent, MS67+ Red
Strong Eye Appeal

3718 **1942-S MS67+ Red PCGS. CAC.** This is a seldom-offered opportunity for the Registry Set enthusiast to acquire a Plus-designated Superb Gem with CAC-approved visual appeal. The surfaces feature pumpkin-gold color and sharp detail throughout. Luster rolls over each minimally marked side, and PCGS has certified only two submissions finer (7/14). PCGS# 2710

3719 **1944 MS67+ Red PCGS.** Blazing Red surfaces reveal crisply impressed design elements and only one trivial tick on Lincoln's lapel. PCGS has awarded the Plus designation to only 5 coins in MS67 with none finer (7/14), making this an important opportunity for Registry Set enthusiasts. NGC ID# 22EA, PCGS# 2722

3720 **1945-D MS67+ Red PCGS. CAC.** A sharply struck and beautifully preserved coin that should draw the attention of any serious Registry Set collector. The lovely mint-red toning is uniformly distributed across the immaculate, intensely lustrous surfaces. Population: 8 in 67+ Red, 0 finer (7/14). NGC ID# 22EH, PCGS# 2737

1947 Lincoln Cent, MS67 Red
Registry-Quality Blazer

3721 **1947 MS67 Red PCGS.** Virtually undisturbed, vibrant mint luster illuminates rich coppery-red surfaces on this well-struck Superb Gem, while no signs of carbon are readily discernable. Tied with just 19 others as the finest certified of the date at PCGS (7/14), this coin is also tied numerically with the example in the current highest-rated Registry Set. NGC ID# 22EN, PCGS# 2752

3722 **1949-D MS67 Red PCGS.** This is a fiery-red example with satiny luster and only a few areas of minor strike incompleteness. Although the issue is common across virtually all grade levels, comparable Superb Gems are very scarce. In fact, PCGS has certified just 39 submissions in 67 Red and none finer (7/14). NGC ID# 22EW, PCGS# 2773

3723 **1949-D MS67 Red PCGS. CAC.** Satiny, coppery-red luster engulfs each side of this beautiful Superb Gem, and close examination reveals only a single, minute carbon speck on the lapel. This piece, tied for the finest certified at PCGS (7/14), is also numerically equal to the example in the highest-rate Registry Set. NGC ID# 22EW, PCGS# 2773

3724 **1950 MS67 Red PCGS.** Among the finest-certified. This coppery-red Superb Gem displays a full strike over highly lustrous, well-preserved surfaces. Registry Set collectors should note that PCGS has seen just 30 coins in MS67 Red and none finer (7/14). NGC ID# 22EY, PCGS# 2779

3725 **1950 MS67 Red PCGS.** Balanced orange-red and copper-gold hues blend over both sides of this Registry-quality Superb Gem. The devices are sharply detailed and close examination reveals only a few faint surface grazes. PCGS has graded 31 MS67 Red examples, with none finer (7/14). NGC ID# 22EY, PCGS# 2779

1950 Cent, MS67 Red
Exceptional Mint Luster

3726 **1950 MS67 Red PCGS. CAC.** The 1950 Lincoln cent is a relatively plentiful issue in virtually any grade desired, but its availability dramatically drops at the MS67 level, and none have been certified numerically finer at PCGS or NGC (5/14). This example is boldly struck, with radiant, coppery-orange mint luster, and is pleasantly free of any signs of carbon spotting. Population: 30 in 67 Red, 0 finer (5/14). NGC ID# 22EY, PCGS# 2779

1952-S Lincoln Cent, MS67+ Red
The Sole Finest Certified

3727 **1952-S MS67+ Red PCGS.** Virtually flawless surfaces showcase a well-executed strike and deep coppery-red mint luster, with a couple small ribbons of mint-green toning seen across Lincoln's jacket toward the date. A small speck adjacent to the N in ONE is the only sign of carbon. Hundreds of this date have been certified by PCGS and NGC in MS67 Red, but this coin stands as the *only* example to receive a Plus designation, and none have been encapsulated finer (7/14). Obviously, this piece is less than half a point finer than the example in the current highest-rated Registry Set. NGC ID# 22F8, PCGS# 2803

3728 **1953 MS66+ Red PCGS. CAC.** Full copper-red luster radiates from this Premium Gem. The surfaces are well-preserved and exhibit sharply struck devices. Some microscopic carbon specks are noted on the upper reverse, but they are hardly noticeable without magnification. PCGS has awarded Plus designations to only 26 MS66 examples, with 11 finer (7/14). NGC ID# 22F9, PCGS# 2806

3729 **1953-D MS67 Red PCGS.** This gorgeous representative offers satiny luster over unimpaired surfaces with faint lime-green toning. Red Premium Gems from this issue are fairly available. However, the certified population data dramatically declines at the Superb Gem level. From an original mintage of over 700 million coins, PCGS has certified a mere 28 examples in 67 Red, and none finer (7/14). NGC ID# 22FA, PCGS# 2809

3730 **1953-D MS67 Red PCGS.** Dense, peach-orange color reverberates with booming mint luster over each side of this crisply struck, well-preserved Superb Gem. An important opportunity for the Registry Set collector, as this piece is one of just 28 MS67 examples at PCGS, with none numerically finer (7/14). NGC ID# 22FA, PCGS# 2809

3731 **1953-D MS67 Red PCGS.** Blazing copper-red coloration and swirling mint frost combine over each side of this Superb Gem. The design elements are well-struck and the surfaces are virtually devoid of any impairments. Population: 28 in 67 Red, 0 finer (7/14). NGC ID# 22FA, PCGS# 2809

3732 **1955 MS67 Red PCGS.** Blazing orange color prevails over the lustrous, smooth surfaces of this Superb Gem cent. The bold strike provides excellent eye appeal, although the portrait of Lincoln reveals several spidery signs of die fatigue visible with a loupe. Population: 21 in 67 Red, 0 finer (7/14). NGC ID# 22FF, PCGS# 2824

3733 **1955 Doubled Die Obverse, FS-101, AU55 PCGS.** A Choice AU representative of this widely sought "naked-eye" Mint blunder, this doubled die obverse cent shows glossy burgundy and chocolate-brown toning over each side, with tinges of coppery-red in the design crevices. PCGS# 37910

3734 **1955 Doubled Die Obverse, FS-101, AU55 PCGS.** A lovely chocolate-brown representative of the most famous of all doubled die varieties. The obverse legends exhibit an extraordinarily broad and bold spread. Marks are minimal though we note minor granularity on the obverse field near 3 o'clock. PCGS# 37910

3735 **1955 Doubled Die Obverse, FS-101, AU58 PCGS.** This is a glossy chocolate-brown example of this widely popular *Guide Book* variety. Light rub over the devices precludes a Mint State grade, though the motifs remain bold and the surfaces are free of environmental impairments. PCGS# 37910

3736 **1955 Doubled Die Obverse, FS-101, MS61 Brown NGC. CAC.** One of the most famous and glaringly obvious Mint blunders in all of 20th century numismatics, the 1955 Doubled Die Obverse cent is a popular issue in all grades. This glossy piece is mildly abraded, as the grade suggests, but retains pleasing eye appeal, as is evidenced by the green CAC approval label. PCGS# 37910

3737 **1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS. CAC.** A pleasing lower-grade Mint State example of one of the most spectacular Mint blunders in 20th century numismatics, this coin displays glossy light brown surfaces and pleasing design definition. Few major abrasions are present, given the grade. PCGS# 37910

1955 Cent, MS64 Red and Brown
Famous Doubled Die Obverse, FS-101

3738 **1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS.** A beautiful chestnut-gold and lime-green near-Gem of this spectacular doubled die variety. Crisply struck and lustrous with smooth fields and only minor flan chatter (as made) on the portrait of Lincoln. Brown AU examples are always available but examples of the present quality are rare. PCGS# 37911

3739 **1956 MS67 Red PCGS.** This Superb Gem is among the finest coins numerically at PCGS and NGC combined (7/14). Intense copper-orange color paints essentially pristine surfaces that show well-struck devices and minimal carbon. NGC ID# 22FK, PCGS# 2836

3740 **1956 MS67 Red PCGS.** A lovely Superb Gem piece that will certainly attract the attention of Registry Set specialists. The rich mint-red coloration adorns clean, mark-free surfaces that have a flashy, semiprooflike appearance. Population: 24 in 67 (1 in 67+) Red, 0 finer (7/14). NGC ID# 22FK, PCGS# 2836

3741 **1958-D MS67+ Red PCGS. CAC.** The lustrous, copper-orange surfaces are essentially mark-free and show glimpses of cherry-red color. Lincoln's hair and shoulder exhibit sharp detail, while minor softness occurs over the O in ONE. This Superb Gem is one of only five coins with a Plus designation in the Red category, and no examples are certified finer at PCGS and NGC combined (7/14). NGC ID# 22FR, PCGS# 2851

1959 Lincoln Cent, MS67 Red
Tied for Finest at PCGS

3742 **1959 MS67 Red PCGS.** Rose-red and coppery-orange hues blend into the nearly undisturbed surfaces of this well-defined Superb Gem. A few faint freckles are noticed upon close examination, though these are undetectable to the unaided eye. PCGS has encapsulated only 13 pieces in MS67 Red, and none finer (7/14). NGC ID# 22FS, PCGS# 2854

3743 **1960-D Large Date MS67 Red PCGS.** This full mint Red Superb Gem displays rich, coppery luster and well-struck devices. The surface preservation is excellent, though a few faint carbon specks are noted on the reverse. PCGS has awarded this lofty grade to just 15 coins with none finer (5/14). NGC ID# 22FY, PCGS# 2866

3744 **1960-D Large Date MS67 Red PCGS.** Several small, interesting die breaks appear across Lincoln's head, in the 9 of the date, and the B in LIBERTY. This Superb Gem example exhibits strong mint luster and vibrant copper-orange color over well-struck surfaces. The fields reveal a number of die polish lines. Population: 15 in 67 Red, 0 finer (7/14). NGC ID# 22FY, PCGS# 2866

1962-D Lincoln Cent, MS67 Red
Tied for Finest at PCGS and NGC

3745 **1962-D MS67 Red PCGS.** This issue is readily obtainable up to and including the Premium Gem grade level. Superb Gems, however, are very rare. Only 18 coins have been certified in MS67 Red with none finer at PCGS and NGC combined (7/14), making this an important Registry Set candidate. The boldly defined surfaces feature copper-orange color and blazing mint luster. NGC ID# 22G4, PCGS# 2881

1964-D Lincoln Cent, MS67 Red
Tied for Finest Certified

3746 **1964-D MS67 Red PCGS.** Dazzling, coppery-pink mint bloom radiates from the nearly perfect surfaces of this well-struck Superb Gem. A few minute carbon specks are noted on Lincoln's jacket, though the eye appeal is hardly affected. PCGS has certified only 11 pieces in this lofty grade and none finer (7/14), making this coin a rare and important opportunity for the Registry Set collector. NGC ID# 22G8, PCGS# 2893

3747 **1964-D MS67 Red PCGS.** A significant piece for the Registry Set collector, this satiny Superb Gem is tied with just 10 others as the finest certified at PCGS (7/14). Rich coppery-red and deeper rose hues encompass each side, and the surfaces are free of any discernable signs of carbon spotting. NGC ID# 22G8, PCGS# 2893

3748 **1967 MS67 Red PCGS.** Glowing coppery-orange mint bloom engulfs each side of this example, while the surfaces are void of carbon spotting. The strike is slightly soft on the portrait, not uncommon for the issue. This is one of just 15 MS67 Red examples certified by PCGS, with none finer (7/14). NGC ID# 22GB, PCGS# 2902

3749 **1967 MS67 Red PCGS.** Tinges of rose and lilac-gold color penetrate otherwise coppery-orange luster on each side of this virtually carbon-free Superb Gem. This piece is tied numerically with the example represented in the current highest-rated Registry Set. Population: 15 in 67 Red, 0 finer (7/14). NGC ID# 22GB, PCGS# 2902

3750 **1967 MS67 Red PCGS.** Fiery orange-red mint luster surrounds tinges of bronze-gold in the centers, while a faint speck near the left reverse rim is the only sign of carbon. PCGS has only certified 14 other MS67 Red examples, and none finer (7/14). NGC ID# 22GB, PCGS# 2902

3751 **1967 MS67 Red PCGS.** Orange-gold and coppery-red hues merge across each side of this well-struck Superb Gem. The surfaces are free of carbon spotting and the eye appeal is outstanding. This coin is tied with just 14 others as the finest certified at PCGS (7/14). NGC ID# 22GB, PCGS# 2902

3752 **1972 Doubled Die Obverse, FS-101, MS66 Red PCGS. CAC.** This popular *Guide Book* and *Cherrypickers'* variety features strong die doubling on the date, LIBERTY, and IN GOD WE TRUST with a broad spread. Deep mint red and radiant luster cover the well-struck surfaces. PCGS# 38013

1978 Cent, MS67+ Red
Among the Finest Coins Certified

3753 **1978 MS67+ Red PCGS.** Of the 5.5 billion cents produced in Philadelphia, PCGS has certified just 41 coins in MS67 Red (7/14). Moreover, this Superb Gem is one of only three pieces awarded a coveted Plus designation, making it an important opportunity for Registry specialists. The surfaces exhibit fiery copper-orange coloration and sharp strike definition with no mentionable blemishes. NGC ID# 22HB, PCGS# 2992

PROOF LINCOLN CENTS

3754 **1909 PR65 Red and Brown PCGS. CAC.** A well-produced proof example, with bold rims and rich, matte-like luster. Each side displays a beautiful array of toning, showing hues of golden-orange, cherry-red, and violet. PCGS has certified 38 numerically finer representatives (7/14). NGC ID# 22KS, PCGS# 3304

3755 **1909 PR66 Red and Brown PCGS.** This Premium Gem proof, from a mintage of 2,618 specimens, offers copper-red and golden-brown color with splashes of faint purple toning over the obverse. As expected, the strike is razor-sharp and marks are virtually unseen. Population: 34 in 66 (2 in 66+) Red and Brown, 3 finer (7/14). NGC ID# 22KS, PCGS# 3304

3756 **1910 PR65 Red and Brown NGC.** A well-defined example of this popular matte proof issue. The obverse displays primarily deep burgundy patina, with a few coppery-orange tinges of color in the recesses, while the reverse is fully the latter color. Census: 42 in 65 Red and Brown, 8 finer (7/14).
Ex: Baltimore Signature (Heritage, 3/2009), lot 336. NGC ID# 22KT, PCGS# 3307

3757 **1914 PR65 Brown PCGS.** The bold, almost medallic relief of this matte proof beautifully showcases Brenner's iconic Lincoln portrait. Tinges of coppery-red luster glow around the left margins, while the remainder of each side is primarily auburn-brown, and the surface preservation is excellent. Population: 17 in 65 Brown, 23 finer (7/14). NGC ID# 22KX, PCGS# 3318

3758 **1916 PR63 Red and Brown PCGS.** This fully struck specimen displays ruby-red, orange, forest-green, and cobalt-blue hues on each side. The surfaces are minimally disturbed, although a loupe reveals infrequent small spots. All matte proof cents are scarce, but the 1916 has a *Guide Book* mintage of just 600 pieces. Housed in an old green label holder.
Ex: FUN Signature (Heritage, 1/2011), lot 4309. NGC ID# 22KZ, PCGS# 3325

3759 **1938 PR66+ Red PCGS. CAC.** This deeply mirrored Premium Gem features beautiful golden-orange surfaces and expectedly pinpoint-sharp definition over the devices. From a mintage of 14,734 proofs, PCGS has seen only 32 submissions finer (7/14). NGC ID# 22L5, PCGS# 3341

3760 **1938 PR66 Red Cameo NGC.** Razor-sharp definition is evident on all design elements of this impressive Premium Gem, and the frosty devices contrast boldly with the deeply reflective Red fields. Cameo examples are seldom encountered because the Mint used an all-brilliant finish on proofs in 1938. Census: 16 in 66 Cameo, 2 finer (7/14). NGC ID# 22L5, PCGS# 83341

TWO CENT PIECES

3761 **1864 Small Motto, FS-401, MS63 Red and Brown PCGS.** The ephemeral introductory series subtype. Lustrous and intricately impressed with smooth orange-red and apple-green surfaces. A roundish strike-through (as coined) is centered above the 64 in the date. Encased in an old green label holder. PCGS# 38233

3762 **1865 MS65+ Red and Brown PCGS. CAC. KF-P6-RPD.** Plain 5. The tops of the 18 are repunched. The variety designation is from Kevin Flynn's invaluable reference *Getting Your Two Cents Worth*. This smooth, well struck, and coruscating Gem displays wheat-gold and walnut-brown with the deeper shades on the reverse. NGC ID# 22NA, PCGS# 3583

3763 **1865 MS65+ Red and Brown PCGS. CAC.** Plain 5. A fully struck peach-gold Gem that has mellowed just enough to merit a Red and Brown designation. Marks are essentially absent although a few minute flecks are scattered. NGC ID# 22NA, PCGS# 3583

3764 **1868 MS65 Red and Brown PCGS. CAC.** Lustrous and richly toned, with none of the frequently-seen strike anomalies or die cracks that plague this type. Well-preserved and mark-free, with minimal carbon flecks that are not really evident using the unaided eye. Population: 49 in 65 Red and Brown, 4 finer (7/14). NGC ID# 22NC, PCGS# 3598

3765 **1869 MS65 Red and Brown PCGS. CAC.** Predominantly copper-orange with a few areas of darker red-brown color, this CAC-approved Gem displays sharp detail on the olive leaves and reverse wreath. In the Red and Brown category, PCGS has certified only three coins finer (7/14). NGC ID# 22ND, PCGS# 3604

PROOF TWO CENT PIECES

3766 **1866 PR65 Red and Brown PCGS. CAC.** This razor-sharp Gem proof displays warm bronze-gold luster over the reverse, while the obverse is awash in glossy coppery-brown patina. A moderate degree of mirroring in the fields confirms its proof status, while the surfaces are appropriately well-preserved. Population: 58 in 65 Red and Brown, 13 finer (7/14). NGC ID# 274V, PCGS# 3631

3767 **1869 PR64 Red PCGS.** From a reported mintage of 600 proofs, this Choice specimen showcases pumpkin-orange coloration throughout. The fields are moderately reflective, and the devices appear expectantly crisp. NGC ID# 274Y, PCGS# 3641

THREE CENT SILVER

1855 Three Cent Silver, MS65
Seldom Encountered This Nice

3768 **1855 MS65 PCGS.** Well-struck devices and clean surfaces are the hallmarks of this Gem example, though mottled aquamarine and golden toning adds to the visual appeal. With such a small mintage (only 139,000 pieces), it is not surprising that this issue is rare at the Gem grade level, and exceedingly so any finer. Population: 15 in 65 (1 in 65+), 7 finer (7/14). NGC ID# 22Z4, PCGS# 3671

3769 **1858 MS64 PCGS.** A Type Two example with two lines bordering the six-pointed star. The issue is also the final date with a mintage over 1 million coins. This Choice representative shows good detail with slight softness over the olive branch and toward the peripheries on each side. NGC ID# 22Z7, PCGS# 3674

1858 Three Cent Silver, MS65+
Beautiful Multihued Toning

3770 **1858 MS65+ PCGS. CAC.** Luminescent sky-blue, lavender, and orange-gold hues intermingle on each side of this high-end Gem, while the surfaces are nearly undisturbed. Bold clash marks are noted on each side, not uncommon for the type in general. Overall, this is a remarkably attractive representative of this moderately available date. Population: 57 in 65 (3 in 65+), 47 finer (7/14). NGC ID# 22Z7, PCGS# 3674

3771 **1862/1 MS66 PCGS. FS-301.** A secondary 1 is visible beneath the 2 in the date. According to the *Cherrypickers' Guide*, the overdate is due to economy rather than error. This Premium Gem is sharply struck and mostly brilliant with peripheral toning around the reverse. NGC ID# 22ZC, PCGS# 3681

PROOF THREE CENT SILVER

3772 **1867 PR65 Cameo NGC.** The 1867 Type Three three cent circulation strikes are seldom seen in high grade, struck to the extent of only 4,000 pieces. This is a well-mirrored survivor of the proof complement of 550 coins, pinkish-gold with scattered tiny flecks and good device frost. Census: 9 in 65 Cameo, 14 finer (7/14). PCGS# 83717

THREE CENT NICKELS

3773 **1868 MS66 PCGS.** Delicate chestnut-gold overtones grace this lustrous and fully struck Premium Gem. Struck from multiply clashed dies and housed in a green label holder. A few pinpoint flecks are noted near STATES. Population: 33 in 66, 1 finer (7/14). NGC ID# 2756, PCGS# 3734

3774 **1883 AU50 PCGS.** Well-struck with even, moderate wear and abrasion-free surfaces that exhibit light olive-gray coloration and bits of forest-green verdigris clinging to some of the devices. A couple of wispy slide marks are noted on Liberty's cheek. Population: 10 in 50, 57 finer (7/14). NGC ID# 275E, PCGS# 3751

3775 **1884 VF20 PCGS.** More than twice as many proofs as business strikes were minted in 1884, an unusual scenario for any federal coinage issue, of any type or era. The tiny business strike production of 1,700 examples helps to ensure the key-date status of this three cent nickel, and examples are rare at all grade levels. This VF piece displays surfaces that are smooth and abrasion-free, but moderately worn and rather subdued. Still an important coin that will attract plenty of attention when it crosses the auction block. Population: 4 in 20, 51 finer (7/14). NGC ID# 275F, PCGS# 3752

PROOF THREE CENT NICKELS

3776 **1868 PR66 NGC.** Delicate tan-gold and blue patina graces smooth and glossy surfaces. A pleasing Premium Gem proof from earlier in the three cent nickel series. Census: 20 in 66, 0 finer (7/14).
Ex: Long Beach Signature (Heritage, 6/2005), lot 5397. NGC ID# 275N, PCGS# 3764

1868 Three Cent Nickel, PR67 Ultra Cameo Tied for Finest Certified

3777 **1868 PR67 Ultra Cameo NGC.** The 1868 proof three cent nickels are among the better-made issues in the series, and this example beautifully showcases this quality. Heavily frosted relief elements boldly contrast with the mirrored fields, and close examination fails to reveal any post-Mint surface flaws, though a few of the usual minor strike-throughs are noted on each side. Struck from fresh dies with bold design elements. Census: 3 in 67 Ultra Cameo, 0 finer (7/14). PCGS# 93764

1869 Three Cent Nickel, PR66 Deep Cameo Boldly Contrasted

3778 **1869 PR66 Deep Cameo PCGS. CAC.** This outstanding Premium Gem specimen with a Deep Cameo designation represents the high-water mark for the 1869 three cent nickel proof issue. Dramatic field-device contrast, colorless surfaces, and the absence of any mentionable flaws imbue this piece with strong visual appeal. From a reported mintage of 600 proofs. Population: 11 in 66 (1 in 66+) Deep Cameo, 0 finer (7/14). PCGS# 93765

3779 **1870 PR66 Cameo NGC.** Frosty, well-defined central devices deliver pleasing contrast against the mirrored fields, while the surfaces are nearly free of marks. A couple small, mint-made strike-throughs are noted on the obverse. Census: 26 in 66 Cameo (1 in 66+ Cameo, 2 in 66 ★ Cameo), 3 finer (7/14). PCGS# 83766

3780 **1872 PR66 PCGS. CAC.** Pale powder-blue patina complements the lavender-gray shadings on each side of this Premium Gem proof. Carefully preserved with elegant eye appeal. Population: 22 in 66, 0 finer (7/14).
Ex: Dallas Signature (Heritage, 10/2009), lot 222. NGC ID# 275T, PCGS# 3768

3781 **1872 PR66 PCGS. CAC.** This lovely Premium Gem proof displays deep mirrors surrounding heavily frosted and typically razor-sharp design features. From a reported mintage of 950 specimens, PCGS has certified just 22 examples in PR66 with none finer (7/14). NGC ID# 275T, PCGS# 3768

3782 **1875 PR65 Cameo PCGS.** The devices on this Gem Cameo are somewhat satiny, rather than frosty, but impart just enough field-motif contrast to qualify for the designation from PCGS. The coin is well-struck, with a light golden patina on each side. Population: 17 in 65 (1 in 65+) Cameo, 7 finer (7/14). PCGS# 83771

3783 **1876 PR65 Deep Cameo PCGS.** Heavily frosted devices and deeply mirrored fields deliver a stark Cameo appearance from all angles. A couple small strike-throughs are noted on the obverse, but grade-limiting marks are faint. A blush of golden color graces the peripheral regions. Population: 10 in 65 Deep Cameo, 4 finer (7/14). PCGS# 93772

3784 **1878 PR65 PCGS. Gold CAC.** Pastel sun-gold and ice-blue patina embraces this lustrous and fully impressed proof-only Gem. A few pinpoint flecks deny perfection. Only a minuscule percentage of CAC submissions secure a gold CAC seal. Housed in an old green label holder. NGC ID# 275Y, PCGS# 3774

3785 **1878 PR66 PCGS.** Pleasing powder-blue toning colors the frosty design elements over the reverse, while the obverse maintains its brilliance throughout. PCGS has certified only 14 examples finer from this popular proof-only issue (7/14). NGC ID# 275Y, PCGS# 3774

3786 **1878 PR66+ Cameo PCGS.** Bold cameo contrast characterizes this Plus-designated Premium Gem. Each side exhibits highly reflective fields and frosty design features devoid of mentionable marks. A tiny band of reddish color occurs above Liberty's portrait, while the remaining surfaces gleam with brilliance. PCGS# 83774

3787 **1879 PR67 Cameo PCGS.** A virtually pristine proof, this Superb Gem Cameo showcases exceptional field-motif contrast, with ample mirroring and razor-sharp definition. From a production total of 3,200 proofs. Population: 37 in 67 Cameo, 1 finer (7/14). PCGS# 83775

3788 **1881 PR67 Cameo NGC. CAC.** A fabulous strike emboldens the design elements, and flawless surfaces are essentially untoned. Outstanding all-around eye appeal. Census: 33 in 67 Cameo (4 in 67 ★ Cameo), 10 finer (7/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 2489. PCGS# 83777

3789 **1883 PR66 PCGS. CAC.** In 1883, the proof mintage of nickel three cent pieces (6,609 coins) surpassed the business strike mintage for the first time, a trend that would continue for several years. This Premium Gem proof offers splashes of orange color over otherwise silver-gray surfaces. Overall, this is an expectedly sharp and appealing example, as recognized by both PCGS and CAC. NGC ID# 2765, PCGS# 3779

3790 **1883 PR67 NGC. CAC.** One of the most visually appealing proof three cent nickels that we have examined in quite some time. This piece is fully struck with satiny rather than reflective fields, as usual for the type. Essentially untoned with pleasing faint accents of ice-blue in the fields. The smooth surfaces are immaculately preserved. Census: 84 in 67 (3 in 67 ★, 1 in 67+★), 4 finer (7/14). NGC ID# 2765, PCGS# 3779

3791 **1883 PR67 Cameo PCGS.** The proof mintage (6,609 specimens) was 2,600 coins higher the than the number of circulation strikes issued in 1883. Still, Cameo examples are scarce in all grades and rare as fine as this representative. The surfaces appear boldly contrasted and entirely brilliant. Population: 42 in 67 (1 in 67+) Cameo, 0 finer (7/14). PCGS# 83779

3792 **1885 PR67 PCGS. CAC.** With only 1,000 business strikes produced in 1885, collector demand for proofs is strong. This razor-sharp and fully brilliant example demonstrates remarkable eye appeal. Population: 36 in 67, 1 finer (7/14). NGC ID# 2767, PCGS# 3781

SHIELD NICKELS

3793 **1868 Repunched Date, FS-309, MS64 NGC.** Ex: Eric P. Newman Collection. Reverse of 1867. A lovely near-Gem example of one of the varieties with a repunched date. Pewter-gray and olive-green color are present on this piece, along with a few small flecks of deeper gray. A small die crack extends from the bottom of the cluster of leaves at left on the obverse. PCGS# 38349

3794 **1869 MS66 NGC.** Nicely struck and lustrous with pleasantly smooth features and a hint of golden toning. Very scarce in such quality, yet affordable. Census: 14 in 66 (1 in 66 ★), 3 finer (7/14).
Ex: Houston Signature (Heritage, 12/2008), lot 903. NGC ID# 22P3, PCGS# 3796

3795 **1870 MS65 PCGS.** A touch soft on IN GOD WE TRUST but sharply rendered elsewhere, this is a pleasing silver-gray Shield nickel that lacks even the smallest surface blemish. Wispy die cracks extend partway over the upper obverse and the lower reverse, but these mint-made features are not distracting. Population: 40 in 65 (1 in 65+), 10 finer (7/14). NGC ID# 22P4, PCGS# 3797

3796 **1870 MS65 PCGS. CAC.** Highly lustrous with pretty gray-rose toning and sharp strike definition on the obverse. The reverse shows some minor weakness of detail, mainly on the stars and on the S in CENTS, which is incomplete, probably due to excessive die polish. An attractive, conditionally scarce Gem example of this Philadelphia Mint issue. Population: 40 in 65 (1 in 65+), 10 finer (7/14). NGC ID# 22P4, PCGS# 3797

3797 **1870 MS65 PCGS. CAC.** Green-gold elements grace this luminous Gem. Well-preserved with an attractive obverse, though the lower stars on the reverse show considerable striking softness. Population: 40 in 65 (1 in 65+), 10 finer (7/14). NGC ID# 22P4, PCGS# 3797

3798 **1871 MS65 PCGS. FS-301.** Repunched date. An unusually bright, semiprooflike example of this Philadelphia Mint issue, showing lovely gold-tan and silvery champagne-rose toning. A sparkling Gem with unmarked fields and devices. A small planchet defect is noted in the upper right obverse field, near the rim at 2 o'clock. Population: 32 in 65, 12 finer (7/14). NGC ID# 22P5, PCGS# 3798

3799 **1872 MS65 PCGS. CAC.** The 1872 Shield nickel is moderately available in the MS63 to MS64 grade range, but it becomes elusive in MS65 and finer pieces are rare. This example displays radiant silvery-white luster and beautifully preserved surfaces. The central regions are boldly struck, though some outer wreath leaves are not fully defined. The usual array of die cracks presides in the margins, most notably on the obverse, and there is an unobtrusive planchet void (as made) on the reverse border near OF. Population: 36 in 65 (1 in 65+), 21 finer (7/14).
From The James E. Blake Collection. NGC ID# 22P6, PCGS# 3799

3800 **1873 Open 3 MS65 NGC.** Well-defined for this later-logotype setup, and struck from a later-state obverse die cracked at the top. Peach-gold patina influences lustrous surfaces, and a small patch of sage is noted to the right of the date. Census: 44 in 65 (1 in 65+), 7 finer (7/14). NGC ID# 276C, PCGS# 3800

3801 **1873 Open 3 MS65 PCGS.** Faint rose and lavender overtones visit pale pearl-gray surfaces that swirl with understated luster. The obverse displays well, though the reverse has a few spots and uneven detail on the stars. Population: 33 in 65 (2 in 65+), 9 finer (7/14).
From The James E. Blake Collection. NGC ID# 276C, PCGS# 3800

1873 Open 3 Nickel, MS66
Die Doubled Obverse
Fletcher-111

3802 **1873 Open 3 — Doubled Die Obverse — MS66 NGC. Fletcher-111.** A trace of almond-gold toning overlies lustrous slate surfaces. Sharply struck and nearly immaculate. Die doubled northwest, most apparent (as usual for the series) on the annulet. The lowest horizontal shield line is also strongly doubled. Also interesting for the heavy die crack along the left obverse border. Very similar to FS-101; nonetheless a different variety. NGC calls it VP-009 but we reference the Edward L. Fletcher, Jr. Shield nickel book. The sole business strike issue unavailable in proof format, although Closed 3 proofs were struck. Census: 7 in 66, 0 finer (7/14). NGC ID# 276C, PCGS# 3800

3803 **1874 MS65 NGC.** This Gem exhibits swirling luster of brilliant nickel-white surfaces. Each side is sharply struck, especially on the olive leaves and stars. Numerous die cracks appear around the obverse, evidence of the trouble the Mint continued to encounter striking these nickel coins. Census: 22 in 65, 5 finer (7/14). NGC ID# 22P9, PCGS# 3803

3804 **1874 MS65 PCGS. CAC.** The surfaces are nearly unabraded and the luster showcases faint ice-blue and champagne hues. The motifs are not fully brought up in the peripheral regions, an oft-seen characteristic for this type, but the overall appeal is not noticeably inhibited. Population: 35 in 65 (1 in 65+), 8 finer (7/14).
From The James E. Blake Collection. NGC ID# 22P9, PCGS# 3803

3805 **1875 MS65 PCGS.** This Gem example is generally well-struck and displays intense satiny luster and lovely light olive, gold, and pale lilac toning. A slight degree of weakness is noted on the lower obverse shield edges. A carefully preserved piece free of any surface distractions. Population: 25 in 65, 13 finer (7/14). NGC ID# 22PA, PCGS# 3804

3806 **1875 MS65 NGC.** Light caramel-gold patina adorns this lustrous, boldly struck, and exemplary Gem. Although readily obtained well worn, the 1875 is surprisingly scarce in the present quality. Census: 28 in 65, 6 finer (7/14). NGC ID# 22PA, PCGS# 3804

3807 **1876 MS65 PCGS.** Crisp design definition is the hallmark of this well-preserved Gem. Radiant luster illuminates a soft golden hue, while deeper amber accents are noted on each side. A surprisingly attractive example with minimal die cracks. Population: 44 in 65, 12 finer (7/14).
From The James E. Blake Collection. NGC ID# 22PB, PCGS# 3805

3808 **1876 MS65 PCGS. CAC.** Potent luster, a sharp strike, and a smooth appearance combine to confirm the Gem status of this Centennial-year Gem. Light rose, aqua, and cream-gray toning adorn the carefully preserved surfaces. The date is lightly repunched north. Population: 44 in 65, 12 finer (7/14).
Ex: Central States Signature (Heritage, 5/2004), lot 6081; Central States Signature (Heritage, 4/2011), lot 3014. NGC ID# 22PB, PCGS# 3805

1881 Shield Nickel, MS65
Seldom Seen Finer

3809 **1881 MS65 PCGS.** Shield nickel production in 1881 reached only 68,800 pieces, and high-grade survivors are proportionately elusive. This Gem example is softly struck on the right-hand wreath leaves and some of the crossbars of the shield, as is typical, but is bold on the stars and exhibits smooth surfaces. Golden-gray toning blankets each side. Population: 39 in 65 (1 in 65+), 21 finer (7/14). NGC ID# 276F, PCGS# 3811

3810 **1882 MS66 PCGS.** The obverse is flashy with appreciable mirrors. The minimally toned reverse is also bright but with more swirling luster. A great Premium Gem from late in the Shield nickel series. Population: 72 in 66 (3 in 66+), 6 finer (7/14).
Ex: *Central States Signature (Heritage, 4/2011), lot 3017.* NGC ID# 22PC, PCGS# 3812

3811 **1882 MS66 PCGS. CAC.** The lustrous nickel-gray surfaces show glimpses of pastel coloration when held at the correct angle. Evidence of die erosion appears over much of the obverse, unsurprising given the issue's mintage (11.4 million pieces) and the difficulties the Mint had striking these nickel coins. PCGS has certified only 5 coins in higher numeric grades (7/14). NGC ID# 22PC, PCGS# 3812

1883/2 Shield Nickel, MS64
FS-305, Popular *Cherrypickers'* Variety

3812 **1883/2 FS-305 MS64 PCGS.** A popular *Cherrypickers'* variety with the secondary 2 between the center point and lower loop of the 3. This is a sharply struck representative with bold definition over the olive leaves, arrows, and stars. Each side gleams with brilliance frosty luster. Population: 3 in 64 (1 in 64+), 0 finer (7/14). PCGS# 406858

3813 **1883/2 FS-305 MS66 PCGS.** Repunched date. This is the only one of the five known 1883/2 overdates where the underlying 2 is not located between the second 8 and the 3. A well-struck and beautifully preserved Premium Gem example with lovely light toning and highly lustrous surfaces. PCGS# 406858

3814 **1883 MS66 PCGS.** Full strike definition with unusually broad rims give this piece the arm's-length appearance of a possible proof specimen. The fields are satiny rather than reflective, however, and a faint die crack connects ES O on the upper reverse to a small rim cud located directly above and between TE. A satiny, nicely preserved piece, entirely void of surface marks. NGC ID# 22PE, PCGS# 3813

3815 **1883 MS66 PCGS.** From the final year of the Shield design, this Premium Gem exhibits an unusually sharp strike, with light golden patina and slight reflectivity in the fields. A few faint, intertwining die cracks on the obverse are characteristic of this type in general. PCGS has certified only 11 numerically finer examples (7/14). NGC ID# 22PE, PCGS# 3813

PROOF SHIELD NICKELS

3816 **1866 Rays PR62 PCGS.** An attractive PR62 example of the short-lived Rays design, with sharply detailed design elements and hazily reflective surfaces that show only minor signs of contact. From a small proof mintage of 600 pieces. NGC ID# 276G, PCGS# 3817

1866 Rays Nickel, PR65
Above-Average Surfaces

3817 **1866 Rays PR65 PCGS.** The mintage of the 1866 proof nickel is open to debate because mint records were destroyed in 1925 (Peters and Mohon, 1995). Production estimates range from 125 to 500 pieces. The more deeply toned nickel-gray fields of this Gem highlight the lighter, well-struck devices, resulting in modest contrast. The relatively smooth surfaces are free of the significant planchet defects and spotting that plague this issue. Housed in a prior generation holder. Population: 80 in 65, 39 finer (7/14). NGC ID# 276G, PCGS# 3817

1866 With Rays, PR65
First-Year Type

3818 **1866 Rays PR65 PCGS.** While laminations, spotting, granularity, and other imperfections tend to be the rule for this introductory proof issue, the surfaces fail to show any distracting irregularities. The fields are smooth and moderately reflective, and the devices are razor-sharp. This is most notable on the leaves, stars, and rays. Iridescent orange patina appears to blanket the obverse when held at the proper angle. NGC ID# 276G, PCGS# 3817

1867 No Rays Shield Nickel, PR64 Pattern Reverse, *Guide Book* Variety

3819 **1867 No Rays, Pattern Reverse, PR64 PCGS.** The 1867 No Rays Shield nickel proofs were struck with two slightly different reverses. The vast majority of the 600 specimens struck feature Reverse D, while approximately 20 to 30 coins are known with the Reverse C. Discovered in 2002 by Douglas L. Kurz, this *Guide Book* variety is dubbed the Pattern Reverse because it was used to strike Judd-507 and was one of two dies used to strike Judd-573. The stars point under the upright of the E in STATES and between the uprights of the first A in AMERICA. Additionally, the obverse is an early die state with a raised graver's line to the left of the first vertical on the shield.

Each side displays fully struck design elements and light toning in shades of apricot-orange and lavender. This is the sole non-Cameo example certified at PCGS. Four other coins are certified with a Cameo designation (8/14). PCGS# 519406

3820 **1870 PR66 Cameo NGC.** This untoned Premium Gem Cameo 1870 Shield nickel shows silver-gray fields with lighter silver-white high points amid surfaces that are virtually unmarked throughout, quite appealing and high-end for this elusive proof issue. These Shield nickel proofs seem considerably underrated at today's market levels. Census: 14 in 66 Cameo, 2 finer (7/14). PCGS# 83824

3821 **1876 PR66 Cameo PCGS. CAC.** Noticeable Cameo contrast accents light golden toning on this Premium Gem proof, while the design elements are sharply brought up, including full centrils on the stars. Slight strike doubling is noted on most obverse relief elements, including the date numerals. Population: 30 in 66 (4 in 66+) Cameo, 6 finer (7/14). PCGS# 83830

3822 **1878 PR63 NGC.** Soft olive-gold toning diminishes the mirroring in the fields, but the design elements exhibit an incredible degree of sharpness. Surface marks are minimal, giving this piece ample appeal for the grade. From a proof-only mintage of 2,350 pieces. NGC ID# 276V, PCGS# 3832

3823 **1878 PR65 PCGS. CAC.** This issue from an original proof-only mintage of 2,350 pieces is not rare, but it is subject to extra market pressure due to the absence of business strikes. This Gem example is fully struck and untoned, with swirling cartwheel luster in the fields and well-preserved surfaces that only reveal a couple of trivial nicks on the reverse fields, under magnification. NGC ID# 276V, PCGS# 3832

3824 **1878 PR66 PCGS.** Lime-green borders frame the almond-gold fields and motifs of this proof-only Shield nickel. Fully struck and satiny with original eye appeal. Encapsulated in a first generation holder. NGC ID# 276V, PCGS# 3832

3825 **1878 PR65 Cameo NGC. CAC.** Glassy fields and bold design elements deliver exceptional visual appeal on this nearly brilliant proof Cameo. From a proof-only mintage of 2,350 pieces. Census: 7 in 65 Cameo, 15 finer (7/14). PCGS# 83832

3826 **1880 PR67 Cameo PCGS. CAC.** The second 8 in the date is clearly repunched, visible within the loops. This is known as the "dropped 8" variety. The strike is razor-sharp, as expected, with frosty design features and watery fields generating strong cameo contrast. Population: 21 in 67 (1 in 67+) Cameo, 0 finer (7/14). PCGS# 83835

3827 **1880 PR67 Cameo PCGS. CAC.** Much confusion can be had in differentiating the proofs of this year from the business strikes, but this piece, with its bold, frosty devices and deeply mirrored fields, is undeniably of proof origin. A blush of pale amber-gold color adds a degree of warmth to the seemingly perfect surfaces. Population: 21 in 67 (1 in 67+) Cameo, 0 finer (7/14). PCGS# 83835

3828 **1883 PR67 PCGS.** The 1883 proof Shield nickel is highly popular as the first of three different proof nickel types issued in 1883. This Superb Gem example displays exceptional design definition and depth of mirroring, while the surfaces exhibit soft hues of ice-blue, mint-green, and champagne. Population: 33 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 276Z, PCGS# 3838

LIBERTY NICKELS

3829 **1883 With Cents MS66 PCGS.** This is a carefully preserved example of the final nickel type produced in 1883. The lower-left portion of the wreath and a few obverse stars are not fully brought up, but the portrait is needle-sharp. Soft hues of powder-blue, gold, and lime-green toning grace each side. The usual array of minor die cracks is seen around the peripheral regions. Population: 59 in 66 (4 in 66+), 2 finer (7/14). NGC ID# 22PH, PCGS# 3844

3830 **1889 MS66 NGC. CAC.** This is a common issue up to and including the Gem grade level, but anything finer is very scarce to rare. The surfaces are lightly toned and carefully preserved. The devices exhibit a razor-sharp strike with full radial lines on the stars and a full ear of corn on the left side of the wreath. NGC has graded only two submissions in higher numeric grades (7/14). NGC ID# 2775, PCGS# 3850

3831 **1889 MS66 NGC. CAC.** A delightful Premium Gem, with sharply detailed design elements in most areas and just a touch of softness on the lower wreath. The well-preserved surfaces radiate vibrant mint luster on both sides and hints of pale gold and lavender-gray toning enhance the outstanding eye appeal. Census: 45 in 66, 2 finer (7/14). NGC ID# 2775, PCGS# 3850

3832 **1904 MS66 PCGS. CAC.** Soft pastel hues accent beautiful, virtually flawless surfaces. A few stars are not fully defined, but the design elements are otherwise sharply impressed. Soft, satiny luster illuminates the subtle patina. Population: 80 in 66 (3 in 66+), 0 finer (7/14). NGC ID# 277F, PCGS# 3865

3833 **1912-D MS65 PCGS.** Nicely struck for this branch mint issue and quite lustrous. Pale rose, lavender, and gold patina covers both sides, though a couple of small spots appear on the obverse. The Denver Mint did not strike cents until 1911, and nickels waited until 1912. PCGS has certified 32 numerically finer representatives (7/14). *Ex: Long Beach Signature (Heritage, 9/2006), lot 884; Long Beach Signature (Heritage, 2/2007), lot 2584.* NGC ID# 277P, PCGS# 3874

3834 **1912-D MS65+ PCGS. CAC.** The stars show full centers, and Liberty's hair is sharply defined. Radiant luster percolates through champagne-gold toning that covers each well-preserved side. This is an attractive final-year representative from the Denver Mint, and PCGS has seen only 32 coins finer (7/14). NGC ID# 277P, PCGS# 3874

1912-D Nickel, Toned MS66
Above-Average Strike

3835 **1912-D MS66 PCGS.** The 1912-D has the dubious distinction of having a weak strike, especially on Liberty's hair and the star centers. The current Premium Gem offering is a refreshing exception. The design elements are well-struck, including the hair and most of the stars. Only stars 7 and 11 reveal minor weakness. Most of the wreath is sharply defined, save for the corn ear and wheat stalk left of the bowknot. The surfaces are medium olive-brown and are remarkably well-preserved. Population: 32 in 66, 0 finer (7/14). NGC ID# 277P, PCGS# 3874

3836 **1912-S MS63 PCGS.** Deep orange-gold toning blankets satiny luster on each side of this Select Mint State example, while the design elements are well-defined throughout. Though not the scarcest in an absolute sense, the 1912-S nickel does boast the lowest mintage of the series (only 238,000 coins). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3837 **1883 No Cents PR67 NGC.** This one-off proof issue has become immensely popular with type and date collectors alike, and demand for the highest-graded examples, Superb Gems such as the present piece, far outstrips supply. This specimen sports pale blue and peach toning, the latter color appearing mostly on the reverse. A tiny contact mark is noted within the wreath. Census: 20 in 67 (1 in 67+, 1 in 67 ★), 0 finer (7/14).
Ex: Dallas Signature (Heritage, 10/2009), lot 257; Central States Signature (Heritage, 4/2011), lot 3068. NGC ID# 22PU, PCGS# 3878

1883 No Cents Liberty Nickel, PR67+
None Numerically Finer

3838 **1883 No Cents PR67+ NGC. CAC.** Highly popular as one of three different proof nickel types produced in 1883, the proof No Cents Liberty nickel was struck to the extent of 5,219 coins, but few survive at the Superb Gem grade level. This Plus-graded piece shows pale lemon-gold and ice-blue hues over each side, with seemingly flawless surfaces and fully struck design elements. Census: 20 in 67 (1 in 67+, 1 in 67 ★), 0 finer (7/14). NGC ID# 22PU, PCGS# 3878

3839 **1883 No Cents PR66 Cameo PCGS.** This is a sharp, beautifully preserved example of this popular one-year, No Cents type. Moderate mirroring in the fields is complemented by a veil of light golden toning on each side, and the surface preservation is equally appealing. PCGS has certified only 15 numerically finer Cameo representatives (7/14). PCGS# 83878

1883 No Cents Nickel, PR67 Cameo
Among the Finest Examples at NGC and PCGS

3840 **1883 No Cents PR67 Cameo NGC.** The popular and storied No Cents design, once a target of charlatans, is now a classic American coinage variety. This Superb Gem Cameo proof exhibits impressive contrast between its mirrored fields and frosty devices, with bold design definition, and brilliant, untoned surfaces. Census: 22 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (7/14). PCGS# 83878

3841 **1884 PR66+ Cameo PCGS.** A lovely, gold-tinted Cameo, this high-end Premium Gem proof exhibits needle-sharp design definition and ample mirroring in the fields. The preservation is excellent and the surfaces displays vibrant luster. Population: 56 in 66 (6 in 66+) Cameo, 5 finer (7/14). PCGS# 83882

1890 Liberty Nickel, PR66 Cameo
Excellent Registry Set Candidate

3842 **1890 PR66 Cameo PCGS. CAC.** This spectacular Premium Gem exhibits sharply detailed design elements and deeply mirrored fields that contrast boldly with the richly frosted devices. The surfaces are mostly brilliant and well-preserved, but a small planchet flaw is noted near star 13 and a few hints of pale gold toning enhance the outstanding eye appeal. Population: 17 in 66 (3 in 66+) Cameo, 1 finer (8/14). PCGS# 83888

3843 **1892 PR66+ Cameo PCGS.** A beautiful proof from a mintage of 2,745 coins. The bright silver-gray surfaces exhibit softly frosted devices and deeply mirrored, nearly flawless fields. A small nick on Liberty's neck appears to be all that keeps this coin from an even higher grade. Population: 29 in 66 (5 in 66+) Cameo, 4 finer (7/14). PCGS# 83890

3844 **1896 PR67 NGC.** Vibrant multicolor toning leaps from the semiprooflike fields of this coin in vivid hues of green, gold, champagne, and rose. Seemingly pristine surfaces exhibit a needle-sharp strike on this high-end Superb Gem. Census: 11 in 67, 0 finer (7/14). NGC ID# 2786, PCGS# 3894

3845 **1897 PR66 Cameo PCGS.** Rich golden toning encompasses each side of this lovely Premium Gem, adding a degree of warmth to the strong field-motif contrast. The design elements exhibit full definition, and a single tick in the field near star 1 appears to be all that precludes an even finer grade. Population: 31 in 66 (7 in 66+) Cameo, 16 finer (7/14). PCGS# 83895

1897 Liberty Nickel, PR67 Cameo
From a Mintage of 1,938 Proofs

3846 **1897 PR67 Cameo PCGS.** Whispers of golden-orange toning accent the otherwise brilliant surfaces of this amazing Superb Gem proof. The heavily frosted design motifs stand out starkly against reflective, jet-black fields, generating contrast worthy of a Cameo designation. Population: 16 in 67 (2 in 67+) Cameo, 0 finer (7/14). PCGS# 83895

3847 **1898 PR66 Cameo PCGS.** A great coin with brilliant surfaces and a strong black and white appearance on each side. Fully struck with clean, untouched fields that are highly reflective, and heavily frosted snow-white design motifs. Population: 33 in 66 (5 in 66+) Cameo, 5 finer (7/14). PCGS# 83896

1903 Liberty Nickel, PR67+
Rare This Well-Preserved

3848 **1903 PR67+ PCGS. CAC.** Splashes of pale rainbow toning melt into the deeply mirrored fields of this high-end Superb Gem example. Close scrutiny finds the surfaces virtually perfect, and the design elements struck to full definition. From a proof mintage of only 1,790 pieces. Population: 19 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 278D, PCGS# 3901

3849 **1906 PR66 Cameo PCGS.** The design elements are crisp and the golden-gray surfaces are free of any noticeable imperfections. There is just enough contrast between the satiny devices and the fields to qualify for the Cameo designation from PCGS. Population: 28 in 66 (4 in 66+) Cameo, 19 finer (7/14). PCGS# 83904

3850 **1907 PR66 Cameo PCGS. CAC.** The Philadelphia Mint struck 1,425 proof Liberty nickels in 1907, the lowest proof mintage in the entire series. This Premium Gem specimen offers remarkable cameo contrast, an expert strike, and carefully preserved surfaces. Population: 15 in 66 Cameo, 4 finer (7/14). PCGS# 83905

3851 **1908 PR66 Cameo PCGS.** Struck during an era when frosted devices on proofs were the exception and not the rule, this Premium Gem represents just a small population of high-end survivors worthy of a Cameo designation. Furthermore, the strike is well-executed and a blush of deep golden toning on each side only increases the appeal. Population: 22 in 66 (2 in 66+) Cameo, 4 finer (7/14). PCGS# 83906

3852 **1908 PR66 Cameo PCGS.** This issue is readily available in most grades, but Cameo representatives are seldom seen. This Premium Gem example exhibits bold design definition and ample mirroring in the fields. A ribbon of light golden toning surrounds the peripheries, while the central regions are largely untoned. Population: 22 in 66 (2 in 66+) Cameo, 4 finer (7/14). PCGS# 83906

1909 Liberty Nickel, PR68
Essentially Perfect Surfaces

3853 **1909 PR68 NGC.** When viewed through a loupe, it is hard to imagine how there could be two points on the grading scale above this coin. It appears perfect to us. The only so-called defects are a couple of tiny planchet voids in the field between Liberty's hair and star 13. Each side displays pinkish centers with a pale outline of green around the margins. Just a magnificent type coin. Census: 9 in 68 (1 in 68 ★), 0 finer (7/14). NGC ID# 278K, PCGS# 3907

1909 Nickel, PR67 Cameo
Lovely Toning

3854 **1909 PR67 Cameo PCGS. CAC.** A specimen with wonderful visual appeal on both sides, this Superb Gem exhibits splendid toning in addition to pronounced Cameo contrast. The toning includes subtle hues of frosty pale blue and peach. Bold at the centers, although portions of the outer devices display incompleteness, including several of the stars and the left ear of corn. Population: 21 in 67 (2 in 67+) Cameo, 1 finer (7/14). PCGS# 83907

1909 Liberty Nickel, PR67 Cameo
Delightful Eye Appeal

3855 **1909 PR67 Cameo PCGS. CAC.** Attractive champagne patination and bold cameo contrast imbue this Superb Gem with vivid eye appeal. From a generous mintage of 4,763 proofs, this high-end, late-date Liberty nickel specimen is devoid of any mentionable contact marks. Population: 21 in 67 (2 in 67+) Cameo, 1 finer (7/14). PCGS# 83907

BUFFALO NICKELS

3856 **1913-S Type Two MS64 PCGS.** The 1913-S Type Two nickel boasts the third-lowest mintage of the series (little more than 1.2 million pieces), but ranks as the scarcest regular issue overall. This near-Gem displays glossy golden-gray patina, with minimally abraded surfaces. The strike is slightly soft on the central devices, as is typical of this San Francisco issue. NGC ID# 22R3, PCGS# 3923

1913-S Type Two Nickel, MS65
Difficult Any Finer

3857 **1913-S Type Two MS65 PCGS.** The surfaces of this Gem reveal a pale champagne patina. Though the strike is pleasing overall, areas of weakness, such as LIBERTY, are present, typical for this date. The horn, bison's head and tail, on the other hand, exhibit fairly nice detail. Scattered tiny flecks appear, but do not unduly detract. Housed in a first generation holder. Only 34 examples have achieved higher numeric grades from PCGS (7/14). NGC ID# 22R3, PCGS# 3923

1913-S Type Two Nickel, MS65
Popular Low-Mintage Issue

3858 **1913-S Type Two MS65 PCGS.** This satiny Gem displays iridescent rose-gold and silvery-gray color over each side, with light pastel green shades on portions of the obverse. The strike is generally pleasing overall, including the peripheral details, with the high point of the hair braid and the fur atop the bison's head exhibiting the only notable weakness. Scattered minute flecks of carbon appear on both sides and a few small laminations are present on the reverse. PCGS has awarded higher numeric grades to only 34 examples (7/14). NGC ID# 22R3, PCGS# 3923

3859 **1915 MS66+ PCGS. CAC.** Moderately available in most grades, the 1915 nickel becomes scarce in levels finer than the present coin. Satiny, virtually undisturbed mint luster showcases iridescent pastel toning over each side, while the design elements exhibit strong definition. PCGS has seen 41 numerically finer submissions (7/14). NGC ID# 22R7, PCGS# 3927

3860 **1915-D MS65 PCGS.** Light champagne patina graces this satiny Gem. The strike and luster are above-average on this piece, and while there are a few small marks on the devices, these have little impact on the eye appeal. PCGS has seen 35 numerically finer submissions (7/14).
Ex: Dallas Signature (Heritage, 11/2006), lot 362. NGC ID# 22R8, PCGS# 3928

3861 **1917-D MS65 PCGS.** This piece shows an above-average strike for the issue, with the only mentionable weakness seen periodically around the border, primarily on the bison's head. Warm amber and olive-gold hues blanket the satiny, well-preserved surfaces. PCGS has graded only 18 coins numerically finer (7/14).
Ex: Baltimore Signature (Heritage, 7/2003), lot 6180. NGC ID# 22RE, PCGS# 3935

3862 **1918 MS65 PCGS.** This is an exceptionally sharp representative from an issue that typically appears weakly struck. The surfaces are awash in softly frosted luster and delicately toned in shades of faint peach-orange and rose. NGC ID# 22RG, PCGS# 3937

1918 Buffalo Nickel, MS66
Exceptionally Well-Struck

3863 **1918 MS66 PCGS.** Softly frosted luster radiates from surfaces that show delicate lilac and peach-orange toning. The issue typically shows incompleteness over the central obverse, particularly on the knot that secures the hair braid, but such is not the case here. This Premium Gem is exceptionally well-struck with only slight softness over the central portion of the bison. No marks are visible to the unaided eye. Population: 55 in 66 (2 in 66+), 8 finer (7/14). NGC ID# 22RG, PCGS# 3937

3864 **1918/7-D FS-101, Good 6 PCGS.** Pale battleship-gray patina blankets each side of this well-circulated example, with deeper olive seen in some of the recessed areas. The date is weak, as is typical at this grade level, though the overdate feature is clearly visible with low-power magnification. Overall, this is a pleasing lower-grade representative of this *Guide Book* variety. PCGS# 38446

3865 **1918/7-D FS-101, Fine 12 PCGS.** This is a lightly circulated example of this widely popular *Guide Book* variety, but the overdate feature is plainly visible. Pale olive-gray patina encompasses each side, while the surfaces are exceptionally smooth throughout. PCGS# 38446

3866 **1918-D MS64 PCGS.** Warm golden-gray toning engulfs each side of this satiny near-Gem, while the surfaces are pleasingly clean. The central devices are not fully defined, a common characteristic of this slightly more challenging Denver issue. NGC ID# 22RH, PCGS# 3938

3867 **1919 MS66 PCGS.** Vivid lemon-gold and powder-blue hues encompass most of each side, with strong rainbow colors also seen around the upper reverse margin. The 1919 was a high-production issue (more than 60 million pieces struck), and many, such as this coin, exhibit a touch of softness on the hair braid and bison's shoulder. Still, PCGS has certified only 12 numerically finer examples (7/14). NGC ID# 22RL, PCGS# 3941

3868 **1919 MS66 PCGS.** The date is common up to and including MS65, after which point it becomes scarce to rare. Examples exist with both a weak strike and a sharp strike; the latter accurately describes the coin here offered. The surfaces are satiny and brilliant, and PCGS has certified only 12 pieces numerically finer (7/14). NGC ID# 22RL, PCGS# 3941

3869 **1919 MS66+ PCGS. CAC.** A bright, satiny, lightly toned example of this readily available date from the Philadelphia Mint. The design elements are fully struck and the surfaces are virtually pristine, making this Premium Gem an unusual high-end coin indeed. Population: 6 in 66+, 12 finer (7/14). NGC ID# 22RL, PCGS# 3941

3870 **1919 MS66+ PCGS. CAC.** Radiant, satiny mint bloom and nearly undisturbed surfaces are the hallmarks of this piece. Signs of die erosion are observed in the recesses with magnification, likely contributing the minor softness seen on the central regions of the devices. PCGS has certified just 12 numerically finer examples (7/14). NGC ID# 22RL, PCGS# 3941

3871 **1919-D MS63 PCGS.** A highly intriguing example, this piece displays numerous die cracks across the upper portion of the obverse, with noticeable signs of die fatigue on the top of the head. The design elements are weakly defined, as is typical of this Denver issue. Struck from mildly rotated dies, with a light golden-gray patina. NGC ID# 22RM, PCGS# 3942

3872 **1919-S MS63 PCGS.** This spectacular Select example offers brilliant surfaces that radiate vibrant mint luster and show only minor signs of contact. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 22RN, PCGS# 3943

3873 **1919-S MS63 PCGS.** A mix of rose and gold patina bathes lustrous sky-blue surfaces. The design elements are weakly defined on the upper hair braid and on portions of the reverse, though the strike is actually pleasing for this S-mint issue.
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5364. NGC ID# 22RN, PCGS# 3943

3874 **1920 MS66 PCGS. CAC.** The 1920 is among the more plentiful dates overall, but pieces grading finer than this Premium Gem blazer are decidedly rare. Glowing, satiny mint bloom radiates from the nearly flawless surfaces on each side, with faint ice-blue and champagne hues adding to the visual display. A touch of minor softness is noted on the obverse hair braid, though the strike is actually above-average for the issue. PCGS has certified just nine numerically finer representatives (7/14). NGC ID# 22RP, PCGS# 3944

3875 **1920 MS66+ PCGS. CAC.** Iridescent hues of apricot-orange, lavender, and rose paint the surfaces of this lustrous, CAC-approved Premium Gem. Each side is sharply detailed, notably over the bison's head and the Indian's hair braid. PCGS has certified a mere nine coins in higher numeric grades (7/14). NGC ID# 22RP, PCGS# 3944

1920-S Nickel, MS64
Better Struck Than Usual

3876 **1920-S MS64 PCGS.** The near-Gem level of preservation is the finest most collectors are likely to encounter. Relatively few pieces have been certified in higher grades due to the weak strikes and subpar luster that characterize most 1920-S nickels. The present MS64 displays light toning over its lustrous surfaces, and the design elements are somewhat better struck than typically seen, but the bison's fur, especially atop its head, is weakly defined. The horn and tail are fairly well-defined. PCGS and NGC have seen fewer than 40 examples finer (7/14). NGC ID# 22RS, PCGS# 3946

3877 **1921 MS66 PCGS.** Struck from well-worn dies, as evidenced by the flow lines in the fields on each side, though the devices are surprisingly struck to full definition despite. Golden-gray toning blankets satiny luster on each side, while the surfaces are free of any noticeable abrasions. PCGS has encapsulated only 22 numerically finer representatives (7/14). NGC ID# 22RT, PCGS# 3947

3878 **1921 MS66 NGC.** Whispers of light gold imbue frosty surfaces that are well-preserved throughout. Typically sharp design features make this Premium Gem an excellent type representative. Census: 67 in 66 (2 in 66+, 6 in 66 ★), 14 finer (7/14).
Ex: Dallas Signature (Heritage, 11/2006), lot 375. NGC ID# 22RT, PCGS# 3947

3879 **1923-S MS64 PCGS.** An attractive near-Gem representative that possesses noteworthy sharpness for the issue and is accented in golden and blue pastels. Extremely scarce and, consequently, expensive at the MS65 level, making this a fine alternative for the quality conscious collector.
Ex: Central States Signature (5/2005), lot 6157. NGC ID# 22RW, PCGS# 3950

3880 **1925-S MS63 PCGS.** The 1925-S is among the most poorly produced issues in the series, with weak strikes and die fatigue being common. This example exhibits these characteristics, but not quite to the exaggerated extent most-often seen. Satiny, golden-gray luster blankets each side, with iridescent blue and lavender hues seen in the recesses. NGC ID# 22S4, PCGS# 3956

3881 **1927-S MS63 NGC.** The Buffalo nickel specialist will appreciate the unusually well-defined design elements on this Select 1927-S representative. The surfaces are fairly clean for the grade, and iridescent lavender, powder-blue, and champagne toning further heightens the visual appeal. NGC ID# 22SA, PCGS# 3962

3882 **1928 MS66+ PCGS.** A beautiful Premium Gem, wonderfully toned in shades of lime-green, sky-blue and antique-gold, among others; with intensely lustrous surfaces that are immaculate on both sides. Just 15 coins are graded even finer at PCGS. 13 in 66+, 15 finer (7/14). NGC ID# 22SB, PCGS# 3963

1928-D Buffalo Nickel, MS66
One Coin Finer at PCGS and NGC Combined

3883 **1928-D MS66 PCGS.** Exceptionally well-struck for the issue with only the slightest bit of shallowness over the bison's shoulder, this Premium Gem features softly frosted luster and entirely brilliant surfaces. Although the 1928-D is readily available in most Mint State grades, MS66 coins are rare, and only one coin is graded finer at PCGS and NGC combined. Population: 47 in 66, 0 finer (7/14). NGC ID# 22SC, PCGS# 3964

1928-D Nickel, MS66
Tied for Finest at PCGS

3884 **1928-D MS66 PCGS.** As with other Denver issues from the 1920s, the 1928-D is well-known as a strike rarity, albeit to a lesser degree than earlier years. The obverse of this piece shows a bit of highpoint softness on the Indian's hair above the knot and on the bison's shoulder, but the remaining design features are generally well-defined. Each side is nearly untoned with attractive, satiny mint luster and no reportable abrasions. Population: 47 in 66, 0 finer (7/14).
Ex: Central States Signature (Heritage, 5/2004), lot 6379; Long Beach Signature (Heritage, 2/2005), lot 6008; Central States Signature (Heritage, 4/2009), lot 1534; Dallas Signature (Heritage, 10/2009), lot 280. NGC ID# 22SC, PCGS# 3964

1935 Nickel, Breathtaking MS67+
Fully Struck

3885 **1935 MS67+ PCGS. CAC.** The radiantly lustrous surfaces of this high-end Superb Gem display whispers of soft sky-blue and lavender color and are impeccably preserved. The design elements are fully struck throughout. Such specimens are very rare, accounting for less than one percent of the population (Bowers, 2007). This coin has breathtaking technical quality and aesthetic appeal. PCGS and NGC have each seen a solitary piece numerically finer (7/14)! NGC ID# 22SN, PCGS# 3974

3886 **1935 Doubled Die Reverse, FS-801, AU58 NGC.** The reverse demonstrates strong doubling on FIVE CENTS, E PLURIBUS UNUM, and the eye. The *Cherrypickers' Guide*, fifth edition, calls this variety "... extremely rare in any grade above VF. About 10 are known in Mint State." Just a touch of rub shows on the highpoint hair on this luscious piece, which boasts attractive green-gray hues with glints of gold on each side, and a complete, although not bold horn. Census: 10 in 58, 9 finer (7/14).
Ex: Long Beach Signature (Heritage, 9/2006), lot 1080. PCGS# 38465

1935 FS-801 Nickel, MS62
Doubled Die Reverse

3887 **1935 Doubled Die Reverse, FS-801, MS62 NGC.** The reverse legends and bison's head are clearly die doubled on this *Guide Book* variety, especially on FIVE CENTS and UNITED. Unlike the more famous 1937-D Three Legged nickel, the 1935 FS-801 is rare in Uncirculated grades. The present coruscating example displays splashes of powder-blue and wheat-gold toning with minor obverse spotting. The strike is good, and marks are nearly absent. PCGS# 38465

3888 **1936-S MS67 PCGS.** Pastel rose and gold coloration dominates intensely lustrous surfaces on both sides of this Superb Gem Buffalo nickel. Exquisitely impressed motifs and a lack of mentionable marks further enhance the coin's outstanding eye appeal. Population: 76 in 67, 0 finer (7/14).
Ex: ANA National Money Show (Heritage, 3/2007), lot 332. NGC ID# 22SU, PCGS# 3979

3889 **1937-D Three-Legged, FS-901, AU58 PCGS.** A briefly circulated caramel-gold and stone-gray representative of the perennially popular mint error. Marks are generally confined to three lines on the upper back of the bison and a hair-thin line on the cheek. Housed in a green label holder. PCGS# 38475

3890 **1937-D Three-Legged, FS-901, MS61 PCGS.** This popular variety is the result of heavy polishing of eroded dies, which obliterated the bison's right front leg. The coin offered here features typically subdued luster and iridescent accents over nickel-gray surfaces. PCGS# 38475

3891 **1937-D Three-Legged, FS-901, MS61 NGC.** Heavy die polishing effaced the lower-relief forward leg of the bison, resulting in this popular "three-legged" *Guide Book* variety. This is a pleasing Mint State example, with iridescent olive-gold patina and minimal abrasions for the grade. Evidence of die erosion is seen in the recesses upon close examination, but the striking sharpness is hardly affect. PCGS# 38475

3892 **1937-D Three-Legged, FS-901, MS62 NGC.** This is a pleasing lower-grade Mint State representative of this popular *Guide Book* variety. A loupe reveals the beginning signs of die erosion in the fields near the borders, as is typical for the issue, but the strike is nonetheless well-executed. PCGS# 38475

3893 **1937-D Three-Legged, FS-901, MS62 NGC.** Heavy die polishing created this popular *Guide Book* variety, with the bison's right front leg almost completely effaced. This is a boldly struck, highly pleasing Mint State example, with dusky golden-gray toning over each side. PCGS# 38475

1938-D/S Nickel, MS67+
Outstanding Eye Appeal

3894 **1938-D/S MS67+ NGC. CAC.** Both sides of this high-end Superb Gem are awash with intense luster, and each displays hints of light gold-tan color, slightly more so on the reverse. The design features are sharply struck, including the Indian's hair and braid, LIBERTY, and the bison's fur, horn and tail. Impeccably preserved throughout. Many thousands of the 1938-D/S are known today, but few approach the fantastic eye appeal of the present coin. NGC ID# 22T3, PCGS# 3985

PROOF BUFFALO NICKELS

3895 **1915 PR66 PCGS. CAC.** A pleasing matte proof specimen with full strike definition and wonderfully smooth, untouched fields and devices. Light cream-gray obverse coloration turns to a deeper shade of wheat-gray mingled with pastel golden accents over the reverse. PCGS has graded only 59 examples finer (7/14). NGC ID# 278U, PCGS# 3992

3896 **1936 Type One — Satin Finish PR65 PCGS. CAC.** This Gem proof is decisively struck with gleaming edges, though the luster is far from the brilliance found on the year's Type Two pieces. Faint golden tints are visible at the margins. Housed in an old green label holder. *Ex: Long Beach Signature (Heritage, 5/2009), lot 346.* NGC ID# 278X, PCGS# 3994

3897 **1936 Type One — Satin Finish PR67 PCGS.** Unpopular with collectors at the time of issue due to its similarity to that of business strikes, the satin proof finish was discontinued part way through the year, and the Mint reverted back to the old brilliant finish from that point forward. This piece is beautifully preserved with light gold and ice-blue hues. The strike is bold, as one would expect for a proof. Housed in a green label holder. PCGS has seen 35 numerically finer submissions (7/14). NGC ID# 278X, PCGS# 3994

3898 **1937 PR66 NGC.** Highly reflective fields and a razor-sharp strike deliver excellent visual appeal on this Premium Gem proof Buffalo nickel. Iridescent, pastel hues blend into the nearly flawless surfaces on each side, further heightening the visual appeal. From a mintage of 5,769 coins. NGC ID# 278Z, PCGS# 3996

3899 **1937 PR67 PCGS.** A flashy, deeply mirrored example of this popular and widely collected proof type. Just the faintest trace of pale golden color occurs over otherwise brilliant surfaces, and there are no obvious contact marks on either side. PCGS has graded only 18 numerically finer examples (7/14). *Ex: Long Beach Signature (Heritage, 9/2002), lot 6092.* NGC ID# 278Z, PCGS# 3996

3900 **1937 PR67+ NGC.** This is a beautiful, brilliant Superb Gem from the second year of modern Buffalo nickel proof production in 1937. A fully struck, pristine example with unusually deep, watery reflectivity in the fields, for this type. Census: 9 in 67+, 45 finer (7/14). NGC ID# 278Z, PCGS# 3996

3901 **1937 PR67 NGC. CAC.** A beautiful, fully struck specimen from the second and final year of "modern" proof Buffalo nickel production. The inky-black fields and ice-gray motifs are immaculately preserved and contact-free. NGC ID# 278Z, PCGS# 3996

3902 **1937 PR67 PCGS. CAC.** This is an ideal type representative because of the issue's generous mintage (5,769 specimens) and availability in high grades. The entirely brilliant surfaces exhibit an expectedly pinpoint-sharp strike and no marks worthy of critique. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

3903 **1938 MS67 Full Steps PCGS.** Virtually perfect surfaces and luminous silvery-gray luster complement the bold strike on this Registry-quality Superb Gem. PCGS has encapsulated only 16 Full Steps examples at this grade level, and none finer (7/14). NGC ID# 22T4, PCGS# 84000

3904 **1942-S MS67 Full Steps NGC.** This Registry-quality Superb Gem showcases radiant sun-gold, lavender, and lilac toning over strong, satiny mint luster. The strike is bold and the surfaces are virtually perfect. This piece is tied with just 16 others as the finest certified of the date at NGC (7/14). NGC ID# 22TN, PCGS# 84017

1942-S Nickel, Lustrous MS67 Full Steps

3905 **1942-S MS67 Full Steps PCGS.** Frosty luster endows both sides of this magnificent Superb Gem, each of which displays just an occasional whisper of gold-tan patina. The design features exhibit sharp detail in addition to the Full Steps. A couple of light reverse marks are within the confines of the grade designation. A branching die crack is visible on Jefferson's shoulder. Population: 21 in 67 Full Steps, 0 finer (7/14). NGC ID# 22TN, PCGS# 84017

1942-S Nickel, Bright MS67 Full Steps

3906 **1942-S MS67 Full Steps PCGS.** This bright Wartime nickel displays just an occasional hint of gold color on its intensely lustrous surfaces. The design elements are sharply defined, culminating in Full Steps. These are bold not only beneath the pillars but on each side of Monticello as well. A beautiful, impeccably cared for coin. Population: 21 in 67 Full Steps, 0 finer (7/14). NGC ID# 22TN, PCGS# 84017

3907 **1943-D MS67+ Full Steps PCGS.** Bands of multicolor iridescence occur at the right-obverse and lower-reverse margins in rainbow hues. This silver D-mint wartime issue frequently shows full detail like this Superb Gem, however, PCGS has certified only three coins finer (7/14). NGC ID# 22TS, PCGS# 84020

3908 **1944-D MS67+ Full Steps PCGS.** Fully struck design elements and seemingly flawless surfaces are the hallmarks of this high-end Superb Gem, while the lustrous surfaces showcase pastel hues of ice-blue, lavender-gold, and mint-green. This coin is one of only 12 MS67 examples to receive a Plus designation from PCGS, with only three numerically finer (7/14), and it is less than half of a grade point finer than the example in the current highest-rated Registry Set. NGC ID# 22TV, PCGS# 84023

1946-D Nickel, MS67 Full Steps
None Numerically Finer at PCGS

3909 **1946-D MS67 Full Steps PCGS.** Pastel gold, green, and lavender hues grace satiny luster on each side of this boldly struck, exceptionally well-preserved Superb Gem. PCGS has certified only 11 Full Steps pieces in MS67 (1 in 67+), with none finer (7/14), making the present offering an important opportunity for the Registry Set collector. NGC ID# 22U3, PCGS# 84029

1949-D Jefferson Nickel, MS67 Full Steps
Rare at This Lofty Grade Level

3910 **1949-D MS67 Full Steps PCGS.** A single glance at the population reports shows why this issue is so challenging in the highest grades. PCGS and NGC combined have certified just six examples in MS67 Full Steps and none in a higher numeric grade. Prospective bidders will be competing with Registry Set enthusiasts for this immaculate Full Steps representative. A whisper of golden translucence covers lustrous, satin-silver surfaces. There are no surface distractions. Population: 4 in 67 Full Steps, 0 finer (7/14). NGC ID# 22UC, PCGS# 84038

1964 Jefferson Nickel, MS66 Full Steps
Registry-Quality Representative

3911 **1964 MS66 Full Steps PCGS.** Ex: Compradore Collection. The Philadelphia Mint struck more than 1 billion nickels in 1964, and about 1 of every 30 examples (or 30 million) had full steps. While such a quantity seems sufficient, the connoisseur will find the search for an example as nice as this piece to be exceedingly difficult. Fully lustrous with satin surfaces and pale gold toning. Population: 5 in 66 Full Steps, 1 finer (7/14). NGC ID# 22VG, PCGS# 84075

3912 **1975 MS67 Full Steps PCGS.** Tinges of fuchsia and pale green highlight dusky golden-gray toning over each side, while the surfaces are almost perfectly preserved and the strike is sharp. This piece is tied with one other as the finest certified in Full Steps at PCGS (7/14), and is a full grade point finer than the example in the current highest-rated Registry Set. NGC ID# 22W4, PCGS# 84094

PROOF JEFFERSON NICKEL

3913 **1959 PR68 Deep Cameo PCGS.** Bold white-on-black contrast complements the razor-sharp design definition on this high-end, Registry-quality proof. The eye appeal is equally magnificent. Population: 16 in 68 Deep Cameo, 1 finer (7/14). NGC ID# 27A9, PCGS# 94191

EARLY HALF DIME

1797 V-1, LM-4, Half Dime, Fine 12
Rare 13 Stars Variety

3914 **1797 13 Stars, V-1, LM-4, R.5, Fine 12 PCGS.** The rarest *Guide Book* variety of the date, and the only Small Eagle half dime die variety with 13 stars. Approximately as rare as its 1797 O-101 half dollar counterpart, but much more affordable. The present LM-4 example has steel-gray and tan-brown centers. The borders exhibit deep russet patina. Minimally abraded, and sharp for the Fine grade. PCGS# 38600

BUST HALF DIMES

1829 Half Dime, MS65
V-3, LM-2

3915 **1829 V-3, LM-2, MS65 PCGS. CAC.** A lightly toned Gem with hints of tan on the fields and glimpses of sea-green near the rims. Lustrous and splendidly preserved with prominent clash marks on the reverse. The strike is good despite blending on the claws and shield border. An excellent candidate for an advanced type set. PCGS# 38613

1829 V-3, LM-2 Half Dime
MS65 Prooflike
Ex: Green, Newman

3916 **1829 V-3, LM-2, R.1, MS65 Prooflike NGC.** Ex: "Col." E.H.R. Green, Eric P. Newman. The LM-2 die pair was utilized for both proof and business strike half dimes in 1829, and this Gem, designated Mint State by NGC, was considered a proof by its famous prior owners. This early die state piece displays clash marks but no die cracks. The flashy fields are lightly toned silver-gray and the margins are powder-blue. The strike is razor-sharp. PCGS# 38613

3917 **1835 Small Date, Small 5C, V-7, LM-10, R.1, MS64 PCGS. CAC.** Dusky autumn-brown toning dominates, but the reverse periphery displays forest-green. A coruscating and nearly unabraded near-Gem with a needle-sharp strike and impressive eye appeal. PCGS# 38719

SEATED HALF DIMES

3918 **1846 VF30 PCGS.** A moderately worn example with a blatantly original appearance and smooth, slightly abraded surfaces. Relatively few examples of this low-mintage New Orleans issue have survived to the present day, at any level of preservation. Population: 8 in 30, 28 finer (7/14). NGC ID# 2338, PCGS# 4336

3919 **1854 Arrows MS66 PCGS. V-3.** Arrows half dimes were a generously minted type coin and are required for any 19th century type set. In this case 5.7 million pieces were struck. Few can equal the technical grade or sheer eye appeal of this coin. The highly lustrous surfaces have pearl-gray centers that are surrounded by speckled golden, russet, and deep blue toning at the margins. Sharply struck throughout. Population: 11 in 66 (1 in 66+), 1 finer (7/14). NGC ID# 2342, PCGS# 4358

3920 **1857-O MS66 NGC. V-3.** This attractive Premium Gem displays well-detailed design elements and vibrant mint luster, under shades of golden-brown and silver-gray patina. Prominent clash marks are present on each side, not uncommon for the issue. Census: 30 in 66, 4 finer (7/14). NGC ID# 233T, PCGS# 4366

1860 Half Dime, MS67
Lustrous and Attractively Toned

3921 **1860 MS67 PCGS. CAC.** The year 1860 saw the production of 798,000 half dimes, and the issue often serves as a first-year type because of the addition of the obverse legend. This gorgeous Superb Gem features illuminant luster that shines through mostly violet-gray toning, with areas of peripheral ice-blue and sea-green color. Sharply struck and attractive. Population: 38 in 67, 4 finer (7/14). NGC ID# 2347, PCGS# 4377

3922 **1861 MS66 PCGS. CAC.** Light golden patina visits this lustrous and unabraded Civil War type coin. Only a few cereal grains on the upper left wreath lack a full impression. Struck from clashed dies. Housed in a green label holder. Population: 23 in 66 (1 in 66+), 2 finer (7/14). NGC ID# 2349, PCGS# 4379

1861 Half Dime, MS67
Attractive, Registry-Quality Example

3923 **1861 MS67 NGC.** The 1861 half dime is a common issue in an absolute sense because of its 3.3 million-coin mintage. However, in Superb Gem it is a conditional rarity. Between NGC and PCGS combined, only nine coins are certified in MS67 with one NGC-graded example in MS68 (8/14). The surfaces are partly toned in ice-blue, russet, and violet, and the design elements are well-defined. A nice Registry Set candidate. NGC ID# 2349, PCGS# 4379

1872 Half Dime, MS67
Among the Finest at Both Services

3924 **1872 MS67 NGC.** Splashes of cobalt-blue, purple-pink, and violet cover each side, while the strike shows incompleteness over Liberty's head, shield, and the reverse bow. The Philadelphia Mint produced just under 3 million coins in 1872, making it one of the more plentiful issues in the series. However, this unsurpassed Superb Gem is among the five finest coins certified by both NGC and PCGS (7/14). NGC ID# 234X, PCGS# 4400

PROOF SEATED HALF DIMES

3925 **1859 PR64 NGC. V-1.** The interesting single-year Paquet subtype (aside from the rare transitional patterns) with hollow-center stars and a different engraving of Liberty. The date is boldly repunched south. Fully struck and flashy, with peach-gold and aquamarine patina. Striations on the central reverse are as made, on the planchet prior to the strike. NGC ID# 235P, PCGS# 4438

3926 **1867 PR66 NGC.** Sea-green and peach alternate across this fully struck and flashy Reconstruction-era proof half dime. Perusal beneath a lens fails to locate any detractions. One of only 625 proofs produced, and encased in a prior generation holder. NGC ID# 2364, PCGS# 4450

3927 **1867 PR66 PCGS.** A lovely Premium Gem from a low proof mintage of only 625 coins, this half dime has deep blue and amber toning over fully mirrored fields. Light contrast is visible beneath the toning. Population: 13 in 66, 5 finer (7/14). NGC ID# 2364, PCGS# 4450

1869 Half Dime, PR67
Conditionally Rare

3928 **1869 PR67 NGC. V-2.** Vivid orange-gold, violet, and ocean-blue hues melt into the deeply reflective fields of this beautifully preserved proof. The upper-left portion of the wreath (the typical weak point) is not fully defined, though the motifs are otherwise sharply impressed. A mintage of just 600 proofs was recorded, and those surviving at this high grade level are exceedingly rare. Census: 10 in 67 (1 in 67 ★), 1 finer (7/14). NGC ID# 2366, PCGS# 4452

1870 Half Dime, PR66 Cameo
Pleasantly Contrasted

3929 **1870 PR66 Cameo PCGS.** From a mintage of 1,000 proofs, this Premium Gem offers pleasantly contrasted surfaces that gleam with brilliance. A heavy layer of frost covers the predictably razor-sharp design features, while the fields exhibit a high degree of reflectivity. A handful of wispy marks, visible with a loupe, define the grade. Population: 7 in 66 Cameo, 2 finer (7/14). PCGS# 84453

EARLY DIME

3930 **1798 Small 8 — Damage — Genuine PCGS. Fine Details. JR-3, R.5.** From the personal collection of Dick Osburn. An original coin with nice, medium-gray patina and sharp motifs for the assigned grade, but with three rather deep gouges on the obverse, and a few small digs on the reverse defining the PCGS Details designation. A scarce variety for the date, this coin retains considerable appeal despite the damage. PCGS# 38752

BUST DIME

1820 Dime, JR-7, MS64
Deep Multicolor Toning

3931 **1820 Medium 0, JR-7, R.2, MS64 NGC.** Vivid peripheral rings of gold, ocean-blue, and violet surround rich apricot centers, while the underlying luster is strong and satiny. The strike is bold throughout the stars and border dentils, as well as the central motifs. The JR-7 variety is not particularly scarce in and of itself, but any 1820 dime grading in the MS64 to MS65 range is seldom seen. PCGS# 38787

SEATED DIMES

3932 **1853 Arrows MS65 NGC.** A short-lived type with the arrows added to denote a weight change in 1853, this magnificently toned dime is a memorable and attractive Gem example of the type. Bullseye toning shows blue and purple margins merging into lustrous red-gold centers. The same colors appear on the reverse in concentric rings with a sliver center. Bright mint luster resides beneath the toning of this colorful MS65 example, which is fully struck and virtually without abrasions. Census: 76 in 65 (1 in 65+, 2 in 65 ★), 60 finer (7/14). NGC ID# 2398, PCGS# 4603

3933 **1854 Arrows MS65 NGC. Fortin-103, R.4.** This variety is characterized by faint doubling on the bottom of the date numerals. Deep ocean-blue peripheral toning surrounds dusky lavender-gray patina in the centers, while the design elements are boldly struck. Census: 20 in 65, 20 finer (7/14). NGC ID# 239A, PCGS# 4605

1871-CC Seated Dime, VF Details
Key Carson City Issue

3934 **1871-CC — Damage — PCGS Genuine. VF Details. Fortin-101.** A single die pair produced the entire mintage of just 20,100 pieces for this rare Carson City issue. Extant examples are highly sought-after in all grades, but only rarely found. Bright, silvery-gray patina complements a pleasing degree of remaining detail on this representative. Each side exhibits evenly scattered, but heavy abrasions, collectively accounting for the Damage designation from NGC. NGC ID# 23A5, PCGS# 4654

3935 **1872-CC — Damage — PCGS Genuine. XF Details. Fortin-101.** A stone-gray example of this early and rare Carson City issue. From the mintage of 35,480 pieces, none were saved by numismatists until decades later. Most survivors exhibit various degrees of environmental damage. The present coin is lightly to moderately granular and has a couple of unimportant marks. NGC ID# 23A8, PCGS# 4657

1872-S Dime, MS63
A Rare Issue in Mint State

3936 **1872-S MS63 PCGS. CAC. Fortin-101.** This is the only variety for the issue (190,000 coins), and Fortin notes that the date boasts a low R.7 rarity ranking in mint condition. This Select representative features fully brilliant surfaces that show lightly scattered marks. The devices are well-defined with a touch of high-point softness. Population: 1 in 63, 8 finer (7/14). NGC ID# 23A9, PCGS# 4658

1873-CC Seated Dime, Fine Details
Sought-After Carson City Issue

3937 **1873-CC Arrows — Damage — PCGS Genuine. Fine Details. Fortin-101.** The only known die pair. The diagnostic die crack through the mintmark is weak, but discernable. Only 18,791 pieces were issued, and as these circulated heavily, survivors are scarce in all grades and genuinely rare above the VF level. This example is well-detailed for the grade level and displays deep gunmetal-gray toning. The damage noted by PCGS is seen in the form of heavily granular surfaces over the entire obverse, though the reverse remains seemingly unimpaired. The granularity is noticeable, but not overly bothersome to the naked eye. NGC ID# 23BH, PCGS# 4666

3938 **1873-S Arrows MS63 NGC. Fortin-102.** Ex: Pittman / Richmond. The 1 in the date is lightly repunched above the base. Rich sea-green, golden-brown, and lilac toning dominates this satiny and unblemished two-year type coin. The strike shows moderate incompleteness on the mintmark and Liberty's head. *Ex: Hans Schulman, 4/1959, lot 1570; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 652; Richmond Collection, Part III (David Lawrence, 3/2005), lot 1194.* NGC ID# 23BJ, PCGS# 4667

1880 Seated Dime, MS67
Beautifully Toned and Well-Preserved

3939 **1880 MS67 NGC. Fortin-102a, R.4.** The repunched 8 and broken 80 in the date confirm the Fortin-102a variety. Orange-toned centers turn outwardly in concentric fashion to magenta and ice-blue over the obverse, while the reverse exhibits similar colors mottled with splashes of brilliance. Luster radiates throughout, and the devices are sharply detailed. Census: 12 in 67 (1 in 67 ★), 4 finer (7/14). NGC ID# 23AT, PCGS# 4688

1882 Seated Dime, MS67
Fortin-110, None Finer at PCGS

3940 **1882 MS67 PCGS. CAC. Fortin-110, R.2.** Aquamarine and orange-gold tones vie for attention across the sharply lustrous surfaces of this Superb Gem dime. The slightest movement of eye or hand causes the cartwheel sheen to roll across the surfaces, which show virtually no marks or weakness of strike other than the central reverse, which is diagnostic of the variety. A small spot of deeper tone is seen by the reverse denticles at 7 o'clock. Population: 20 in 67, 0 finer (7/14). NGC ID# 23AV, PCGS# 4690

3941 **1889 MS66 NGC. CAC.** A boldly struck, pleasingly preserved example of this late Seated dime issue. Blended iridescent hues of champagne, steel-green, and powder-blue encompass the clean, unmarked surfaces. A lustrous, conditionally scarce Premium Gem. Census: 27 in 66, 8 finer (7/14). NGC ID# 23B9, PCGS# 4702

1891 Dime, MS67
Tied for Finest at PCGS

3942 **1891 MS67 PCGS. Fortin-126, R.3.** Cartwheel luster swirls over the entirely brilliant surfaces of this final-year Seated dime representative, from a healthy mintage of over 15 million coins. The devices exhibit a somewhat irregular strike, while the surfaces are immaculately preserved. Population: 10 in 67, 0 finer (7/14). NGC ID# 23BD, PCGS# 4706

PROOF SEATED DIMES

3943 **1860 PR65+ PCGS. CAC. Fortin-101, R.3.** Tinges of violet and sea-green accent warm champagne toning on each side of this boldly struck, high-end Gem example. The fields display ample mirroring and the devices deliver nearly enough contrast to qualify for a Cameo designation. Population: 19 in 65 (2 in 65+), 23 finer (7/14). NGC ID# 23CJ, PCGS# 4753

3944 **1862 PR64 Cameo PCGS. Fortin-101.** A lovely Choice Cameo proof, this Civil War dime is a designation rarity with few Cameo proofs certified. Both sides have light golden-brown and blue-green toning over radiant silver surfaces. Population: 4 in 64 Cameo, 3 finer (7/14). PCGS# 84755

3945 **1863 PR66 PCGS. Fortin-101, R.4.** A pleasing Civil War era proof, one of just 460 similar coins minted. Cobalt-blue, yellow-gold, and crimson patination runs over both sides. Crisply struck and nicely preserved. Population: 13 in 66 (1 in 66+), 0 finer (7/14). NGC ID# 23BS, PCGS# 4756

3946 **1865 PR65 PCGS. Fortin-102.** Lush navy-blue, rose-red, and apricot-gold patina encompasses this well struck Gem. The obverse has a few lint marks, as made, including one that journey's from Liberty's lower wrist to the UN in UNITED. Only 500 proofs issued for the Civil War date. NGC ID# 23CN, PCGS# 4758

3947 **1866 PR65 Cameo PCGS. Fortin-102.** The base of the 1 in the date is lightly repunched. Delicate golden-brown toning visits this precisely struck Gem. Frosty motifs exhibit obvious white-on-black contrast with the darkly mirrored fields.
Ex: Orlando FUN Signature (Heritage, 1/2010), lot 3671, which realized $1,955. PCGS# 84759

3948 **1869 PR66 Cameo NGC. Fortin-106, R.5.** Deeply mirrored fields and bold, satiny design elements contribute to the Cameo designation from NGC. The obverse displays mottled lavender-gold, and olive-gray toning, while the reverse is awash in concentric rainbow hues. Census: 8 in 66 Cameo (1 in 66 ★ Cameo), 2 finer (7/14). PCGS# 84762

3949 **1875 PR66 Cameo PCGS. Fortin-101.** Narrow bands of autumn-brown and aquamarine endow the obverse periphery. The reverse is brilliant. A prominently mirrored and highly attractive specimen. A later, lapped die state with portions of the gown absent. PCGS# 84772

3950 **1877 PR65 NGC. Fortin-101, R.4.** Type Two Reverse. The 1877 proof issue (510 pieces) is the lowest-mintage date in the series between 1874 through 1891. Both sides exhibit olive-green toning with purple and blue accents. Census: 12 in 65, 20 finer (7/14). NGC ID# 23D2, PCGS# 4774

1881 Seated Dime, PR67 Cameo
Nice Peripheral Toning

3951 **1881 PR67 Cameo PCGS. CAC.** Splendid multicolor toning in shades of ice-blue, cherry-red, and orange surround essentially brilliant interiors on each side. The devices are heavily frosted, and the fields display a high degree of reflectivity. Collectors often turn to the proofs from this issue (975 coins) because the Mint produced only 24,000 circulation strikes, one of the lowest mintages in the series. Population: 8 in 67 Cameo, 1 finer (7/14). PCGS# 84778

1882 Seated Dime, PR67
Richly Toned Throughout

3952 **1882 PR67 PCGS. CAC. Fortin-101, R.3.** A ring of fiery-orange toning surrounds an icy, blue-aqua center on the obverse of this exquisitely patinated proof dime; the reverse is a bit more subtle, but when viewed at the proper angle, it also displays rich aqua and blue coloration, but with golden margins. The fields of this Superb Gem proof are deeply liquid and reflective. The devices show soft mint frost and provide subtle cameo contrast, although the holder does not indicate so. Population: 10 in 67, 3 finer (7/14). NGC ID# 23D7, PCGS# 4779

3953 **1882 PR66 Cameo NGC. Fortin-101, R.3.** A blush of light golden toning warms otherwise frost-white luster on the relief elements and beautifully accents the deep mirroring in the fields. Sharp motifs further heighten the visual appeal. Census: 21 in 66 Cameo (1 in 66 ★ Cameo), 17 finer (7/14). PCGS# 84779

3954 **1883 PR65 Cameo PCGS. Fortin-103, R.3.** Vivid royal-blue, green-gold, and lavender hues encompass each side of this Gem proof Cameo. The strike is crisp, save for the upper-left portion of the wreath, and a couple small ticks on Liberty's lap appear to be all that preclude an even finer grade assessment. Population: 17 in 65 Cameo, 15 finer (7/14). PCGS# 84780

3955 **1884 PR65 NGC. CAC.** A gorgeous piece with a stark cameo effect noted on both sides, as richly frosted devices loom over deep pools of watery reflectivity. A sharply struck, carefully preserved, conservatively graded example. NGC ID# 23D9, PCGS# 4781

3956 **1886 PR66 NGC. CAC.** Dappled peach, lavender, ocean-blue, and straw-gold consume the obverse. The reverse is blended rose-red and honey. Fully struck and flashy with no evidence of hairlines. Encapsulated in a former generation holder. NGC ID# 23DB, PCGS# 4783

3957 **1889 PR66 NGC. Fortin-102, R.4.** Faintly champagne-toned with a degree of wateriness to the reflectivity in the carefully preserved fields. A low-contrast but high-appeal Premium Gem proof. Census: 36 in 66 (1 in 66 ★), 10 finer (7/14). NGC ID# 23DE, PCGS# 4786

BARBER DIMES

3958 **1894 MS66 PCGS.** This delightful Premium Gem exhibits well-detailed design elements and vibrant mint luster, under shades of greenish-gold, silver-gray, and amber toning. The well-preserved surfaces display no mentionable distractions. Population: 15 in 66, 1 finer (7/14). NGC ID# 23DT, PCGS# 4803

3959 **1898 MS66 PCGS. CAC.** Although the issue is common in absolute terms, Premium Gems such as this are rare. Delicate multicolor patina, a full strike, and illuminating luster further enhance the appeal. Population: 39 in 66 (2 in 66+), 4 finer (7/14). PCGS# 4815

1899-S Barber Dime, MS66
Conditionally Rare

3960 **1899-S MS66 PCGS.** Lightly toned in ice-blue and golden-brown hues with radiant luster shining through. The design motifs are strongly defined, especially on Liberty's hair and the lower wreath. Although the issue is plentiful in most grades, Premium Gems such as this are very rare. Population: 13 in 66 (1 in 66+), 3 finer (7/14). NGC ID# 23EB, PCGS# 4820

3961 **1901 MS66 PCGS.** A beautiful mixture of iridescent coloration covers each side of this Premium Gem. Boldly struck and lustrous, with blemish-free surfaces. Population: 15 in 66 (1 in 66+), 1 finer (7/14).
Ex: Central States Signature (Heritage, 5/2007), lot 369. NGC ID# 23EF, PCGS# 4824

3962 **1904-S MS63 PCGS.** This coin seems high-end for the Select Mint State grade level, with few if any surface marks and certainly none that present themselves to the unaided eye. Boldly struck with satiny mint luster and attractive reddish-brown and electric-blue peripheral toning. Population: 17 in 63, 31 finer (7/14). NGC ID# 23ES, PCGS# 4834

3963 **1906-D MS65 PCGS.** A gorgeous Gem example showing mottled champagne-tan patina across both sides, and lovely, deep cobalt-green iridescence near the obverse peripheries. Well struck, blemish-free, and near the top of the certified population. Population: 12 in 65, 17 finer (7/14). NGC ID# 23EY, PCGS# 4839

3964 **1907-O MS66 PCGS. CAC.** Both sides of this Premium Gem display lustrous surfaces and lovely toning. The intermingled shades include gold, olive-green, red, orange, and jade-green. The strike is sharp overall, adding to the appeal. Population: 16 in 66 (1 in 66+), 2 finer (7/14). NGC ID# 23F5, PCGS# 4844

3965 **1907-S MS65 PCGS.** Available in lower grades, this San Francisco issue becomes rare at the Gem grade level. This piece exhibits satiny luster and sharp design definition. Deep midnight-blue, olive-gray, and amber-gold toning encompasses each side, delivering a pleasing degree of eye appeal. Population: 4 in 65, 8 finer (7/14). NGC ID# 23F6, PCGS# 4845

1911-D Barber Dime, MS67
Among the Finest at PCGS and NGC

3966 **1911-D MS67 PCGS. CAC.** The 1911-D Barber dime is an available issue up to and including the Gem level. Premium Gems are scarce and Superb Gems such as this are very rare. The surfaces are fully brilliant and exhibit a few faint grazes over the reverse. The design elements show sharp detail overall with slight softness over Liberty's hair. Population: 10 in 67, 0 finer (7/14). NGC ID# 23FK, PCGS# 4858

3967 **1912-D MS66 PCGS.** Ex: Lily Nicole Collection. Both sides of this Premium Gem display deep, dappled toning — the colors on the obverse include red, orange, gold, plum, olive-green, and teal, while tinges of olive-green, forest-green, red, aquamarine, and orange are present on the reverse. The design elements display bold definition. Population: 21 in 66 (2 in 66+), 1 finer (7/14). NGC ID# 23FN, PCGS# 4861

3968 **1916-S MS66 NGC. CAC.** From the final year of the Barber series, this Premium Gem S-mint example displays sharply struck devices and satiny luster. Mint-green and light golden toning blankets each side. Among the fines certified of the date. Census: 30 in 66, 0 finer (7/14). NGC ID# 23FZ, PCGS# 4871

PROOF BARBER DIMES

3969 **1894 PR66 PCGS.** This Premium Gem proof dime from the mintage of 972 pieces shows largely pinkish centers bounded by daubs of delightful iridescence along the rims on each side. A sharp and distraction-free coin for a type or date set. Population: 37 in 66 (1 in 66+), 22 finer (7/14). NGC ID# 23G6, PCGS# 4878

3970 **1898 PR65 Cameo PCGS.** Ex: Teich Family Collection. Light caramel-gold toning visits this nicely mirrored and well-preserved Gem. The devices are luminous and provide good contrast. Only 735 proofs were coined. Population: 16 in 65 Cameo, 36 finer (7/14). *Ex: Jim Spaulding White Collection (Stack's, 2/1960), lot 795.* PCGS# 84882

3971 **1898 PR65 Cameo PCGS. CAC.** Beautiful, crisp design elements complement highly reflective fields, while the surfaces exhibit vivid hues of navy-blue, violet, amber, and sea-green on the obverse, and light-to-medium golden color over the reverse. Any grade-defining hairlines are well-hidden by the rich patina. Population: 16 in 65 Cameo, 36 finer (7/14). PCGS# 84882

3972 **1903 PR65 PCGS. CAC.** Each side features a ring of golden-russet toning around entirely brilliant interiors. The Mint produced 755 Barber dime proofs in 1903, and this Gem representative offers deep reflectivity, primarily in the reverse fields. Population: 38 in 65 (1 in 65+), 35 finer (7/14). NGC ID# 23GG, PCGS# 4887

3973 **1904 PR65 Cameo PCGS. CAC.** Proofs issued between 1902 and 1907 scarcely feature cameo contrast, as the Mint shifted to a brilliant finish during that period. Beautiful multicolor toning in shades of blue, green, rose, and violet color the obverse, further enhancing the appeal of this Gem proof. The reverse shows brilliant centers and light golden-brown toning at the margins. Population: 6 in 65 Cameo, 6 finer (8/14). PCGS# 84888

3974 **1905 PR65 NGC.** The 5 in the date is repunched. This Gem is one of 727 proof Barber dimes struck in 1905, and the issue is relatively available across most grade levels. Light contrast occurs over the obverse, while the reverse shows attractive ice-blue and light-orange toning. NGC ID# 23GJ, PCGS# 4889

3975 **1905 PR65 PCGS.** Ex: Teich Family Collection. The 5 in the date is broadly repunched north. The variety is mentioned in passing in the Lawrence reference to the series. This fully struck Gem is attractively toned ocean-blue, sun-gold, tan-brown, lavender, and slate-gray. NGC ID# 23GJ, PCGS# 4889

3976 **1910 PR67 NGC.** Only 551 proofs were struck of the dime, quarter, and half in 1910, and high-grade survivors are predictably scarce. This deeply mirrored example has subdued flash because of the cobalt-blue and deep violet toning that thickly coats each side. The coin is essentially perfect as far as preservation goes; a casual glance appears to show some hairlines in the fields, but examination with a loupe resolves these into thin streaks of original brilliance. Census: 14 in 67, 4 finer (7/14). NGC ID# 23GR, PCGS# 4894

3977 **1913 PR66 PCGS.** The incredible sharpness of the design elements coupled with glass-like mirroring in the fields gives this exceptionally well-preserved Premium Gem example outstanding appeal. Soft apricot and olive-gold hues encompass much of each side, with tinges of sky-blue and violet seen periodically around the peripheries. Population: 13 in 66 (1 in 66+), 6 finer (7/14). NGC ID# 23GU, PCGS# 4897

MERCURY DIMES

3978 **1916 MS67 Full Bands PCGS. CAC.** An ideal first-year type representative, this fully struck Superb Gem displays vivid splashes of rainbow toning over much of each side, with vibrant underlying mint luster. Only 10 numerically finer examples have been awarded a Full Bands designation at PCGS (7/14). NGC ID# 23GX, PCGS# 4905

1916 Mercury Dime, MS68 ★ Full Bands
One of Two Finest at NGC Awarded a Star

3979 **1916 MS68 ★ Full Bands NGC.** An exemplary first-year example that is partially layered in each side in mottled russet, rose-violet, and emerald-green toning. Obviously original, significant portions of the original silver surface are evident on each side. Always popular and always available in lower grades, this is one of the finest 1916 dimes known. Census: 14 in 68 (2 in 68 ★) Full Bands, 0 finer (7/14). Ex: *Long Beach Signature (Heritage, 9/2005), lot 2481; Dallas Signature (Heritage, 11/2007), lot 455. From The Pannonia Collection.* NGC ID# 23GX, PCGS# 4905

1916-D Mercury Dime, VF30
Cornerstone Date in the Series

3980 **1916-D VF30 NGC.** Bands of faint rainbow toning hug the peripheries of this otherwise brilliant and lightly circulated example from the keystone issue in the Mercury dime series. Significant interior detail remains, though the high points appear well-worn. The Denver Mint struck a mere 264,000 coins, ensuring the date's perennial popularity among collectors. NGC ID# 23GY, PCGS# 4906

3981 **1919-D MS62 Full Bands PCGS.** This sharply detailed MS62 specimen exhibits Full Bands definition on the fasces and shows a prominent die crack in the obverse field through Y in LIBERTY. The lightly marked surfaces radiate vibrant mint luster. NGC ID# 23H9, PCGS# 4925

3982 **1921 AU58 PCGS.** Mottled russet and violet toning occur over the obverse, while the reverse is largely brilliant. This low-mintage, semikey representative features sharp definition on the bands with just a touch high-point friction. Population: 35 in 58, 12 finer (7/14). NGC ID# 23HE, PCGS# 4934

1924 Dime, Elusive MS67 Full Bands

3983 **1924 MS67 Full Bands PCGS.** The 1924 dime is elusive in Superb Gem with Full Bands. Whispers of electric-blue, lavender, and gold visit the highly lustrous surfaces of the present offering, more so on the obverse. Crispy struck design elements and impeccable preservation round out the coin's outstanding eye appeal. Population: 25 in 67 Full Bands, 0 finer (7/14). NGC ID# 23HJ, PCGS# 4943

3984 **1929 MS67 Full Bands PCGS.** The 1929 Mercury dime issue is available in an absolute sense, yet this Superb Gem with Full Bands is conditionally elusive. In fact, this coin is among the finest examples numerically graded at PCGS (7/14). Blazing, colorless surfaces and coruscating luster make this an exceptional representative. NGC ID# 23J2, PCGS# 4973

1929-S Dime, Vibrant MS67 Full Bands Elusive at This Level

3985 **1929-S MS67 Full Bands PCGS.** The 1929-S dime, sporting a production approaching 5 million pieces, is a common date. That said, Full Band specimens in the lofty grade of MS67 are highly elusive and unknown any finer. The silver-white surfaces of this offering exhibit vibrant luster and boldly struck devices, culminating in Full Bands. There are no distracting marks. Population: 43 in 67 Full Bands, 0 finer (7/14). NGC ID# 23J4, PCGS# 4977

1934 Mercury Dime, MS68 Full Bands None Numerically Finer

3986 **1934 MS68 Full Bands PCGS. CAC.** A common date, the 1934 Mercury dime had a mintage of more than 24 million coins. Few, however, survive in Superb Gem condition with Full Bands definition. This virtually perfect MS68 Full Bands example showcases radiant, frosty mint bloom with small tinges of rainbow color seen around the peripheral regions, most prominent on the reverse. The central definition is full and the eye appeal is equally high. Population: 22 in 68 (1 in 68+) Full Bands, 0 finer (7/14). NGC ID# 23JA, PCGS# 4989

3987 **1936-S MS67+ Full Bands PCGS. CAC.** Beautiful lemon-gold color enhances frosty, nearly undisturbed mint bloom on each side of this precisely struck Superb Gem. The surfaces are expectantly clean, and the eye appeal is exceptional. PCGS has certified just three numerically finer Full Bands examples (7/14). NGC ID# 23JH, PCGS# 5003

3988 **1944 MS67 Full Bands PCGS. CAC.** Quality control problems may be the norm for the issue, but such is not the case for this remarkably preserved Superb Gem example. Brilliant and lustrous throughout, both the horizontal and diagonal bands are fully struck, and no mentionable marks appear on either side. PCGS has seen only two finer submissions in Full Bands (7/14). NGC ID# 23KB, PCGS# 5051

PROOF MERCURY DIME

3989 **1939 PR68 NGC.** This is a brilliant, deeply mirrored proof with satiny devices and bold design definition. The coin is virtually flawless from both a technical and aesthetic standpoint. Census: 78 in 68 (10 in 68 ★), 0 finer (7/14). NGC ID# 27DK, PCGS# 5074

ROOSEVELT DIMES

3990 **1948-S MS67+ Full Bands PCGS.** For the Registry Set specialist, this frosty, gold-tinted Superb Gem is virtually the ultimate when it comes to the 1948-S dime, as it is one of only four MS67 examples to receive a Plus designation from PCGS, and that service has encapsulated only one numerically finer coin (7/14). Beautifully preserved with sharp motifs, this piece also ranks nearly half of a grade point finer than the coin represented in the current highest-rated Registry Set. NGC ID# 23KT, PCGS# 85090

3991 **1957-D MS68 ★ Full Bands NGC.** A bold strike and exceptional surface preservation are among the pleasing attributes this high-end Superb Gem possesses, though the true appeal lies in the rich toning; the reverse showcases concentric rings of copper-red, olive-gold, lime-green, royal-blue, violet, and golden-orange toning around a pale gray center, while the obverse shows tinges of olive and turquoise around the dusky gray center. This Registry-quality piece is tied with just two others as the finest certified (7/14). NGC ID# 23LL, PCGS# 85115

TWENTY CENT PIECES

3992 **1875-CC AU53 NGC.** The Carson City Mint struck 133,290 twenty cent coins in 1875, and the issue is the only collectible CC date in the series. Violet-gray covers each side of this lightly circulated example, with golden-tan and ice-blue accents throughout. Minor friction appears over the sharply detailed devices. NGC ID# 23R6, PCGS# 5297

3993 **1875-CC AU55 PCGS. CAC.** A well-detailed piece with satin luster and light pinches of mottled olive-green patina near many of the devices. Free of large marks, with slight rub on the high points. NGC ID# 23R6, PCGS# 5297

3994 **1875-CC AU58 PCGS.** A brilliant representative with abundant bright luster across the margins and devices. Minimally marked, and Liberty's thigh has a only a whisper of rub. Well struck aside from the upper portion of the eagle's left (facing) wing. Housed in a green label holder.
Ex: Baltimore Signature (Heritage, 7/2003), lot 6884. NGC ID# 23R6, PCGS# 5297

3995 **1875-S MS64 PCGS.** The California branch mint struck just over 1.1 million twenty cent coins in the denomination's introductory year, making it the most available date in the short-lived and ever-popular series. This near-Gem offers delicate toning over sharply impressed and minimally marked surfaces. NGC ID# 23R7, PCGS# 5298

3996 **1875-S MS64 PCGS. CAC. FS-302.** The top of a digit appears in the dentils below the 7 in the date, and the S mintmark is repunched. This near-Gem twenty cent piece showcases frosty and brilliant surfaces with well-struck devices. Minor softness occurs peripherally around the reverse and over Liberty's head. Vivid eye appeal. NGC ID# 23R7, PCGS# 5298

3997 **1875-S MS64 PCGS. CAC.** Vibrant luster emanates through light olive-gray patina on the obverse while gunmetal-gray toning uniformly blankets the reverse. This is a sharply defined example from the most readily collectible date in the twenty cent series. Good for type. NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent Piece, MS65
Semiprooflike Fields

3998 **1875-S MS65 PCGS. MPD-002.** This is the most prominent of the various misplaced date varieties of the issue, with the top of an errant 8 looming above the denticles below the primary 18; unlisted in *Cherrypickers'*. Dusky caramel-gold toning enriches this satiny and nearly unabraded Gem. The strike is pleasing, with only slight incompleteness on the upper edge of the eagle's left (facing) wing and the region around Liberty's head.
Ex: FUN Signature (Heritage, 1/2008), lot 1069. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

3999 **1876 PR62 Cameo PCGS.** This is a pleasing lower-grade proof Cameo, with satiny devices and ample mirroring in the fields. The stars and central devices are well brought up, and no noticeable marks are present. Population: 11 in 62 Cameo, 68 finer (7/14). PCGS# 85304

EARLY QUARTERS

1796 Draped Bust Quarter
Key Silver Type, B-2

4000 **1796 B-2, R.3 — Holed and Plugged — PCGS Genuine.** In our opinion, this coin has the details of a Fair specimen that has been plugged, whizzed, and damaged. A fairly large plug is at 12 o'clock on the obverse and 6 o'clock on the reverse. The stone-gray surfaces are evenly microgranular from whizzing, and the lower half of the reverse displays a few patches of tiny to moderate abrasions. The upper half of the date is clear and the portrait is nicely outlined. PCGS# 38920

4001 **1804 B-1, R.3, AG3 NGC.** The obverse on its own merits the Good grade, since the date, LIBERTY, and stars are bold. The upper reverse legends are also sharp but the beginning of UNITED and most of AMERICA is well worn. The eagle and portrait are nicely outlined. PCGS# 38921

1805 Bust Quarter, XF
Very Scarce B-1 Variety

4002 **1805 B-1, R.4, XF40 PCGS.** Tompkins Die State 2/2. A much better Browning die variety. B-3 and B-2 are the usually seen 1805 marriages. The golden-brown and stone-gray are clashed but only lightly marked. The wings and borders display hints of luster. A pair of small mint-made obverse rim strike-throughs are noted at 4:30. PCGS# 38923

BUST QUARTERS

4003 **1818 B-2, R.1 — Improperly Cleaned — NGC Details. AU.** The stone-gray surfaces are only mildly glossy. The reverse field near the eagle displays inconspicuous graffiti, and a faded thin mark is above the repunched star 13. PCGS# 38943

4004 **1818 B-3, R.3, VF35 PCGS.** Deep cream-gray fields contrast with pearl-white high points. An unblemished and attractive midgrade example. Moderately clashed, and a radial die crack passes through the lowest arrowhead. PCGS# 411648

4005 **1834 B-4, R.1, AU58 NGC.** Vivid multicolor toning encompasses much of each side, while only a brush of high-point wear is detected over the devices. The strike is well-executed throughout, save for star 1 which is not fully defined. A couple old, faint pinscratches on the upper reverse are the only surface flaw of note, and numerous die cracks around the reverse margins are characteristic of the variety. Housed in a prior generation holder. PCGS# 38995

SEATED QUARTERS

4006 **1845 MS64+ NGC.** A blatantly original-looking coin with both sides covered in variegated hues of turquoise, red-peach, and gold-tan patina. Well-struck and lustrous, with mark-free surfaces and pleasing visual appeal. Census: 19 in 64 ***(this 1 in 64+),*** 8 finer (7/14). NGC ID# 23SV, PCGS# 5408

4007 **1853/4 Arrows and Rays, Briggs 1-A, FS-1301, AU55 PCGS.** Pastel straw-gold and ice-blue toning visits this sharply struck and attractive Choice AU quarter. A popular Guide Book variety of the single-year Arrows and Rays subtype. A few faint hairlines are noted near Liberty's cap. Certified in a green label holder.
Ex: Palm Beach Signature (Heritage, 3/2006), lot 572, which realized $1,150. PCGS# 395931

4008 **1866 Motto VF20 PCGS.** A gunmetal-gray better date quarter with blushes of apple-green on the reverse field. LIBERTY is sharp and marks are minimal. A mere 16,800 pieces were issued, since unbacked fractional currency drove out silver coin. Encapsulated in a green label holder. NGC ID# 23UB, PCGS# 5468

4009 **1866-S VF30 NGC.** From the meager mintage of 28,000 pieces, the NGC Census records a total of only 23 coins. The present midgrade example is above average for the issue, since the typical 1866-S is a cleaned or corroded Fine. Toned silver-gray and chestnut-brown. All legends are bold. Encased in a prior generation holder. NGC ID# 23UC, PCGS# 5469

4010 **1867 XF40 PCGS.** A scarcer low-mintage date with an original production on only 20,000 coins. A boldly struck example with light natural coloration and minimal surface marks that are located mostly in the right obverse field. Population: 6 in 40, 38 finer (7/14). NGC ID# 23UD, PCGS# 5470

1867 Quarter, Well-Struck MS62
Difficult in Mint Condition

4011 **1867 MS62 NGC.** This scarce issue, from a low mintage of 20,000 pieces, is very difficult to locate in mint condition. Indeed, NGC and PCGS have certified only about 30 Uncirculated examples, mostly in the lower levels. Deep gray toning imbued with hints of tan cover the obverse and peripheral reverse, before ceding to a more silvery appearance in the reverse center. The design elements are well-struck, including Liberty's head, an area that is usually poorly defined. Census: 6 in 62, 3 finer (7/14). NGC ID# 23UD, PCGS# 5470

1875-CC Quarter, AU53
Scarcer Carson City Issue

4012 **1875-CC AU53 PCGS. Briggs 2-B.** The 1875-CC quarter is somewhat more elusive in high grades than its moderate mintage of 140,000 pieces would suggest, making the date seem mildly underrated to some numismatists. This About Uncirculated piece displays original golden-gray patina over each side, with hints of luster remaining in the recesses. Ample detail remains for the grade. Population: 1 in 53, 43 finer (7/14). NGC ID# 23UY, PCGS# 5499

1876-CC Quarter, MS64 ★ Prooflike
Finer of Two Certified as Prooflike

4013 **1876-CC MS64 ★ Prooflike NGC.** Type Two Reverse. Small CC. A stone-white and flashy near-Gem. Nicely struck and only delicately abraded. Narrow feet on the A in STATES confirm the reverse subtype. A prize for the advanced Carson City specialist. NGC has certified just two examples as Prooflike, the present coin and an MS61 (7/14). PCGS# 85502

1877 Seated Quarter, MS67
Modest Cameo Contrast

4014 **1877 MS67 NGC.** Dazzling cartwheel luster engulfs the seemingly perfect surfaces of this fully brilliant Superb Gem. Soft mint frost graces the devices, subtly contrasted with the moderately mirrored fields, giving this piece a level of eye appeal that is rarely encountered on the Seated Liberty type. Slight softness appears over a few of the design elements, though the sharpness is otherwise pleasing. Census: 36 in 67 (1 in 67+, 5 in 67 ★), 8 finer (7/14). NGC ID# 23V5, PCGS# 5504

4015 **1877-CC MS64 PCGS. Briggs 1-A.** The obverse is moderately rusted on this variety. A very late die state, with the repunched date numerals effaced by lapping and die wear. The 1877-CC is among the more plentiful Seated Liberty quarter issues from this mint, much to the delight of Carson City collectors. This near-Gem example displays well-struck devices and minimally abraded surfaces. A faint blush of light golden toning graces frosty luster on each side. NGC ID# 23V6, PCGS# 5505

1878 Seated Quarter, MS66
Tied for Finest Numerically at Both Services

4016 **1878 MS66 PCGS. Briggs 1-A.** This variety features a prominent die lump on Liberty's stomach. The 1878 Philadelphia issue is the toughest date in the decade (in Mint State) despite a mintage of 2.2 million coins. Gems are rare, and Premium Gems such as this seldom cross the auction block. Mostly brilliant centers yield to light golden-orange toning at the borders. Lustrous and sharply defined, all stars show full centers. Population: 10 in 66 (1 in 66+), 0 finer (7/14). NGC ID# 23V8, PCGS# 5508

4017 **1878-CC MS64 NGC. Briggs 2-B.** Dusky lavender-gray and light aquamarine toning encompasses each side, and the surfaces are free of major abrasions. The obverse figure is slightly soft on some of the high points, not uncommon for the issue, and the reverse border legends are weakly defined due to a heavily lapped die. Census: 51 in 64, 31 finer (7/14). NGC ID# 23V9, PCGS# 5509

4018 **1881 MS64 PCGS. CAC.** From a mintage of just 18,000 coins, this Choice representative features beautiful multicolor toning in pastel shades of blue, green, orange, and rose. Well-struck save for minor incompleteness on stars 4 through 8, this example is minimally marked and lustrous. NGC ID# 23VD, PCGS# 5513

4019 **1888 MS64 PCGS.** From a mintage of just 10,000 pieces, this near-Gem displays radiant, frosty luster shining through deep olive, gold, and russet toning on each side. The strike is sharp, and a thin, old, hardly detectable scratch in the left obverse field appears to be all that kept this coin from a full Gem grade. NGC ID# 23VL, PCGS# 5520

1889 Quarter, Smooth MS66
Only 12,000 Coins Minted

4020 **1889 MS66 NGC.** The Mint struck a meager quantity of Seated quarters in 1889 (12,000 coins), one in a string of low-mintage issues dating back to 1879. This Premium Gem offers bold definition over the stars, claws, and arrow fletchings, while Liberty's head shows a touch of softness. The smooth surfaces lack any color or mentionable flaws. Census: 45 in 66 (1 in 66+, 6 in 66 ★), 29 finer (7/14). NGC ID# 23VM, PCGS# 5522

4021 **1890 MS66 PCGS.** Vibrant luster sweeps this virtually stone-white high grade Seated quarter. The strike is bold except on the right-side stars. Just 80,000 pieces were struck, although Philadelphia dealers such as the Chapman brothers secured a number of Uncirculated examples. Certified in a green label holder. NGC ID# 23VP, PCGS# 5523

4022 **1891 MS64 Prooflike NGC.** A highly lustrous and well struck final-year Choice Seated quarter. Delicate golden patina equally adorns both sides. Census: 4 in 64 Prooflike, 1 finer as Prooflike (7/14). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

4023 **1859 PR63 NGC.** A moderately contrasted Select proof, this piece also displays sharp design definition and a blush of light golden toning over both sides. Close examination reveals wispy, grade-defining hairlines in the fields, but these are undetectable to the naked eye. From a mintage of only 800 coins. NGC ID# 23WL, PCGS# 5555

1860 Seated Quarter
Deeply Mirrored Gem Proof

4024 **1860 PR65 PCGS.** Although 1,000 proofs were struck, reportedly 458 pieces were melted as unsold for a net mintage of just 542 pieces. This example is a lovely Gem, with deep iridescence blanketing both sides of the coin. Midnight-blue toning surrounds dusky-rose centers, floating on deep-mirrored fields. The stars are poorly formed and lack their centers (typical of proofs for this issue). Population: 19 in 65 (1 in 65+), 6 finer (7/14). NGC ID# 23WM, PCGS# 5556

4025 **1863 PR64 NGC.** The obverse features primarily plum patination with ice-blue and cherry-red accents, while the reverse shows orange-toned interiors that turn outwardly to magenta and cobalt-blue. Razor-sharp, as expected, with only a few wispy marks in the fields that do not detract. From a mintage of 460 proofs. NGC ID# 23WR, PCGS# 5559

4026 **1864 PR63 PCGS.** Splashes of lavender and aquamarine toning encompass much of each side, while the remainder of the surfaces display a light golden hue. The strike is bold, with ample mirroring in the fields, but the rich patina precludes a Cameo designation from PCGS. This issue had a fairly low proof mintage of only 470 pieces. NGC ID# 23WS, PCGS# 5560

4027 **1864 PR62 Cameo PCGS.** A trace of light golden color accents otherwise brilliant, deeply mirrored fields on this well-struck proof, while the satiny devices provide just enough contrast to warrant the Cameo designation. From a mintage of just 470 proofs. Population: 2 in 62 Cameo, 32 finer (7/14). PCGS# 85560

1864 Quarter, PR65 Cameo
Lightly Patinated

4028 **1864 PR65 Cameo PCGS.** A low issuance of only 93,600 business strikes heightens demand for the 470 proofs struck in 1864. This Gem specimen offers stark field-device contrast with faint golden-orange and ice-blue toning toward the peripheries. Needle-sharp, as expected. Population: 9 in 65 Cameo, 3 finer (7/14). PCGS# 85560

1865 Quarter, PR65
Final-Year, No Motto Type

4029 **1865 PR65 NGC.** Only 500 proofs were struck in 1865, a paltry addition to the 58,800 strikes for circulation. Light rose toning is seen over each side with a rim of deeper blue at the margins. The mirrored fields still flash brightly, unimpeded by the presence of the toning. A small planchet flaw occurs in the right obverse field. Census: 19 in 65 (1 in 65+, 1 in 65 ★), 13 finer (7/14). NGC ID# 23WT, PCGS# 5561

1871 Quarter, Stunning PR65 Ultra Cameo
Extremely Rare in This Finish

4030 **1871 PR65 Ultra Cameo NGC.** The 1871 quarter dollar is not particularly difficult to locate in proof, of which 960 pieces were struck. Ultra Cameos are another story, however. NGC has graded only two as such, a PR63 Ultra Cameo and the present Gem Ultra Cameo (7/14). Stunning field-motif contrast shows on both sides, each of which is sharply struck. Wonderfully preserved throughout. PCGS# 95570

1875 Seated Quarter, PR65 ★ Cameo
Beautiful, Near-Pristine Specimen

4031 **1875 PR65 ★ Cameo NGC.** Type One Reverse. This is a stunning example that displays seemingly unsurpassable technical quality for the grade and memorable visual appeal. The utterly brilliant surfaces exhibit exquisitely frosted snow-white design motifs that are fully struck on both sides, and glassy fields that offer illimitable depths of watery reflectivity. Impressively preserved and contact-free, with a small number of wispy hairlines on the obverse that keep this beautiful Gem proof specimen from an even loftier grade assessment. Census: 3 in 65 ★ Cameo, 4 finer (7/14).
From The Pannonia Collection. PCGS# 85576

1880 Quarter, PR67
Beautifully Toned

4032 **1880 PR67 NGC.** Type One Reverse. Delicate shades of champagne-gold and cerulean-blue toning enhance the pristine surfaces of this delightful Superb Gem. The design elements are well-detailed and the fields are deeply mirrored, with outstanding visual appeal. From a generous proof mintage of 1,355 pieces. Census: 15 in 67 (3 in 67 ★), 5 finer (7/14). NGC ID# 23XC, PCGS# 5581

1880 Quarter, PR67 Cameo
Entirely Brilliant

4033 **1880 PR67 Cameo NGC.** Type One Reverse. From a mintage of 1,355 proofs, this Superb Gem Cameo displays essentially untoned surfaces that exhibit sharply struck, frosted design elements highlighted by deeply mirrored fields. The nearly pristine surfaces are virtually blemish free. Fantastic overall eye appeal. Census: 15 in 67 Cameo (2 in 67+ Cameo, 2 in 67 ★ Cameo), 6 finer (7/14).
From The Pannonia Collection. PCGS# 85581

4034 **1884 PR65 NGC.** The date boasts one of the lowest circulation strike mintages in the entire Seated Liberty series, heightening demand for the 875 proofs struck. This Gem features thickly frosted design elements and deep mirrors. Faint russet toning occurs around the obverse rim and over the lower-reverse. NGC ID# 23XG, PCGS# 5585

1884 Quarter, PR66
Only 875 Proofs Minted

4035 **1884 PR66 PCGS.** The obverse displays mostly rose and golden-orange coloration with areas of irregular toning in the fields. Sea-green and purple-blue dominate the reverse surfaces. Both sides show sharp definition and minimal marks, while a small planchet lamination occurs between Liberty's right (facing) foot and the rim. Population: 22 in 66, 8 finer (7/14). NGC ID# 23XG, PCGS# 5585

4036 **1886 PR65 NGC. Briggs 2-B.** Although the surfaces of both sides are covered by an attractive patina of gray, green, orange, and yellow, the fields remain reflective, creating lovely eye appeal. The coin displays a pleasing level of detail overall, with several of the stars revealing an incompleteness of strike. Census: 33 in 65, 35 finer (7/14). NGC ID# 23XJ, PCGS# 5587

4037 **1886 PR66 NGC.** Rose-gold fills the margins but the fields are powder-blue. Crisply struck and flashy with exemplary preservation. A low mintage date with only 886 proofs and 5,000 business strikes. Certified in a former generation holder. NGC ID# 23XJ, PCGS# 5587

4038 **1888 PR65 Cameo NGC. Briggs 2-B.** Traces of light golden toning are seen across the frosty, well-defined relief elements, while the fields exhibit ample mirroring for the Cameo designation from NGC. A few wispy hairlines in the fields preclude a finer grade, but are undetectable to the naked eye. Census: 14 in 65 Cameo, 17 finer (7/14). PCGS# 85589

BARBER QUARTERS

4039 **1896-O AU55 PCGS.** A pleasing example of this better New Orleans issue, this Choice 1896-O quarter retains substantial mint luster and virtually complete detail on each side. Light golden peripheral color encircles pale golden-gray patina over the central regions. Population: 12 in 55, 50 finer (7/14). NGC ID# 23Y8, PCGS# 5614

4040 **1900 MS65 PCGS Secure.** Type Two Obverse. Type Three Reverse. Thick mint frost covers the entirely brilliant surfaces of this Gem Barber quarter. Representative of the issue, the devices are well-struck with trivial softness on the eagle's talons and the arrow fletchings. Strong eye appeal. Population: 36 in 65, 17 finer (7/14). NGC ID# 23YK, PCGS# 5625

4041 **1901-S AG3 NGC. CAC.** The 1901-S Barber quarter represents one of the major rarities in 20th century U.S. numismatics because of its paltry mintage of 72,664 coins. This AG example presents an affordable opportunity for the budget-minded collector acquire this otherwise challenging date. Light gray patina covers each side, and the date and mintmark are bold. NGC ID# 23YR, PCGS# 5630

1901-S Quarter, Key-Date, Fine Details

4042 **1901-S — Mount Removed — NGC Details. Fine.** The light to medium-gray surfaces of this key-date representative display occasional hints of light gold-tan at the margins. The upper part of T and a full Y in LIBERTY show on the headband. Most of the letters in the motto on the reverse ribbon are clear. Several shallow scratches are visible on the obverse, and the mount was removed from the reverse shield.

4043 **1909-O AU50 PCGS.** The 1909-O quarter is a better date in high grades, with a mintage of only 712,000 pieces. This About Uncirculated example shows small tinges of olive toning in the recesses around the borders, with nearly complete detail and substantial remaining mint luster. Population: 3 in 50, 53 finer (7/14). NGC ID# 23ZJ, PCGS# 5655

4044 **1909-S MS65 PCGS.** An impressive, conditionally scarce Gem example from San Francisco. Only a few dozen pieces have been graded this high, from the original mintage of 1.3 million coins. Sharply struck and lustrous, with mostly green patina on the obverse and extensive reddish-brown toning on the reverse. Population: 24 in 65, 19 finer (7/14). NGC ID# 23ZK, PCGS# 5656

4045 **1910 MS65 PCGS.** This issue boats the third-lowest mintage among P-mint Barber quarters. Mottled jade-green and violet patina blankets the obverse, while yellow-orange, purple, and red color dominate the reverse. The strike is sharp with above-average detail over Liberty's forehead and the eagle's right (facing) talon. Population: 34 in 65 (1 in 65+), 21 finer (7/14). NGC ID# 23ZL, PCGS# 5657

4046 **1911-S MS66 NGC.** Concentric bands of green-gold, ocean-blue, and deep violet toning surround dusky central hues of amber-gold on the obverse, while the reverse displays a rich blend of sea-green and olive-gold colors. The strike is well-executed, even on the problematic right (facing) shoulder of the eagle, and radiant underlying mint luster delivers just the right amount of luminance to the clean surfaces. Census: 80 in 66 (3 in 66+), 9 finer (7/14). NGC ID# 23ZR, PCGS# 5661

PROOF BARBER QUARTERS

4047 **1893 PR66 Cameo PCGS.** From a proof mintage of 792 pieces, this beautifully toned Cameo exhibits lavender-gold, violet, and sea-green hues across deeply mirrored fields, while the devices are boldly impressed and the surfaces are free of any mentionable marks. Population: 14 in 66 (1 in 66+) Cameo, 18 finer (7/14). PCGS# 85679

1894 Barber Quarter, PR67
Dramatic Multicolor Toning

4048 **1894 PR67 NGC.** This spectacular Superb Gem is toned in shades of emerald-green, violet-blue, and gray, with deeply mirrored fields shining through the toning. The design elements are sharply detailed throughout. A somewhat generous mintage of 972 proof Barber quarters was accomplished in 1894, making this early date a popular one for type purposes. Census: 26 in 67 (2 in 67 ★), 5 finer (7/14). NGC ID# 2429, PCGS# 5680

1894 Quarter, PR66 Cameo
Frosty and Brilliant

4049 **1894 PR66 Cameo NGC.** Blazing cameo contrast characterizes this Premium Gem proof. The Mint struck 972 Barber quarter specimens in 1894 — the second-highest proof mintage in the series — making this an appropriate type representative. A few wispy marks in the right obverse field limit the grade. Census: 14 in 66 Cameo (1 in 66+ Cameo), 16 finer (7/14). PCGS# 85680

1894 Quarter, PR66 Cameo
Appealing Early-Issue Contrasted Proof

4050 **1894 PR66 Cameo NGC. CAC.** Splashes of cobalt-blue and lavender concentrate at the obverse borders of this Premium Gem Cameo, while whispers of light golden-tan make occasional visits to the reverse. An attentive strike sharpens the design elements, except for localized softness on the shield. Some faint hairlines mix with die polish lines on Liberty's cheek and neck. Census: 14 in 66 Cameo (1 in 66+ Cameo), 16 finer (7/14). PCGS# 85680

4051 **1895 PR64 PCGS. CAC.** The design elements of this attractive Choice example are sharply detailed except for some softness on star 3. The deeply mirrored surfaces are enhanced by shades of greenish-gold and silver-gray toning. Population: 55 in 64, 66 finer (7/14). NGC ID# 242A, PCGS# 5681

4052 **1896 PR64+ PCGS. CAC.** From a mintage of 762 proofs, this high-end near-Gem showcases full sharpness of the motifs and deep mirroring in the fields. The obverse is awash in eye appeal with peripheral blue and violet rings encircling vivid lemon-gold margins and a soft champagne center; the reverse is more traditionally toned in uneven shades of aquamarine, amber, and milky-tan patina. An incredible coin, with just a few wispy hairlines precluding full Gem status. NGC ID# 242B, PCGS# 5682

4053 **1904 PR66+ NGC.** A pleasingly toned specimen with variegated iridescent hues of lilac, lavender, rust-gold and sea-green noted over clean, mark-free surfaces. Fully struck with highly reflective fields and gorgeous eye appeal. Census: 37 in 66 (1 in 66+, 1 in 66 ★), 39 finer (7/14). NGC ID# 242K, PCGS# 5690

4054 **1904 PR64 Cameo PCGS.** Ex: Teich Family Collection. Medium autumn-gold toning embraces this fully struck and exemplary proof quarter. The motifs are nonetheless luminous. One tiny spot is noted above the arrowheads. Population: 4 in 64 Cameo, 12 finer (7/14).
Ex: T.K. Harvin Collection (Stack's, 6/1959), lot 872. PCGS# 85690

1906 Barber Quarter, PR66+
Only 675 Coins Struck

4055 **1906 PR66+ PCGS. CAC.** This Premium Gem example is one of 675 Barber quarter proofs struck in 1906. When examined at the proper angle, the obverse offers intermingled shades of ice-blue and sea-green color, while the reverse shows primarily lilac-rose and cobalt-blue toning. Population: 38 in 66 (2 in 66+), 23 finer (7/14). NGC ID# 242M, PCGS# 5692

4056 **1911 PR64 PCGS.** The sharp, satiny devices of this Choice proof are void of marks, and the deeply mirrored fields exhibit only a few grade-consistent hairlines when studied with a lens. Pale champagne and ice-blue hues deliver attractive pastel patina. NGC ID# 242T, PCGS# 5697

4057 **1913 PR64 Cameo PCGS. CAC.** The well-struck surfaces reveal light champagne color overall, with areas of orange and teal also present, primarily on the obverse. From a mintage of just 613 proofs. Population: 9 in 64 Cameo, 22 finer (7/14). PCGS# 85699

4058 **1915 PR65 PCGS.** Beautifully blended turquoise and sea-green hues engulf each side of this Gem proof. The devices are intricately detailed and satiny, but the rich patina reduces the field-motif contrast. A highly pleasing, deeply mirrored representative. Population: 16 in 65, 26 finer (7/14). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

4059 **1917 Type One MS66 Full Head PCGS. CAC.** A lustrous Premium Gem with a variegated display of green, lavender-gold, and champagne coloration on both sides. Boldly struck with impressively sharp definition on Liberty's head and torso. Population: 438 in 66 (16 in 66+) Full Head, 74 finer (7/14). NGC ID# 242Z, PCGS# 5707

4060 **1917-D Type One MS66 Full Head PCGS.** This issue was saved in substantial quantities as a first-year type. This carefully preserved Premium Gem features an even sharper strike than is typically seen, with Full Head detail, complete rivets, and bold definition over the eagle's breast and wing feathers. All-brilliant with just a hint of marginal russet toning around the reverse. PCGS has certified only 22 numerically finer submissions (7/14). NGC ID# 2432, PCGS# 5709

1917-D Type One Quarter, MS66 Full Head
Elusive Any Finer

4061 **1917-D Type One MS66 Full Head PCGS. CAC.** The 1917-D Type One quarter is readily available through Gem, even with Full Head details. The population declines in Premium Gem and becomes very elusive any finer. The lustrous surfaces of this offering exhibit well-struck design elements and are nicely preserved. PCGS has seen only 22 specimens finer (7/14). NGC ID# 2432, PCGS# 5709

1918-S Quarter, MS66
Only One Numerically Finer at PCGS

4062 **1918-S MS66 PCGS.** This radiant Premium Gem boasts satiny, light golden luster overall, with deeper lemon and olive hues around the obverse peripheries. Liberty's head is characteristically weak, as are shield rivets 3 and 4, and the eagle's breast, but the chain mail, stars, and date numerals are unusually bold. The surfaces are virtually free of even minor flaws and deliver generous eye appeal. Population: 16 in 66, 1 finer (7/14). NGC ID# 2439, PCGS# 5724

4063 **1918-S MS63 Full Head PCGS.** This well-detailed Select example exhibits Full Head definition, but shows just a touch of softness on the shield rivets and eagle's feathers. The lustrous surfaces are lightly marked and richly toned in shades of champagne-gold, ice-blue, and dove-gray. NGC ID# 2439, PCGS# 5725

4064 **1920-S MS64 PCGS.** Light golden-brown toning blankets this lustrous and boldly struck Standing Liberty quarter. The head details are strong but just shy of full. Evidence of clash marks and lapping appear over Liberty's lower leg. NGC ID# 243G, PCGS# 5738

4065 **1921 MS64 NGC.** A lustrous, minimally abraded example of this elusive key-date issue, this near-Gem 1921 quarter exhibits above-average design definition, with notable sharpness on the vertical and horizontal shield lines and the eagle's feathers. The date is clear, and Liberty's head is partially brought up. Speckled light golden toning blankets the reverse, leaving the obverse essentially brilliant. NGC ID# 243H, PCGS# 5740

4066 **1924 MS65 Full Head PCGS.** This satiny Gem is boldly struck throughout, with impressive definition on the shield rivets, stars, eagle's feathers, and Liberty's head, while a lack of major abrasions and a clear date further increases the eye appeal. Yellow-gold hues and faint russet speckles are spread across each side. NGC ID# 243L, PCGS# 5747

4067 **1924 MS65 Full Head PCGS.** A faint tint of light golden toning complements razor-sharp details throughout, with notable definition seen on the shield rivets, the date, and the stars. The luster appears somewhat granular upon close examination, the result of a severely rusted die. This is characteristic of many 1924 quarters, and does affect overall visual appeal. NGC ID# 243L, PCGS# 5747

1924-S Quarter, MS64 Full Head Bold Date

4068 **1924-S MS64 Full Head PCGS.** The 1924 San Francisco issue is typically weak and scarcely seen with Full Head detail. This above-average Choice representative features a bold date and strong definition over Liberty's head. The shield, rivets, and eagle's wing feathers are expectedly soft. Softly frosted luster occurs over mostly brilliant surfaces that show occasional hints of violet and russet color at the margins. NGC ID# 243N, PCGS# 5751

4069 **1930 MS66 Full Head PCGS. CAC.** A veil of golden patina paints each side, frequently seen on coins from this issue. The strike is typically sharp with Full Head and shield definition with all rivets present. Overall, this is an immensely attractive Premium Gem representative. NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

4070 **1932 MS66+ PCGS.** An exceptional Premium Gem, this first-year Washington quarter exhibits both bold design elements and seemingly perfect surface preservation. Each side displays vibrant, frosty luster beneath beautifully iridescent pastel hues of blue, gold, and silvery-rose. PCGS has only certified three finer examples (7/14). NGC ID# 2447, PCGS# 5790

1932 Quarter, MS66+ Only Three Finer at PCGS

4071 **1932 MS66+ PCGS. CAC.** This incredibly sharp, highly lustrous example displays splashes of green-gold, lemon, and amber-orange color over much of the obverse and to a lesser extent around the reverse periphery. This is one of only 16 MS66 coins to receive a Plus designation from PCGS, where only three have been deemed numerically finer (7/14), making it an ideal candidate for either the Registry Set specialist or type collector. NGC ID# 2447, PCGS# 5790

4072 **1932-D MS62 PCGS.** A marvelous Mint State example of the key first-year Denver Mint Washington quarter, this piece is nearly brilliant, with light silver luster and splashes of heather toning on the obverse. The strike is especially strong, with special notice given to Washington's hair and the eagle's breast. NGC ID# 2448, PCGS# 5791

4073 **1932-D MS63 PCGS.** The issue's San Francisco counterpart is generally recognized as the key date in the Washington quarter series. In high grades, however, this Denver date is significantly scarcer. Each side is lightly toned and well-struck with minimal marks for the grade. NGC ID# 2448, PCGS# 5791

4074 **1932-D MS64 PCGS.** This first-year D-mint quarter is one of the most elusive dates in the Washington series, especially in mint condition. Fully brilliant and sharply defined, the surfaces exhibit satin luster and surprisingly few marks for the grade. NGC ID# 2448, PCGS# 5791

1932-S Washington Quarter, MS65 Rare Any Finer

4075 **1932-S MS65 NGC.** Frosty golden-gray luster complements bold design definition on each side of this Gem example, while small orange-gold, lilac, and amber accents are seen periodically around the obverse periphery. This issue boasts the lowest business strike mintage of the series (408,000 coins), and has long been considered a key date. Census: 66 in 65 (1 in 65 ★), 5 finer (7/14). NGC ID# 2449, PCGS# 5792

4076 **1934 Medium Motto, FS-402, MS66 PCGS.** Mottled russet, olive, and deep red toning joins pale golden patina on each side, with the colors somewhat concentrated around the borders. The strike is solid and the preservation is equally appealing. PCGS# 146002

4077 **1934 Medium Motto, FS-402, MS67+ PCGS. CAC.** Beautiful rainbow colors of lilac-red, sun-gold, and apple-green endow the borders of this crisply struck and lustrous Superb Gem. Marks are absent save for light contact on the eagle's breast. PCGS# 146002

1935 Washington Quarter, MS67+
Just One Coin Finer at Both Services

4078 **1935 MS67+ PCGS. CAC.** Splendid sea-green, apricot, and rose toning embrace the surfaces of this beautiful Superb Gem. Vibrant luster radiates over each side, and the devices show crisp definition throughout. This high-end Washington quarter is ideal for Registry Set enthusiasts, as only one coin is certified finer by PCGS and NGC combined (7/14). NGC ID# 244D, PCGS# 5797

4079 **1935-S MS67 PCGS. CAC.** None numerically finer at both services. The mostly brilliant surfaces feature faint pastel toning toward the obverse margin. Hues include lime-green, orange, and lavender. This is a well-struck Superb Gem without any mentionable imperfections. Population: 29 in 67, 0 finer (7/14). NGC ID# 244F, PCGS# 5799

4080 **1936-D MS66 PCGS.** The 1936-D is a semikey date in the Washington quarter series that becomes exceedingly scarce in upper-Mint State grades. The satiny surface are unencumbered by toning or any impairments visible to the naked eye. PCGS has certified only 14 coins numerically finer (8/14). NGC ID# 244H, PCGS# 5801

4081 **1937-D MS67 NGC.** An essentially flawless Superb Gem that boasts scintillating luster and a bold strike. Certified in a former generation holder. Close to brilliant, although the obverse displays traces of lime patina. Census: 20 in 67 (2 in 67 ★), 0 finer (7/14). NGC ID# 244L, PCGS# 5804

4082 **1937-D MS67 PCGS. CAC.** Rich frosty luster and virtually untoned surfaces provide this beautifully preserved Superb Gem with exceptional visual appeal. An important offering for the Registry collector, as no coins have been graded numerically finer at PCGS or NGC (8/14). NGC ID# 244L, PCGS# 5804

4083 **1939 MS67+ PCGS. CAC.** A great Superb Gem example of this early Washington quarter date; well-struck and impressively preserved. Lovely hues of red-orange, sky-blue, gold, and charcoal decorate the obverse border in a rainbow-like display. Population: (11 in 67+), 5 finer (7/14). NGC ID# 244R, PCGS# 5808

4084 **1940-D MS67 PCGS. CAC.** This sharply struck Superb Gem is tied numerically with the example in the highest-rated Registry Set. Pale lavender and champagne hues blend over the frosty, virtually undisturbed surfaces, delivering exceptional visual appeal. None have graded numerically finer at PCGS (7/14). NGC ID# 244V, PCGS# 5812

4085 **1941-S MS67 PCGS. CAC.** Splashes of green, yellow, orange, blue, and red color the otherwise brilliant obverse surfaces. The reverse is entirely free of any toning. This Premium Gem S-mint quarter is expectantly clean for the grade and pleasingly detailed. Population: 53 in 67 (2 in 67+), 0 finer (7/14). NGC ID# 244Z, PCGS# 5816

4086 **1942 MS67 PCGS.** A spectacular Superb Gem with sharply detailed design elements and impeccably preserved surfaces, this coin displays shades of greenish-gold and lavender-gray toning over vibrant mint luster. Population: 38 in 67 (7 in 67+), 0 finer (7/14). NGC ID# 2452, PCGS# 5817

4087 **1942-S MS67 PCGS. CAC.** Trumpet tail S. Magnificent apple-green and ruby-red shades endow this lustrous, immaculate, and well struck Superb Gem. Although a few are graded finer, the present piece undoubtedly offers equivalent eye appeal. Population: 49 in 67 (6 in 67+), 1 finer (7/14). NGC ID# 2454, PCGS# 5819

1943-D Quarter, Dazzling MS67+

4088 **1943-D MS67+ PCGS. CAC.** Pastel shades of blue, green, purple, rose, and orange faintly cover each side, imbuing this carefully preserved Superb Gem with CAC-recognized eye appeal. The surfaces exhibit vivid mint luster that percolates through the toning, and a loupe fails to reveal any mentionable flaws. Population: 56 in 67 (4 in 67+), 1 finer (7/14). NGC ID# 2456, PCGS# 5821

4089 **1949-D MS67+ PCGS. CAC.** This 1949-D Washington quarter is surpassed by only two coins in MS68 at PCGS, and tied with a small handful in MS67+. Cartwheel luster enlivens each side, but the rich patina in hues of jade, gold, and cherry is the hallmark of this pristine price. Population: 6 in 67+, 2 finer (7/14). NGC ID# 245R, PCGS# 5840

1950-S/D Quarter, MS66
A Highly Popular Issue

4090 **1950-S/D FS-601 MS66 PCGS. CAC.** The underlying D mintmark is visible beneath the primary S. The brilliant surfaces of this Premium Gem display pleasing frosty luster, and the design elements are well-struck. A few minute marks are consistent with the grade designation. Highly popular among Washington quarter collectors. Population: 34 in 66 (1 in 66+), 5 finer (7/14). PCGS# 145638

4091 **1951-D MS67 PCGS. CAC.** Rich, satiny luster adds to the attractiveness of this lovely Superb Gem example. The coin displays a light champagne patina with tiny flyspecks of gray and ice-blue on each side. Thin die cracks are found near the top of Washington's head and across the eagle's face. Population: 31 in 67 (1 in 67+), 1 finer (7/14). NGC ID# 245X, PCGS# 5847

4092 **1951-S MS67+ PCGS. CAC.** Mottled sea-green and coppery-red iridescence adorns both sides of this well-struck, carefully preserved example. The Registry Set collector may be interested in this high-end coin, since just one piece is rated even higher by PCGS. Population: 17 in 67+, 1 finer (7/14). NGC ID# 245Y, PCGS# 5848

1953-S Washington Quarter, MS67+
Tied for Finest at PCGS

4093 **1953-S MS67+ PCGS. CAC.** The 1953-S issue is plentiful in all grades up to and including Premium Gem. Superb Gems are scarce, and PCGS has awarded only three Plus-designations to the 82 MS67 examples it has certified (7/14). This lightly toned representative exhibits needle-sharp definition over the central devices and unimpaired surfaces. The eye appeal is strong. NGC ID# 2466, PCGS# 5854

4094 **1954 MS67+ PCGS. CAC.** A near-pristine example with pleasing satin luster and variegated iridescent patina noted over both sides. Well struck and free of noticeable surface flaws. One of the two finest-graded examples from PCGS, and a certain target of the serious Registry Set collector. Population: 2 in 67+, 0 finer (7/14). NGC ID# 2467, PCGS# 5855

4095 **1957 MS68 NGC.** Green-gold at the margins with blue-violet centers, the colors of the obverse are a trifle deeper than those seen over the reverse. Vibrant luster and carefully preserved surfaces under the toning make this amazing MS68 example an important Registry opportunity. Census: 3 in 68, 0 finer (7/14). NGC ID# 246D, PCGS# 5862

4096 **1958-D MS67+ PCGS. CAC.** Bright-green and crimson colors are blended across the obverse, while the reverse shows a slender band of similar hues only near the upper peripheries. A well-preserved Washington quarter with satiny, mark-free surfaces. Population: 10 in 67+, 0 finer (7/14). NGC ID# 246G, PCGS# 5865

4097 **1964 MS67 PCGS Secure.** Deep cherry-red, forest-green, orange, and lemon-gold hues engulf each side of this sharp Superb Gem, with the colors somewhat more intense on the reverse. None have been certified numerically finer (7/14). NGC ID# 246U, PCGS# 5876

SMS WASHINGTON QUARTER

4098 **1966 SMS MS68 Cameo PCGS.** Special Mint Sets replaced proof sets from 1965 to 1967. The coins were struck once on unpolished planchets and were allowed to come into contact with other pieces. Fortunately, this amazing example lacks any signs of such contact. Each side features distinct cameo contrast and satiny luster. Population: 8 in 68 Cameo, 0 finer (8/14). PCGS# 85998

PROOF WASHINGTON QUARTERS

4099 **1936 PR66 PCGS. CAC.** Though not prohibitively scarce in this grade, the proof 1936 Washington quarter is genuinely rare numerically finer, with only eight such pieces certified by PCGS (7/14). This example is well-struck with highly reflective fields. Light golden toning graces each side, with a thin crescent of greenish-gold color around the upper reverse periphery. NGC ID# 27HN, PCGS# 5975

1942 Washington Quarter, PR67+
Strong Eye Appeal

4100 **1942 PR67+ PCGS. CAC.** Golden-orange color surrounds each side. The obverse shows dusky blue-green and lavender interior toning, while the reverse displays splashes of yellow and olive-green patina. As expected, this Superb Gem proof exhibits a razor-sharp strike, and the eye appeal is strong. From a mintage of 21,123 coins, PCGS has certified only 6 submissions finer (7/14). NGC ID# 27HV, PCGS# 5981

4101 **1950 PR67 Cameo PCGS.** Ex: The Elite Cameo Collection. A well-contrasted Superb Gem proof from this first year of the modern proof era. Snow-white devices complement coal-black, reflective fields. Population: 19 in 67 (1 in 67+) Cameo, 4 finer (8/14). NGC ID# 27HW, PCGS# 85982

4102 **1958 PR68 Deep Cameo PCGS.** An available date in an absolute sense, the proof 1958 Washington quarter is quite the opposite with Deep Cameo contrast, especially at the lofty PR68 grade level. This essentially perfect white-on-black representative is numerically equal to the piece in the current highest-rated proof Registry Set. Population: 24 in 68 Deep Cameo, 5 finer (8/14). NGC ID# 27J4, PCGS# 95990

4103 **1960 PR69 Deep Cameo PCGS.** This is a remarkably contrasted and essentially flawless representative. Devoid of any toning, each side displays fully struck and thickly frosted devices, and the fields are highly reflective. Population: 36 in 69 Deep Cameo, 0 finer (8/14). NGC ID# 2492, PCGS# 95992

EARLY HALF DOLLARS

4104 **1795 2 Leaves, O-105a, R.4 — Plugged — NGC Details. VF.** The plug, above Liberty's head, is well-executed and is virtually undetectable without magnification. Dusky lavender-gray patina blankets much of each side, with the high points of the eagle exhibiting a lighter, battleship-gray color. The borders are strong and the central detail is excellent for the VF grade level. PCGS# 39221

1803 Draped Bust Half, AU53
O-104, Small 3, Large Reverse Stars

4105 **1803 Small 3, Large Reverse Stars, O-104, R.3, AU53 ANACS.** This is the second most challenging variety of the year after O-102, though the 188,234 half dollars minted in 1803 makes it one of the more available dates in the early half dollar series overall. The surfaces show only the slightest high-point friction, while the upper-shield lines are just a touch incomplete. All other design elements show strong detail. Splashes of golden-orange toning color the obverse, and appear over the otherwise steel-gray reverse when tilted at an angle. PCGS# 39274

1806 O-109a Half Dollar, AU53
Only Pointed 6, No Stem Variety

4106 **1806 Pointed 6, No Stem AU53 NGC. O-109a, R.4.** Though the O-109 is among the more abundant 1806 half dollar die pairs, its status as the only Pointed 6, No Stem variety makes it a focus coin for *Guide Book* collectors. This AU53 example is of the later O-109a state with die crack from star 12 to throat, making it more appealing to specialists. Tan, violet, and medium-gray surfaces retain considerable luster despite wear on the high points. PCGS# 39310

4107 **1806 Pointed 6, Stem, O-114a, R.4, VF25 PCGS.** The heavy bisecting crack on the reverse between 4 and 10 o'clock confirms the later Overton die state. A charming representative with sea-green and wheat-gold toning. No marks detract and the curls and wing plumage show ample detail. PCGS# 39316

4108 **1806 Pointed 6, Stem, O-114a, R.4, VF25 PCGS. CAC.** This scarce Overton variety is identified by a broadly recut TY in LIBERTY, and the late die state of O-114a is confirmed by a heavy die crack from the left milling through the eagle's left wing, scroll, neck, and right wing, through the E in AMERICA to the right edge. Thick, brown patina covers the fields, with the motifs several shades lighter for two-toned appeal. Strong detail for the grade remains on the motifs. PCGS# 39316

4109 **1807 Draped Bust, O-102, R.2 — Streak Removed — PCGS Genuine. AU Details.** A hint of straw-gold toning visits this partially lustrous and well defined Draped Bust type coin. Traces of struck-in grease are noted above the hair ribbon, but despite the PCGS notation, no impairment is readily evident. A later die state with bold clash marks on both sides. PCGS# 39339

BUST HALF DOLLARS

4110 **1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF45 PCGS.** The upper curve of the underlying 2 is plainly visible to the left of the primary 5 in the denomination. This piece is in an intermediate die state, with noticeable flow lines around the borders, but without the later cud that forms near the U in UNITED. Tints of blue accent deep gunmetal-gray patina in the fields, while some of the high points of the relief elements exhibit lighter shades of color. This is a highly appealing, lightly circulated example of this popular *Guide Book* variety. Population: 4 in 45, 12 finer (7/14). PCGS# 39356

4111 **1811 Large 8, O-104a, R.1, AU53 PCGS. CAC.** An extensive, circular die crack surrounds the major devices of the obverse, with several other significant obverse cracks as well, making this one of the more interesting late die state varieties in the entire series. Warm, gunmetal-gray patina has golden overtones, with soft luster shining through. Sharp details remain despite seven points of wear. PCGS# 39426

4112 **1813 O-105, R.1, AU58 PCGS.** Lightly toned cream-gray and almond-gold. Lustrous and nearly unabraded with only a trace of wear on the motifs. Clashed at least seven times, judging by the line count beneath the scroll. PCGS# 39463

4113 **1814 O-104a, R.2, AU58 PCGS.** Smooth, unmarked surfaces show subtle iridescence where luster shines through an overall skin of old silver-gray patina, which darkens at the margins. The motifs are sharply struck and pleasing for the near-Mint grade. A late state of the dies, with numerous die cracks on both obverse and reverse. The variety is much scarcer in an earlier state of the dies, although perhaps more interesting in this late die state. PCGS# 39479

4114 **1820/19 Curl Base 2, O-102, R.1, AU53 NGC.** The underlying 19 is plainly visible within the primary 20 in the date. This particular example displays soft, concentric rainbow hues on each side beneath a thin veil of golden-gray toning. Ample luster remains, and the design elements retain substantial detail. PCGS# 39574

4115 **1821 O-103, R.2, MS61 NGC.** The die state is intermediate between O-103 and O-103a. An ascending crack passes through the 21 in the date to the curl but does not continue to the cap. Golden-brown and aquamarine margins encompass cream-gray centers. Lustrous and minimally marked. PCGS# 39578

4116 **1823 O-112, R.1, MS63 PCGS.** Apple-green and lime-gold color drapes this lustrous and unabraded Bust half. Each side has a few minute dark freckles. Sharply struck save for about half of the right-side stars. Liberty's profile is strike doubled.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 955. PCGS# 39618

1823 Half Dollar, O-112, MS64

4117 **1823 O-112, R.1, MS64 NGC.** Light honey patina adorns this thoroughly lustrous and beautifully preserved near-Gem. The strike is crisp except on the right-side stars and left (facing) claw. A trivial, narrow lamination is noted near the 3 in the date. Struck from clashed dies. Among the finest known for the O-112 marriage. PCGS# 39618

4118 **1824 O-105, R.2, MS63 NGC.** Autumn-brown, rose-red, and aquamarine toning endow smooth, satiny surfaces. The right-side stars are soft but much of the coin is well struck. Dr. Peterson's collectible "Lines under left claws" variety. PCGS# 39625

4119 **1824 O-112a, R.4, MS61 NGC.** An early stage of this late die state variety, with the circular crack from the rim between star 13 and the date advanced only half way across the obverse. Shades of gold and lavender-gray toning encompass each side, while the design elements are sharply defined. The surfaces are unusually clean for the grade. PCGS# 39633

4120 **1826 O-110, R.2, AU58 PCGS. CAC.** The 8 in the date is recut inside its upper-left loop. This near-Mint piece displays nearly complete detail, with smooth surfaces and bold design definition. Deep toning in shades of auburn-brown, forest-green, and golden-orange blankets each side. A perfect coin the collector who appreciates old-time patina. Population: 3 in 58, 1 finer (7/14). PCGS# 39679

4121 **1828 Square Base 2, Small 8s, Large Letters, O-110, R.2, AU58 PCGS.** Dusky sea-green and autumn-brown toning encompasses this briefly circulated half dollar. Smooth except for a few wispy field marks near the profile. Luster dominates the reverse as well as the curls and obverse margin. PCGS# 39764

4122 **1832 Small Letters, O-103, R.1, MS63 NGC. CAC.** Ex: "Col." E.H.R. Green, Eric P. Newman. Cobalt-blue rims cede to russet-brown borders and cream-gray interiors. The reverse toning is deeper than the obverse. Marks are minor for the designated grade. A small toning spot is noted beneath star 12. PCGS# 39860

1832 Half Dollar, MS64
O-106, Beautiful Patina

4123 **1832 Small Letters, O-106, R.1, MS64 PCGS.** A B-shaped defect appears on the lowest point of the shield margin, and star 1 is strongly recut. Beautiful golden-gray patina blankets surfaces that show glimpses of purple-blue and apricot toning, with radiant luster throughout. This near-Gem exhibits sharply struck design elements, and only a tiny tick on Liberty's neck merits mention. In all Small Letters varieties, PCGS has seen just 14 examples in higher numeric grades (7/14). PCGS# 39864

REEDED EDGE HALF DOLLARS

4124 **1837 MS62 NGC. GR-23, R.2.** Clash marks beneath the chin and a radial die crack to star 10 identify the Graham variety. Rich cream-gray toning blankets this satiny and unmarked half dollar. The strike is bold at the centers but shows occasional peripheral incompleteness. NGC ID# 24G4, PCGS# 6176

4125 **1839-O XF40 PCGS. GR-4, R.4.** A pearl-gray and almond-gold example with minimal marks and hints of luster through the legends. According to Dick Graham, GR-1 constitutes approximately 95% of all 1839-O halves. GR-4 is comparatively rare. The mintmark is repunched southeast, the left obverse stars exhibit heavy cracks, and the coin has medal turn. NGC ID# 24G7, PCGS# 6181

4126 **1839-O — Reverse Scratched — NGC Details. AU. GR-1, R.1.** Deep ebony and mauve patina envelops this richly detailed New Orleans type coin. Intermittent abrasions near the first S in STATES and on the eagle's left (facing) wing correspond to the NGC notation. A thin mark near star 8 is also noted. NGC ID# 24G7, PCGS# 6181

SEATED HALF DOLLARS

4127 **1842-O Small Date, Small Letters VG8 PCGS. WB-101, Die Pair 2, R.5.** This is a rare die variety, with the Small Date obverse paired with the Small Letters reverse of 1839. The coin is well-worn, as the grade suggests, but retains substantial detail in the eagle's feathers, and the borders are strong. Original battleship-gray patina graces each side, growing darker toward the peripheral recesses. Population: 2 in 8, 58 finer (7/14). NGC ID# 24GV, PCGS# 6238

1846 Half Dollar, Near-Mint
6 Over Horizontal 6, FS-301

4128 **1846 6 Over Horizontal 6, WB-104, FS-301, AU58 NGC.** Light to medium chestnut-tan and sea-green toning. This near-Mint half dollar is well struck and displays only trivial contact. Two rim cuds beneath the date are as made. The "lazy" 6 is readily observed to the south and west of the 6. A famous and distinctive *Guide Book* variety. PCGS# 409888

4129 **1848-O AU58 PCGS. CAC. WB-101, Die Pair 8, R.3.** From the personal collection of Dick Osburn. Luminous and original, with rich patina that displays blue-green, coffee, and rose tones. Just a touch of rub visits this lightly abraded, scarce New Orleans coin. A late die state with numerous reverse die cracks. Population: 13 in 58, 22 finer (7/14). NGC ID# 24HD, PCGS# 6261

4130 **1851 XF45 PCGS. WB-101, R.6.** This is a scarce-to-rare issue in the Seated half dollar series, depending upon die variety and preservation level. This Choice XF example has a pleasingly smooth and original appearance, with few surface marks and none that are individually distracting. Minor bounce doubling is noted on 85 in the date. NGC ID# 24HJ, PCGS# 6266

4131 **1853 Arrows and Rays AU58 PCGS. CAC. WB-101.** Arrows at the date were added to the design of this denomination in order to signify a slight decrease in the coins' weight. The addition of Rays around the eagle, removed in 1854, make this a unique one-year type. A solidly struck example with attractive light coloration and faint high-point rub that keeps it from a Mint State holder. NGC ID# 24JJ, PCGS# 6275

4132 **1853 Arrows and Rays MS62 NGC. WB-101.** Light golden-gray toning graces softly frosted luster on each side of this pleasing Arrows and Rays type coin. The strike is well-executed and major abrasions are minimal. A small, jagged strike-through is noted on Liberty's right (facing) elbow, and pronounced clash marks are seen on each side. NGC ID# 24JJ, PCGS# 6275

1853 Arrows and Rays Half Dollar
A Very Pleasing MS63
Popular One-Year Design Type

4133 **1853 Arrows and Rays MS63 PCGS. CAC. WB-101.** Lustrous silver-gray surfaces of this Select half dollar exhibit well-struck design elements. This is a minimally abraded example for the designated grade. Great overall eye appeal, appropriately recognized by CAC. Very popular as a one-year design type. NGC ID# 24JJ, PCGS# 6275

1853 Arrows and Rays Half Dollar, MS64
Pleasing Eye Appeal

4134 **1853 Arrows and Rays MS64 NGC.** Near Gem is the highest grade most collectors are likely to encounter of this popular type coin. Indeed, NGC and PCGS have graded only 52 specimens finer (7/14). Lustrous surfaces display soft mauve patination and all design elements are well-struck. A few minute marks preclude Gem classification. Very pleasing eye appeal. NGC ID# 24JJ, PCGS# 6275

1857 Half Dollar, Conditionally Rare MS65

4135 **1857 MS65 NGC.** The 1857 half dollar, from a mintage approaching 2 million pieces, is a common date except in the better Mint State grades where it is rare. Electric-blue and russet toning gravitates to the margins of this Gem, framing the untoned centers, and the design elements are sharply struck. A few minute marks are consistent with the grade. Census: 11 in 65, 2 finer (7/14). NGC ID# 24HS, PCGS# 6290

4136 **1861-O MS64 PCGS. WB-101, Die Pair 1, R.5.** The present near-Gem was struck by the New Orleans Mint while under Federal authority. The lustrous and unmarked surfaces are primarily silver-white although gunmetal and tan freckles congregate in protected areas. NGC ID# 24J8, PCGS# 6303

4137 **1861-O WB-103/104, Bisected Date, Speared Olive Bud VF35 PCGS. CAC. Die Pair 14, R.4.** A distinctive variety struck by the New Orleans Mint while it was operated by the Confederate States of America. WB-103 is the "Bisected Date" with a vertical crack through the left border of the 6. The "Speared Olive Bud" WB-104 exhibits a pair of parallel die lines through the upper olive bud. A moderately circulated but problem-free gunmetal-gray example. PCGS# 516984

4138 **1863-S MS62 NGC. WB-102, Die Pair 4, R.3.** Due to a defective punch, the upper curve of the mintmark is absent. Sea-green, lilac, and copper-gold colors swirl about the refreshingly unabraded fields, although the Seated Liberty has a few small contact marks. Struck from clashed and slightly rotated dies.
Ex: Long Beach Signature (Heritage, 6/2002), lot 7244; Baltimore Signature (Heritage, 7/2003), lot 7608; Dallas Signature (Heritage, 10/2006), lot 1180. NGC ID# 24JC, PCGS# 6310

4139 **1865-S AU58 PCGS. WB-102, Die Pair 2, R.3.** From the personal collection of Dick Osburn. Small thin mintmark, right of center below the feather tip. A brilliant coin, lustrous with a hint of peach-gold patina in the left obverse field. Sharply struck and attractive, with few marks to be seen other than die clash and extensive, interesting die cracks on both sides of the coin (diagnostic of the die pair). Population: 4 in 58, 12 finer (7/14). NGC ID# 24JG, PCGS# 6314

1870-S Half Dollar, MS62
Rare in Mint Condition

4140 **1870-S MS62 PCGS. WB-101, R.4.** The date and mintmark characteristics, as well as diagnostic die lumps on the drapery confirm this as Die Pair 4. Golden-tan patina covers each side, and the devices are well-struck save for slight incompleteness on the olive leaves and arrow fletchings. The San Francisco Mint struck just over 1 million Seated halves in 1870, and in mint condition this is one of the better issues in the series. Lustrous and minimally marked. Population: 7 in 62, 8 finer (7/14). NGC ID# 24K3, PCGS# 6329

1870-S Seated Half, MS62
Condition Rarity

4141 **1870-S MS62 PCGS. WB-101, R.4.** This is a better date in the series, especially in Mint State. The design motifs exhibit sharp definition with full stars and strong head detail. Only the eagle's left (facing) claw shows trivial softness. A layer of golden-gray patina covers each side, and the reverse displays attractive blue, green, and magenta accents. Population: 7 in 62, 8 finer (7/14). NGC ID# 24K3, PCGS# 6329

4142 **1871-CC VF30 PCGS. WB-101, Die Pair 1, R.4.** Lilac-gray surfaces display pleasing gold overtones and considerable remaining mint luster for the assigned grade. Although not the scarcest Carson City date of the series, the 1871 issue is nevertheless highly desired by collectors and seldom available this nicely detailed and attractive in VF30. Population: 7 in 30, 70 finer (7/14). NGC ID# 24K5, PCGS# 6331

4143 **1874-CC Arrows VG8 NGC. WB-101, Die Pair 3, R.4.** This is an original, well-detailed example of this scarce Carson City issue. The fields are richly patinated in iridescent olive-gray color, while the relief elements exhibit lighter tan-gray surfaces. Each side is problem-free and the eye appeal is exceptional for the grade level. From a low mintage of only 59,000 coins. Census: 7 in 8, 48 finer (7/14). NGC ID# 24LB, PCGS# 6347

4144 **1876-CC MS61 NGC. WB-102, Die Pair 8, R.3.** A stone-gray and caramel-gold Centennial year Carson City type coin. Well struck and attractive with minimal marks aside from delicate hairlines on the obverse field. Luster is especially evident at the margins. NGC ID# 24KH, PCGS# 6353

4145 **1878-CC VG10 PCGS. WB-101, Die Pair 1.** Sky-blue and lavender toning drapes this rare date Seated half dollar. Minimally abraded despite a minor obverse rim ding at 1 o'clock. Just 62,000 pieces were struck, likely all prior to the arrival of the first Carson City Morgan dollar dies.
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 3810, which realized $2,530. NGC ID# 24KP, PCGS# 6359

PROOF SEATED HALF DOLLARS

1859 Seated Liberty Half, PR64
Only 800 Pieces Struck

4146 **1859 PR64 PCGS. CAC.** The 1859 proof Seated Liberty half dollar claims a mintage of 800 pieces, but it is likely that many specimens went unsold and were melted after the end of the year. The present coin is an attractive Choice example with sharply detailed design elements and reflective fields under shades of greenish-gold and bluish-gray patina. Housed in a green label holder. Population: 40 in 64, 10 finer (8/14). NGC ID# 27TJ, PCGS# 6413

4147 **1860 PR63 PCGS.** Type Two Reverse. Vivid cherry-red, electric-blue, and apricot hues enrich this exquisitely struck specimen, while a few faint hairlines on the fields are all that limit the grade. Although 1,000 proofs were struck, most of the production was eventually melted as unsold. Population: 41 in 63, 58 finer (7/14). *Ex: Long Beach Signature (Heritage, 6/2006), lot 1692.* NGC ID# 27TK, PCGS# 6414

4148 **1865 PR63 PCGS.** A blend of orange, blue, lavender, and magenta coloration blankets both sides of this fully struck proof half dollar. Any grade-defining hairlines in the fields are well-hidden by the rich patina. From a mintage of only 500 proofs. *Ex: ANA Signature (Heritage, 8/2005), lot 787.* NGC ID# 27TS, PCGS# 6419

4149 **1867 PR63 Cameo PCGS.** This is an attractively, deeply mirrored Cameo from a fairly low proof mintage of just 625 pieces. A faint blush of lavender-gold toning blankets the obverse and encircles the reverse periphery, while the central devices are struck to full definition. Population: 5 in 63 Cameo, 25 finer (7/14). PCGS# 86425

4150 **1868 PR63 PCGS.** Warm champagne toning over the central regions deepens to rich orange-gold around the borders on this boldly struck Select proof. Ample mirroring is seen in the fields, though a few faint, parallel roller marks are noted above the eagle upon close examination. Population: 57 in 63, 42 finer (7/14). NGC ID# 27U3, PCGS# 6426

4151 **1871 PR64 NGC. WB-101.** Ex: "Col." E.H.R. Green. A well-detailed Choice example from a generous proof mintage of 960 pieces. The well-preserved brilliant surfaces show accents of cobalt-blue and sea-green toning at the rims, with outstanding eye appeal. Census: 37 in 64 (1 in 64 ★), 31 finer (7/14). *Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $8.50; Eric P. Newman Numismatic Education Society.* NGC ID# 27U6, PCGS# 6429

4152 **1876 "C" in Neck, FS-401, PR63 NGC.** Ex: "Col." E.H.R. Green, Eric P. Newman. Type One Reverse. The popular and obtainable proof variety with the top of a small misplaced C on the base of Liberty's throat. Rich golden-brown, plum-red, navy-blue, and forest-green toning blankets this specimen. A few contact marks are noted on the upper left obverse. PCGS# 413733

4153 **1878 PR63 NGC. WB-101.** Ex: "Col." E.H.R. Green. A well-detailed Select proof from a mintage of 800 pieces. This coin is deeply toned in shades of blue, gray, and lime-green toning, with reflective fields underneath. *Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $8.50; Eric P. Newman Numismatic Education Society.* NGC ID# 27UD, PCGS# 6439

4154 **1878 PR64 Cameo PCGS. CAC. WB-101.** Ex: Dick Osburn Collection. A deeply mirrored Choice proof with pleasing Cameo contrast, this boldly struck representative also displays warm champagne toning overall, with tinges of violet and aquamarine seen periodically around the margins. Population: 14 in 64 (1 in 64+) Cameo, 11 finer (7/14). PCGS# 86439

4155 **1879 PR63 PCGS.** Even with gray patina covering both sides, the reflectivity of the fields cannot be denied on this Select example. Closer examination reveals a host of colors on both sides. The hues include yellow-gold, plum, orange, and apple-green. Arguably, the reverse is the more attractive side, with large areas of vibrant orange and cherry-red appearing on the eagle. The coin also exhibits strong design detail. NGC ID# 27UE, PCGS# 6440

4156 **1880 PR64 PCGS.** Vivid blue-green, sapphire, and amethyst patina graces both sides of this boldly impressed Choice proof. A peach-toned fingerprint appears at the left obverse, just above the shield, and faint hairlines are present in the fields. A lovely specimen from an original mintage of 1,355 pieces. *Ex: ANA Signature (Heritage, 8/2007), lot 861.* NGC ID# 27UF, PCGS# 6441

4157 **1880 PR63 Cameo PCGS.** The design elements of this spectacular Select specimen are sharply detailed and richly frosted, providing bold cameo contrast with the deeply mirrored fields. Only a few minor hairlines are evident and the surfaces are entirely untoned. Population: 24 in 63 (1 in 63+) Cameo, 80 finer (7/14). PCGS# 86441

1881 Seated Half, Gem Proof
Multicolor Patina Over Each Side

4158 **1881 PR65 PCGS.** Type Two Reverse. Although a mintage of 10,000 circulation strikes was the third-highest in the decade, the 1881 half dollar issue remains relatively scarce, increasing demand for the 975 proofs struck. Apricot and violet patina progresses outwardly from the centers to blue, green and orange-yellow at the margins over each side. The strike is predictably pinpoint-sharp, and marks are minimal. Population: 27 in 65, 12 finer (7/14). NGC ID# 27UG, PCGS# 6442

1884 WB-101 Seated Half
Late-Series Gem Proof

4159 **1884 PR65 NGC. WB-101, R.2.** Both business strikes and proofs have their proponents among collectors of the late-series (1879-1891) Seated halves, making this run of low-mintage dates an interesting subset. Surviving proofs outnumber business strikes in the higher grades. This example is one of 875 proofs struck, with blue and reddish-gold tones framing silver centers. Deeply mirrored fields surround the boldly struck devices, with slight cloudiness noted on the obverse. A tiny toning spot marks the top of Liberty's gown. NGC ID# 27UK, PCGS# 6445

1884 Half Dollar, Sharply Struck PR66
An Alternative to the Rare Business Strike

4160 **1884 PR66 PCGS.** The low mintage of 4,400 business strikes places added pressure on the proofs from date collectors. Subtle aqua-green and mauve toning runs over the surfaces of this Premium Gem proof. The design features are sharply struck and the few marks are within the parameters of the grade. Population: 14 in 66, 3 finer (7/14). NGC ID# 27UK, PCGS# 6445

1885 Half Dollar, PR66
Comprehensive Multicolor Toning

4161 **1885 PR66 NGC.** Rich apple-green margins surround dusky rose-red fields and devices. Well preserved and sharply struck with undisturbed original toning and attractive eye appeal. Encased in a prior generation holder. One of just 930 proofs issued for this low mintage date. NGC ID# 27UL, PCGS# 6446

4162 **1890 PR63 Cameo NGC.** Decisively struck with distinct contrast between the richly frosted devices and the gold-gray fields. Rich orange patina graces the margins of this Select piece, one of just 590 proofs coined. Appealing despite light, swirling hairlines in the fields that account for the grade. Census: 6 in 63 Cameo, 30 finer (7/14). *Ex: ANA Signature (Heritage, 8/2007), lot 868.* PCGS# 86451

BARBER HALF DOLLARS

4163 **1892-S MS62 NGC.** Although not rare in an absolute sense, this San Francisco issue is somewhat elusive in grades finer than that of the present piece. The obverse displays deep olive and golden-gray toning, while the reverse is lighter, with just a light gray hue. Light, scattered abrasions define the grade, though these are well-masked by the rich patina. Census: 21 in 62, 36 finer (7/14). NGC ID# 24LJ, PCGS# 6464

4164 **1893-O MS64 PCGS.** Unusually well-struck for this O-mint issue, this near-Gem also displays deep burgundy, orange-gold, olive, and aquamarine toning over radiant mint luster on each side, with the colors somewhat more intense on the obverse. A few grade-defining surface ticks are present, but these are well-hidden beneath the patina. Population: 41 in 64 (1 in 64+), 8 finer (7/14). NGC ID# 24LL, PCGS# 6466

4165 **1894-S MS63 PCGS.** Bold design definition and semiprooflike fields are among the pleasing attributes this lightly toned example possesses. Pale gold and lilac-gray colors intermingle over each side, essentially masking any grade-limiting surface abrasions. Population: 26 in 63, 57 finer (7/14). NGC ID# 24LR, PCGS# 6470

1899-O Barber Half, MS64
Conditionally Scarce Issue

4166 **1899-O MS64 PCGS.** A strike-challenged New Orleans date. Despite a mintage of more than 1.7 million pieces, remarkably few high-grade survivors exist. This example is thickly toned on the obverse in earthy bronze overtones, revealing glimpses of silver luster and a touch of orange and blue at the rims. The reverse shows a typical New Orleans strike, with weakness at the eagle's shoulder and shield corner, neck feathers, and legs. Amber-gold toning surrounds softly lustrous central devices. Population: 23 in 64 (1 in 64+), 15 finer (7/14). NGC ID# 24M7, PCGS# 6484

4167 **1900-S MS63 PCGS.** This sharply detailed Select specimen exhibits an extensive network of die cracks on both sides, with vibrant satiny mint luster and a scattering of minor contact marks. A few hints of green and lavender patina visit the pleasing surfaces. Population: 18 in 63, 34 finer (7/14). NGC ID# 24MB, PCGS# 6488

4168 **1905 MS64 PCGS.** An impressive Choice Barber half dollar with sharply detailed design elements and well-preserved lustrous surfaces. Dappled shades of golden-brown, gunmetal-gray, and silvery-white patina cover the surfaces of both sides. From a small mintage of 662,000 pieces. Population: 31 in 64 (1 in 64+), 24 finer (7/14). NGC ID# 24MR, PCGS# 6501

4169 **1905-O AU55 PCGS.** This is a partially lustrous Choice About Uncirculated representative with entirely untoned surfaces. The design elements are well-struck and show an expected amount of light friction over the high points. A low-mintage date in the Barber half dollar series. NGC ID# 24MS, PCGS# 6502

4170 **1907-D MS63 PCGS. CAC.** Each side of this sharp, satiny example displays light golden toning, with deeper olive hues in the recesses around the border. Light, scattered grazes limit the grade, though the surfaces are attractively smooth. NGC ID# 24MZ, PCGS# 6509

4171 **1907-D MS65 NGC.** The 1907-D is not a particularly scarce date in an absolute sense, but Gem examples are difficult to locate, and finer coins are decidedly rare. The coin offered here is a well-struck example with light golden toning over each side. A few minor grazes on the cheek preclude a finer grade assessment, but hardly inhibit the frosty luster. Census: 18 in 65, 8 finer (7/14). NGC ID# 24MZ, PCGS# 6509

4172 **1908 MS63 PCGS. CAC.** Well-struck with shimmering satin luster and a slight degree of speckled russet patina on obverse and reverse alike, in hues of dark-olive and russet-gold. Nicely preserved and nearly blemish-free, save for couple of thin vertical marks on Liberty's neck and jaw. NGC ID# 24N4, PCGS# 6512

1908-S Barber Half, MS64+
Rare Any Finer

4173 **1908-S MS64+ NGC.** The 1908-S is a slightly scarcer date in Mint State condition; it is scarce in MS63 and MS64, and becomes genuinely rare any finer. This Plus-graded example displays pale amber-gold toning over each side, deepening toward the rims. The surfaces are pleasantly clean, though some minor weakness on the central design elements likely contributes to the grade. Census: 14 in 64 (2 in 64+), 10 finer (7/14). NGC ID# 24N7, PCGS# 6515

4174 **1911-D MS65 NGC.** The highly lustrous surfaces of this D-mint Gem half dollar are visited by dapples of russet and electric-blue at the margins, and a well-directed strike leaves strong definition on the design elements, save for minor softness in the upper-right corner of the shield. A couple grade-consistent marks are noted on the cheek. Census: 16 in 65 (1 in 65+), 7 finer (7/14).
Ex: FUN Signature (Heritage, 6/2008), lot 1068. NGC ID# 24NE, PCGS# 6522

4175 **1912 MS64 PCGS.** In the context of the Barber series, the 1912 half dollar is fairly plentiful in MS64 and lower grades, but Gem or finer examples are rare. This piece is well-preserved for the grade and boasts sharp design definition, as well. A blanket of golden toning is seen over satiny luster on each side. PCGS has encapsulated only 24 numerically finer representatives (7/14). NGC ID# 24NG, PCGS# 6524

4176 **1913 XF45 PCGS.** Well-detailed and nearly void of surface marks, with variegated pastel coloration over smooth, evenly worn surfaces. A scarce coin from a low-mintage issue of just 188,000 business strikes. NGC ID# 24NK, PCGS# 6527

4177 **1914-S MS64 PCGS. CAC.** This is a somewhat better date in the Barber half series with a mintage of 992,000 coins. The design elements are sharply struck with full stars and only slight softness on the eagle's right (facing) talon and the arrow fletchings. Areas of mottled olive-green toning occur over the otherwise frosty and brilliant surfaces, contributing to the eye appeal of this near-Gem example. NGC ID# 24NP, PCGS# 6531

4178 **1915-D MS64 PCGS.** For the collector who appreciates original toning, this near-Gem type coin may fill the bill. The obverse displays deep gold and amber patination overall with tinges of deeper russet in the protected regions, while the reverse exhibits light, silvery-gold luster with splashes of deep olive and amber-red color. The strike is slightly soft on the eagle's right (facing) shoulder, as is typical, though the design elements are otherwise well-defined. NGC ID# 24NS, PCGS# 6533

4179 **1915-D MS65 PCGS.** Medium caramel-gold toning enriches this lustrous and splendidly preserved Gem. Slight softness of strike is noted near the right shield corner and fletchings. Certified in a green label holder. Population: 58 in 65, 17 finer (7/14). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

1896 Barber Half, PR66 Cameo
Attractively Contrasted

4180 **1896 PR66 Cameo PCGS.** The proof 1896 half dollar is a fairly plentiful proof issue, as 762 examples were struck, but few survive with any degree of Cameo contrast. This Premium Gem example displays clean surfaces with deep shades of lavender-blue color blending into the fields. The eagle's right (facing) shoulder is not fully defined, though the strike is otherwise pleasing. Population: 13 in 66 (2 in 66+) Cameo, 4 finer (7/14). PCGS# 86543

1898 Half Dollar, PR65 ★ Cameo

4181 **1898 PR65 ★ Cameo NGC.** An outstanding Barber half of any date. This exceptional proof does indeed have extra eye appeal for the grade, as indicated by the star designation. The fields show unfathomable depth of reflectivity, and the devices have considerable mint frost that, when combined with the mirrored surfaces, produce a strong cameo effect. Brilliant on both obverse and reverse. Census: 15 in 65 Cameo (1 in 65+ Cameo, 1 in 65 ★ Cameo), 34 finer (7/14).
From The Pannonia Collection. PCGS# 86545

1901 Barber Half, PR66 Cameo
One of 813 Proofs Struck

4182 **1901 PR66 Cameo PCGS.** The frosty design motifs remain largely untoned and stand out against reflective, semi-brilliant fields that show areas of peach-orange, rose, and blue coloration. As one would expect of a high-end proof, the strike is needle-sharp, and the surfaces are free of any obvious contact marks. Population: 16 in 66 (3 in 66+) Cameo, 11 finer (7/14). PCGS# 86548

4183 **1905 PR64 PCGS.** One of 727 Barber half proofs made in 1905. The borders on both sides of this near-Gem display splotches of cobalt-blue, lavender, and golden-tan patination, and a sharp strike prevails on the design elements. Some faint slide marks on Liberty's cheek are not disturbing.
Ex: Long Beach Signature (Heritage, 5/2007), lot 1175. NGC ID# 24P9, PCGS# 6552

1906 Barber Half, PR66
Deeply Mirrored, Richly Colorful

4184 **1906 PR66 NGC.** Beautiful, wide rims surround this fully struck proof, which features deep, richly toned fields and devices. The fields are watery-deep and reflective, with the motifs lightly frosted (although not enough for a cameo designation). Intense shades of ruby-red and cerulean-blue cover the obverse, while turquoise and lavender hues bathe the equally rich reverse. An unquestioned Premium Gem proof, bold and beautiful. Census: 34 in 66 (1 in 66+, 1 in 66 ★), 24 finer (7/14). NGC ID# 24PA, PCGS# 6553

1906 Barber Half, PR66
Delightful Orange Toning

4185 **1906 PR66 PCGS.** Magnificent orange-gold toning endows most of this high grade proof type coin. The obverse has a window of brilliance at the center, and the obverse margin displays occasional navy-blue and plum-red patina. Intricately struck and beautiful. Certified in an old green label holder. NGC ID# 24PA, PCGS# 6553

4186 **1910 PR64 NGC.** Shades of greenish-gold, steel, and cerulean-blue toning visit the surfaces of this attractive Choice example. The design elements are sharply detailed and the fields are deeply reflective, under the patina. Census: 68 in 64 (3 in 64+), 90 finer (7/14). NGC ID# 24PE, PCGS# 6557

WALKING LIBERTY HALF DOLLARS

4187 **1916 MS65 PCGS. CAC.** Shades of silver-gray, golden-brown, and amber toning visit the surfaces of this charming Gem, with well-detailed design elements and vibrant mint luster, under the patina. No mentionable distractions are evident. NGC ID# 24PL, PCGS# 6566

1916 Walking Liberty Half, MS66
Elusive High-End Example

4188 **1916 MS66 PCGS. CAC.** Among Philadelphia issues, only the 1921 has a lower mintage than the 1916. This high-grade representative provides potent, shimmering luster and a hint of light golden toning. The strike is precise, and the few minute, grade-consistent marks are difficult to locate. Population: 94 in 66 (5 in 66+), 4 finer (7/14). NGC ID# 24PL, PCGS# 6566

4189 **1916-D MS65 PCGS.** Iridescent shades of greenish-gold, silver-gray, and amber toning enhance the eye appeal of this attractive Gem. The strike is sharper than usually seen on an early series Walker, with some definite separation between Liberty's thumb and finger. NGC ID# 24PM, PCGS# 6567

1916-S Half Dollar, MS64
Planchet Crack Mint Error

4190 **1916-S — Planchet Crack at 6 O'Clock — MS64 NGC.** A small edge flaw (as struck) is visible near 6 o'clock on the obverse, and is also evident near 12 o'clock on the reverse. Despite the rarity of such a mint error on a 20th-century silver type coin, the present half dollar is more desirable for its status as a high grade 1916-S. The brilliant surfaces are lustrous and display only trivial contact. The strike is fairly sharp, with pleasing definition on Liberty's head and branch hand. NGC ID# 24PN, PCGS# 6568

4191 **1916-S MS64 NGC.** From the first year of the series, this example from San Francisco exhibits shimmering mint luster and nicely preserved surfaces. An appealing choice for type purposes, and conditionally scarce at this near-Gem grade level. NGC ID# 24PN, PCGS# 6568

4192 **1917 MS66 PCGS.** This second-year issue claims the highest mintage in the series prior to 1936, yet Premium Gems are elusive and anything finer is rare. The devices are boldly impressed. Light toning blankets the obverse, while most of the reverse shows russet and olive toning. PCGS has certified only three coins numerically finer (7/14). NGC ID# 24PP, PCGS# 6569

4193 **1917-D Obverse MS63 PCGS.** This Select coin exhibits satiny, lightly toned surfaces. Liberty's head and branch hand as well as the eagle's breast feathers show strong detail, although the skirt lines are somewhat weak. Die rust occurs in the upper-obverse field. NGC ID# 24PR, PCGS# 6570

4194 **1917-D Obverse MS63 NGC.** The scarcer of the two 1917-D types, with the mintmark located on the obverse. This piece has somewhat subdued luster with decent strike definition and free surface marks. A handful of dark orange alloy spots are noted: one on the obverse and the rest on the reverse. NGC ID# 24PR, PCGS# 6570

4195 **1917-D Obverse MS63+ NGC.** From a mintage of only 765,400 pieces, this Plus-grade Mint State example displays strong, satiny luster, with tinges of golden-orange and lavender toning throughout. Some typical softness is noted on Liberty's thigh and the eagle's central feathers, though it is minor. NGC ID# 24PR, PCGS# 6570

1917-D Half Dollar, MS64 Reverse Mintmark Variant

4196 **1917-D Reverse MS64 NGC.** Despite a significantly higher mintage (more than 1.9 million pieces versus just 765,400 pieces), the Reverse Mintmark 1917-D half dollar is somewhat more elusive in high grades than its Obverse Mintmark counterpart. This satiny Choice example exhibits remarkably sharp detail, with notable definition seen on Liberty's branch hand, which is virtually complete. A few light, scattered ticks are not distracting, and each side displays pale golden patina. NGC has certified 29 numerically finer representatives (7/14). NGC ID# 24PS, PCGS# 6571

4197 **1917-S Reverse MS63 PCGS.** A thin veil of light champagne toning coats satiny mint luster on each side of this well-preserved example. The strike is slightly soft on Liberty's thigh and the eagle's leg, as is typically seen on this San Francisco issue, but the eye appeal remains pleasing. NGC ID# 24PU, PCGS# 6573

4198 **1917-S Reverse MS63 PCGS.** The mintmark was moved to the reverse partway through the year in 1917, creating a popular new design for type collectors. This attractive Select example displays a sharp strike for an early series Walker, and the lustrous surfaces show only minor contact marks. NGC ID# 24PU, PCGS# 6573

4199 **1918 MS64 NGC.** Deep layers of purple-violet and reddish-gold toning decorate the well-preserved surfaces of this near-Gem example. Somewhat softly struck over the centers, with fine satin luster that is very pleasing to the eye. NGC ID# 24PV, PCGS# 6574

4200 **1918-D MS62 PCGS.** Richly toned in shades of golden-brown, lavender-gray, and amber, this pleasing MS62 specimen displays lightly marked surfaces with slightly subdued mint luster and well-detailed design elements. NGC ID# 24PW, PCGS# 6575

4201 **1918-S MS63 PCGS.** This impressive Select example displays a better-than-average strike for the issue, with just minor softness on Liberty's wreath hand. The lightly marked surfaces show a few streaks of greenish-gold toning and vibrant mint luster on both sides. NGC ID# 24PX, PCGS# 6576

4202 **1920 MS64 PCGS.** Dusky shades of golden-brown and lavender-gray toning blanket the well-preserved surfaces of this impressive Choice example. The design elements are well-detailed, with a touch of the usual softness on the central obverse and eagle's leg. NGC ID# 24R3, PCGS# 6580

4203 **1920-S MS62+ NGC.** Light golden-tan and gunmetal toning enriches the borders of this lustrous better date half dollar. The strike is typical but the surfaces are refreshingly free from abrasions. NGC ID# 24R5, PCGS# 6582

1927-S Half Dollar, Lustrous MS64

4204 **1927-S MS64 PCGS. CAC.** Whispers of reddish-gold, more extensive on the obverse, gravitate to the margins of this near-Gem Walker, framing the essentially color-free centers. The strike is typical for the issue, that is, Liberty's branch hand is indistinct. Liberty's head, however, exhibits better detail than usually seen on this date. The few minute marks on the lustrous surfaces are consistent with the grade. Nice eye appeal overall, aptly recognized by CAC. NGC ID# 24RA, PCGS# 6587

4205 **1928-S MS63 PCGS.** Boldly lustrous surfaces provide this Select example with immediate eye appeal. Scattered tiny spots of toning are present on both sides in shades of golden-brown. Several die cracks appear on the reverse. NGC ID# 24RB, PCGS# 6588

1928-S Half Dollar, Lustrous MS64

4206 **1928-S MS64 PCGS.** The 1928-S is a leading strike rarity in the Walking Liberty half dollar series, as seen by the weak strike on Liberty's branch hand and the eagle's trailing leg. Lustrous surfaces display whispers of reddish-brown at the obverse periphery and are randomly scattered over the reverse. Light marks are consistent with the grade. NGC ID# 24RB, PCGS# 6588

4207 **1929-D MS64 PCGS.** Despite its low mintage, the 1929-D issue is relatively available in mint condition. Cartwheel luster graces the surfaces of this sharply struck and fully brilliant Walker. The reverse details are notably well-defined, and overall this coin is high-end for the grade. NGC ID# 24RC, PCGS# 6589

4208 **1929-D MS65 PCGS.** Gold and peach overtones grace a softly lustrous silver base on this attractive D-mint Gem from the end of the Roaring Twenties. The thumb of Liberty's branch hand shows slight separation, rating this piece as above-average on strike. Just over a million pieces were struck, and PCGS recognizes just 67 coins in MS66 and better condition (7/14). NGC ID# 24RC, PCGS# 6589

4209 **1929-S MS64 PCGS.** The issue is roughly as available as its Denver brother. Softly frosted luster swirls across the brilliant surfaces of this near-Gem representative, with sharp striking detail and minimal marks further adding to its visual appeal. NGC ID# 24RD, PCGS# 6590

1933-S Half Dollar, MS66
Boldly Struck Throughout

4210 **1933-S MS66 PCGS.** Flecks of purple-umber patina float on the vibrant silver surfaces of this attractive, boldly struck half. Following a three-year halt after the stock market crash of 1929, half dollar coinage resumed in 1933, but only at the San Francisco mint. Surprisingly, this issuance contained some of the sharpest strikes in this denomination since the beginning of Weinman's Walking Liberty design in 1916. This frosty Premium Gem is a prime example, with full thumb separation, gown lines, and eagle feathers. Dappled blue-gray toning accents pale ice-blue patina on each side, with no significant surface abrasions present. Just nine examples have graded numerically finer at PCGS (7/14).
Ex: Central States Signature (Heritage, 5/2005), lot 7405. NGC ID# 24RE, PCGS# 6591

1933-S Half Dollar, Strong MS66
Rare in Finer Condition

4211 **1933-S MS66 PCGS.** The San Francisco Mint was alone in producing Walking Liberty halves in 1933, and only 1.7 million coins were struck. Additionally, this is the first Walker half issue since 1929. Bold head definition and softly frosted luster are attributes of this lightly toned Premium Gem representative. No marks deserve individual mention, and PCGS has certified only nine numerically finer examples (8/14). NGC ID# 24RE, PCGS# 6591

4212 **1934-D MS66 PCGS.** Small D mintmark. This Denver issue is conditionally scarce, and both services have certified only five coins numerically finer combined (7/14). The surfaces maintain their brilliance overall with light multicolor toning over the right obverse field. Sharply detailed and lustrous. NGC ID# 24RG, PCGS# 6593

4213 **1934-D MS66 PCGS.** Small D. Delicate chestnut toning visits this high grade Great Depression half dollar. Booming luster dominates well struck surfaces. Wispy grazes on the front wing and right obverse field decide the grade. NGC ID# 24RG, PCGS# 6593

1934-S Half Dollar, MS65

4214 **1934-S MS65 NGC.** Grayish freckles cascade over the lustrous surfaces of this Gem and the strike is solid throughout, including Liberty's branch hand, head, and skirt lines, and the eagle's breast feathers. Close examination reveals no significant contact marks. Nice overall eye appeal. NGC has seen fewer than 50 pieces finer (2/14). NGC ID# 24RH, PCGS# 6594

1934-S Half Dollar, MS65
Well-Detailed Throughout

4215 **1934-S MS65 PCGS.** Light straw-gold toning adorns this lustrous, attractively preserved Gem. The coin is unusually sharply struck given its San Francisco Mint origin. All three mints produced Walking Liberty halves in 1934, the first such occurrence since 1921, and an indication that the worst of the Great Depression was subsiding. NGC ID# 24RH, PCGS# 6594

4216 **1935-D MS65 PCGS. CAC.** Liberty's head is exceptionally well-defined for this notoriously poorly struck Denver issue. Satiny luster shimmers over entirely brilliant and smooth surfaces that are devoid of any mentionable marks. An eye-appealing Gem. NGC ID# 24RK, PCGS# 6596

1935-D Walking Liberty Half, MS66
None Finer at Either Service

4217 **1935-D MS66 PCGS.** The 1935-D is essentially impossible to find fully struck. The typical example shows incompleteness over Liberty's head and branch hand. Such is the case with this satiny and brilliant Premium Gem, although the surfaces are exceptionally clean. Neither PCGS nor NGC have certified any coins in higher numeric grades (8/14). NGC ID# 24RK, PCGS# 6596

4218 **1935-S MS65 PCGS.** The 1935-S Walkers are known to be somewhat weakly struck and are usually found with brilliant or lightly toned surfaces. This Gem half dollar is lightly struck on the central details, but no more so than most examples of this San Francisco issue. The toning, however, is rich and pervasive. Dusky shades of golden-brown and dove-gray patina blanket the obverse. The reverse is spectacularly toned in multiple hues of forest green, aqua, rose, and gold. Strong mint luster shines beneath the toning of this impressive Gem. NGC ID# 24RL, PCGS# 6597

4219 **1935-S MS65 PCGS. CAC.** The well-preserved surfaces of this impressive Gem are blanketed in dusky shades of gray, gold, and amber toning, with vibrant mint luster and well-detailed design elements underneath. The 1935-S is definitely scarce in higher grades. NGC ID# 24RL, PCGS# 6597

1936 Walking Liberty Half, MS67+ Rarely Found Finer

4220 **1936 MS67+ PCGS. CAC.** The 1936 is a fairly common date in the Walking Liberty half series, but its availability in MS67 is only marginal, and finer pieces are exceedingly rare. This Plus-graded piece exhibits soft, satiny luster beneath hues of pale champagne and ice-blue color, while the devices are well-defined and surfaces reveal only a few minute ticks upon close examination. PCGS has encapsulated only two numerically finer representatives (7/14). NGC ID# 24RM, PCGS# 6598

4221 **1936-D MS66 PCGS. CAC.** Both sides of this satiny, CAC-approved Premium Gem are lustrous and brilliant, though the reverse features a few splashes of light gold color toward the margins. The design elements are well-struck with only a touch of softness on Liberty's head and right (facing) hand. NGC ID# 24RN, PCGS# 6599

4222 **1937 MS67+ NGC.** Lovely, natural silvery-gray toning covers the surfaces of this lustrous, boldly struck half dollar. Rare this nice. Just eight examples are certified numerically higher by PCGS and NGC combined. This Superb Gem is near the next higher grade, as confirmed by the NGC Plus designation. NGC Census: 9 in 67+, 3 finer (7/14). NGC ID# 24RR, PCGS# 6601

4223 **1937-D MS66+ PCGS. CAC.** The 1937-D Walker issue is scarcer than its San Francisco counterpart in most grades, and in high grades it is one of the more challenging issues within the 1934 to 1947 short set. This Plus-designated and CAC-approved example features satiny and untoned surfaces with well-struck devices. A touch of typical softness occurs over Liberty's right (facing) hand. NGC ID# 24RS, PCGS# 6602

1937-D Half Dollar, MS67 Tied for Finest at PCGS

4224 **1937-D MS67 PCGS. CAC.** The 1937-D half dollar is moderately available in lower grades, but this coin is one of just 49 certified in MS67 by PCGS, with none finer (7/14). Softly frosted, radiant luster engulfs each side, with traces of light golden color seen around the peripheries. The strike is above-average for the issue, with partial thumb separation on Liberty's branch hand. NGC ID# 24RS, PCGS# 6602

4225 **1938-D MS65 PCGS. CAC.** An impressive Gem example with brilliant surfaces and gleaming mint luster. Boldly struck with partial definition on Liberty's branch hand, and well-preserved with no mentionable surface distractions seen on either side. NGC ID# 24RV, PCGS# 6605

4226 **1938-D MS66 PCGS.** This well-preserved Premium Gem displays mostly brilliant surfaces, with a few hints of greenish-gold and lavender toning. The design elements are well-detailed, with just a touch of the usual softness on Liberty's wreath hand. PCGS has graded 40 numerically finer examples (7/14). NGC ID# 24RV, PCGS# 6605

4227 **1938-D MS66 PCGS. CAC.** A remarkable example that actually seems high-end for the Premium Gem grade level. The strike definition is unusually sharp for the type, with good separation of the thumb on Liberty's branch hand. Lustrous and well-preserved, with shimmering silvery-gray surfaces and a faint grease streak on the reverse, on the eagle's right (facing) wing, that is slight enough to overlook. NGC ID# 24RV, PCGS# 6605

4228 **1939-S MS67 PCGS.** Beautifully preserved, as the grade suggests, this high-end representative displays radiant, frosty mint bloom with just a few faint traces of light golden color. Moderate thumb separation on Liberty's branch hand confirms a well-executed strike. None have been certified numerically finer (7/14). NGC ID# 24RY, PCGS# 6608

4229 **1940-S MS66+ PCGS.** Satiny, silvery-white luster illuminates nearly undisturbed surfaces on each side of this high-end Premium Gem. Liberty's branch hand and the eagle's right (facing) leg are not fully defined, but the strike is otherwise well-executed. PCGS has certified only 11 numerically finer representatives (7/14). NGC ID# 24S2, PCGS# 6610

4230 **1940-S MS66 PCGS. CAC.** A hint of honey toning graces this lustrous high grade half dollar. A few trivial grazes on the right obverse field deny technical perfection. A good strike for an S-mint issue, although the branch hand is indistinct. Encased in a green label holder. NGC ID# 24S2, PCGS# 6610

1941 Walker, MS68
None Numerically Finer

4231 **1941 MS68 NGC.** The 1941 Walking Liberty half dollar issue is popular for type purposes because of its high mintage (24.2 million coins) and availability. However, blazing MS68 examples such as this are exceptional. The lustrous surfaces are immaculately preserved, fully brilliant, and sharply detailed throughout. Magnification fails to reveal any noteworthy marks. Census: 24 in 68 (3 in 68 ★), 0 finer (7/14). NGC ID# 24S3, PCGS# 6611

4232 **1941-D MS67+ PCGS. CAC.** Satiny, lustrous surfaces display soft ice-blue hues over the central regions, with luminous olive-gold and amber-orange hues around the peripheries. The strike is well-executed, with pleasing thumb separation on Liberty's branch hand. PCGS has encapsulated only one numerically finer representative (7/14). NGC ID# 24S4, PCGS# 6612

4233 **1941-D MS67+ PCGS. CAC.** A light silver-gold example with remarkably bold strike definition and lovely shimmering mint luster. The reverse is pristine and the obverse shows just a couple of pinpoint-sized marks in the right field that you will need a magnifier in order to see. NGC ID# 24S4, PCGS# 6612

4234 **1941-S MS66 PCGS.** For an S-mint issue from the 1940s, this Premium Gem offers a bold strike with typical softness on Liberty's right (facing) hand. Mostly brilliant surfaces displays hints of jade-green, ice-blue, and magenta coloration at the margins. PCGS has seen only nine coins in higher numeric grades (7/14). NGC ID# 24S5, PCGS# 6613

4235 **1941-S MS66 PCGS.** Vibrant, frosty mint luster radiates from the pristine, brilliant surfaces of this spectacular Premium Gem, creating fantastic eye appeal. The strike is better than usually seen on this issue, with just a little softness on the central obverse and the eagle's leg. NGC ID# 24S5, PCGS# 6613

4236 **1941-S MS66 PCGS. CAC.** This San Francisco issue is moderately available in this grade, but finer pieces are decidedly rare. This satiny example displays nearly undisturbed surfaces and tinges of lemon-gold toning around the margins. The strike is slightly soft on Liberty's branch hand, but is otherwise sharp throughout. Only nine coins have graded numerically finer at PCGS (7/14). NGC ID# 24S5, PCGS# 6613

4237 **1941-S MS66+ PCGS. CAC.** Exceptional mint luster is expected on any high-grade 1941-S half dollar. The mint luster on this piece is especially pronounced and only the slightest hint of color is present over the reverse. The strike details are ever-so-close to being fully brought up in all areas except for Liberty's branch hand. Population: 41 in 66+, 9 finer (7/14). NGC ID# 24S5, PCGS# 6613

1942 Walker, MS67+
Incredibly Well-Preserved

4238 **1942 MS67+ PCGS. CAC.** A blush of faint golden patina blankets the otherwise brilliant surfaces of this Superb Gem. Liberty's head and skirt, as well as the eagle's breast and leg feathers, show sharp definition. Each side is devoid of all but a few well-hidden ticks, and the eye appeal is strong. PCGS has seen only six finer submissions (7/14). NGC ID# 24S6, PCGS# 6614

4239 **1943 MS67+ PCGS. CAC.** Fully brilliant and wonderfully preserved, this Superb Gem offers blazing luster over sharply detailed and nearly flawless surfaces. Only a few minuscule and well-hidden ticks preclude a rare MS68 designation. PCGS has seen just six coins finer (7/14). NGC ID# 24S9, PCGS# 6618

4240 **1943-D MS67+ PCGS. CAC.** It is easy to see why PCGS has added the + designation to the MS67 grade of this exceptional specimen. The full strike definition seen on both sides is highly unusual for a business strike Walking Liberty half dollar. A lustrous, beautifully toned coin with flawlessly preserved surfaces. Population: 10 in 67+, 2 finer (7/14). NGC ID# 24SA, PCGS# 6619

4241 **1943-S MS66+ PCGS. CAC. FS-101.** Trumpet tail S. A brilliant high grade type coin with potent luster and a good strike for a wartime San Francisco product. Smooth save for light contact on the field above the sun. Minor hub doubling is noted on the rays and IN GOD WE TRUST. NGC ID# 24SB, PCGS# 6620

4242 **1943-S MS66+ PCGS. CAC. FS-101.** Trumpet tail S. Delicate straw-gold and ice-blue toning adorns this highly lustrous and suitably struck Premium Gem. Contact is confined to the field near the T in LIBERTY. Hub doubling on IN GOD WE TRUST and the rays is as often seen for the issue. NGC ID# 24SB, PCGS# 6620

4243 **1945 MS67 PCGS. CAC.** Dappled caramel-gold toning adorns this lustrous and beautifully preserved Superb Gem. The strike is bold and the eye appeal is outstanding. None have been certified numerically finer by PCGS or NGC (7/14). NGC ID# 24SF, PCGS# 6624

4244 **1946-S MS66+ PCGS. CAC.** Trumpet tail S. Vivid multicolor toning in varying shades of gold, cherry-red, and forest-green encompasses the reverse and encircles the peripheral regions of the obverse. The devices are lightly struck on the centers, as is typical of this San Francisco issue, though frosty luster contributes to the Premium Gem grade assessment. NGC ID# 24SL, PCGS# 6629

PROOF WALKING LIBERTY HALF DOLLARS

1936 Half Dollar, PR66
First Proof Issue Since 1915

4245 **1936 PR66 NGC.** Light champagne toning covers wonderfully preserved surfaces that show expectedly razor-sharp device definition. The Mint struck 3,901 Walking Liberty proofs in 1936, the first time the Philadelphia facility struck specimens dating back to 1915. It's low mintage makes this issue considerably more challenging than succeeding proof dates in the series. NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half, PR66
Lowest-Mintage Proof Issue

4246 **1936 PR66 PCGS. CAC.** This Premium Gem specimen represents the first and lowest-mintage proof issue in the Walking Liberty series (3,901 pieces). The surfaces are fully brilliant, and the obverse shows a moderate degree of contrast. The designer's initials are only vaguely visible from excessive die polishing. PCGS has certified 33 coins numerically finer (7/14). NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR66+
Flashy and Brilliant

4247 **1936 PR66+ NGC. CAC.** The Mint resumed proof production in 1936 after a 21-year hiatus, making this a popular first-year specimen in the Walking Liberty series. A predictably razor-sharp strike and entirely brilliant surfaces characterize this high-end Premium Gem proof, while a green label CAC sticker affirms its visual appeal. NGC ID# 27V4, PCGS# 6636

4248 **1942 PR67+ PCGS. CAC.** Light toning covers both sides of this gorgeous Superb Gem Walker proof. The design elements are predictably razor-sharp and the eye appeal is strong, as recognized by CAC. PCGS has certified 44 coins finer (7/14). NGC ID# 27V9, PCGS# 6642

4249 **1942 PR68 NGC.** An essentially perfect example of the final proof issue in the Walking Liberty half dollar series, this high-end Superb Gem boasts deeply mirrored fields and razor-sharp design elements. Traces of lemon-gold and ice-blue toning accent otherwise brilliant surfaces on each side. NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

4250 **1948 MS66+ Full Bell Lines PCGS.** This high-end Premium Gem displays lustrous well-preserved surfaces under intense shades of greenish-gold and magenta toning. The design elements are sharply detailed, with Full Bell Lines. PCGS has graded just four numerically finer examples (7/14). NGC ID# 24SR, PCGS# 86651

4251 **1948 MS66+ Full Bell Lines PCGS. CAC.** An important offering for the Registry Set collector, this Plus-graded Premium Gem is one of just 16 so-designated examples at PCGS, where only four are numerically finer (7/14). Frosty, gold-tinted luster blankets both sides, while vivid orange-gold, cherry-red, and forest-green toning surrounds the reverse periphery and forms a wide crescent around much of the obverse margins. NGC ID# 24SR, PCGS# 86651

4252 **1948-D MS66+ Full Bell Lines PCGS.** This is a Registry-quality Premium Gem with Full Bell Lines and a Plus designation from PCGS. The lightly toned surfaces gleam with booming luster and the devices appear sharply detailed. Between the two major services, only one coin grades higher than the present offering (7/14). NGC ID# 24SS, PCGS# 86652

4253 **1949 MS66+ Full Bell Lines PCGS. CAC.** This piece is boldly struck on Franklin's hair and the reverse bell lines, and displays nearly unabraded surfaces. Dappled olive-gold and lavender-gray toning blankets each side, with the colors primarily concentrated around the margins. This is one of just eight MS66 Full Bell Lines examples to receive a Plus designation from PCGS, and that service has certified none numerically finer (7/14). NGC ID# 24ST, PCGS# 86653

4254 **1949-D MS65 Full Bell Lines PCGS.** The Denver Mint struck over 4 million Franklin halves in 1949, yet Gems such as this are only moderately available. The obverse exhibits faint toning in shades of ice-blue, lilac, and peach, while the reverse is devoid of color. Vibrant luster swirls over each side of this attractive Full Bell Lines representative. NGC ID# 24SU, PCGS# 86654

4255 **1949-D MS65 Full Bell Lines PCGS.** Russet-brown, violet, and cherry-red toning appears mottled over each side with luster shining throughout. This second-year Denver issue presents strong definition over the devices, as recognized by the Full Bell Lines designation. NGC ID# 24SU, PCGS# 86654

1949-D Franklin Half, MS66 Full Bell Lines
None Certified Numerically Finer

4256 **1949-D MS66 Full Bell Lines PCGS.** The 1949-D Franklin half is not overly elusive in Mint State with Full Bell Lines, but such pieces grading as high as this Premium Gem are. PCGS has certified just 45 examples in MS66 (3 in 66+), and none finer (7/14). This piece shows vibrant, frosty mint bloom, with crisp Full Bell Lines and just a trace of light golden color. A few insignificant grazes preclude an even finer grade, though these are nearly undetectable to the unaided eye. NGC ID# 24SU, PCGS# 86654

1949-D Half Dollar, Toned MS66 Full Bell Lines

4257 **1949-D MS66 Full Bell Lines PCGS.** Mint State Full Bell Line 1949-D Franklin half dollars are readily available through the Gem level of preservation, after which the population drops precipitously. The two major services have graded only 53 Premium Gems and none finer. Occasional freckles of russet and olive run over the obverse, while this color palette becomes more extensive on the reverse. Sharply struck and nicely preserved. Population: 45 in 66 (3 in 66+) Full Bell Lines, 0 finer (7/14). NGC ID# 24SU, PCGS# 86654

4258 **1949-S MS67 NGC. CAC.** This piece is boldly struck, though the bell lines become just a little too faint near the bell crack to qualify for the Full Bell Lines designation from NGC. Rich orange-gold and olive peripheral toning surrounds lighter sky-blue and lavender hues in the centers. Census: 9 in 67, 0 finer (7/14). NGC ID# 24SV, PCGS# 6655

4259 **1949-S MS66+ Full Bell Lines PCGS. CAC.** Vibrant satiny mint luster illuminates a full coating of speckled copper-orange and olive patina across both obverse and reverse. Fully struck with carefully preserved surfaces that are nearly pristine. Population: 11 in 66+ Full Bell Lines, 5 finer (7/14). NGC ID# 24SV, PCGS# 86655

4260 **1949-S MS66+ Full Bell Lines PCGS. CAC.** Deep brownish-gold patina appears in a mottled fashion across each side of this lustrous Premium Gem half dollar. Fully struck and well-preserved, with a mere handful of tick marks that are well concealed by the original coloration. Population: 11 in 66+ Full Bell Lines, 5 finer (7/14). NGC ID# 24SV, PCGS# 86655

4261 **1950 MS66+ Full Bell Lines PCGS. CAC.** A crescent of golden-brown and pumpkin-orange toning appears confined to the right obverse margin, while the remaining surfaces are mostly untoned. Each well-struck side is virtually devoid of any impairments. PCGS has seen just nine examples finer (7/14). NGC ID# 24SW, PCGS# 86656

4262 **1950-D MS66 Full Bell Lines PCGS.** Satiny luster embraces each side of this Premium Gem with Full Bell Lines. Despite a mintage of just over 8 million coins, this carefully preserved example is among the finest numerically certified at either PCGS or NGC (7/14), making it appropriate for Registry purposes. NGC ID# 24SX, PCGS# 86657

4263 **1951 MS66+ Full Bell Lines PCGS.** This Registry-quality Premium Gem displays a dusting of pale lavender-blue toning, with deeper splashes of orange-gold and olive color seen over portions of each side. This piece is one of just eight MS66 Full Bell Lines examples to receive a Plus designation from PCGS, and only three are numerically finer (7/14). NGC ID# 24SY, PCGS# 86658

4264 **1951-S MS66+ Full Bell Lines PCGS. CAC.** This high-end Premium Gem seems conservatively graded at the current level. It is sharply struck with intense, shimmering mint luster. Light, attractive patina adorns each side, and the surfaces are nearly blemish-free. Population: 3 in 66+ Full Bell Lines, 3 finer (7/14). NGC ID# 24T2, PCGS# 86660

4265 **1953 MS66 Full Bell Lines PCGS.** Finely peppered lavender-gray color spreads across the entire obverse of this Registry-quality Premium Gem, while the reverse shows deeper orange-gold and lilac hues of the same pattern. The bell lines are well-defined and the surfaces reveal only a few minute ticks. Population: 42 in 66 (3 in 66+) Full Bell Lines, 0 finer (7/14). NGC ID# 24T6, PCGS# 86664

4266 **1953 MS66 Full Bell Lines PCGS.** The issue is known for its problematic strike, and this Full Bell Lines, Registry-quality example is about as sharp as one may hope to find. Dusky violet-gray patination with pastel accents covers the obverse, while the reverse remains largely brilliant. Strong luster shines throughout. Population: 42 in 66 (3 in 66+) Full Bell Lines, 0 finer (7/14). NGC ID# 24T6, PCGS# 86664

4267 **1953-D MS66 Full Bell Lines PCGS. CAC.** PCGS opted to encase this Premium Gem reverse-up to as a testament to its magnificent multicolor patination. The obverse, however, shows only light toning over mostly brilliant and heavily frosted surfaces. The devices reveal sharp detail, and PCGS has seen only two numerically finer submissions (7/14). NGC ID# 24T7, PCGS# 86665

4268 **1953-D MS66+ Full Bell Lines PCGS. CAC.** Radiant, frosty mint luster illuminates rich amber and forest-green peripheral toning around an iridescent ice-blue center on the obverse, while the reverse exhibits deeper shades of champagne, red, and green-gold toning overall. The strike is well-executed, and surface flaws are almost nonexistent. This is one of just six MS66 examples awarded a Plus designation at PCGS, with just two finer (7/14). NGC ID# 24T7, PCGS# 86665

1953-S Franklin Half Dollar, MS67 Prime Registry Set Candidate

4269 **1953-S MS67 PCGS. CAC.** The 1953-S Franklin half dollar claims a mintage of 4.1 million pieces and this spectacular Superb Gem is one of the finest survivors. The design elements are well-detailed and the beautifully preserved surfaces display vibrant mint luster and vivid iridescent shades of orange-gold, greenish-gold, and lavender toning. Population: 13 in 67, 0 finer (7/14). NGC ID# 24T8, PCGS# 6666

1953-S Half Dollar, Toned MS67 Extremely Rare at This Level

4270 **1953-S MS67 PCGS. CAC.** This date is extremely rare in MS67 and unknown any finer. Moreover, no MS67s with Full Bell Lines are known for this date. Radiantly lustrous surfaces display occasional whispers of olive, gold-orange, and battleship-gray on the obverse, but more extensive hues of this color combination run over the reverse. Well-struck and nicely preserved. Population: 13 in 67, 0 finer (7/14). NGC ID# 24T8, PCGS# 6666

4271 **1955 MS66+ Full Bell Lines PCGS.** Dappled olive and amber-gold toning blankets both sides of this boldly struck Premium Gem. PCGS has awarded the Plus designation to just six MS66 examples, and a higher numeric grade to only two (7/14). NGC ID# 24TC, PCGS# 86670

4272 **1955 MS66+ Full Bell Lines PCGS. CAC.** Magnificently toned with mottled shades of copper-orange, cobalt-blue, and cherry-red. Vibrant cartwheel luster flows over well-preserved and sharply struck surfaces, affirming the CAC designation. PCGS has seen six submissions in 66+ Full Bell Lines and only two finer (7/14). NGC ID# 24TC, PCGS# 86670

4273 **1958-D MS66 Full Bell Lines PCGS. CAC.** This is a spectacularly toned Premium Gem with Full Bell Lines. The obverse shows golden-brown patina with jade, cherry-red, and red-orange accents, while the reverse displays only light peripheral toning that blends to brilliant centers. Sharply struck with abundant eye appeal. NGC ID# 24TH, PCGS# 86675

1959 Franklin Half, MS66 Full Bell Lines
Registry-Quality Example

4274 **1959 MS66 Full Bell Lines PCGS. CAC.** Type One Reverse. As per Rick Tomaska (2011): "The 1959-P is especially elusive in MS66 FBL, and ranks among the rarest Franklin dates in this high grade from the 1948-1959 era, surpassed in rarity only by the 1949-D and 1953-S." This beautiful and sharply struck representative features mostly golden-brown and violet toning over the obverse, while the reverse is fully brilliant. Population: 44 in 66 (3 in 66+) Full Bell Lines, 0 finer (7/14). NGC ID# 24TJ, PCGS# 86676

4275 **1961 MS65+ Full Bell Lines PCGS.** Vivid olive-gold and coppery-orange toning encompasses the reverse and much of the obverse periphery, while mottled lavender-gray hues color the remaining regions. The strike is bold, with notable definition seen on Franklin's hair and, of course, the bell lines. This is one of only two Gems to receive a Plus designation from PCGS, with just six numerically finer (7/14). NGC ID# 24TN, PCGS# 86680

4276 **1962 MS65 Full Bell Lines PCGS.** A close examination of the certified population data reveals the scarcity of Full Bell Line examples. While PCGS has seen 665 Gems and 21 coins finer, they have certified only 159 pieces with Full Bell Lines and 6 coins finer (7/14). This is a lightly toned and lustrous example from the penultimate Philadelphia issue. NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half, PR67
Deeply Mirrored Fields

4277 **1950 PR67 PCGS. CAC.** Notorious for its generally substandard strike, the 1950 Franklin half is exceedingly scarce in Superb Gem. This well-struck, CAC-approved representative offers fully brilliant surfaces with deeply mirrored fields and moderate contrast. The Registry Set enthusiast should bid accordingly. Population: 39 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 27VA, PCGS# 6691

4278 **1950 PR65 Cameo PCGS. CAC.** The brilliant silver-white surfaces show considerable field-device contrast on each side, sufficient for the designation, even if not profound. The eye appeal and minimal contact are suggestive of an even finer grade. Population: 102 in 65 Cameo, 40 finer (7/14). NGC ID# 27VA, PCGS# 86691

1952 Half Dollar, PR67 Cameo
Scarce With a Cameo Designation

4279 **1952 PR67 Cameo PCGS. CAC.** Many 1952 Franklin half proofs exhibit boldly contrasted obverses, while the reverses are undeserving of a Cameo designation. As a result, locating Cameo examples can prove challenging. This Superb Gem is entirely brilliant, deeply, mirrored, and immensely appealing. Population: 39 in 67 (1 in 67+) Cameo, 2 finer (7/14). NGC ID# 27VC, PCGS# 86693

4280 **1954 PR67 Ultra Cameo NGC. CAC.** Deeply contrasted fields and devices are the hallmark of this untoned Superb Gem proof with the Ultra Cameo designation. The silver-white surfaces are essentially pristine with excellent eye appeal. Census: 23 in 67 Ultra Cameo, 10 finer (7/14). PCGS# 96695

PROOF KENNEDY HALF DOLLARS

4281 **1976-S Clad PR70 Deep Cameo PCGS.** A delightful coin in every way, with boldly frosted devices and flawless surface preservation. No toning has formed over this rare and unsurpassable representative. Not to be missed for the Registry Set specialist. Population: 39 in 70 Deep Cameo, (7/14).
Ex: Central States Signature (Heritage, 4/2006), lot 3176. NGC ID# 27WP, PCGS# 96811

4282 **1976-S Silver PR70 Deep Cameo PCGS.** An important Bicentennial issue that proves difficult to obtain in this top grade. The devices show significant frost and contrast decidedly against the deeply mirror fields. Entirely brilliant and highly desirable. Population: 76 in 70 Deep Cameo, (7/14).
Ex: Central States Signature (Heritage, 4/2006), lot 3177. NGC ID# 27WR, PCGS# 96812

4283 **1976-S Silver PR70 Deep Cameo PCGS.** Technical perfection defines this Bicentennial Kennedy half. As the Deep Cameo designation suggests, the fields are highly mirrored and the devices thickly frosted. This is an important opportunity for Registry enthusiasts. NGC ID# 27WR, PCGS# 96812

EARLY DOLLARS

4284 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Good 6 PCGS.** A layer of golden-tan and olive-brown patina covers each side of this well-worn Flowing Hair dollar. The BB-27 variety shows a bar that extends from the top curl toward the point of star 5, faintly visible on this coin. The obverse devices are clear while the reverse shows slight marginal softness. Nevertheless, this is a splendid early dollar that is ideal for the collector on a budget. PCGS# 39977

1795 Flowing Hair Dollar, Fine Details B-5, BB-27, Three Leaves

4285 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Scratch — PCGS Genuine. Fine Details.** The familiar Flowing Hair Bolender variety with a mint-made die scratch behind the highest neck curl. A richly toned example with lavender-gray fields, stone-gray motifs, and golden-brown borders. A diagonal pinscratch near Liberty's ear corresponds to the PCGS notation, along with a lesser vertical pinscratch between the 17 in the date. PCGS# 39977

1795 Draped Bust Dollar, Fine 15 B-14, BB-51, Off-Center Bust

4286 **1795 Draped Bust, Off-Center, B-14, BB-51, R.2, Fine 15 PCGS.** Bowers Die State I. A cream-gray representative with somewhat deeper toning in design recesses. Minor adjustment marks (as issued) are noted beneath the right (facing) wing and on the periphery near AMERICA and UNITED. Abrasions are inconsequential aside from occasional tiny reverse rim nicks. PCGS# 39996

1798 Large Eagle, Wide Date Dollar, VF35 Rare Early Die State B-16, BB-110

4287 **1798 Large Eagle, Pointed 9, Wide Date, B-16, BB-110, R.5, VF35 PCGS.** Bowers Die State I. A cream-gray and chestnut-gold representative. Smooth aside from light hairlines and minor reverse rim dings at 3 o'clock and 11:30. A mint-made planchet flaw is noted near the T in LIBERTY. From early dies with only faint cracks near the flag of the 1 in the date. Most examples of B-16 show much more advanced cracks on the lower left obverse. PCGS# 40027

4288 **1799 7x6 Stars, B-12, BB-160, R.3, — Cleaned — ANACS. XF40 Details.** Die State III, with a die crack extending in each direction from the bottom of the 1 in the date. ANACS notes old cleaning, though the surfaces are surprisingly attractive, with blue-tinted gunmetal-gray patina in the fields and lighter colors seen over much of the relief elements. The devices retain strong detail for the grade level, while a few faint adjustment marks are noted amid the reverse stars. PCGS# 40051

4289 **1799 7x6 Stars, B-17, BB-164, R.2, VF30 NGC.** Bowers Die State III. Two dull die lines beneath reverse star 2 attribute this collectible Draped Bust marriage. An attractive midgrade deep gunmetal-gray representative. Noticeable marks are confined to a single vertical line west of the O in OF. PCGS# 40055

1799 7x6 Stars Dollar, VF30 B-21, BB-169

4290 **1799 7x6 Stars, B-21, BB-169, R.3, VF30 PCGS. CAC. B-21, BB-169, R.3.** Die State IV. A dusky cream-gray early dollar with evident wear on Liberty's cheek and forehead, yet luster glimmers from selected protected areas. Abrasions are trivial except for wispy marks near the R in LIBERTY and a faint line beneath the hair ribbon. PCGS# 40060

4291 **1800 B-4, BB-186, R.4 — Obverse Scratched — NGC Details. VF.** Bowers Die State II. A scarce die marriage. A midgrade example with moderately glossy caramel-gold and sky-blue surfaces. A few pinscratches on the right obverse field account for the NGC notation. Softness of strike is confined to the right (facing) wingtip.

1800 Draped Bust Dollar, XF40
B-10, BB-190, Wide Date, Low 8

4292 **1800 Wide Date, Low 8, B-10, BB-190, R.3, XF40 ANACS.** Die State III. This is a highly attractive, problem-free type representative, with original lavender-gray patina and strong detail for the grade. The border dentils are fully defined on each side, and the central devices are boldly impressed. Smooth surfaces and a lack of any adjustment marks makes this piece ideal for the collector who favors old-time patina. PCGS# 40076

4293 **1801 B-3, BB-213, R.3, Fine 12 NGC.** Bowers Die State II. The date is clashed near the ES in STATES. An ocean-blue and olive-gray silver dollar with surprisingly unabraded surfaces. E PLURIBUS UNUM is only faintly evident but some plumage and hair detail remains. PCGS# 40085

1801 Silver Dollar, Choice VF
Better B-4, BB-214 Variety

4294 **1801 B-4, BB-214, R.4, VF35 PCGS.** Bowers Die State III. A gunmetal-gray and chocolate-brown representative of Bolender-4, the scarcest of the four 1801 varieties. In turn, the 1801 is the scarcest collectible date of the Heraldic Eagle type. A handsome piece with an unabraded reverse and a few unobtrusive thin marks on the lower half of Liberty. PCGS# 40086

4295 **1803 Large 3, B-6, BB-255, R.2 — Cleaning — PCGS Genuine. VF Details.** Die State I, as usual. This piece is boldly defined throughout, with strong remaining detail for the grade level. PCGS notes old cleaning, though the smooth surfaces have since acquired varying shades of blue-tinted toning. No adjustment marks are present, and the appeal is better than one might expect for a Details-graded coin. PCGS# 40101

1803 Large 3 Dollar, Choice VF
B-6, BB-255

4296 **1803 Large 3, B-6, BB-255, R.2, VF35 PCGS.** Bowers Die State II. Dove-gray fields contrast with stone-white high points. A well defined Draped Bust type coin. Marks are surprisingly absent except for a small reverse rim ding at 8 o'clock and thin line near the hair ribbon. A slender lamination above the arrows is as made. The 1804 delivery of silver dollars was likely comprised of the B-6 1803. PCGS# 40101

SEATED DOLLARS

1850 Seated Dollar, AU58
Scarce, Low-Mintage Issue

4297 **1850 AU58 NGC.** The 1850 Seated dollar had a small production total of only 7,500 pieces, and is proportionately elusive in all grades today. This near-Mint example displays bold, virtually complete design definition, with deep toning in shades of cobalt-blue, sea-green, maroon, and orange-gold over each side. An excellent example for the collector who appreciates original patina. Census: 33 in 58, 34 finer (7/14). NGC ID# 24YM, PCGS# 6937

1854 Seated Dollar, Mint State Sharpness
Attractive Golden Luster

4298 **1854 — Scratch — PCGS Genuine. Unc Details.** A low mintage of only 33,140 coins ensures the scarcity of the 1854 Seated dollar in all grades, and Mint State examples are decidedly rare. This example exhibits an outstanding, razor-sharp strike, and is free of any signs of circulation. A long, thin scratch forms an arc in the reverse field above the eagle, but is not overly distracting to the naked eye. Soft, golden-gray luster illuminates each side. NGC ID# 24YT, PCGS# 6942

4299 **1856 — Cleaning — PCGS Genuine. AU Details.** The 1856 Seated dollar was only struck to the extent of 63,500 pieces, and survivors are scarce in all grades. This piece is unnaturally bright, due to light cleaning, but has begun to retone light golden and sky-blue hues. The strike is slightly soft on the eagle's left (facing) leg and on Liberty's upper torso, not uncommon for this issue. NGC ID# 24YV, PCGS# 6944

4300 **1860 AU55 PCGS.** This attractive Choice AU specimen retains much of its original mint luster and only slight traces of wear show on the well-detailed design elements. A few scattered minor abrasions dolittle to detract from the overall presentation. Population: 22 in 55, 92 finer (7/14). NGC ID# 24Z2, PCGS# 6949

1860-O Dollar, Minimally Abraded MS62+ Above-Average Strike

4301 **1860-O MS62+ NGC. CAC.** The large mintage of 515,000 pieces makes this date readily available and a top choice of type collectors. Occasional whispers of light olive-tan visit both sides of this high-end MS62 specimen. The design elements are better struck than usually seen on this issue, though the hair on Liberty's head is a touch soft. Some light marks are fewer and less severe than ordinarily encountered for this date and for the designated grade. NGC ID# 24Z3, PCGS# 6950

1862 Seated Dollar, Unc Details Only 11,540 Coins Struck

4302 **1862 — Cleaning — PCGS Genuine. Unc Details.** Aside from the 1851 and 1852 dates, this is the lowest-mintage Seated dollar issue from the Philadelphia Mint (11,540 coins). Boldly struck devices and moderately reflective fields generate a prooflike appearance, and original mint luster remains in the protected regions. Small ticks and wispy marks from the noted cleaning are scattered over each side, but they do not overly detract. NGC ID# 24Z5, PCGS# 6952

1862 Seated Dollar, Unc Details Scarce, Low-Mintage Issue

4303 **1862 — Cleaning — PCGS Genuine. Unc Details.** The 1862 Seated dollar had a scant mintage of only 11,540 pieces and ranks among the scarcer issues in the series overall. This unworn example displays unnaturally bright color due to past cleaning, but retains bold design definition and ample mirroring in the fields. A few tinges of apricot toning are seen periodically around the peripheral regions. NGC ID# 24Z5, PCGS# 6952

4304 **1864 — Cleaning — PCGS Genuine. AU Details.** An elusive Civil War-era Seated dollar, the 1864 is widely known to be a rarity in Mint State condition. This piece exhibits bright, silvery surfaces due to past cleaning, but retains nearly complete detail. A light golden ring surrounds the peripheries, and there are remnants of semiprooflike mirroring in the fields. NGC ID# 24Z7, PCGS# 6954

4305 **1869 AU55 PCGS.** The majority of coins from this Seated Liberty issue were exported overseas. Despite a mintage of 423,000 pieces, finding examples in higher grades proves difficult. This Choice About Uncirculated representative exhibits violet-gray patina and iridescent accents over each side. Slight friction appears throughout, and a minor graze extends from the eagle's left (facing) talon to the O in DOL. NGC ID# 24ZC, PCGS# 6962

1871-CC Seated Dollar, XF Sharpness Only 1,376 Pieces Struck

4306 **1871-CC — Holed, Plugged — PCGS Genuine. XF Details.** With a scant mintage of only 1,376 coins, the 1871-CC Seated dollar is understandably scarce and highly sought-after in all grades. This lightly circulated example exhibits bright, silvery-gray surfaces and strong detail. A small hole between star 7 and Liberty's head is noticeably plugged, with some reengraving of the surrounding dentils and letters. NGC ID# 24ZH, PCGS# 6967

1872-CC Dollar, XF Details
A Collectible Representative

4307 **1872-CC — Filed Rims — PCGS Genuine. XF Details.** Along with the 1871 and 1873 Carson City Seated dollar issues, the 1872-CC is one of the key dates in the series because of its low mintage (3,150 coins). This lightly circulated example displays silver-gray patina and much interior detail remaining. An expected number of abrasions are scattered over each side, and the noted rim filing hardly does anything to affect the desirability of this coin. NGC ID# 24ZK, PCGS# 6969

4308 **1872-S XF40 PCGS.** A dove-gray example with smooth surfaces that are only lightly marked on both sides. A scarce low-mintage date from the San Francisco Mint. NGC ID# 24ZL, PCGS# 6970

1873-CC Seated Dollar, Fine Sharpness
Only 2,300 Pieces Produced

4309 **1873-CC — Plugged — NGC Details. Fine.** The year 1873 was the final year of the Seated Liberty silver dollar, and production at the Carson City Mint totaled only 2,300 coins before coinage of the new Trade dollar commenced. Survivors of the Seated Liberty variant are scarce in any condition, and highly sought-after by Carson City specialists. This piece shows signs of old cleaning over each side, with the remnants of original gunmetal toning in the crevices. NGC notes that the coin has been plugged, though the signs are not immediately obvious. NGC ID# 24ZN, PCGS# 6972

PROOF SEATED DOLLAR

1866 Motto Seated Dollar, PR62 Cameo
Deeply Mirrored Fields

4310 **1866 Motto PR62 Cameo NGC.** Issued the year in which IN GOD WE TRUST was added to the reverse, proof 1866 Seated Liberty dollars are highly sought-after by collectors, especially with full cameo contrast. This sharply struck example displays remarkably deep mirroring in the fields with softly frosted design elements. Deep lavender and green-gold hues melt into the fields beneath pleasing golden-gray patina overall. A small patch of surface marks in the right obverse field limits the grade, but hardly detracts from the overall visual appeal. PCGS# 87014

TRADE DOLLARS

4311 **1873-CC Chop Mark AU53 PCGS.** Type One Obverse and Reverse. The 1873-CC Trade dollar is a better date in and of itself, with a mintage of only 124,500 pieces, but an array of chop marks (10 in all) adds an additional degree of intrigue to the present example. Soft, golden-gray toning blankets each side, and the design elements are sharply struck. Population of chop-marked examples: 1 in 53, 4 finer (7/14). PCGS# 87032

4312 **1874-CC AU55 PCGS.** Micro CC. Period after FINE. Deep aquamarine and golden hues reside beneath a blanket of gunmetal-gray toning on each side, while the design elements are nearly complete, with just a trace of high-point wear. A Choice example of this Carson City issue, ideal for the collector who appreciates original patina. NGC ID# 2532, PCGS# 7035

4313 **1875-S MS62 PCGS.** Type One Reverse. Large S. Brilliant except for a blush of tan toning on the right margins. This lustrous Trade dollar has a good strike aside from the right (facing) claw. Minor field marks account for the grade. NGC ID# 2536, PCGS# 7039

4314 **1875-S/CC Chop Mark PCGS. FS-501.** Type One Obverse and Reverse. Middle die state. The second C in the underlying mintmark is visible in the field to the right of the primary S. This example of this highly popular Guide Book variety clearly spent many years in the Oriental trade, as evidenced by some 19 different chop marks (mostly on the obverse). Pale silvery-gray luster blankets both sides. The devices exhibit a degree of flattening from the repeated punching of chop marks, though the strike is otherwise sharp. PCGS# 87040

4315 **1877-CC — Questionable Color — PCGS Genuine. Unc. Details.** Rich autumn-brown and blue-green toning alternates across this satiny and sharply struck Carson City Trade dollar. Lightly hairlined, and unobtrusive marks are noted near star 5. NGC ID# 253D, PCGS# 7045

1878-CC Trade Dollar, AU Details
Low-Mintage Carson City Issue

4316 **1878-CC — Cleaning — PCGS Genuine. AU Details.** Type Two Obverse and Reverse. The final Trade dollar produced at the Carson City Mint, the 1878-CC also boasts a low mintage of only 97,000 pieces and is proportionately elusive in high grades. This piece is lightly cleaned, but has since acquired pale golden-gray patina. A touch of high-point wear is seen over each side, but the details remain essentially complete. NGC ID# 253F, PCGS# 7047

PROOF TRADE DOLLARS

1875 Trade Dollar, PR63 Cameo
Type Two Reverse
No Berry Beneath Claw

4317 **1875 PR63 Cameo PCGS.** Type Two Reverse. A nicely contrasted Select proof, boldly struck with the exception of a slight weakness on stars 7 through 13. The brilliant, deeply mirrored fields emphasize the attractive, frosted devices. Delicate field hairlines and a curving, thin mark above Liberty's knee to the branch stem define the assigned grade, yet detract little from the eye appeal of this untoned proof. Population: 20 in 63 Cameo, 29 finer (7/14). PCGS# 87055

4318 **1876 PR62 Cameo PCGS.** Type One Obverse. Type Two Reverse. This stone-white specimen has pleasing frost on the motifs. The obverse is moderately hairlined and the reverse is well preserved. A popular Centennial Year proof date. PCGS# 87056

1878 Trade Dollar, PR64 Cameo
Boldly Contrasted, Mirrored Surfaces

4319 **1878 PR64 Cameo PCGS.** This dramatic proof is a study in chiaroscuro, with alternating shades of light and dark toning emphasizing the white-on-black contrast between the frosted motifs and the deeply mirrored fields. The overall effect is compelling. A few light marks define the near-Gem grade, but this distinctive proof is impressive technically Choice. One of 900 pieces minted for this proof-only issue. PCGS# 87058

4320 **1880 PR60 PCGS.** Type Two Obverse and Reverse. This is a sharply detailed and deeply mirrored example of this proof-only issue, with a scattering of minor hairlines and contact marks in the field that define the grade. A few hints of pale gold toning visit the surfaces. NGC ID# 27YS, PCGS# 7060

4321 **1880 PR61 PCGS Secure.** Type Two Obverse and Reverse. A thin ring of golden peripheral toning surrounds bright, deeply mirrored fields on this otherwise untoned proof Trade dollar. Liberty's head and the surrounding stars are not fully defined, though the strike is otherwise pleasing. NGC ID# 27YS, PCGS# 7060

4322 **1880 PR62 NGC.** From a generous proof-only mintage of 1,987 pieces, this PR62 example is sharply detailed in most areas, with just a touch of softness on some star centers. Delicate shades of gold and blue toning blanket the lightly marked reflective surfaces. NGC ID# 27YS, PCGS# 7060

1882 Trade Dollar, Sharp PR64 Cameo
Beautiful Golden Toning

4323 **1882 PR64 Cameo PCGS.** Type Two Obverse and Reverse. This proof-only issue was produced to the extent of 1,097 pieces, but few Cameo representatives are known finer than this near-Gem example. A thin veil of vanilla-gold toning graces glassy fields and frosty devices on each side, with small splashes of cloudy-tan and deep midnight-blue color seen periodically around the margins. The design elements are boldly struck, and the surfaces are void of any noticeable marks. The eye appeal is exceptional. Population: 48 in 64 (2 in 64+) Cameo, 17 finer (7/14). PCGS# 87062

1883 Trade Dollar, PR63 Cameo
Fully Struck, Untoned Proof

4324 **1883 PR63 Cameo PCGS.** Strongly mirrored fields surround the medium-contrasted motifs of this brilliant proof, the final year of public sales for proof Trade dollars. A proof-only mintage of 979 pieces brought a quiet end to the series, although in numismatic circles the surreptitious 1884 and 1885 issues (both extreme rarities and unofficial as far as the Mint was concerned) are much-discussed to this day. The present 1883 coin is fully struck and limited only by a few dark spots on the lower reverse and some minimal cloudiness where delicate hairlines gather. Population: 26 in 63 Cameo, 57 finer (7/14). PCGS# 87063

End of Session Two

SESSION THREE

PATTERNS

1863 Judd-299 Indian Cent, PR63 Brown Transitional Bronze Pattern

4325 **1863 One Cent, Judd-299, Pollock-359, Snow-PT1, R.3, PR63 Brown NGC.** Struck from regular issue, plain edge dies, but in bronze instead of copper-nickel. The Indian cent alloy switched from bronze to copper-nickel during 1864. The dies exhibit medallic alignment, as usual for Judd-299. The present fully struck specimen offers deeply blended forest-green and gunmetal-gray toning with glimpses of the initial fire-red at the borders. PCGS# 60454

1863 GOD OUR TRUST Half Dollar in Silver Judd-340, PR64

4326 **1863 Half Dollar, Judd-340, Pollock-412, Low R.6, PR64 PCGS. CAC.** Virtually identical to the adopted design with the motto GOD OUR TRUST included in the upper reverse field without a banner or scroll. Struck in silver with a reeded edge. The fields are bright and deeply reflective, and the toning is irregular with deep streaks of blue and gray on the obverse and more traditional light blue central color on the reverse surrounded by pale rose. PCGS# 60502

1867 Coronet Five Cent Pattern in Nickel Judd-570, PR65 Ultra Cameo

4327 **1867 Five Cents, Judd-570, Pollock-638, 640, R.5, PR65 Ultra Cameo NGC.** A bust of Liberty wearing a coronet and facing left dominates the obverse design. UNITED STATES OF AMERICA is around the periphery with the date below. The top of the 7 is distant from the curl. The reverse shows 5 CENTS centered within a laurel wreath with the motto IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. This is a relatively plentiful pattern variety with more than 30 examples known, according to the R.5 rarity rating. In addition to these nickel patterns, this die combination was also struck in copper, with only four or five known. The present piece is a remarkable, nearly brilliant, light gray proof, with exceptional cameo contrast on both sides. A few tiny spots and faint contact marks on each side are of little concern to the overall presentation.
Ex: FUN Signature (Heritage, 1/2009), lot 1669. PCGS# 60780

1869 Standard Silver Quarter in Silver Judd-734, PR65 Cameo Exceptional Eye Appeal

4328 **1869 Standard Silver Quarter, Judd-734, Pollock-815, High R.6, PR65 Cameo NGC.** Liberty, wearing a headband inscribed with LIBERTY in raised letters and a star at the front, faces right. A plain ribbon gracefully flows through Liberty's hair and across her shoulders. UNITED STATES OF AMERICA is at the upper rim, with IN GOD WE TRUST in a ribbon below. The reverse features 25 / CENTS within an oak and laurel wreath, with STANDARD SILVER above and the date, 1869, below. Struck in silver with a plain edge. This Gem Cameo proof showcases profound depth of mirroring in the fields and razor-sharp devices. A halo of lemon-gold toning surrounds the periphery, granting just the right touch of warmth to the immense visual appeal of this virtually flawless pattern. PCGS# 800188

1869 Standard Silver Quarter in Copper
Judd-736, PR65 Red and Brown
Ex: Lemus Collection

4329 **1869 Standard Silver Quarter Dollar, Judd-736, Pollock-817, R.7, PR65 Red and Brown NGC.** Ex: Lemus Collection. On the obverse a right-facing Liberty wears a headband displaying LIBERTY in raised letters and a single star at the front. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is at the lower rim. Struck in copper with a plain edge.

Pattern specialists agree that less than 12 Judd-736 patterns exist in all grades. Both of the copper pattern issues bearing this design—the reeded edge and plain edge variants—are rare, yet the plain edge version offered here appears to be the slightly less available, based on the infrequency of auction appearances and the combined population data of NGC and PCGS.

Teetering on the edge of a full Red designation, this specimen was likely limited by areas of darker toning in the right obverse field and on the high points of Liberty. The surfaces, otherwise, are pleasing and fully deserving of a Gem proof determination. Before being encapsulated, the current offering was documented at 85.9 grains with a diameter of 0.899 inches. The die alignment is approximately 170 degrees (Pollock, 1994).

Ex: Lee Collection (Superior Galleries, 9/1988), lot 2843; FUN Signature (Heritage, 1/2009), lot 1708. PCGS# 70963

1869 Standard Silver Quarter, PR65 Cameo
Judd-737 in Aluminum

4330 **1869 Standard Silver Quarter, Judd-737, Pollock-818, High R.7, PR65 Cameo PCGS Secure.** Standard Silver design with the bust of Liberty facing right, wearing a headband with LIBERTY inscribed upon it. UNITED STATES OF AMERICA surrounds most of the obverse margin with the motto set on a scroll below the bust of Liberty. On the reverse, 25 CENTS is surrounded by a wreath of oak and laurel leaves, and around the periphery is STANDARD SILVER 1869. Struck in aluminum with a reeded edge. A minimally toned Gem with reflective fields. The strike shows incompleteness on the IB in LIBERTY and the EN in CENTS. Virtually as made, with laminations near the UN in UNITED and about the reverse periphery. PCGS# 511358

1869 Standard Silver Half Dollar in Silver
Judd-743, PR66

4331 **1869 Standard Silver Half Dollar, Judd-743, Pollock-824, High R.6, PR66 NGC.** A bust of Liberty faces right, wearing a cap ornamented with large stars. A ribbon inscribed LIBERTY rests on her shoulder. IN GOD WE TRUST resides within a scroll below, and UNITED STATES OF AMERICA encircles her head. On the reverse, STANDARD SILVER is centered above the familiar wreath of cotton and corn. 50 CENTS is placed within the wreath; the date is beneath. William Barber's initial B is recut above the L in LIBERTY, which is repunched. Struck in silver with a plain edge. This beautifully preserved Premium Gem proof shows blended hues of green-gold and lavender-blue beneath a thin veil of gunmetal-gray toning on each side. The fields are deeply reflective and the devices are well brought up. PCGS# 60971

1873 Trade Dollar Pattern, PR61
Judd-1281 in Silver, Bailly Design

4332 **1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR61 PCGS.** A J.A. Bailly rendition of Liberty faces left with the date below and 13 stars around. Her hair is coiled and displays a sprig. The reverse has the legend layout of the issued Trade dollar except E PLURIBUS UNUM lacks a scroll and is set directly into the field. The eagle and shield motif appears identical to that of the Amazonian Judd-1202 half dollar. Struck in silver with a reeded edge. The present brilliant specimen displays slight cameo contrast and has a well struck obverse. Portions of the eagle are lightly brought up, usual for Judd-1281. Delicate field hairlines determine the grade. PCGS# 61566

(1999) Martha Washington Dollar-Size Medal
Judd-2185, Copper-Zinc Alloy, MS67

4333 **(1999) Martha Washington Dollar, Judd-2185, Pollock-Unlisted, Low R.7, MS67 NGC.** This 1759-dated medal was struck with dies prepared in 1965 for the purpose of testing different coinage alloys. The Judd-2185 piece, with a plain edge, was produced in 1999 in an alloy of 71% copper, 25% zinc, 2% nickel, and 1% manganese, likely a test composition for the Sacagawea dollars that debuted the following year with a similar alloy. As a result, the piece is roughly the same size and color as the later regular issue dollars. Listed in the Judd book as Low R.7, but it is described as a medal and not technically a pattern. The piece is virtually perfect in strike and preservation. PCGS# 511836

(1999) Martha Washington Dollar-Size Medal
Judd-2188, Copper-Zinc Alloy, MS67

4334 **(1999) Martha Washington Dollar, Judd-2188, Pollock-Unlisted, Low R.7, MS67 NGC.** This 1759-dated dollar-size medal was struck in 1999 with a Martha Washington design that had been used since 1965 to test various coinage alloys. This particular piece was struck with a composition of 75% copper, 22% zinc, and 2% nickel, and bears a color similar to that of the Sacagawea dollars that debuted the following year in 2000. This piece has die markings (as made) in the obverse fields to the left and right of the portrait, seen in the form of small raised dots that form rather crudely shaped N's. The piece is well-struck and nearly pristine. PCGS# 511836

GOLD DOLLARS

1849-D Gold Dollar, AU55
First-Year Dahlonega Type Coin

4335 **1849-D AU55 PCGS. Variety 1-B.** The scarcer of the two known varieties, with the mintmark centered between the ribbon ends. As a date, the 1849-D is arguably the most available gold dollar from the Dahlonega Mint, as many examples from the 21,588-coin mintage were likely saved as novelties. Its first-year issue status, however, maintains its popularity today, and any problem-free example will find a ready home in a fine southern gold collection or type set. This piece is boldly struck and retains nearly complete detail, while the surfaces exhibit original olive-gold patina and there are tinges of luster remaining in the recesses. NGC ID# 25BD, PCGS# 7507

4336 **1853 MS64 PCGS. CAC.** The 1853 gold dollar had a mintage in excess of 4 million coins, and is proportionately available in Mint State today. This piece, however, is unusually high-end for the grade, with needle-sharp design elements and remarkably few abrasions of any sort. Green and rose-gold hues blend across each side, with frosty underlying mint luster. NGC ID# 25BU, PCGS# 7521

4337 **1853 MS64 PCGS. CAC.** Expertly struck with bright satiny luster and appealing honey-gold toning across each side. There are a couple of stray nicks in the left obverse field, but these are probably too small to see without a magnifier. A high-end example of this earlier, common date issue.
Ex: Long Beach Signature (Heritage, 5/2008), lot 2914. NGC ID# 25BU, PCGS# 7521

4338 **1853 MS64+ PCGS. CAC.** A boldly struck Type One representative, this Plus-graded near-Gem boasts frosty green-gold luster and sharp motifs. A few minute, grade-defining ticks are noted on each side, though the eye appeal is hardly impeded. NGC ID# 25BU, PCGS# 7521

4339 **1854-S AU58 NGC.** Here is a partially lustrous specimen from the first year of San Francisco Mint operations, and one of just seven dates in the gold dollar series (1849-1889), to emanate from that facility. This satiny piece is nicely struck and exhibits a slightly muted, straw-gold color on both sides.
Ex: ANA Signature (Heritage, 4/2006), lot 1536. NGC ID# 25C2, PCGS# 7527

4340 **1854 Type Two MS61 NGC.** A lovely straw-gold example with boldly impressed design elements and shimmering, satiny mint luster. Unabraded with a few wispy hairlines in the fields that seemingly prevent a finer grade assessment. NGC ID# 25C3, PCGS# 7531

1855-O Gold Dollar, AU55
Type Two New Orleans Issue

4341 **1855-O AU55 NGC. Variety 2.** The New Orleans Mint produced 55,000 gold dollars in 1855, less than one-tenth the number of coins struck in Philadelphia. Additionally, this is the only Type Two issue from the Louisiana facility. The yellow-gold surfaces are partially lustrous and show good detail on the lower wreath, although LIBERTY is only partially visible on the obverse. NGC ID# 25C7, PCGS# 7535

1855-O Gold Dollar, AU58
Only Type Two O-Mint Issue

4342 **1855-O AU58 NGC. Variety 2.** The sole Type Two New Orleans issue, the '55-O has a low mintage and becomes very scarce in the present quality. The apricot-gold surfaces are void of remotely relevant marks, and wear is mostly relegated to the curls above the ear. The legends and wreath shimmer with luster. NGC ID# 25C7, PCGS# 7535

1861 Gold Dollar, MS65
Rarely Seen Finer

4343 **1861 MS65 PCGS.** Despite a substantial mintage of over half a million pieces, even the 1861 gold dollar becomes elusive in Gem. This lovely survivor has deep sun-gold surfaces with occasional lilac accents. Strongly lustrous and well-defined. Population: 40 in 65, 10 finer (7/14).
Ex: ANA Signature (Heritage, 3/2003), lot 6173; Long Beach Signature (Heritage, 5/2008), lot 2930. NGC ID# 25CU, PCGS# 7558

4344 **1873 Closed 3 MS61 NGC.** Semireflective, as usually seen for this low-mintage issue. Striking weakness is noted in the middle of the date but the overall eye appeal is decent for the grade. Census: 21 in 61, 56 finer (7/14). NGC ID# 25DA, PCGS# 7574

4345 **1883 MS65 PCGS.** The 1883 gold dollar had a mintage of only 10,800 pieces, but enough Mint State examples were saved to the make the date available for type purposes. This Gem example exhibits rich apricot-gold luster and sharp design elements. A few minute ticks limit the grade, but hardly inhibit the eye appeal. Housed in an old green label holder. NGC ID# 25DM, PCGS# 7584

4346 **1888 MS65 NGC.** Struck from slightly rotated dies, this lovely Gem displays a bold strike overall, although some weakness is present at the ERT of LIBERTY. The surfaces are frosty and lustrous. From a mintage of 15,501 coins. NGC ID# 25DT, PCGS# 7589

4347 **1888 MS65 PCGS. CAC.** Satiny peach-gold luster graces nearly unabraded surfaces on each side of this Gem type coin. The design elements are boldly impressed, and the eye appeal is equally impressive. NGC ID# 25DT, PCGS# 7589

4348 **1888 MS66 PCGS. CAC.** Radiant yellow-gold mint bloom illuminates carefully preserved surfaces on this boldly struck Premium Gem example. PCGS has encapsulated 49 numerically finer representatives (7/14). NGC ID# 25DT, PCGS# 7589

4349 **1889 MS66 PCGS.** The Philadelphia Mint accomplished a mintage of nearly 29,000 gold dollars in 1889, the final year of issue for the type. A number of high-grade examples survive today, making the date ideal for type purposes. This frosty Premium Gem displays shimmering yellow-gold luster and sharp design definition.
From The Valley View Life Collection, Part Two. NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, MS67
Final-Year, Type Three Issue

4350 **1889 MS67 PCGS.** A final-year issue from a mintage of 28,500 coins, the 1889 Type Three gold dollar is frequently encountered in type collectors' collections. This remarkable Superb Gem representative features luscious peach-gold coloration and frosty mint luster. PCGS has certified only three submissions in higher numeric grades (7/14). NGC ID# 25DU, PCGS# 7590

1889 Type Three Gold Dollar, MS67
Rarely Seen Finer

4351 **1889 MS67 NGC.** The gold dollar series came to an end in 1889 with a final-issue mintage of 28,950 coins. Locating comparable Superb Gems can be accomplished with relative ease, though coins in finer condition are very rare. This gorgeous piece features well-struck design motifs and smooth surfaces. Peach-gold color and lilac accents paint each side, and clash marks appear throughout. NGC has certified 16 numerically finer submissions (8/14). NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, MS67
End of the Gold Dollars

4352 **1889 MS67 PCGS Secure.** Always popular and the final year of the gold dollar type, this boldly struck Superb Gem is frosty and lustrous. Free of die clash and postmint abrasions, the yellow-gold patina is tinged with green overtones amid the swirling luster. A light die crack follows the curve of the wreath on the reverse. PCGS has certified just three numerically finer pieces. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLAR

4353 **1881 PR60 NGC.** Only 87 proofs were produced this year, but the large number of prooflikes has confused the picture of availability of 1881 proof gold dollars. The mirrored fields have taken on rich orange-gold patina and a mildly scuffy appearance. A few trivial contact marks are noted in the reverse field. Census: 1 in 60, 1 finer (7/14).
Ex: *Dallas Signature (Heritage, 12/2004), lot 6483.* NGC ID# 25ER, PCGS# 7631

CLASSIC QUARTER EAGLES

4354 **1834 AU58 NGC. Breen-6138, Variety 1, R.1.** The sole die marriage of the Small Head subtype, which introduces the Classic series. The present straw-gold Borderline Uncirculated example has a good strike and only two remotely relevant marks, on the fields above the date and southwest of the beak. NGC ID# 25FS, PCGS# 7692

4355 **1835 AU58 PCGS. Breen-6141, Variety 6, R.2.** A widely spaced AM in AMERICA identifies this distinctive Classic Head die marriage. The reverse die was previously used on the 1834 Variety 2. A partially lustrous orange-gold type coin. Well defined and problem-free with distributed minor contact. NGC ID# 25FT, PCGS# 7693

4356 **1836 Block 8 AU55 NGC. Breen-6144, Variety 15, R.2.** Second Head of 1837. A still-lustrous, Choice AU representative, this piece displays original green-gold patina over much of each side, with faint orange overtones in the recesses around the borders. The central design elements are not fully defined. PCGS# 97694

1836 Quarter Eagle, MS61
Variety 15, Block 8

4357 **1836 Block 8 MS61 NGC. Breen-6144, Variety 15, R.2.** Second Head of 1837. The Block 8 variety is slightly scarcer than the Script 8; Mint State representatives are elusive, and those grading finer than MS62 are rare. This piece is pleasing for the grade, with lustrous green-gold patina and minimal abrasions. The central design elements are softly impressed, as is seen on many examples of this issue. NGC has certified 35 numerically finer Block 8 representatives (7/14). PCGS# 97694

4358 **1838 AU55 PCGS. Breen-6146, Variety 19, R.2.** This is an originally patinated, well-defined, Choice About Uncirculated example of the short-lived Classic Head type. Only a brush of wear is observed upon close examination, and the surfaces are free of any major consequential abrasions.
From The Valley View Life Collection, Part Two. NGC ID# 25FY, PCGS# 7696

LIBERTY QUARTER EAGLES

4359 **1840 AU50 NGC.** A pleasing example of this elusive Philadelphia issue, this coin exhibits rich green-gold patina over both sides, with unusually clean surfaces. The strike is soft on the central devices, as is typical of this early Liberty Head issue. Census: 18 in 50, 46 finer (7/14). NGC ID# 25GA, PCGS# 7717

4360 **1844-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** A yellow-gold Charlotte quarter eagle with ample luster and a fairly sharp strike. Parallel hairlines emerge upon rotation beneath a lens. A minor lamination is noted beneath OF and at the nearby wingtip. NGC ID# 25GU, PCGS# 7735

4361 **1849-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** A meager mintage of 10,220 pieces ensures the rarity of the 1849-C. The present yellow-gold example has only a hint of wear but is glossy from cleaning. Minor pinscratches are noted near the beak and above the date. A few dentils are repaired near 6 o'clock on the reverse. NGC ID# 25HE, PCGS# 7753

4362 **1851-C — Rim Filing — NGC Details. AU. Variety 1.** The obverse rim is filed between 9:30 and 10:30, partly obscured by one of the four tabs of the NGC holder. The surfaces appear minutely granular but are free from consequential marks. A small roundish strike-through is noted on the base of Liberty's neck.
Ex: FUN Signature (Heritage, 1/2011), lot 6717.

4363 **1851-D — Improperly Cleaned — NGC Details. AU. Variety 15-N.** This is a more challenging Dahlonega issue, with a mintage only 11,264 pieces and an estimated survival of just 100 to 125 coins in all grades. This example is lightly cleaned, but retains a pleasing green-gold patina and is only minimally abraded. The eagle's talons exhibit some typical weakness, though the devices are otherwise well-defined. NGC ID# 25HN, PCGS# 7761

4364 **1851-O AU58 NGC. Variety 1.** Splendid original orange-gold and olive-green toning embraces this partially lustrous near-Mint New Orleans type coin. Marks are inconsequential except for a slender line beneath the left (facing) wing. The date was initially entered with a downward slope, then entered correctly. NGC ID# 25HP, PCGS# 7762

4365 **1852 MS64 NGC.** A razor-sharp strike and carefully preserved, lustrous surfaces are attributes of this near-Gem No Motto quarter eagle. The issue's mintage of over 1.1 million coins makes it plentiful in lower grades. However, coins as fine as this are scarce, and NGC has seen only 8 numerically finer submissions (7/14). NGC ID# 25HR, PCGS# 7763

4366 **1862 AU53 PCGS.** The 1862 quarter eagle had a mintage in excess of 98,000 pieces, but Mint State survivors are elusive and, when found, are usually heavily abraded. This is a well-detailed AU representative, with soft green-gold color and only minor surface abrasions, none of which are readily noticeable. Population: 10 in 53, 58 finer (7/14). NGC ID# 25JZ, PCGS# 7796

1887 Quarter Eagle, MS64
Only One Finer at PCGS

4367 **1887 MS64 PCGS.** With a mintage of only 6,106 coins, the 1887 quarter eagle issue offers many examples with attractive prooflike mirroring in the fields, and this piece does not disappoint. The devices are sharply struck and rich peach-gold color is seen over each side. Unlike some other low-mintage issues of the period which managed to survive in substantial numbers, the 1887 is rarely seen at this grade level, and finer pieces are almost unknown. Population: 18 in 64, 1 finer (7/14). NGC ID# 25LB, PCGS# 7839

4368 **1893 MS65 PCGS.** All quarter eagles from 1880 to 1899 were minted at Philadelphia. The highest circulation-strike production that period occurred in 1893, when 30,000 pieces were coined. This Gem has brilliant, satiny luster with bright yellow-gold surfaces and full design definition. Population: 51 in 65, 21 finer (7/14). NGC ID# 25LH, PCGS# 7845

1894 Quarter Eagle, MS64
Seldom Seen Finer

4369 **1894 MS64 PCGS.** The 1894 quarter eagle is widely popular for its low mintage of only 4,000 coins, and is furthermore rare in Gem and finer grades. This highly lustrous, Choice example showcases rich honey-gold color over moderately reflective fields, while the design elements are bold, and surface abrasions are minimal. Population: 24 in 64 (4 in 64+), 22 finer (7/14).
From The Valley View Life Collection, Part Two. NGC ID# 25LJ, PCGS# 7846

4370 **1896 MS65 NGC.** Frosty green-gold mint luster complements sharply impressed design motifs on each side of this Gem representative. Close study with a lens reveals a few minute disturbances in the luster on Liberty's cheek, though these are undetectable to the unaided eye. Census: 60 in 65 (1 in 65+, 1 in 65 ★), 35 finer (7/14). NGC ID# 25LL, PCGS# 7848

1898 Quarter Eagle, MS67
Tremendous Eye Appeal

4371 **1898 MS67 NGC.** The mintage is small for this Philadelphia quarter eagle, but collectors have largely ignored any claims of scarcity because several Superb Gem coins exist. This example seemingly exceeds most others, however, thanks to a bold strike and the tremendous eye appeal, color, and surface quality. There are no copper spots or serious marks anywhere on the coin, although two or three tiny grazes appear on Liberty's portrait. Mint luster rolls over the frosted surfaces, which display orange-gold coloration with plentiful lilac accents. Census: 36 in 67 (3 in 67+, 4 in 67 ★), 0 finer (7/14). NGC ID# 25LN, PCGS# 7850

4372 **1900 MS65 PCGS.** This popular, turn-of-the-century quarter eagle issue (67,000 coins) is frequently seen in type collections because of its availability in high grades. The frosty, lemon-gold surfaces of this Gem example are sharply detailed with slight granularity toward the reverse peripheries. NGC ID# 25LR, PCGS# 7852

4373 **1903 MS65 PCGS.** This lovely sun-gold Gem displays a few scattered freckles of golden-rose toning that are most conspicuous near the eagle's beak. The coin is fully struck and lustrous, with a smooth reverse and only minor obverse grazes. NGC ID# 25LU, PCGS# 7855

4374 **1903 MS66 PCGS. CAC.** This frosty high-end type coin displays strong yellow-gold luster and bold motifs. Surface abrasions are almost nonexistent, as the grade suggests, though a few unobtrusive coppery alloy spots are noted on the upper obverse. NGC ID# 25LU, PCGS# 7855

4375 **1905 MS65 PCGS.** The 1905 is one of the more readily available, late-date quarter eagles of the Liberty Head design, and is ideal for type representation. This frosty, yellow-gold Gem displays full mint bloom and sharp devices. The surfaces are seemingly perfect to the unaided eye, though a loupe reveals are few tiny, grade-consistent ticks.
From The Valley View Life Collection, Part Two. NGC ID# 25LW, PCGS# 7857

4376 **1905 MS65 NGC.** This available Liberty Head quarter eagle exhibits softly frosted luster and yellow-gold surface coloration with fully struck design features, making it an ideal type representative. A few tiny marks are peppered throughout, and a small copper alloy spot is noted adjacent to star 1. NGC ID# 25LW, PCGS# 7857

4377 **1905 MS65 PCGS. CAC.** This Gem representative displays vibrant yellow-gold mint frost over nearly unabraded surfaces. A well-struck type coin, with a few faint, coppery alloy spots on the obverse attesting to its originality. NGC ID# 25LW, PCGS# 7857

INDIAN QUARTER EAGLES

4378 **1911 MS64+ PCGS. CAC.** The satiny surfaces of this high-end example display appealing apricot and antique-gold toning, along with accents of rose in the fields under close examination. A well-struck and carefully preserved example of this popular date issue, much more affordable than the key 1911-D. NGC ID# 2893, PCGS# 7942

4379 **1911-D Weak D XF40 PCGS.** The 1911-D quarter eagle boasts a low mintage of only 55,680 coins, and ranks as the undisputed key to the series. Warm orange-gold patina blankets smooth surfaces on each side of this lightly circulated example; certified as Weak D, though the mintmark is plainly visible with low-power magnification.
From The Valley View Life Collection, Part Two. PCGS# 7954

4380 **1911-D Weak D — Cleaned — ANACS. AU55 Details.** ANACS notes old cleaning, though the surfaces retain a pleasing honey-gold patina. Wear is minimal, and abrasions are similarly sparse, save for a small cut in the field to the left of the eagle's head. As designated on the holder, this piece is of the Weak D variety.
From The Valley View Life Collection, Part Two. PCGS# 7954

4381 **1911-D Strong D — Cleaning — PCGS Genuine. AU Details.** A richly detailed apricot-gold representative of the popular series key. High point wear is minimal, and there are no mentionable marks. The mintmark is sharp and the surfaces are only mildly glossy. NGC ID# 2894, PCGS# 7943

1911-D Two and a Half, AU55
Bold Mintmark

4382 **1911-D AU55 NGC.** Bold mintmark. This is an attractive Choice About Uncirculated example from the key issue Indian Head quarter eagle series (only 55,600 coins struck). The devices are sharply detailed with trivial friction over the high points. The minimally abraded and partially lustrous surfaces exhibit minimal marks. NGC ID# 2894, PCGS# 7943

1911-D Two and a Half
Uncirculated Sharpness

4383 **1911-D — Improperly Cleaned — NGC Details. Unc.** The Denver mintmark is bold. A sun-gold example of the low mintage series key. Well struck, attractive, and free from visible hairlines, although the surfaces are moderately bright from a wipe. Marks are absent except for a diagonal line above the LU in PLURIBUS.

4384 **1912 MS63 NGC.** The pleasing yellow and greenish-gold surfaces of this attractive Select specimen are brightly lustrous and show only minor signs of contact and the design elements are sharply detailed throughout. Eye appeal is quite strong. NGC ID# 2896, PCGS# 7944

4385 **1913 MS64 PCGS.** An attractive near-Gem with bright satiny surfaces that exhibit natural wheat-gold toning and light apricot accents. A well-preserved coin with clean surfaces and better-than-average eye appeal for the type. NGC ID# 2897, PCGS# 7945

4386 **1913 MS64 NGC.** The 1913 quarter eagle is an available date in lower grades, but its availability drastically declines beyond the MS64 grade level. This bronze-gold example displays bold motifs and remarkably clean fields for the type. NGC ID# 2897, PCGS# 7945

1914 Quarter Eagle, MS63
Better Philadelphia Issue

4387 **1914 MS63 NGC.** With a mintage of 240,000 pieces, the second-lowest production figure of the series, the 1914 Indian quarter eagle is a better date in the finer Mint State grades. This satiny Select example displays fiery orange-gold luster and well-struck design elements. A few minor abrasions are present, none of which are out of line for the grade. NGC ID# 2898, PCGS# 7946

1914 Quarter Eagle, MS63
Minimally Marked for the Date

4388 **1914 MS63 PCGS.** The lustrous orange-gold surfaces of this MS63 quarter eagle exhibit nicely defined design features. Some light marks are visible, but these are fewer and less severe than the heavy abrasions that often plague this date. This low-mintage Philadelphia specimen displays rather nice eye appeal for the grade designation. NGC ID# 2898, PCGS# 7946

1914 Quarter Eagle, Well-Struck MS63
Second Lowest Mintage in the Series

4389 **1914 MS63 PCGS.** The 1914 has the second lowest mintage (240,000 pieces) of the Indian quarter eagle series behind the key-date 1911-D that approaches 56,000 coins. The 1914 is a challenge in lower Uncirculated grades and becomes rare in Gem. This Select example displays lustrous wheat-gold surfaces that exhibit well-struck devices, though the lower headdress feathers are a touch soft as typically seen. The eagle's feathers on both shoulders are strong, however. A few minute marks are visible in the raised, open fields, particularly those on the reverse. NGC ID# 2898, PCGS# 7946

4390 **1914-D MS63 NGC.** A bright, highly lustrous example showing deeper-than-usual apricot-gold toning, sharp strike definition, and only a modest number of minute ticks on the obverse and reverse fields. Faint lilac, orange, and reddish accents further intensify the splendid eye appeal of this high-end Select Uncirculated example. NGC ID# 2899, PCGS# 7947

4391 **1914-D MS63 NGC. CAC.** This lustrous, satiny representative is well-struck on the high points of the devices, and boasts pleasingly clean fields for the grade. This date had a moderately substantial mintage of 448,000 pieces, but its availability gradually declines in succeeding Mint State grades. NGC ID# 2899, PCGS# 7947

1927 Quarter Eagle, MS65
Attractively Toned, Bold Strike

4392 **1927 MS65 PCGS. CAC.** While this date is generally available in grades up to and including MS65, it is rare any finer. Coins with strong eye appeal and sharp strikes are sought by high-grade gold collectors and series specialists. This coin qualifies on all counts, with wonderful orange-gold patina, above-average luster, and nearly full details. CAC-approved for quality and appeal. NGC ID# 289D, PCGS# 7951

THREE DOLLAR GOLD PIECES

4393 **1854 AU50 NGC.** Glowing orange-gold mint luster radiates from the protected regions of this Almost Uncirculated first-year type coin, delivering incredible visual appeal for the grade. High-point wear is light, and an old, faint scratch to the right of the 3 on the reverse is the only surface flaw of note. NGC ID# 25M3, PCGS# 7969

4394 **1854 AU55 NGC.** This Choice About Uncirculated coin offers sharply defined design elements with green- and reddish-gold surface coloration. The 1854 issue is the only date that shows DOLLARS in small letters, technically making this a single-year type. NGC ID# 25M3, PCGS# 7969

4395 **1854 AU55 NGC.** The 1854 is widely chosen for type purposes, due to its availability and first-year issue status. This Choice AU representative displays soft orange-gold patina, with remnants of mint luster in the recesses. The devices are well-struck and only a brush of actual wear is detected. NGC ID# 25M3, PCGS# 7969

4396 **1854 AU55 PCGS.** A lovely example with bright surfaces and beautiful antique-gold and butter-gold toning. Evenly worn with relatively minimal marks from circulation. A perfect selection for type purposes. NGC ID# 25M3, PCGS# 7969

4397 **1854 AU58 NGC.** The introductory issue of this ill-fated denomination was both produced and saved in large quantities. As such, it is the most plentiful date in circulated grades and the second most common date after the 1878 issue. This near-Mint example offers softly frosted luster over sharply struck, yellow-gold surfaces. NGC ID# 25M3, PCGS# 7969

4398 **1854 AU58 PCGS.** This pleasing, near-Mint type coin displays vivid lemon-gold color over each side, with substantial mint luster remaining in the recesses. Only a brush of actual wear is detected upon close examination.
From The Valley View Life Collection, Part Two. NGC ID# 25M3, PCGS# 7969

4399 **1854-O XF40 PCGS. Variety 2.** The usual die state with lapping evident on the wreath ribbon. The 1854-O is popular for its low mintage, small DOLLARS subtype, and New Orleans origin. The curls display moderate wear, but this original apricot-gold example exhibits noticeable luster and shows few marks. NGC ID# 25M5, PCGS# 7971

4400 **1856 AU55 NGC.** The lower portion of the wreath is well-struck, as is Liberty's portrait. Only the U in UNITED is softly impressed. Abundant luster remains within the recesses of this Choice AU example, and the yellow-gold surfaces are smooth and free of clash marks. NGC ID# 25M8, PCGS# 7974

1856 Three Dollar, MS61
Softly Frosted Luster

4401 **1856 MS61 PCGS.** Bright yellow-gold surfaces display occasional traces of soft red color and retain a exhibit softly frosted luster. The design elements are well-struck except for the usually seen weakness on the U of UNITED, the O in DOLLARS, and the bow knot. A few faint pinscratches are visible on the obverse. NGC ID# 25M8, PCGS# 7974

4402 **1856-S XF45 NGC.** Medium S. A peach-gold San Francisco type coin. Luster brightens the legends and no marks merit mention. Liberty's hair and the wreath exhibit wear commensurate with the grade. NGC ID# 25M9, PCGS# 7975

1856-S Three Dollar, AU55
Early San Francisco Issue

4403 **1856-S AU55 NGC.** Medium S. In its second year striking the denomination, the San Francisco Mint produced 34,500 three dollar coins, and the issue is relatively available in circulated grades. Substantial mint luster remains within the recesses of this Choice About Uncirculated example. The surfaces display red- and green-gold coloration and well-struck devices, with wispy marks lightly scattered over each side. NGC ID# 25M9, PCGS# 7975

1857-S Three Dollar, AU50
Partial Luster Remains

4404 **1857-S AU50 NGC.** The issue was quickly placed into circulation on the West Coast and few were set aside. This About Uncirculated representative shows typically bright yellow-gold surfaces with partial luster remaining in the legends. Each side is free from any singularly distracting abrasions, although clash marks appear on the upper-reverse. NGC ID# 25MB, PCGS# 7977

1859 Three Dollar Gold
Lustrous Near-Mint Example

4405 **1859 AU58 PCGS. CAC.** Ample luster is visible on the brassy-gold surfaces of this near-Mint State three dollar, and a well-directed strike leaves better detail on the design elements than usually seen, including the 8 and 5 in the date, which are usually weak. Both sides are minimally marked. NGC ID# 25MD, PCGS# 7979

4406 **1860 XF45 PCGS.** The 1860 three dollar gold piece claims a business-strike mintage of 7,036 pieces, making the issue scarce in all grades. This Choice XF example shows a little wear on the tops of the feathers and hair above the eye, but the reddish-gold surfaces are lightly abraded and retain traces of original mint luster. NGC ID# 25ME, PCGS# 7980

4407 **1860 AU55 PCGS.** The 1860 three dollar gold piece is a low-mintage issue (only 7,036 pieces struck), and is proportionately elusive in Mint State condition. This Choice Almost Uncirculated example shows strong luster and rich yellow-gold color. Surface abrasions are as minor as is the brush of high-point wear detected upon close examination.
From The Valley View Life Collection, Part Two. NGC ID# 25ME, PCGS# 7980

1860 Three Dollar, AU55
Original Surfaces

4408 **1860 AU55 PCGS. CAC.** A mintage of 7,036 coins makes this issue slightly more difficult to find than the 1859 date. The recesses retain significant luster, and the reddish-gold surfaces are clearly original. Resultingly, CAC has awarded this Choice About Uncirculated representative with a green label for quality. Well-struck and minimally marked for the grade. NGC ID# 25ME, PCGS# 7980

4409 **1868 AU55 PCGS.** This Choice About Uncirculated example offers reddish-gold color overall with partial luster remaining within the recesses. The surfaces feature well-detailed devices and minimal abrasions. The issue's 4,850-coin mintage makes it one of the most readily collectible dates in the three dollar gold series from the 1860s. NGC ID# 25MP, PCGS# 7989

1868 Three Dollar, Scarce MS61

4410 **1868 MS61 NGC.** The surfaces are primarily orange-gold with glints of lilac appear in the protected regions, for example, in the recesses around LIBERTY and within the 3 on the reverse. Scattered marks are small but numerous, accounting for the grade. From a mintage of 4,850 circulation strikes. Census: 45 in 61, 37 finer (7/14). NGC ID# 25MP, PCGS# 7989

4411 **1870 AU55 PCGS.** Only 3,500 business-strike three dollar gold pieces were struck in 1870. This Choice AU specimen is lightly worn and the yellow-gold surfaces show prooflike reflectivity in sheltered areas. Population: 45 in 55, 80 finer (7/14). NGC ID# 25MS, PCGS# 7991

1870 Three Dollar, AU58
3,500 Coins Minted

4412 **1870 AU58 PCGS.** Although the issue's mintage of 3,500 coins is higher than the 1869 date, it is nearly as scarce in all grades. Rich shades of orange- and green-gold intermingle throughout this near-Mint three dollar piece. Insignificant friction is seen over the well-struck devices, and numerous wispy marks are scattered across the surfaces. Population: 45 in 58 (1 in 58+), 35 finer (7/14). NGC ID# 25MS, PCGS# 7991

4413 **1872 — Cleaned — ANACS. AU55 Details.** The 1872 three dollar piece, with a mintage of only 2,000 coins, presents the date collector with a challenging search. This example is nearly unworn, though light cleaning has slightly dampened the luster. Still, abrasions are minimal, and the eye appeal is pleasing.
From The Valley View Life Collection, Part Two. NGC ID# 25MV, PCGS# 7994

4414 **1874 AU55 PCGS.** One of the more plentiful dates in this challenging series, the 1874 is ideal for type representation. This Choice AU piece shows rich orange-gold patina over each side, with milky lilac overtones seen when tilted at an angle.
From The Valley View Life Collection, Part Two. NGC ID# 25MX, PCGS# 7998

4415 **1874 AU58 PCGS.** Of the four "common" issues in the three dollar gold series that are often chosen for type purposes (1854,1874, and 1878), the 1874 has the lowest mintage (41,800 pieces). This near-Mint example shows bright, yellow-gold color and only a trace of high-point friction. NGC ID# 25MX, PCGS# 7998

4416 **1878 AU53 NGC.** The Mint struck 82,304 three dollar coins in 1878, most of which remained in vaults. This lightly circulated example exhibits smooth, rose-gold surfaces with traces of luster in the protected regions. The strike appears a touch shallow on the wreath. NGC ID# 25MZ, PCGS# 8000

4417 **1878 AU55 PCGS.** The 1878 three dollar gold piece is one of the more available issues of the series and a favorite choice of type collectors. This Choice AU specimen shows just a touch of wear on the well-detailed design elements and the pleasing surfaces retain much original mint luster. NGC ID# 25MZ, PCGS# 8000

4418 **1878 AU55 PCGS.** A high mintage (for the series) of 82,304 pieces, ranks the 1878 three dollar piece among the more plentiful issues for type purposes. This Choice AU example retains hints of shimmering, yellow-gold luster in the recesses, while the relief elements exhibit just a touch of light circulation.
From The Valley View Life Collection, Part Two. NGC ID# 25MZ, PCGS# 8000

4419 **1878 MS61 PCGS.** The grade-limiting abrasions on this lustrous type coin are light and evenly distributed, posing little distraction to the unaided eye. Shimmering, peach-gold luster warms each side, while the devices are generally well-struck.
From The Valley View Life Collection, Part Two. NGC ID# 25MZ, PCGS# 8000

4420 **1885 — Cleaning — PCGS Genuine. AU Details.** The bright yellow-gold surfaces are moderately prooflike in appearance, unsurprising given the issue's minuscule mintage of 801 coins. This lightly circulated key date is sharply struck with strong detail on the lower wreath. NGC ID# 25N8, PCGS# 8007

1885 Three Dollar Gold, AU50
Only 801 Pieces Struck

4421 **1885 AU50 PCGS.** Even in the context of the three dollar gold series, which is known for its many low-mintage issues, the 1885 stands out as one of only three business strike dates with a production total of less than 1,000 coins (only 801 pieces). This original AU representative exhibits deep orange and honey-gold coloration, with substantial semiprooflike mirroring remaining in the fields. A few minor abrasions accompany the grade, but high-point wear is minimal and the eye appeal is excellent. NGC ID# 25N8, PCGS# 8007

4422 **1886 — Altered Surfaces — PCGS Genuine. Unc Details.** From a mintage of just 1,000 coins, this boldly struck, minimally abraded representative displays warm honey-gold color and strong prooflike mirroring in the fields. PCGS notes that the surfaces have been altered, though the effects are not immediately apparent. NGC ID# 25N9, PCGS# 8008

4423 **1887 AU50 PCGS.** A low mintage of just 6,000 coins ensures the popularity of this elusive issue. The present example exhibits a touch of wear, but shows few consequential abrasions. Deep orange-gold patina further increases the overall visual appeal.
From The Valley View Life Collection, Part Two. NGC ID# 25NA, PCGS# 8009

EARLY HALF EAGLES

1807 Half Eagle, Bust Left, BD-8, AU Details
Rich Original Coloration

4424 **1807 Bust Left — Graffiti — PCGS Genuine. AU Details. BD-8, R.2.** Bass-Dannreuther Die State c/a. This is the earlier die state for this fairly available variety, though the obverse is clashed from its previous usage for BD-7. This is the final use of this obverse, but the reverse was later employed for the first three varieties of 1808 coinage. The present example displays substantial golden luster amid hues of rich apricot and olive-gold patination. The graffiti noted by PCGS is seen as a few short, crisscrossing pinscratches in the left obverse field, but these are faint and hardly detract from the visual appeal. NGC ID# 25P9, PCGS# 8101

1811 Half Eagle, AU Details
Small 5, BD-2

4425 **1811 Small 5 — Repaired — NGC Details. AU. BD-2, R.3.** Bass-Dannreuther Die State d/a. A well defined olive-gold type representative. The obverse field displays unobtrusive and subtle smoothing near Liberty's nose and star 11. Nonetheless, most collectors would be delighted to own a partially lustrous example of Reich's Capped Bust Left design. NGC ID# 25PH, PCGS# 8109

4426 **1811 Tall 5 — Cleaning — PCGS Genuine. XF Details. BD-1, High R.3.** Bass-Dannreuther Die State c/e. Bold clash marks occur over each side, with E PLURIBUS UNUM almost entirely visible in the left obverse field and above the date. The surfaces show bright yellow-gold color and sharp design motifs. Dannreuther (2006) notes that the Tall 5 variety "is only marginally harder to find than the other variety for this year with a Small 5 reverse." PCGS# 8110

1818 STATESOF Five Dollar
AU Sharpness, BD-2

4427 **1818 STATESOF — Repaired — PCGS Genuine. AU Details. BD-2, R.4.** Bass-Dannreuther Die State c. The usual late die state with a bisecting crack between star 6 and the second 8 in the date. The obverse field, and Liberty's cheek and neck, are extensively smoothed. The reverse is problem-free save for a faint scuff beneath the left (facing) wing. A well defined example of this scarce *Guide Book* variety. PCGS# 8121

CLASSIC HALF EAGLES

4428 **1834 Plain 4 AU55 NGC. Breen-6502, McCloskey 2-A, R.1.** Second Head, with a triple-punched 4 in the date. The 1834 Plain 4 half eagle boasts the highest mintage of the Classic Head type (657,460 pieces), and is arguably the most available for type representation. This Choice AU example displays bright green-gold patina, with well-defined central devices. The surfaces are free of any major, unsightly abrasions. NGC ID# 25RR, PCGS# 8171

4429 **1834 Plain 4 AU55 PCGS. Breen-6502, McCloskey 2-A, R.1.** The triple-punched 4 in the date helps attribute this collectible first-year Classic five. A good strike except northwest of the ear and on the lower left portion of the shield. Marks are essentially limited to the first T in STATES. NGC ID# 25RR, PCGS# 8171

1834 Classic Head Half Eagle, XF40
Crosslet 4, Original Surfaces

4430 **1834 Crosslet 4 XF40 NGC. CAC. Breen-6503, McCloskey 5-D, R.4.** According to Garrett and Guth (2006): "The 1834, Classic Head, Crosslet 4 half eagle is vastly rarer than the Plain 4 version (by a factor of roughly 10 to 1)." This blatantly original XF representative features beautiful reddish-gold surfaces with an expected amount of grade-consistent wear. The eye appeal is vivid. Census: 11 in 40, 60 finer (7/14). PCGS# 8172

LIBERTY HALF EAGLES

4431 **1840-O AU53 NGC. Variety 3.** Small O. The diameter is 22 mm, intermediate between the 21.6 mm Narrow Mill and the 22.5 mm Broad Mill. A honey-gold New Orleans half eagle with minimal marks and expected blending of strike at the centers.
Ex: Stamford Signature (Heritage, 10/2010), lot 4775. NGC ID# 25SK, PCGS# 8200

1840-O Half Eagle, AU58
Exceptionally Clean Surfaces

4432 **1840-O Narrow Mill AU58 NGC. Variety 3.** The 1840-O half eagle is a scarcer New Orleans issue, with an estimated survival of just 150 to 175 pieces in all grades. Mint State examples are rare, and those grading finer than MS62 are prohibitively so. This is a remarkably clean near-Mint example, with original olive-gold patina and ample luster remaining in the recesses. An old, thin scratch is seen in the hair curls around Liberty's face upon close examination, but there are no other mentionable surface flaws, and high-point wear is nearly nonexistent. Census: 22 in 58, 17 finer (7/14). NGC ID# 25SK, PCGS# 8200

4433 **1844-D XF40 PCGS.** The 1844-D is among the more plentiful Dahlonega half eagles, ideal for the collector seeking a single type representative from this mint. This apricot-gold example displays an above-average strike for a D-mint issue, with only light wear for the grade. Numerous abrasions are noted on each side, the most prominent being a short old scratch behind Liberty's eye.
From The Valley View Life Collection, Part Two. NGC ID# 25T9, PCGS# 8221

4434 **1844-O AU55 NGC. Variety 6.** The 1844-O is one of the more easily obtainable half eagles from the New Orleans Mint, but its availability declines sharply at the Mint State threshold. This Choice AU example shows soft green-gold patina and strong central detail. Light, scattered marks are present on each side, but none are individually noteworthy. NGC ID# 25TA, PCGS# 8222

1848-C Half Eagle, XF45
Challenging in Finer Grades

4435 **1848-C XF45 PCGS. CAC. Variety 1.** Doug Winter writes of this issue: "The 1848-C half eagle is scarcer than its reasonably high mintage figure of nearly 65,000 coins would suggest." He goes on to estimate that only 250 to 350 examples are extant in all grades, and that most of these are in the VF to XF range. This Choice XF coin is highly appealing for the grade, with rich orange-gold coloration over both sides, and only slight high-point wear. No major abrasions are noted, and the design definition is above-average for the issue. Population: 26 in 45, 51 finer (7/14). NGC ID# 25TT, PCGS# 8237

1852 Half Eagle, MS62
Challenging in Mint State

4436 **1852 MS62 NGC.** The 1852 half eagle had a fair substantial mintage of more than 573,000 pieces, but Mint State survivors are nonetheless scarce. This piece displays strong lemon-gold luster with remarkably few abrasions for the grade. The strike is sharp throughout, save for the lower obverse and upper reverse dentils which are not fully defined. Census: 33 in 62, 29 finer (7/14). NGC ID# 25UA, PCGS# 8250

4437 **1854 — Scratch — PCGS Genuine. Unc. Details.** Upon first glance, this lustrous, nicely struck, and original caramel-gold No Motto half eagle appears to be merit a grade as high as MS64, but magnification reveals a wispy pinscratch from star 5 to the back of the neck. NGC ID# 25UG, PCGS# 8256

1857-C Half Eagle, AU53
Attractively Patinated

4438 **1857-C AU53 NGC. Variety 1.** Struck to the extent of 31,360 pieces, the 1857-C is among the more plentiful half eagles from this mint, but it still cannot be considered common, as only 225 to 275 pieces are believed extant. This somewhat lustrous piece exhibits nearly complete detail, with the softness on the eagle's neck due more to characteristically poor striking than actual wear. The surfaces are lightly abraded, but rich hues of orange and honey-gold deliver a pleasing degree of eye appeal. NGC ID# 25V3, PCGS# 8272

1860-D Half Eagle, XF45
Very Rare Large D Variety

4439 **1860-D Large D XF45 NGC. Variety 46-EE.** This very rare variety shows the D centered over the VE in FIVE. Reddish-gold colors the surfaces of this Dahlonega representative, from a mintage of 14,635 coins. The devices feature an above-average strike for the facility, and marks minimal for the grade. Doug Winter (2013) estimates that 100 to 125 examples exist in Extremely Fine, including all varieties. Housed in a former generation holder. PCGS# 98286

4440 **1860-S XF45 ANACS.** A low mintage of just 21,200 pieces ensures the scarcity of this issue in all grades. The present example shows bright bronze-gold color and is only lightly circulated, with ample detail remaining. Finer representatives are decidedly rare, and Mint State coins are nearly nonexistent.
From The Valley View Life Collection, Part Two. NGC ID# 25VJ, PCGS# 8287

4441 **1871-CC — Improperly Cleaned — NGC Details. XF. Variety 1-A.** Olive-gold patina is still in evidence, although the coin is a bit bright, justifying the NGC Details designation. Overall, the coin retains considerable visual appeal. Few examples of this Carson City date are known in AU or finer condition, making XF coins popular with collectors. Only minor abrasions are seen on the well-detailed surfaces, and despite the cleaning, this scarce half eagle is worthy of consideration.

4442 **1879 MS63 NGC.** Semiprooflike surfaces and razor-sharp definition are attributes of this Select half eagle. Frosty luster and rose-gold color blend over each minimally marked side. Census: 28 in 63, 29 finer (7/14). NGC ID# 25X7, PCGS# 8348

4443 **1879-S MS63 NGC. CAC.** A lustrous, boldly struck example of this scarce half eagle issue from San Francisco. A few wispy marks are found under magnification but they seem minimal for the Select Uncirculated grade assignment. Census: 25 in 63, 11 finer (7/14). NGC ID# 25X9, PCGS# 8350

4444 **1881/0 FS-301 MS62 NGC. CAC.** Only light magnification is required to see the curve of the 0 beneath the 1 in the date. The 8s exhibit obvious recutting. A radiant sun-gold half eagle with an intricate strike and the expected number of wispy obverse field marks.
Ex: Long Beach Signature (Heritage, 5/2012), lot 5046, which realized $1,727.30. PCGS# 145714

4445 **1882-CC XF45 NGC. Variety 1-A.** The 1882-CC half eagle is moderately available in circulated grades, but becomes scarce in Mint State. This lightly circulated piece retains strong detail overall, with soft olive-gold patina and minimal distractions. Traces of luster are seen in the recesses when turned in-hand. NGC ID# 25XH, PCGS# 8359

1882-CC Half Eagle, AU58
No Consequential Marks

4446 **1882-CC AU58 NGC. Variety 1-A.** A pleasing Borderline Uncirculated example of this low mintage and conditionally rare Carson City issue. Sharply struck and unblemished with original pumpkin-gold toning. Luster fills the peripheries and devices. Although obtainable in the present grade, the 1882-CC is highly elusive in Mint State. NGC ID# 25XH, PCGS# 8359

4447 **1883-S MS63 NGC.** This San Francisco issue (83,200 pieces) is one of the most underrated dates in the Liberty Head half eagle series, according to Garrett and Guth's *Encyclopedia of U.S. Gold Coins*. The straw-gold surfaces feature frosty luster, sharp design motifs, and minimal marks. Census: 27 in 63, 1 finer (7/14). NGC ID# 25XM, PCGS# 8363

1884-S Five Dollar, MS64
Just Two Coins Finer

4448 **1884-S MS64 NGC.** The 1884-S half eagle issue is underrated, especially in high grades, as collectors tend to pay more attention to New Orleans Mint products. This near-Gem showcases frosty luster over honey-gold surfaces that feature sharply defined devices and only a few tiny ticks. From a mintage of 177,000 coins, NGC has certified 21 submissions in Choice condition with just two coins finer (7/14). NGC ID# 25XR, PCGS# 8366

4449 **1886-S MS64+ NGC.** The 1886-S is a moderately available issue in lower grades, but those worthy of a Gem assessment are decidedly scarce. This piece displays frosty yellow and rose-gold luster over each side, with strong design definition and only a few minute ticks in the fields to preclude a full Gem grade assessment. NGC has certified 53 numerically finer examples (7/14). NGC ID# 25XV, PCGS# 8370

4450 **1890-CC MS61 PCGS. Variety 1-A.** A nicely struck yellow-gold half eagle with fewer marks than is usual for the MS61 level. Luster illuminates the borders and motifs. The '90-CC is scarcer than its '91-CC successor but is nonetheless obtainable in Mint State. NGC ID# 25Y3, PCGS# 8376

4451 **1891-CC MS62 NGC. Variety 1-A.** A splendid Carson City type coin. Traces of dirt in protected areas confirm the originality. The apricot and olive surfaces are well struck and display only minor marks, chiefly confined to the left obverse field. NGC ID# 25Y5, PCGS# 8378

4452 **1893-CC XF45 PCGS. Variety 1-A.** The final CC-mint issue has a low mintage of 60,000 pieces. The present apricot-gold representative displays light wear and traces of luster. Tiny marks are distributed but only a thin line above the upper arrowhead merits mention. NGC ID# 25YB, PCGS# 8384

4453 **1896-S MS62 PCGS. CAC.** The San Francisco facility struck 155,400 half eagles in 1896, and contemporary collectors set few pieces aside. Consequently, the issue is scarce in mint condition and rare in MS62 or higher. Each side displays frosty luster and well-defined design elements. Marks are lightly scattered throughout. Population: 15 in 62, 9 finer (7/14). NGC ID# 25YL, PCGS# 8393

4454 **1897 MS64+ NGC. CAC.** The essentially full strike definition is this coin's most noteworthy characteristic, as few examples of any business strike half eagle issue display such uniformly crisp detail on both sides. An attractive example with honey-gold surfaces imbued with pleasing undertones of champagne toning. Minimally marked and very close to Gem quality. NGC ID# 25YM, PCGS# 8394

1900 Liberty Five, MS65
Attractive Type Representative

4455 **1900 MS65 PCGS. CAC.** Largely honey-gold surfaces reveal distinct lavender and mint-green shadings throughout, generating vivid eye appeal for this Gem Liberty Head five. The design elements are nearly fully struck, and only a few tiny ticks and grazes occur over each side. PCGS has certified only 10 coins in numerically higher grades (8/10). NGC ID# 25YU, PCGS# 8400

INDIAN HALF EAGLES

4456 **1908 MS64 NGC.** The pleasing orange-gold surfaces of this impressive Choice example show a few hints of red and amber, with vibrant mint luster on both sides. The design elements are well-detailed and scattered minor contact marks do little to detract from the overall eye appeal. NGC ID# 28DE, PCGS# 8510

4457 **1908-D MS63 PCGS. CAC.** This is a well-detailed example of this early Denver issue. The luster is satiny with a bronze-gold tint, and the surfaces exhibit only minor grade-defining disturbances. While not overly challenging in this grade, the 1908-D becomes genuinely rare at the Gem level. NGC ID# 28DF, PCGS# 8511

4458 **1908-D MS63 PCGS. CAC.** Subtle lilac overtones accent deep apricot-gold patina, with satiny luster shining through. The lower feathers on the Indian's headdress are not fully brought up, but the strike is otherwise well-executed, and the grade-defining surface abrasions are light and evenly distributed over each side. NGC ID# 28DF, PCGS# 8511

4459 **1908-S AU58 NGC.** A pleasing example from San Francisco with khaki-green toning in the fields and light reddish-gold color on the high points. Boldly defined and lightly circulated, with a few trivial contact marks observed on each side. NGC ID# 28DG, PCGS# 8512

4460 **1909 MS63 NGC.** This is an unusually clean and attractive example of this early Philadelphia issue, with rich, satiny luster and warm yellow-gold color. The upper edge of the eagle's facing shoulder is not fully brought up, though the strike is otherwise well-executed. NGC ID# 28DH, PCGS# 8513

1909 Five Dollar, MS64
Rich Pumpkin-Gold Coloration

4461 **1909 MS64 PCGS.** The 1909 half eagle is among the more accessible issues in its series and remains available for a price at the MS64 level, though finer coins are conditionally scarce. Rich pumpkin-gold color and ample luster provide this near-Gem with a strong degree of visual appeal. The design detail is sharp throughout and there are no mentionable marks. NGC ID# 28DH, PCGS# 8513

4462 **1909 MS64 PCGS.** A common date in lower grades, the 1909 half eagle becomes somewhat elusive at the Gem grade level. This near-Gem piece exhibits sharp detail throughout, with deep olive-gold coloration. Some grade-consistent abrasions are present on each side. NGC ID# 28DH, PCGS# 8513

1909-O Half Eagle, AU50
Final O-Mint Five

4463 **1909-O AU50 NGC.** The 1909-O had a scant mintage of only 34,200 pieces, the lowest business strike production of the series. Survivors are available in the various circulated grades, but Mint State pieces are scarce and are seldom found finer than MS62. This well-detail AU representative exhibits only light wear overall, with a lack of major consequential abrasions. Rich bronze-gold patina attests to the originality of the surfaces. NGC ID# 25ZK, PCGS# 8515

4464 **1911-D AU53 NGC.** Although the issue does not command the same attention as its quarter eagle brother, it remains challenging because of its 72,500-coin mintage. This About Uncirculated representative features reddish-gold coloration and impressive detail on the Indian's headdress and the eagle's breast feathers. NGC ID# 28DR, PCGS# 8521

1911-D Half Eagle, AU58
Elusive Denver Issue

4465 **1911-D AU58 PCGS.** This year is famous for its low-mintage Denver gold issues. While the half eagle is more available than its quarter eagle and ten dollar counterparts, it is still one of the keys to the half eagle series and a real rarity in high Mint State grades. This example is in near-Mint condition, but with the eye appeal and strike to easily surpass many lower Mint State coins. Exceptional, original orange-gold color shows a bold strike. Any wear is hard to discern, and nice luster remains. NGC ID# 28DR, PCGS# 8521

1911-S Indian Head Five, MS62
Slightly Better San Francisco Date

4466 **1911-S MS62 NGC.** Mint State examples of this San Francisco issue are somewhat elusive. Although a few alloy spots are seen above the bonnet and on the Indian's cheekbone, abrasions are minor and widely separated on the high points. This example is well-struck and pleasingly lustrous for the grade. NGC ID# 25ZM, PCGS# 8522

4467 **1912 MS63 NGC.** The issue's relatively high mintage and reputation for sharp striking detail, as is the case with this Select piece, make it a popular type representative. Light orange-gold colors surfaces that show rose accents and minimal marks, save for a small tick in front of the eagle's breast. NGC ID# 28DS, PCGS# 8523

1914 Indian Five, MS64+
High-End for the Grade, Few Finer

4468 **1914 MS64+ PCGS.** It would be challenging and expensive to improve on this lustrous, near-Gem half eagle. A pleasing, medium-gold example, the coin displays a bold strike on the Indian's bonnet with smooth, glowing fields surrounding the sharp motifs. All 1914-dated half eagles are better dates in the series and share nearly identical mintages, although the Denver and San Francisco issues are slightly scarcer than their Philadelphia brother. All three issues are rare in Gem or finer grades, with near-Gem coins an inviting alternative. NGC ID# 28DU, PCGS# 8527

4469 **1915 MS63 NGC.** Fuljenz heralds this issue as being one of the better-made dates in the series, and this piece is an excellent representative of this quality. The strike is razor-sharp throughout, and the surfaces are unusually clean, given the grade; an upper-end coin for the grade. NGC ID# 28DX, PCGS# 8530

LIBERTY EAGLES

4470 **1840 AU53 NGC.** Garrett and Guth write of the 1840 eagle: "This date is typically seen in Extremely Fine or worse conditions." The AU representative here-offered, then, is a notable find for the patient collector. Original bronze-gold patina blankets each side, while deeper orange-gold overtones are seen in the recesses. The strike is sharp and wear is minimal. Census: 23 in 53, 54 finer (7/14). NGC ID# 262G, PCGS# 8581

4471 **1842-O XF45 NGC. Variety 2.** With a mintage of just 27,400 coins, the 1842-O eagle is elusive in all grades. This honey-gold example is only lightly worn for the grade level, with remnants of original luster in the protected areas. Light, scattered abrasions are noted on each side, the most noticeable being an old, light scratch in the left obverse field. NGC ID# 262N, PCGS# 8587

4472 **1844-O XF45 PCGS. Variety 5.** The mintmark is recut within the loop. This Choice XF example features rich orange-gold surface coloration and good strike definition. Marks are evenly scattered over each side. From a mintage of 118,700 coins, this is the third most common No Motto issue from the New Orleans Mint. NGC ID# 262T, PCGS# 8591

4473 **1847 AU58 NGC.** Bulged (six-fold) central hairbun. The 4 in the date is lightly repunched. A straw-gold No Motto type coin that boasts a crisp strike and an absence of mentionable abrasions. NGC ID# 262Z, PCGS# 8597

4474 **1847-O AU55 PCGS. Variety 5.** A better die marriage, distinguished from the "common" Variety 2 by a low mintmark position. A caramel-gold representative with generally attractive surfaces. Bright luster fills the legends, curls, and eagle. NGC ID# 2632, PCGS# 8598

4475 **1848 AU53 NGC.** Despite the high mintage for a No Motto ten, this issue circulated extensively, and About Uncirculated examples are scarce. An expected number of abrasions cover bright yellow-gold surfaces that show generally well-detailed devices. Traces of original luster remain in the protected regions. NGC ID# 2633, PCGS# 8599

1849 Ten Dollar Gold, MS61
Scarce in Mint State

4476 **1849 MS61 NGC.** One of the more available No Motto issues in the series, although Mint State examples are somewhat scarce. This medium-gold example is lightly abraded and lacks detail on the arrow feathers and the adjacent eagle's talon. The date is lightly strike-doubled. A touch of orange-gold patina is seen among the legends and stars, along with remnants of prooflike reflectivity. Census: 14 in 61, 22 finer (7/14). NGC ID# 2635, PCGS# 8601

4477 **1850 Large Date AU58 NGC. CAC.** The Large Date variant is the slightly more plentiful of the two varieties for this issue, but is still itself rare in Mint State condition. This nearly Uncirculated piece is awash in rich apricot-gold patina, with remnants of prooflike mirroring in the protected areas. Scattered abrasions accompany the grade. Census: 51 in 58, 19 finer (7/14). NGC ID# 2637, PCGS# 8603

1854-S Eagle, AU55
First San Francisco Ten

4478 **1854-S AU55 NGC.** In its first year of production, the San Francisco Mint produced more than 123,000 gold eagles, but these circulated heavily in Gold Rush-era California, and Mint State survivors are rare. This Choice AU representative displays smooth, brassy-gold surfaces with remnants of mint luster in the protected regions. The strike is bold, and high-point wear is minimal. NGC ID# 263K, PCGS# 8615

4479 **1856-S AU55 PCGS.** Medium S. The mintmark is positioned between the eagle's left (facing) claw and the arrow fletchings. The West Coast mint struck 68,000 eagles in 1856, most of which entered into circulation. This Choice AU example retains ample luster in the recesses and yellow- and rose-gold color overall. The devices are well-struck with softness on the stars, and marks are evenly scattered over both sides. NGC ID# 263S, PCGS# 8621

4480 **1857 XF45 NGC.** A scant mintage of 16,606 pieces ensures the scarcity of this underappreciated No Motto issue. The peach-gold surfaces are mildly bright and display abrasions consistent with antebellum circulation. Housed in a prior generation holder. NGC ID# 263T, PCGS# 8622

4481 **1860 AU50 NGC.** The 1860 ten dollar had a mintage of just 15,055 pieces, though this was actually one of the higher production totals for the period. Still survivors are scarce any finer than the present coin. Original orange-gold patina graces sharp design elements on each side, with substantial mint luster remaining in the recesses. NGC ID# 2644, PCGS# 8631

4482 **1874 MS61 NGC.** The 1874 Liberty eagle is very scarce in Mint State grades. This MS61 example displays pleasing greenish-gold surfaces with a scattering of minor contact marks on both sides. The design elements are well-detailed and much original mint luster remains intact. Census: 28 in 61, 14 finer (7/14). NGC ID# 2657, PCGS# 8669

1874-CC Ten Dollar, Very Fine
Just 16,767 Pieces Struck

4483 **1874-CC VF20 NGC. Variety 1-A.** All Carson City tens from the 1870s are rare. However, the 1874-CC is more collectible than other early CC-mint issues, with approximately 400 survivors from the mintage of 16,767 pieces. The curls, star centers, and wingtips show wear but the legends are bold. The honey-gold surfaces are minimally abraded, although a small granular area is noted near the bust tip. *Ex: Blah (Stack's, 8/2010), lot 1158, which realized $2,875.* NGC ID# 2658, PCGS# 8670

4484 **1878 MS62 NGC. CAC.** Lustrous antique-gold surfaces are enhanced in their overall appearance by delightful, faint accents of peach and rose. A well-struck coin with vibrant mint luster and small, scattered abrasions that limit the grade but do little to harm the visual appeal of this scarce example. Census: 33 in 62, 15 finer (7/14). NGC ID# 265J, PCGS# 8680

4485 **1878 MS62 PCGS. CAC.** This is the first date in the series that can be found with without too much difficulty in lower Mint State grades. Coins in MS62 such as this are very scarce and anything finer is rare. Frosty mint luster rolls over light rose-gold surfaces that show sharp definition throughout. Population: 47 in 62 (1 in 62+), 17 finer (7/14). NGC ID# 265J, PCGS# 8680

4486 **1878-S AU55 NGC.** The 1878-S ten dollar is elusive in AU grades, and Mint State representatives are exceedingly rare. This Choice AU piece exhibits remnants of prooflike mirroring in the fields, while the devices are well-struck and the surfaces display warm honey-gold patina. Census: 41 in 55 (2 in 55+★), 28 finer (7/14). NGC ID# 265L, PCGS# 8682

4487 **1879 MS62+ PCGS.** The yellow-gold and pink-rose surfaces are bright and semi-reflective in the fields. The design motifs are boldly struck with only a touch of weakness noted on the obverse stars. Surface marks seem minor for the MS62 grade, perhaps accounting for the + designation by PCGS. Population: 2 in 62+, 40 finer (7/14). NGC ID# 265M, PCGS# 8683

4488 **1879 MS62 PCGS. CAC.** Although the issue claims the highest mintage from the Philadelphia Mint since 1849, its survival rate is below-average. This Mint State piece shows rich yellow-gold color with orange accents and frosty luster throughout. Well-struck and minimally abraded. NGC ID# 265M, PCGS# 8683

4489 **1882-O AU53 ANACS.** Garrett and Guth write that this issue is "... a real challenge in grades above AU50 and, in Mint State, the 1882-O is a real rarity." This example shows areas of prooflike mirroring in the protected regions of the fields, with bright green-gold color overall. A touch of light wear confirms the grade, though the surfaces are unusually free of major abrasions. NGC ID# 2664, PCGS# 8697

4490 **1883-S MS61 NGC.** Despite numerous abrasions, this example has appeal thanks to a full strike and attractive, orange-gold color. The fields were at one time semiprooflike before rough transport and handling compromised the surfaces. The 1883-S is conditionally rare above MS61. Census: 22 in 61, 13 finer (7/14). NGC ID# 2669, PCGS# 8702

1887-S Ten Dollar, MS64
Just One Coin Finer

4491 **1887-S MS64 NGC.** The issue is plentiful in circulated grades but becomes scarce in Mint State. The Smithsonian collection includes an XF example, while Harry Bass owned an MS63 coin. This MS64 representative is a conditional rarity, and only one piece is certified finer by both NGC and PCGS combined (7/14). Pinpoint-sharp design features, orange-gold color, and frosty luster further enhance the desirability of this San Francisco ten. NGC ID# 266J, PCGS# 8711

4492 **1888-S MS63 PCGS.** The mintage was just 648,700 coins, and survivors typically hover around the MS60 level. This example has delicate light green and pale rose toning over bright yellow surfaces. Only three examples are graded finer at PCGS (7/14). NGC ID# 266M, PCGS# 8714

4493 **1889 AU58 NGC.** This issue boasts a scant mintage of only 4,440 coins, and is proportionately elusive in all grades. A brush of high-point friction precludes a Mint State grade assessment, though the strike is sharp and the surfaces display rich honey-gold luster. Scattered abrasions accompany the grade, but a degree of semiprooflike mirroring in the fields balances the visual appeal. NGC ID# 266N, PCGS# 8715

4494 **1889 AU58 NGC.** Sharply struck with prooflike flash remaining at the margins, this attractive, orange-gold 1889 ten is a rarity of the series. Just 4,440 pieces were struck by the Philadelphia Mint. With Uncirculated examples are seldom available and expensive, this near-Mint example a logical alternative. A few minor marks are mixed with light rub from brief circulation. NGC ID# 266N, PCGS# 8715

4495 **1889-S MS63 PCGS.** Frosty rose-gold hues highlight the centers of this otherwise green-gold representative. The motifs are sharp, and the grade-limiting abrasions are evenly distributed. PCGS has seen only 22 numerically finer representatives (7/14). NGC ID# 266P, PCGS# 8716

4496 **1890 MS62 PCGS.** This is one of 57,900 eagles struck at the Philadelphia Mint in 1890, and the issue is moderately available up to and including MS62. The surfaces display distinctly rose- and green-gold color with sharply detailed design motifs and lightly scattered marks. NGC ID# 266R, PCGS# 8717

4497 **1890-CC AU55 NGC. Variety 1-A.** The legend IN GOD WE TRUST is lightly die-doubled north. This Choice AU piece retains significant mint luster in the protected regions, and exhibits only a brush of high-point wear. Light, scattered abrasions are noted, not unusual for the grade level. NGC ID# 266S, PCGS# 8718

4498 **1891-CC MS60 PCGS. Variety 1-A.** The mintmark is furthest left among the four known reverse dies. A crisply struck and radiant apricot-gold Carson City type coin. Customary for the grade, small abrasions are distributed, and the reverse displays several thin marks. NGC ID# 266U, PCGS# 8720

4499 **1893-S MS62+ PCGS.** Faint apricot overtones accent frosty green-gold luster on each side of this well-struck Mint State example. Scattered abrasions define the grade. While not scarce in lower grades, the 1893-S is highly elusive in MS63 and above, where PCGS has certified only 54 pieces (7/14). NGC ID# 2674, PCGS# 8728

4500 **1897-O MS61 NGC. Variety 1.** Within the eagle denomination, New Orleans is a scarce mintmark to acquire in Mint State. This example is well-struck save for the final two stars, and while the luminous straw-gold fields display marks, none are singularly distracting. NGC ID# 267E, PCGS# 8738

4501 **1899-O MS61 PCGS. CAC. Variety 3.** A peach-gold New Orleans eagle with cartwheel luster and a precise strike. Abrasions are moderate for the MS61 level. The mintage is low, about one-third of the 1903-O. Housed in a green label holder. NGC ID# 267K, PCGS# 8743

4502 **1901-S MS64 PCGS.** The arm's-length eye appeal of this shimmering example is Gemlike, making it seem like a high-end coin at MS64. Fully struck and highly lustrous with beautiful, natural coloration and minimal surface marks. NGC ID# 267S, PCGS# 8749

4503 **1901-S MS64+ PCGS.** Frosty luster and yellow-gold color blend over each side. The surfaces display sharply struck design features and lightly scattered marks. From a mintage of over 2.8 million eagles, this S-mint issue is popular as a type. NGC ID# 267S, PCGS# 8749

4504 **1901-S MS64+ PCGS. CAC.** Ex: Rive d'Or Collection. A lovely example with even apricot-gold toning and bright, satiny mint luster. Attractive, minimally marked, and nearly a Gem. NGC ID# 267S, PCGS# 8749

1901-S Ten Dollar, MS65
Lustrous and Sharply Detailed

4505 **1901-S MS65 PCGS.** The number of survivors from this high-mintage issue (2.8 million pieces) makes this Gem an appropriate type representative. Vibrant luster illuminates deep yellow-gold surfaces that exhibit tinges of orange and lavender. Sharply detailed throughout with a handful of tiny ticks peppered over each side. NGC ID# 267S, PCGS# 8749

4506 **1902-S MS63 PCGS.** A mintage of 469,500 pieces and a high survival rate make this issue appropriate for type purposes. The luminous surfaces of this Select example offer deep orange-gold color with lavender accents and boldly impressed design elements. NGC ID# 267U, PCGS# 8751

4507 **1903-O MS61 PCGS. Variety 2.** The 1 in the date is centered between two dentils. This is a typically struck New Orleans representative from a mintage of 112,771 coins. Frosty luster covers yellow-gold surfaces that show lightly scattered abrasions over each side. NGC ID# 267W, PCGS# 8753

1903-S Eagle, MS65
Impressive S-Mint Example

4508 **1903-S MS65 PCGS.** While this S-mint issue compares favorably to its Philadelphia counterpart in terms of the number of survivors, it can be found in much higher grades. Aside from the 1901 issue, the 1903-S is the most plentiful date in Gem condition. This gorgeous representative offers blazing luster and vivid orange-gold coloration. The design features are boldly impressed, save for trivial softness over the olive leaves, and marks are minimal. PCGS has certified only 21 numerically finer submissions (7/14). NGC ID# 267X, PCGS# 8754

1907 Liberty Ten Dollar, Sharp MS65

4509 **1907 MS65 NGC.** The 1907-PDS Liberty Head issues were the last of their long-running ilk, soon to be replaced by the Saint-Gaudens design. This Philadelphia Mint Gem certified by NGC offers generous luster on each side over orange-gold surfaces with a sharp strike and lots of eye appeal. Marks are minimal, as expected for the grade. Census: 81 in 65 (2 in 65+), 6 finer (7/14). NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

4510 **1907 No Periods MS61 NGC.** Rich, yellow-gold color graces both sides of this uncirculated No Periods example, the first collectible issue in Saint-Gaudens' Indian Head series. The surfaces offer typically vibrant luster and somewhat shallow detail with abrasions lightly scattered throughout. NGC ID# 28GF, PCGS# 8852

4511 **1908 Motto MS63 NGC.** The 1908 Motto Indian eagle is an important date for type purposes. This attractive, Select specimen displays lightly marked orange and rose-gold surfaces with well-detailed design elements and strong eye appeal. NGC ID# 28GJ, PCGS# 8859

4512 **1908 Motto MS63 PCGS.** Vivid lemon-orange patina blankets satiny luster on each side of this early With Motto type coin. The devices are well-struck, save for the upper edge of the eagle's facing shoulder, which is slightly soft. Grade-defining abrasions are minimal. NGC ID# 28GJ, PCGS# 8859

1908 Motto Ten, MS64
Wheat-Gold Surfaces

4513 **1908 Motto MS64 NGC.** The fine-grained surfaces are somewhat mattelike on this wheat-gold With Motto ten, the first year of production for the later subtype. A stray mark or two on each side are in concert with the grade, though none of them are of any consequence. Excellent eye appeal for this type-coin issue. NGC ID# 28GJ, PCGS# 8859

4514 **1908-D Motto MS61 PCGS.** Ex: Rive d'Or Collection. Rose and green color accent otherwise yellow-gold surfaces that show tan overtones. Although somewhat lackluster and typically struck, this Denver example is devoid of any readily distracting marks. NGC ID# 28GK, PCGS# 8860

4515 **1911 MS64 NGC.** This attractive Choice example displays well-detailed design elements and lightly marked orange-gold surfaces with highlights of red. Both sides show full, if slightly subdued, mint luster. NGC ID# 28GT, PCGS# 8868

1911 Indian Eagle, MS64+
Needle-Sharp Strike

4516 **1911 MS64+ PCGS.** The 1911 Indian Head eagle claims a generous mintage of over 500,000 coins, making it a popular date among type collectors. This gorgeous near-Gem exhibits a needle-sharp strike and deep orange-gold color. Thick mint frost cascades over each minimally marked side, and the eye appeal is strong. NGC ID# 28GT, PCGS# 8868

4517 **1911-D XF45 PCGS.** The issue's mintage of only 30,100 coins makes it a key date in the Indian Head eagle series. This orange-gold Choice XF example exhibits well-struck design motifs with an expected amount of friction for the grade. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, AU53
Well-Defined and Minimally Abraded

4518 **1911-D AU53 NGC.** This low-mintage date (30,100 pieces) combined with the low survival rate leaves collectors with relatively few to choose from. In this regard, NGC and PCGS have graded fewer than 800 examples in all grades, mostly in About Uncirculated and lower Mint State levels. Traces of luster reside in the protected areas of this honey-gold AU53, and the design features are well-defined, including the delineation between the breast and wings and legs, often absent on this date. A few circulation marks are noted, but these are nowhere near as severe as typically encountered on this heavily abraded issue. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, AU55
Semikey Denver Issue

4519 **1911-D AU55 PCGS.** Like the half and quarter eagle of the same date, the 1911-D ten dollar is a widely sought, low-mintage issue (only 30,100 pieces struck) within the Indian Head series. A touch of light wear keeps this representative out of the Mint State category, but it retains much of its original mint luster, and surface abrasions are minimal.
From The Valley View Life Collection, Part Two. NGC ID# 28GU, PCGS# 8869

4520 **1911-S AU55 NGC.** A touch of light wear is seen on the eagle's shoulder and the central hair strands, but the design elements are otherwise sharp. Significant luster remains, and surface abrasions are minimal. With a low mintage of only 51,000 coins, this issue is elusive in Mint State grades. NGC ID# 28GV, PCGS# 8870

4521 **1912-S AU58 NGC.** The grade-defining wear is most easily seen on the eagle's facing wing, but the coin otherwise has the visual appeal of a lower-grade Uncirculated piece. Satiny, honey-gold luster graces each side, while surface abrasions are light and not overly detracting. NGC ID# 28GX, PCGS# 8872

4522 **1912-S AU58 NGC.** Frosty mint luster cascades over the straw-gold surfaces of this near-Mint ten. The 1912-S issue is typically encountered with a shallow strike and myriad abrasions. Although the devices show incomplete detail, lightly scattered abrasions are undistracting. NGC ID# 28GX, PCGS# 8872

1912-S Ten Dollar, Lustrous MS61

4523 **1912-S MS61 NGC.** Despite a mintage of 300,000 pieces (not all that much smaller than the Philadelphia issue's total of 405,000 pieces), the 1912-S eagle is many times scarcer in Mint State than its Philadelphia counterpart. This is a pleasing, lower-grade Mint State example, with rich honey-gold color and satiny luster. A number of small, but noticeable abrasions define the grade, but the central design elements exhibit only a touch of the typical weakness. NGC ID# 28GX, PCGS# 8872

4524 **1913-S AU55 NGC.** With a mintage of only 66,000 coins, the 1913-S is a challenging semikey in the series, especially in Mint State grades. This Choice About Uncirculated example displays satiny, honey-gold luster and nearly complete detail. Scattered abrasions are noted, the most noticeable being an old cut in the field above IN GOD WE TRUST. NGC ID# 28GZ, PCGS# 8874

4525 **1914-S AU58 NGC.** This is one of the more challenging dates in the Indian Head eagle series. Only a touch of slight friction occurs over the well-struck devices. Straw-gold colors each side, and marks are minimal for the grade. An attractive near-Mint representative. NGC ID# 28H4, PCGS# 8877

4526 **1914-S AU58 PCGS.** An attractive near-Mint coin that displays softly frosted luster over light yellow-gold surfaces. Liberty's headdress shows strong detail with minor friction over the hair and eagle's wing feathers. NGC ID# 28H4, PCGS# 8877

1915-S Ten Dollar, Minimally Marked AU58
Low Mintage and Survival Rate

4527 **1915-S AU58 NGC.** The 1915-S ten dollar has not only a low mintage of 59,000 pieces but also has a very low survival rate, as most were melted in the 1930s. NGC and PCGS have certified fewer than 800 specimens in all grades, making this issue a difficult acquisition in all levels of preservation. Considerable luster resides in the recessed areas of the reddish-gold surfaces of this near-Mint specimen and relatively strong definition is seen on the devices. The Indian's hair over the ear is especially impressive. Light contact marks are visible, but these are less widespread and deep than typically encountered on most examples (even Mint State ones) of this date. NGC ID# 28H6, PCGS# 8879

4528 **1916-S AU58 PCGS.** Strong honey-gold luster illuminates nearly complete detail on each side of this near-Mint San Francisco ten dollar. Light, scattered abrasions accompany the grade, though none are individually noteworthy.
From The Valley View Life Collection, Part Two. NGC ID# 28H7, PCGS# 8880

4529 **1916-S AU58 PCGS.** From the final ten dollar issue prior to 1920, this San Francisco example features orange-gold coloration and softly frosted luster over each side. The strike is good with minor friction preventing an Uncirculated designation. NGC ID# 28H7, PCGS# 8880

4530 **1916-S MS61 NGC.** A pleasing lower-grade Mint State example of this popular San Francisco issue, this piece shows strong yellow-gold luster and exhibits only light, scattered abrasions. A touch of softness is noted on the upper edge of the eagle's facing shoulder. NGC ID# 28H7, PCGS# 8880

1932 Indian Eagle, MS65
Frosty Type Representative

4531 **1932 MS65 NGC.** Widely hoarded, the 1932 Indian eagle survived the melting pots in significant numbers, and is now one of the more easily obtainable dates for type purposes. This piece has well-defined central details and frosty golden luster. A few grade-consistent ticks are seen when studied under a lens, though the overall appearance is highly attractive. An available date, but rather elusive in finer condition. NGC ID# 28HB, PCGS# 8884

1932 Ten Dollar, MS65
CAC-Recognized Eye Appeal

4532 **1932 MS65 PCGS. CAC.** This gorgeous Indian Head ten displays lemon-gold color with areas of light golden-orange toning over the headdress. Frosty luster rolls over each minimally marked side, and the devices show strong definition throughout. A high mintage of nearly 4.5 million coins makes this Gem representative an ideal type example. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, Mint State Sharpness Semiprooflike Fields

4533 **1850 — Cleaned — ANACS. MS60 Details.** ANACS notes cleaning, though the surfaces retain a pleasing lemon-gold patina, and the fields display strong remnants of semiprooflike mirroring. Scattered abrasions are present, but the bold strike balances the visual appeal. The 1850 double eagle is widely popular as the first issue of the denomination, but is also scarce in Uncirculated condition. *From The Valley View Life Collection, Part Two.* NGC ID# 268F, PCGS# 8902

4534 **1851 XF45 PCGS.** California Gold Rush yields resulted in the production of over 2 million double eagles in 1851, and the issue is moderately available into the lower-Mint State grades. This lightly circulated piece displays rose-gold coloration over surfaces that show an unsurprising number of abrasions. NGC ID# 268H, PCGS# 8904

4535 **1855 — Obverse Damage — NGC Details. AU.** Remnants of luster complement bright green-gold coloration on both sides of this lightly circulated piece. Scattered abrasions, including an area of field chatter around star 6 on the obverse accounts for the NGC Damage designation, though the overall appeal is nonetheless pleasing for coin in the AU grade range. NGC ID# 268V, PCGS# 8914

1856-S Twenty Dollar, AU50 Popular San Francisco Issue

4536 **1856-S AU50 NGC. CAC.** The discovery of more than 1,000 1856-S double eagles on the wreck of the *S.S. Central America* drastically changed the rarity of high-grade survivors, but also made the date even more sought-after for its connection with the famous treasure ship. This example (not pedigreed to the wreck), displays bright honey-gold patina with hints of luster in the protected regions. The surfaces are lightly abraded, as can be expected at this grade level. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, Mint State Sharpness Radiantly Lustrous

4537 **1856-S — Cleaning — PCGS Genuine. Unc Details.** This highly lustrous, honey-gold representative displays bold design definition and unusually pleasing eye appeal for a coin accompanied by a Cleaning designation on the holder. Close examination reveals some faint, scattered hairlines in portions of the fields on each side, these likely accounting for the details grade from PCGS. NGC ID# 2692, PCGS# 8919

4538 **1858-S XF45 NGC.** This Choice XF Type One double eagle offers lightly abraded orange and rose-gold surfaces that retain traces of original mint luster in sheltered areas. Traces of wear show on the rounded prongs of the coronet and on the hair curls, but much interior design detail remains intact. NGC ID# 2699, PCGS# 8925

4539 **1860 XF40 NGC.** Substantial mint luster remains in the protected regions on this well-detailed Type One Liberty double eagle. Scattered surface abrasions accompany the grade, but the original orange-gold patina balances the visual appeal. NGC ID# 269D, PCGS# 8929

4540 **1860-S — Improperly Cleaned — NGC Details. AU.** Although abnormally bright from cleaning, there are no annoying hairlines or overt signs of mishandling. A bit of mint luster remains around the stars and legends. Numerous small abrasions are present as expected for the AU Details grade.

4541 **10-Piece 1861 Double Eagle Set XF45 NGC and PCGS.** This set includes 10 1861 Liberty double eagles in XF45. Five coins are certified by NGC and another five are certified by PCGS. Each lightly circulated piece retains partial mint luster and displays an expected number of abrasions over both sides.(Total: 10 coins) NGC ID# 269G, PCGS# 8932

1861 Double Eagle, Well-Struck AU53

4542 **1861 AU53 NGC.** The large production approaching 3 million pieces makes the 1861 double eagle a common issue in most grades, though examples in the better levels of mint condition are rare. Luster stands out in the recessed areas of this AU53 specimen. The obverse displays slightly deeper toning than the reverse, and both sides exhibit well-struck design elements. Distributed marks are somewhat more evident on the obverse. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, AU58
Well-Struck and Lustrous

4543 **1861 AU58 PCGS.** Considerable luster is present on this well-struck, attractive near-Mint State example that also displays enticing red-orange and lime-green toning on each side. Numerous small abrasions are scattered about, slightly more so on the obverse. This issue is most readily found in About Uncirculated grades.
Ex: Long Beach Signature (Heritage, 2/2006), lot 3254. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, AU58
Attractive Original Surfaces

4544 **1861 AU58 NGC.** The 1861 double eagle boasts a mintage of nearly 3 million coins, and is often chosen for Type One representation. This nearly Mint State example displays original honey-gold patina with substantial mint luster remaining the protected areas. Light, scattered abrasions accompany the grade. NGC ID# 269G, PCGS# 8932

1865-S Double Eagle, Well-Struck AU50

4545 **1865-S AU50 PCGS.** The honey-gold and reddish-gold surfaces of this S-mint double eagle display luster in the protected areas. The design element are are relatively well-struck for a later-date Type One twenty (coins from the new obverse hub used beginning in 1859 show less detail than those of 1850-1858, per Bowers, 2004). Distributed minute marks are consistent with a lightly circulated large gold coin. NGC ID# 269V, PCGS# 8944

1867 Double Eagle, AU55
Preferred Type Two Issue

4546 **1867 AU55 NGC.** The relatively low mintage of 251,065 pieces was heavily exported, and many well-traveled examples have since returned to collectors' hands. This apricot-gold piece displays nice remaining luster, yet the abrasions are fairly numerous for the Choice AU grade. Eye appeal is not denied, however, and this issue is always a popular Type Two selection. NGC ID# 269Z, PCGS# 8951

4547 **1867-S AU50 NGC.** Large S, the scarcer of the two mintmark sizes for the issue. A yellow-gold double eagle with substantial remaining luster on the reverse. Luster also fills LIBERTY and the date. Marks are relatively minor aside from a cluster beneath the right (facing) wing.
Ex: Long Beach Signature (Heritage, 9/2005), lot 4996. NGC ID# 26A2, PCGS# 8952

4548 **1868-S XF40 NGC.** Soft green-gold patina and remarkably clean fields are the hallmarks of this lightly circulated Type Two Liberty double eagle, while tinges of luster in the reverse fields further add to the overall visual appeal. NGC ID# 26A4, PCGS# 8954

4549 **1871 — Harshly Cleaned — NGC Details. Unc.** Rotation beneath a light reveals patches of coarse hairlines. Nonetheless, a well struck and flashy representative of a low mintage and conditionally rare Philadelphia issue. Gold coins failed to circulate on the East Coast during the early 1870s, driven out by unbacked Federal paper money. NGC ID# 26AA, PCGS# 8960

4550 **1871-S AU55 NGC.** Small Narrow S, scarcer than its Small Squat S alternative for the issue. This apricot-gold and olive-green double eagle is sharply struck and displays bright luster throughout design recesses. Abrasions are unobtrusive except for a slender mark on the cheekbone. NGC ID# 26AC, PCGS# 8962

4551 **1872 AU58 NGC. CAC.** A splendid near-Mint example of this conditionally scarce Philadelphia issue; rare in Uncirculated condition according to Garrett and Guth. Highly lustrous despite its AU rating, with well-struck design motifs and bright yellow-gold surfaces. Small contact marks and wispy hairlines are noted on both sides. NGC ID# 26AD, PCGS# 8963

4552 **1873 Open 3 MS61 PCGS.** A visually pleasing coin with bright, lustrous surfaces that show even yellow-gold toning. Scattered, minor abrasions are typical for the grade on the obverse, while the reverse surfaces are smoother and surprisingly clear of noticeable marks. NGC ID# 26AH, PCGS# 8967

1873 Open 3 Twenty, MS62
Smooth, Nearly Mark-Free Surfaces

4553 **1873 Open 3 MS62 PCGS. CAC.** This sharply struck Open 3 double eagle is exceptionally free of abrasions or marks of any substance. The obverse is heavily frosted — moreso than the reverse — and as a result, the luster is reserved beneath the frost except when viewed at an advantageous angle. CAC recognized the high quality of this appealing coin, which is seemingly finer than the assigned grade based on technical merit. NGC ID# 26AH, PCGS# 8967

1874-CC Double Eagle, XF45

4554 **1874-CC XF45 NGC. CAC. Variety 3-A.** For the 1874-CC, a single reverse die was paired with five different obverses. The 1874-CC has a similar mintage as the '75-CC and '76-CC but is somewhat scarcer. Presumably, fewer were paid out by importers. The present yellow-gold Carson City twenty is nicely defined and less abraded than expected. The lower reverse displays occasional minor granularity. NGC ID# 26AP, PCGS# 8971

4555 **1875-CC VF35 NGC. Variety 4-C.** The second C in the mintmark is positioned partly over the second T in TWENTY. The Carson City Mint produced 111,151 double eagles in 1875, making it one of the more available issues from the facility and a perfect type date. This coin exhibits original orange-gold coloration and scattered abrasions. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, XF45
Better Variety 4-B

4556 **1875-CC XF45 NGC. Variety 4-B.** Variety 2-B appears to be the most prevalent of the many 1875-CC die varieties. Variety 4-B is much rarer and is identified by its date location and a die line within the lower half of the R in LIBERTY. This caramel-gold twenty is lightly marked aside from contact beneath the right (facing) wingtip. NGC ID# 26AT, PCGS# 8974

4557 **1875-CC — Obverse Damage — NGC Details. AU. Variety 3-B.** This Carson City double eagle exhibits frosty, honey-gold mint luster and nearly complete detail on each side. A severely abraded obverse warrants the details grade from NGC, though no individually significant scars are noted.

1875-CC Double Eagle, Unc Details

4558 **1875-CC — Obverse Improperly Cleaned — NGC Details. Unc. Variety 1-B.** The 1875-CC is among the more plentiful double eagles from this Mint, and is popular among mintmark type collectors. This example displays radiant, frosty mint luster and well-detailed devices. NGC notes signs of light cleaning on the obverse, though it pairs well with the highly appealing reverse. Light, scattered abrasions are noted on each side. NGC ID# 26AT, PCGS# 8974

1876-CC Double Eagle, XF45

4559 **1876-CC XF45 NGC. Variety 4-A.** An apricot-gold Centennial-year representative that shows ample bright luster and an absence of individually distracting abrasions. The strike is bold, and high point wear is moderate on the curls and eyebrow. During the era of the gold standard (1873 to 1933), foreign exporters demanded payment in Federal gold coin. European banks accumulated the 1876-CC twenties since disbursed to American collectors. NGC ID# 26AW, PCGS# 8977

4560 **1876-CC — Improperly Cleaned — NGC Details. AU. Variety 3-A.** The 1 in the date is centered over a dentil, the 7 is centered between two dentils, and the right edge of the second C in the mintmark is aligned with the right edge of the second T in TWENTY. This lightly circulated coin offers bright green- and yellow-gold surfaces with well-struck devices. Abrasions are scattered throughout, typical for the issue.

4561 **1877 MS61 NGC.** In 1877, the design was modified to read TWENTY DOLLARS. Radiant luster rolls over the surfaces of this Philadelphia issue. The design elements are boldly impressed with full star centers and sharp hair detail. Myriad abrasions are scattered over each side, but this remains an attractive Mint State representative. NGC ID# 26AY, PCGS# 8982

4562 **1877-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** The cleaning was not harsh, but the original patina is replaced by bright, yellow-gold coloration across both sides of the coin. Still, remnants of mint luster are seen at the margins and more extensively on the reverse. An available Carson City issue, and popular as the first Type Three reverse with TWENTY DOLLARS spelled out. Fewer than expected abrasions are seen on the well-struck surfaces.

4563 **1877-S MS61 PCGS.** Frosty luster covers medium yellow-gold surfaces that exhibit occasional green accents. This first-year Type Three coin shows sharp definition over Liberty's hair curls, and grade-consistent abrasions are scattered evenly throughout. NGC ID# 26B2, PCGS# 8984

4564 **1877-S MS61 NGC.** This first-year Type Three double eagle exhibits full star detail and strong definition on Liberty's hair. Rose-gold surfaces show occasional green accents with an expected number of abrasions scattered over each side. NGC ID# 26B2, PCGS# 8984

4565 **1877-S MS61 PCGS.** Orange- and green-gold paint each side of this lustrous S-mint twenty. The surfaces display strongly defined devices and minimally distracting abrasions. Many of the 1.7 million coins struck for the issue were either circulated or exported overseas. NGC ID# 26B2, PCGS# 8984

1879 Liberty Twenty, MS61
Scarce Mint State Example

4566 **1879 MS61 PCGS.** Double eagle production at the Philadelphia Mint waned in 1879 and nearly disappeared in the years following, in part due to the impetus of the Bland-Allison Act of 1878 that stimulated a meteoric increase of silver dollar production. This Uncirculated twenty shows a typical number of abrasions, but the coin is brightly lustrous and and displays attractive, honey-gold color. NGC ID# 26B6, PCGS# 8988

1879 Twenty Dollar, MS61
Elusive in Mint State

4567 **1879 MS61 PCGS.** Mint condition survivors from this P-mint issue (207,600 coins) are scarce. This MS61 representative showcases rose-gold surface coloration with green overtones. The devices are well-struck with slight high-point softness, and grade-consistent marks are scattered over each side. PCGS has certified 60 coins in higher numeric grades (7/14). NGC ID# 26B6, PCGS# 8988

1882-CC Twenty, XF40
Attractive Orange-Gold Color

4568 **1882-CC XF40 NGC. Variety 1-B.** This variety shows the second C in the mintmark slightly higher and a die crack through TWENTY DOLLARS. After a two-year hiatus, the Carson City Mint struck 39,140 double eagles, nearly four times as many as were struck in 1879. This piece exhibits deep orange-gold color and traces of original luster. An expected number of abrasions occur over each side. Overall, an appealing and only lightly circulated example. NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, XF40
Original Patina

4569 **1883-CC XF40 NGC. Variety 2-A.** A number of this issue survived the 1930s melting pots via overseas holdings, much to the delight of Carson City collectors. This piece shows strong detail for the grade, with hints of original luster shining through. Deep apricot overtones in the recesses accent deep olive-gold patina overall, while noticeable surface flaws are minimal. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty, XF45
Nice Collectible CC Example

4570 **1883-CC XF45 NGC. Variety 2-A.** The second C in the mintmark is positioned over the D in DOLLAR. This Choice XF representative shows traces of original mint luster within the protected regions. The surfaces display green- and reddish-gold coloration with boldly impressed design features throughout. Wear is minimal and marks are evenly scattered over each side. NGC ID# 26BH, PCGS# 8999

1884-CC Double Eagle, XF45
Unusually Lustrous

4571 **1884-CC XF45 NGC. Variety 1-A.** As with the 1883-CC, large numbers of this issue survived in overseas hoards to supply modern-day collectors with ample pieces from which to choose. This Choice XF example retains substantial yellow-gold mint luster in the recesses, with only light wear over the high points of the design. Scattered abrasions are present, as is typical at this grade level. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty, Choice XF

4572 **1884-CC XF45 NGC. Variety 1-A.** A wheat-gold Carson City type coin. Bright luster outlines individual obverse stars, and fills the legends, rays, curls, and eagle. Small marks are scattered but none are offensive. Nicely detailed despite light wear on the curls and wings. Only a single die pair is known for the popular and collectible issue. NGC ID# 26BK, PCGS# 9001

1885-CC Twenty Dollar, AU Details
Only 9,450 Coins Minted

4573 **1885-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** The 1885-CC double eagle is a scarce issue in all grades with a mintage of only 9,450 coins. This AU example offers peach-gold color and cartwheel luster over each side. Liberty's portrait is needle-sharp, while the stars and the eagle's neck feathers show trivial softness. A few wispy marks occur from the noted cleaning, but they do not overly affect the desirability of this Carson City twenty. NGC ID# 26BN, PCGS# 9004

4574 **1885-S MS62 PCGS.** This is a highly lustrous, well-struck example of this popular Type Three San Francisco issue. The color is mainly yellow-gold, though shades of deeper orange and pale lilac accent the central regions. NGC ID# 26BP, PCGS# 9005

4575 **1885-S MS62 NGC.** This San Francisco-issued Type Three double eagle displays excellent eye appeal for the grade with radiant apricot-gold luster and sharply struck design elements. Scattered abrasions contribute to the grade, but they are minor and not overly distracting to the unaided eye. NGC ID# 26BP, PCGS# 9005

4576 **1885-S MS62 PCGS. CAC.** The issue enjoys a lofty mintage of 683,500 pieces, and many were exported for international trade. Honey-gold color dominates each side, with green and rose accents strengthening the eye appeal of this sharp S-mint double eagle. NGC ID# 26BP, PCGS# 9005

4577 **1885-S MS62 NGC. CAC.** Sharply struck with nearly full definition throughout. The real hallmarks of this highly attractive example are flashy mint luster and beautifully blended hues of lime-green, yellow-gold, and pale rose coloration. Scattered small abrasions limit the grade of this overall pleasing double eagle. NGC ID# 26BP, PCGS# 9005

4578 **1888 MS61 NGC.** After a series of ultra-low mintages from 1881 through 1887, the Philadelphia Mint struck 226,161 double eagles in 1888, making it the first readily available date of the decade. This Mint State example displays yellow-gold surface coloration with green and rose accents. Sharply struck and minimally abraded. NGC ID# 26BT, PCGS# 9008

4579 **1889-CC — Brushed — NGC Details. AU. Variety 1-A.** The Carson City Mint resumed production in 1889 after having been out of commission since 1885. The facility struck 30,945 double eagles and the issue is popular among collectors today. This example offers orange-gold coloration and sharp detail with expected friction over the high points. The obverse is lackluster from the noted brushing, while the reverse remains partially lustrous. NGC ID# 26BV, PCGS# 9011

1892-CC Double Eagle, XF45

4580 **1892-CC XF45 NGC. Variety 1-A.** A golden-brown representative of this lower mintage Carson City emission. Glimmers of luster are particularly prevalent on the reverse. Faintly hairlined and moderately abraded with small rim marks near 11 o'clock on the obverse and 1 o'clock on the reverse. NGC ID# 26C6, PCGS# 9020

1895 Twenty, MS64
Few are Certified Finer

4581 **1895 MS64 NGC.** The near-Gem grade is seemingly the stopping point for most examples of this issue, with just 11 coins certified numerically finer by PCGS and NGC combined (7/14). This highly lustrous, gleaming representative is Choice, with excellent sun-gold color and a strong strike. Only minor ticklike abrasions are widely scattered across the brilliant fields and devices.
From The Valley View Life Collection, Part Two. NGC ID# 26CD, PCGS# 9027

4582 **1898-S MS64 PCGS. CAC.** The surfaces feature beautifully original, orange-gold color and swirling mint luster, accounting for the CAC sticker. All stars show full centers, and Liberty's hair is remarkably well-defined. This near-Gem is a perfect S-mint type. NGC ID# 26CL, PCGS# 9034

4583 **1899 MS64 PCGS.** Beautiful, deep orange-red color complements generous cartwheel luster on this eye-appealing piece, held back from an even finer grade by a patch of small marks on Liberty's cheek and a sole luster graze in the right obverse field. NGC ID# 26CM, PCGS# 9035

4584 **1899 MS64 PCGS. CAC.** This is a fully struck double eagle and a wonderful type representative. Dynamic orange-gold surface coloration shows reddish-gold and lavender accents, and frosty luster rolls over each minimally marked side. PCGS has seen only 21 numerically finer examples (7/14). NGC ID# 26CM, PCGS# 9035

1899 Double Eagle, MS64+
CAC-Approved Eye Appeal

4585 **1899 MS64+ PCGS. CAC.** Bold orange-gold color and swirling cartwheel luster intermingle over each side of this eye-appealing near-Gem. The design features are well-struck with full stars on both sides, and only a small mark above the eagle's head precludes a Gem designation. PCGS has certified just 21 coins finer from a mintage of nearly 1.7 million pieces (7/14). NGC ID# 26CM, PCGS# 9035

1900 Double Eagle, MS64
High-End for the Grade

4586 **1900 MS64 NGC. CAC.** The 1900 Liberty double eagle is a common date in MS64 and lower, but becomes significantly more challenging in Gem and finer grades. This Choice representative is incredibly close to Gem quality, with frosty, vibrant yellow-gold mint bloom and fully struck design elements. Close examination reveals a few faint surface grazes on Liberty's cheek, though these are really insignificant, and the eye appeal is reminiscent of a coin that must have just missed a finer grade assessment. NGC ID# 26CP, PCGS# 9037

1901 Double Eagle, MS64
Outstanding Eye Appeal

4587 **1901 MS64 PCGS. CAC.** Between 1900 and 1901, production of double eagles at the Philadelphia Mint dropped from nearly 1.9 million coins to only 111,400 coins. Still, the two dates are roughly equal in terms of availability. This splendid Choice representative offers booming luster over rich, orange-gold surfaces. Each side is clean for the grade and only a small planchet void under the NT in TWENTY precludes a Gem designation. NGC ID# 26CS, PCGS# 9039

1901 Double Eagle, MS65
Deep Orange-Gold Color

4588 **1901 MS65 PCGS.** A Philadelphia Mint issue that is surprisingly available, and popular for type purposes, despite its low mintage of 111,400 pieces. This Gem example is sharply struck and highly lustrous with well-preserved surfaces. Several red-orange alloy spots are observed on each side, along with unusually deep orange-gold coloring and a few areas of pale lilac-gray coloration on the reverse. PCGS has only graded four coins finer (7/14). NGC ID# 26CS, PCGS# 9039

4589 **1903 MS64 NGC. CAC.** This attractive Choice specimen offers sharply detailed design elements and vibrant mint luster, with outstanding eye appeal. The well-preserved orange-gold surfaces show a few hints of rose and only minor signs of contact. NGC ID# 26CW, PCGS# 9043

1903-S Double Eagle, MS64
Radiant Mint Bloom

4590 **1903-S MS64 NGC.** The 1903-S double eagle is moderately available in grades through MS64, but at the Gem level its population plunges to the point of being genuinely rare. This near-Gem showcases vibrant, frosty rose-gold luster over each side, with well-struck design elements and a lack of any mentionable surface imperfections. NGC has encapsulated just 22 numerically finer representatives (7/14). NGC ID# 26CX, PCGS# 9044

1904 Twenty Dollar, MS63 Prooflike
Deeply Mirrored Fields

4591 **1904 MS63 Prooflike NGC.** With a mintage of over 6.2 million coins, this double eagle issue is by far the most plentiful in the series. However, Select examples with a Prooflike designation are scarce. The surfaces are primarily yellow-gold with a few splashes of reddish color over the obverse. Sharply struck with undeniable contrast, this representative is perfect for type purposes. Marks are lightly scattered throughout. PCGS# 79045

SAINT-GAUDENS DOUBLE EAGLES

4592 **1908 No Motto MS66 PCGS. CAC.** Short Rays obverse. An exquisite representative of the short-lived design subtype. Peach-gold and olive-green alternate across lustrous and uncommonly smooth surfaces. NGC ID# 26F6, PCGS# 9142

4593 **1908 Motto MS63 PCGS.** The With Motto 1908 Saint-Gaudens double eagle is somewhat scarcer overall than its No Motto counterpart. This example displays satiny mint luster and rich green-gold color. *Ex: Long Beach Signature (Heritage, 1/2004), lot 7629.* NGC ID# 26F8, PCGS# 9147

1908 Motto Double Eagle, Well-Defined MS64

4594 **1908 Motto MS64 PCGS.** The 1908 Motto double eagle had a significantly lower production than its No Motto counterpart (slightly more than 156,000 pieces for the former and over 4 million coins for the latter). The 1908 Motto is available through MS63. Near-Gems are somewhat scarce, but can be located with searching. Gem and finer coins are very elusive. This lustrous MS64 Motto exhibits well-defined design elements, including the panes and pillars of the Capitol building and the eagle's plumage. Light marks determine the grade. NGC ID# 26F8, PCGS# 9147

1908 Motto Twenty Dollar, Conditionally Scarce MS64

4595 **1908 Motto MS64 PCGS.** Most 1908 Motto double eagles were apparently melted in the 1930s. Bowers (2004) writes that: "Mint State pieces are fairly scarce, MS-64 coins are especially so, and any finer coin is a rarity." The orange-gold surfaces of this near-Gem yield pleasing luster and are nicely struck. Scattered minuscule marks are within the parameters of the grade designation. NGC ID# 26F8, PCGS# 9147

1908 Motto Twenty Dollar, MS64+
Scarcely Seen Finer

4596 **1908 Motto MS64+ PCGS.** Public outcry led Mint officials to add IN GOD WE TRUST above the sun part way through 1908, in spite of President Roosevelt's wishes. Only 156,200 With Motto coins were struck, compared to over 4.2 million No Motto coins produced earlier in the year. This Plus-designated Choice example exhibits lustrous honey-gold surfaces and sharply detailed devices. Marks are well-hidden and undistracting. NGC ID# 26F8, PCGS# 9147

4597 **1909 MS62 NGC. CAC.** The design elements of this attractive MS62 specimen exhibit sharp definition throughout and vibrant mint luster radiates from both sides. The light orange-gold surfaces show a scattering of minor contact marks that define the grade. NGC ID# 26FB, PCGS# 9150

4598 **1909-S MS64 PCGS.** This is a crisply struck Double Eagle that has pleasing luster and a few visible contact marks on either side. The 1909-S is one of the more available issues of the 46 Stars, With Motto subtype.
Ex: Dallas Signature (Heritage, 11/2005), lot 4739. NGC ID# 26FE, PCGS# 9153

4599 **1909-S MS64+ PCGS. CAC.** Radiant luster rolls over the well-struck surfaces of this near-Gem piece and combines with honey-gold color to generate strong eye appeal. Although the 2.7 million-coin mintage would suggest otherwise, Gems are surprisingly elusive. NGC ID# 26FE, PCGS# 9153

1910-D Saint-Gaudens Twenty, MS65+
Minimally Marked, Scarcely Seen Finer

4600 **1910-D MS65+ NGC.** In terms of availability, the 1910-D double eagle is similar to its Philadelphia counterpart in most grades, although more examples are certified in Gem and Premium Gem condition. This MS65+ representative showcases frosty, medium yellow-gold surfaces with no individually significant marks. Sharply struck and attractive. NGC ID# 26FG, PCGS# 9155

4601 **1911-D MS65 NGC. CAC.** The 1911 D-mint double eagle issue is plentiful up to and including the Gem grade level, making this gorgeous representative appropriate for type purposes. Satiny, honey-gold luster endows each well-struck side with undeniable visual appeal. NGC ID# 26FK, PCGS# 9158

4602 **1911-D MS65+ PCGS. CAC.** This is a flashy, high-end Gem example with dazzling mint luster and well-preserved yellow-gold surfaces that reveal only slight, scattered blemishes. The bright surfaces have a pleasing mattelike texture reminiscent of contemporary proofs from this era. NGC ID# 26FK, PCGS# 9158

1913-S Double Eagle, MS63
Low-Mintage Issue

4603 **1913-S MS63 PCGS.** This is a slightly better San Francisco issue, boasting a low mintage of only 34,000 coins. This piece displays vibrant honey-gold mint bloom and sharply defined motifs. Scattered abrasions contribute to the grade, though they are evenly dispersed and pose little distraction. NGC ID# 26FR, PCGS# 9163

4604 **1914-S MS65 NGC. CAC.** A lemon-gold Gem with potent luster and an intricate strike. Minor grazes on the right obverse field are all that deny an even finer grade. Housed in a former generation holder. NGC ID# 26FU, PCGS# 9166

4605 **1916-S MS64 NGC.** An attractive example from the San Francisco Mint. Antique-gold and pale rose toning variations increase the pleasing visual appeal of this lightly abraded, satiny near-Gem double eagle. NGC ID# 26FX, PCGS# 9169

4606 **1916-S MS64 PCGS.** This near-Gem Saint is intensely lustrous and well-preserved, showing minimal marks for the grade. The bright surfaces display delightful lime-gold coloration. NGC ID# 26FX, PCGS# 9169

1920 Double Eagle, MS64
Elusive in Finer Grades

4607 **1920 MS64 PCGS.** The coppery-gold surfaces of this near-Gem twenty display pleasing luster and are imbued with blushes of soft violet, all of which yield attractive eye appeal. The design elements are well-struck, and the few scattered marks are within the confines of the grade designation. Despite the low mintage of slightly more than 228,000 pieces the 1920 is readily available in lower mint condition. MS64 is the finest one can expect to locate as higher-grade pieces are exceeding rare (PCGS and NGC have seen eight examples finer, 7/14). NGC ID# 26FY, PCGS# 9170

1922 Double Eagle, MS65
Exceedingly Rare Any Finer

4608 **1922 MS65 PCGS.** The 1922 double eagle is readily available in grades through MS65, but the certified population plunges dramatically in MS66, where PCGS has encapsulated only eight coins (7/14). This softly frosted Gem example displays radiant honey-gold luster and bold motifs. The fields are virtually undisturbed, and only a few minute grazes on the eagle's feathers and Liberty's knee appear to preclude an even finer grade. NGC ID# 26G3, PCGS# 9173

1922-S Twenty Dollar, Lustrous MS63

4609 **1922-S MS63 NGC.** The 1922-S double eagle is among the many branch mint issues from the 1920s that experienced mass melting post-1933, rendering the date's 2.6 million-coin mintage highly misleading. This Select example shows radiant mint luster and rose-gold color over generally well-defined surfaces; only the Capitol is weakly detailed. Die cracks and lightly scattered abrasions occur throughout. NGC ID# 26G4, PCGS# 9174

4610 **1923-D MS66 PCGS.** This delightful Premium Gem offers sharply detailed design elements and vibrant mint luster throughout. The well-preserved yellow-gold surfaces are remarkably free of distractions and eye appeal is outstanding. NGC ID# 26G6, PCGS# 9176

4611 **1923-D MS66 PCGS.** This coin exemplifies the general description of this issue as expressed by Jeff Garrett and Ron Guth: "As most examples are boldly struck and show radiant luster, this date is often chosen to represent the type if just a single coin is desired."

This is a lovely piece with sharp design motifs and the bright luster mentioned by the authors. Apricot-gold coloration is complemented by faint lilac-gray accents near the centers, on each side. NGC ID# 26G6, PCGS# 9176

4612 **1923-D MS66 PCGS.** Flashy luster along with rich shades of yellow-gold and orange combine to provide this sharply struck Premium Gem specimen with outstanding eye appeal. A tiny as-made strike-through is present within the rays at right on the obverse. A few tiny spots appear on the reverse. PCGS has awarded higher numeric grades to only 67 examples (7/14). NGC ID# 26G6, PCGS# 9176

4613 **1923-D MS66 PCGS.** Magnificent orange-gold color and lilac accents paint each side of this fully struck twenty. The issue is the most readily available mintmarked date in the Saint-Gaudens double eagle series, yet this Premium Gem is as fine an example as one may hope to find without exceeding a five-figure budget. NGC ID# 26G6, PCGS# 9176

4614 **1924 MS65 NGC.** Although the 1928 twenty dollar issue claims a higher mintage, the 1924 date is the most readily available in the series, making this Gem appropriate for type purposes. Sharp definition characterizes the devices, while orange-gold color and vibrant luster blend throughout. NGC ID# 26G7, PCGS# 9177

1924 Twenty Dollar, MS66+ High-End Saint-Gaudens Gold

4615 **1924 MS66+ PCGS.** The well-preserved, medium-gold surfaces of this Premium Gem are nicely frosted and lustrous, and the design elements are sharply detailed throughout. Eye appeal is exceptional. From more than 8,300 Premium Gem coins certified by PCGS, a mere 63 pieces have earned the Plus designation (7/14). NGC ID# 26G7, PCGS# 9177

4616 **1924 MS66 NGC. CAC.** Frosty golden mint bloom is accented by wisps of rainbow color in the central reverse on this high-end type coin. The strike is bold throughout, and the surfaces are seemingly pristine. NGC ID# 26G7, PCGS# 9177

1924-D Double Eagle, AU58 Well-Struck and Minimally Abraded

4617 **1924-D AU58 NGC.** Most 1924-D double eagles were retained in the States instead of being sent overseas for international transactions. Consequently, during the 1930s they were available to be turned over to the government for melting into gold bars. The honey-gold surfaces of this near-Mint offering display ample luster in the protected areas of the well-struck design elements. Both sides are minimally abraded for a large gold coin that has seen some circulation. NGC ID# 26G8, PCGS# 9178

4618 **1925 MS65 PCGS.** A lovely, well-struck Gem with lustrous surfaces and pleasing lime-gold toning. A couple of faint alloy spots, one on each side, do little to detract from the overall appeal of this attractive example from the Philadelphia Mint. NGC ID# 26GA, PCGS# 9180

4619 **1925 MS66 PCGS.** A beautiful Premium Gem Saint with bright, distraction-free surfaces that are highly lustrous and display lovely yellow-gold toning, with rose accents near the centers. Only six coins have been rated finer than this one by PCGS (7/14). NGC ID# 26GA, PCGS# 9180

1925-S Double Eagle, AU50 Minimally Abraded for the Issue

4620 **1925-S AU50 PCGS.** Most of the large mintage (3.7+ million pieces) of the 1925-S double eagle was sent to the melting pots in the 1930s, and the majority of surviving examples are in About Uncirculated and lower Mint State grades. This well-defined AU specimen displays traces of luster in the recessed areas of its apricot-gold surfaces. Both sides reveal remarkably fewer and less severe marks that are expected for this issue that typically shows "a generous number of light to moderate abrasions (Akers, 2008)." NGC ID# 26GC, PCGS# 9182

4621 **1926 MS66+ NGC.** The 1926 Saint-Gaudens double eagle is easily obtainable in grades through MS66, but finer coins are decidedly rare. This radiant example showcases exceptional design definition and nearly undisturbed surfaces. The patina is primarily orange-gold, though wisps of lighter yellow-gold color are seen in the central regions and a small, coppery-red toning spot is noted on the central reverse. NGC has encapsulated only eight numerically finer representatives (7/14). NGC ID# 26GD, PCGS# 9183

4622 **1927 MS65 PCGS.** When one thinks of type coins in the Saint-Gaudens double eagle series, the 1924 usually comes to mind first, but the 1927 is also readily available and often comes with superior eye appeal. This piece is no exception, with frosty honey-gold luster and sharp motifs. A few grade-consistent ticks are seen upon close examination. NGC ID# 26GG, PCGS# 9186

4623 **1928 MS65 NGC.** Frosty mint luster embraces each side of this sharply impressed twenty. The 1928 double eagle issue was struck in large quantities, to the tune of 8.8 million coins — the highest mintage of any U.S. gold coin. Although many pieces were likely melted after the gold recall of 1933, the date remains widely embraced as an ideal type. NGC ID# 26GK, PCGS# 9189

4624 **1928 MS65 PCGS.** Rich lemon-gold luster blankets sharp design elements on each side of this Gem Saint-Gaudens type coin. The eye appeal is excellent, and only a few minute surface ticks show up when studied beneath a light. NGC ID# 26GK, PCGS# 9189

TERRITORIAL GOLD

Augustus Bechtler Dollar, AU53
27 Grains, Kagin-24

4625 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU53 PCGS. K-24, R.3.** Struck by Augustus Bechtler, circa 1842 to 1852. Highly reflective surfaces give way to subtle orange and green-gold hues on each side. The upper obverse rim is weak, but the motifs are otherwise well-defined. The reverse die is rotated approximately 90 degrees, not uncommon for the issue. No die breaks are readily apparent.
From The Valley View Life Collection, Part Two. PCGS# 10040

S.S.C.A. RELIC GOLD MEDALS

Humbert Fifty Dollar Commemorative
Privately Coined in 2008 Using
S.S. Central America Ingots, Gem Proof

4626 **2008 S.S.C.A. "Humbert $50 Commemorative" Gem Proof NGC.** #95 of 375. The source of the gold alloy was Kellogg & Humbert ingots 830 and 555 recovered from the *S.S. Central America* shipwreck. Struck on September 12, 2008, exactly 149 years after the maritime disaster. The design is based on Kagin-11 except for a four-line legend within a plain rectangle on the reverse. PCGS# 10361

Humbert Fifty Dollar Commemorative
Struck in 2008 From S.S.C.A. Ingots, Gem Proof

4627 **2008 S.S.C.A. "Humbert $50 Commemorative" Gem Proof NGC.** #94 of 375. Struck with gold recovered from *S.S. Central America,* Kellogg & Humbert gold ingots 830 and 555. Struck on September 12, 2008, missing the sesquicentennial of the sinking by a single year. The design is similar to Kagin-11, but the reverse has a rectangular area with a four-line informational inscription. PCGS# 10361

CALIFORNIA FRACTIONAL GOLD

1854 Liberty Round Half, AU58
Very Rare BG-403

4628 **1854 Liberty Round 50 Cents, BG-403, R.7, AU58 NGC.** A very rare Period One variety. The FD initials below the Liberty bust represent Frontier, Deviercy & Co., a San Francisco jewelry partnership circa 1853 to 1857. This butter-gold near-Mint example has a trace of high-point friction on the portrait but the fields are flashy and show only faint hairlines from circulation. A couple of minor retained laminations emerge beneath a loupe. PCGS# 10439

4629 **1872 Liberty Octagonal 25 Cents, BG-725, High R.5, MS65 Prooflike NGC.** A flashy and essentially pristine canary-gold Gem. Well struck at the borders with a lighter impression at the centers. A rare die variety, BG-725 has been certified on ten occasions by NGC, with the present piece tied with one other for the honor of finest graded (7/14). PCGS# 710552

4630 **1880 Indian Octagonal 25 Cents, BG-799X, R.3, MS66 NGC.** A high grade apricot-gold Premium Gem. Lustrous and smooth fields combine with a sharp strike to ensure imposing eye appeal. A later die state with clashes near the R in DOLLAR. Census: 2 in 66, 1 finer as 66 Prooflike (7/14). PCGS# 10650

4631 **1881 Indian Round 25 Cents, BG-886, High R.5, MS66 Prooflike NGC.** A peach-gold Premium Gem with smooth mirrored fields and only slight inexactness of strike on the LL in DOLLAR. Outstanding quality for the better Breen-Gillio Period Two variety. Census: 5 in 66 Prooflike, 1 finer (7/14). PCGS# 710747

1881 BG-887 Indian Round Quarter
MS67 Prooflike

4632 1881 Indian Round 25 Cents, BG-887, R.3, MS67 Prooflike NGC. A pristine Superb Gem with radiant butter-gold fields and lightly frosted motifs. The strike shows only slight blending at the centers. Christopher Mohrig of San Francisco is credited as the maker. Census: 3 in 67 Prooflike, 3 in 67 Deep Prooflike, 0 finer (7/14). PCGS# 710748

4633 1876/6876 Indian Octagonal 50 Cents, BG-935, R.5, MS65 NGC. A rare overdate variety of Hermon J. Brand's octagonal Indian Head half dollar. Low power magnification shows the outer loop of an underlying 6 to the left of the primary 1 in the date. Several reverse letters, including the 2 in the fraction, are recut. This is a well-struck piece, with the typically seen prooflike fields and rich green-gold color. Listed on page 401 in the 2015 *Guide Book*. Census: 2 in 65, 0 finer (7/14). PCGS# 10793

1852 Octagonal Indian Half, Prooflike MS66
Rare BG-962, Single Finest at PCGS

4634 1852 Indian Octagonal 50 Cents, BG-962, Low R.7, MS66 PCGS Secure. A radiant, prooflike lemon-gold example, pristine save for a wispy line above the fraction bar. The centers show selected blending typical of the series. Christopher Mohrig was the engraver for a lengthy series of Indian Head octagonal halves between 1872 and 1881. He also produced several rare backdated varieties, including three dated 1852. Regarding BG-962, PCGS has certified a mere nine pieces, with the present coin as the single finest from that service (7/14). PCGS# 10820

4635 1876 Indian Round 50 Cents, BG-1065, R.5, MS66 Deep Prooflike NGC. Tied for the finest certified at NGC, and a grade above any at PCGS, the present pristine yellow-gold BG-1065 half dollar has radiant mirrored fields and only minor incompleteness at the centers. Census: 4 in 66 Prooflike, 0 finer (7/14). PCGS# 910894

1881 BG-1069 Round Indian Half
MS66 Deep Prooflike
Single Finest Certified

4636 1881 Indian Round 50 Cents, BG-1069, High R.4, MS66 Deep Prooflike NGC. As of (7/14), NGC has certified a total of 19 examples, with the present piece as the single finest. The prominently reflective fields are lemon-gold and essentially as made. The strike is bold except above the O in DOLLAR. A few "ghosts" from the obverse stars are present on the lower right reverse margin. PCGS# 910898

4637 1876/5 Indian Octagonal 1 Dollar, BG-1129, R.4 MS64 Prooflike NGC. An excellent near-Gem example of this overdated octagonal gold dollar, made by Christopher Ferdinand Mohrig in San Francisco. The deeply mirrored, yellow-gold fields display strong cameo contrast but reveal few abrasions when studied with a loupe. Unusually well-struck for the issue, from mildly rotated dies. Census: 6 in 64 Prooflike, 3 finer (7/14). PCGS# 710940

1870 Liberty Round Dollar, MS61
Very Scarce BG-1203

4638 1870 Liberty Round 1 Dollar, BG-1203, Low R.5, MS61 NGC. An elusive round dollar Robert B. Gray variety. The attractive design imitates the Type One Federal gold dollar, though the Liberty bust was entered somewhat off center, favoring the lower right obverse. The lemon-gold surfaces are clearly prooflike, although undesignated as such by NGC. The strike is good despite incompleteness near the DO in DOLLAR. PCGS# 10948

4639 1858 Liberty Round Half Dollar, BG-1323, R.8, MS62 PCGS. An extremely rare Period Three variety, described in the Breen-Gillio second edition but without any photographs. The maker is unknown but likely intended to deceive collectors. A lustrous wheat-gold example with attractive surfaces for the designated grade. The sole BG-1323 from either service (7/14). PCGS# 516795

1878 8TF Dollar, AU58
VAM-9, Top 100

4640 **1878 8TF First Die Pair, VAM-9, AU58 PCGS.** A Top 100 Variety. Per VAMworld.com, the first Morgan dollars struck were coined on March 11, 1878, at 3:17 P.M. They were presentation pieces, including one destined for President Hayes. His coin has survived and was confirmed as VAM-9. A rare eight tailfeather VAM. This untoned near-Mint dollar exhibits partial cartwheel luster and lacks obtrusive marks. PCGS# 133792

4641 **1878 8TF Polished Ear, VAM-14.2, MS65 PCGS.** Splendid orange-gold toning dominates the obverse and fills the reverse margin. The central reverse is brilliant. Lustrous and fully struck with exemplary preservation. An available eight tailfeather variety, often attributed by the hair-thin die scratch through the top of the I in LIBERTY. PCGS# 133797

4642 **1878 8TF Polished Ear, VAM-14.2, MS65+ PCGS.** Of the scarcer eight tailfeather variety, this Plus-graded Gem boasts frosty, brilliant luster and razor-sharp design elements. The surfaces are surprisingly clean, even for the Gem grade level, with special notice given to Liberty's cheek, which is nearly pristine. VAM-14.2 Population: 6 in 65+, none finer (7/14). PCGS# 133797

4643 **1878 8TF Doubled Bow, VAM-14.3, MS65 PCGS. CAC.** Housed in a first generation holder. The date shows doubling on the upper-underside of the digits and on the right wreath leaves and berry. The bottom of the 8 has excess metal fill. This first-year, introductory type example was among the first 749,500 Morgan dollars struck. The original Gem surfaces are frosty and brilliant save for a ring of light russet toning that hugs the margins on each side. Although undesignated as VAM-14.3 on the holder, this coin is tied with one other of the same variety for finest at PCGS (7/14). PCGS# 133798

4644 **1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** Attributed by faint die scratches left of the eye and in the lower loop of the first 8 in the date. The obverse is deep mirror prooflike, while the reverse displays vibrant cartwheel luster. Attractively preserved and virtually untoned. VAM-17 Population: 17 in 65 (1 in 65+), 0 finer (7/14). *Ex: FUN Signature (Heritage, 1/2011), lot 5828, which realized $1,610.* PCGS# 133818

4645 **1878 8TF Broken R&B, VAM-21, MS65 PCGS. CAC.** The VAM-21 variety shows LIBERTY slightly doubled and shifted left as well as doubling on P, U, R, and B in PLURIBUS and 1 and 2 stars on right. This is an ideal first-year type representative with interesting doubling on the obverse. Cartwheel luster swirls over each side. This brilliant Gem possesses clean surfaces and wonderful eye appeal. PCGS# 133822

4646 **1878 7/8TF 7/4 Strong, VAM-37, MS64 PCGS. CAC.** Four tailfeathers show under tailfeathers 3, 4, and 5, and two spikes emerge from the bottom of the arrow fletchings. Die polish lines appear on B and R in LIBERTY. Each side shows variegated hues of blue, sea-green, and olive-brown with reddish accents. The design motifs are sharply impressed, and marks are undistracting. PCGS# 134034

1878 Strong 7/8 Tailfeathers Dollar
Sharply Struck MS65

4647 **1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS. CAC.** Medium to deep apricot-gold dominates the obverse but is confined to the periphery on the reverse. The upper obverse margin offers a glimpse of aquamarine. Sharply struck, including good detail in the hair over Liberty's ear and the eagle's breast feathers. Lustrous with pleasing surfaces. At least five of the underfeather tips are visible, hence the "Strong" designation. PCGS# 134034

4648 **1878 7/8F 7/7 Strong, VAM-41, MS63 Deep Mirror Prooflike PCGS.** A Top 100 Variety. Beautiful golden-brown, ocean-blue, and plum-red patina endows the borders of this fully struck and prominently mirrored Morgan dollar. Of the numerous 7/8TF varieties, VAM-41 shows the strongest doubling on the tailfeathers. Lightly marked for the MS63 level, although the left obverse has a pair of minor scuffs. PCGS# 40226

1878 7 Over 8 Tailfeather Silver Dollar
MS64 Deep Mirror Prooflike, VAM-41A

4649 **1878 7/8TF 7/4 Weak, VAM-41A, MS64 Deep Mirror Prooflike NGC. CAC.** Perhaps one of the first examples struck off this lapped version of VAM-41, with four fragments as extra tailfeathers. The diagnostic horizontal lines appear through the ribbon loops. The strike is exacting, and both sides are brilliant aside from peripheral hints of golden toning.
Ex: Jack Lee Estate (Heritage, 12/2008), lot 2711, which realized $1,725. PCGS# 40212

1878 7 Tailfeathers Dollar, Lustrous MS66
Reverse of 1878

4650 **1878 7TF Reverse of 1878 MS66 NGC.** The 7 Tailfeathers reverse occurs with the Reverse of 1878, in which the eagle's breast is flat and the arrow feathers parallel. Slivers of mauve and electric-blue cling to the rims of this Premium Gem. Sharply struck with nicely preserved, highly lustrous surfaces. Census: 26 in 66 (1 in 66 ★), 1 finer (7/14). NGC ID# 253K, PCGS# 7074

1878 7TF Dollar, Second Reverse, AU55
Rare 'Spiked Eye' VAM-123

4651 **1878 7TF Reverse of 1878, Spiked Eye, VAM-123, AU55 PCGS.** A Hit List 40 Variety. According to VAMworld.com, VAM-123 is Rarity-7 and described as "one of the last 7 Tail Feather discoveries and considered by many to be ultra-rare. Trades for huge premiums in all grades, as is considered the Number One 7TF variety and the key coin for those attempting to build a complete set." The second 8 in the date is repunched, but the true pick-up points are a doubled R in PLURIBUS and a short spike from Liberty's eye beneath the lid. A lightly circulated and moderately abraded example with deep lavender, golden-brown, and blue-green toning. As of (7/14), PCGS has certified 15 pieces, with the present coin tied with one other as finest. PCGS# 412571

4652 **1878 7TF Reverse of 1879 MS65 PCGS.** Creamy luster illuminates clean, well-preserved, essentially untoned surfaces. A couple of wispy luster grazes in the field areas preclude an even finer numeric grade assessment. The strike definition is sharp and nearly full over both sides of this highly attractive Gem. NGC ID# 253L, PCGS# 7076

4653 **1878 7TF Reverse of 1879 MS65 PCGS.** The slanting arrow feather identifies the Reverse of 1879. This impressive Gem exhibits well-detailed design elements and vibrant mint luster, under vivid shades of grayish-blue and greenish-gold toning. PCGS has graded 17 numerically finer examples (7/14). NGC ID# 253L, PCGS# 7076

4654 **1878-CC MS65 PCGS.** Delicate lime-green and lemon-yellow toning occurs marginally and yields to entirely brilliant centers. Thick mint frost covers each side, and the design features are sharply impressed. This is a attractive Carson City Gem from the first year of issue. NGC ID# 253M, PCGS# 7080

4655 **1878-CC MS65 PCGS.** Hazy, violet-gray patina turns to iridescent orange when held at the proper angle. This first-year Carson City representative features strong detail over Liberty's ear and the eagle's breast, with minimal marks throughout. NGC ID# 253M, PCGS# 7080

4656 **1878-CC MS65 PCGS.** Cartwheel luster radiates over the semiprooflike surfaces of this first-year Carson City Morgan dollar. Each side showcases fully struck devices and minimally scattered abrasions. A flashy and brilliant Gem. NGC ID# 253M, PCGS# 7080

4657 **1878-S MS66+ PCGS. CAC. VAM-16.** As on many Morgan VAMs from 1878, the obverse is lightly die-doubled, visible on LIBERTY and E PLURIBUS UNUM. This is a fully struck and lustrous Premium Gem with remarkably smooth surfaces. A trace of gold toning visits both sides. PCGS has encapsulated just 27 numerically finer representatives (7/14). NGC ID# 253R, PCGS# 7082

4658 **1879 MS65+ PCGS. CAC.** Faint peripheral gold toning is evident on each side of this otherwise frosty and brilliant Plus designated Gem Morgan. The eye appeal is exceptional, as recognized by the green CAC-approval sticker. NGC ID# 253S, PCGS# 7084

1879-CC Dollar, AU55
The Popular 'Perfect' CC Variety

4659 **1879-CC AU55 NGC.** Traces of luster reside in the recesses of this Choice AU Morgan. The design elements are well-defined save for light wear over the high points. Lightly abraded for a large silver coin that has seen some circulation. The "Perfect" CC variety. More available, but also more popular, than the Large CC over Small CC variety. NGC ID# 253T, PCGS# 7086

1879-CC Morgan, Unc Details
VAM-3, Capped Die

4660 **1879-CC Capped Die, VAM-3 — Cleaning — PCGS Genuine. Unc Details.** A Top 100 Variety. The date is mildly repunched and there is heavy die pitting around the mintmark. The G in GOD is only partially filled, indicating an early die state. This example is lightly cleaned, but retains subtle luster and a light golden hue overall. The design elements are sharp, save for a small "flat" spot immediately above Liberty's ear, and noticeable surface abrasions are minimal. PCGS# 133869

1879-CC Dollar, MS61
Capped Die, VAM-3

4661 **1879-CC Capped Die, VAM-3, MS61 NGC.** A Top 100 Variety. In addition to the famous die chips prevalent about the mintmark, VAM-3 is noteworthy for repunching on the 18 in the date. Potent luster sweeps this nicely struck and practically brilliant example. A small and minor peripheral spot is noted at 4:30 on the reverse and 7:30 on the obverse. PCGS# 133869

1879-S Dollar, Toned MS65
An Elusive Variety

4662 **1879-S Reverse of 1878 MS65 PCGS.** A Top 100 Variety. The 1879-S Reverse of 1878 variety Morgan dollar (flat eagle's breast and parallel arrow feathers) is quite elusive, while the Reverse of 1879 variety (rounded breast and slanted arrow feathers) is common. A subtle blend of aqua-blue, olive, and violet coloration covers the lustrous surfaces of this well-struck Gem. A well cared for specimen. Population: 51 in 65, 1 finer (7/14). NGC ID# 253W, PCGS# 7094

1879-S Morgan Dollar
MS66 Deep Mirror Prooflike

4663 **1879-S MS66 Deep Mirror Prooflike PCGS. CAC.** A stunning Premium Gem, this Deep Mirror Prooflike specimen is fully brilliant with extraordinary contrast between the watery fields and thickly frost devices. Both sides are untoned, and the pristine surfaces show few marks. It is essentially as struck. Population: 48 in 66 Deep Mirror Prooflike, 8 finer (7/14). NGC ID# 253X, PCGS# 97093

4664 **1880 MS66 NGC.** This Premium Gem is blazing white with ample frost on the devices and strong eye appeal. The surfaces are excellent for the grade, with a few trivial ticks from handling, but far fewer than usually encountered on this date. A tiny spot of color appears on Liberty's cheek. Census: 42 in 66, 0 finer (7/14).
Ex: Central States Signature (Heritage, 4/2006), lot 3258, which realized $3,737.50. NGC ID# 253Y, PCGS# 7096

4665 **1880 MS66 PCGS.** A well-struck example of this early issue with untoned, lustrous surfaces that are free of abrasions or other detractions. Even the hair detail above Liberty's ear and the eagle's breast feathers are well-defined. NGC ID# 253Y, PCGS# 7096

4666 **1880/79-CC Reverse of 1878, VAM-4, MS64 PCGS.** A Top 100 Variety. Impressive autumn-gold, navy-blue, and rose-red toning encompasses the reverse of this lustrous and well struck Choice Carson City dollar. The obverse is comparatively brilliant, save for a glimpse of struck-in grease near star 4. PCGS# 133876

4667 **1880-CC 8 Over High 7, VAM-5, MS65 PCGS.** A Top 100 Variety. This is a frosty and brilliant Gem that features a popular overdate variety. An outline of the 7 appears within the loops and below the base of the second 8 in the date. The devices exhibit a sharp strike throughout, notably on the hair strands above Liberty's ear, although the eagle's breast is a touch incomplete. Population: 5 in 65, 1 finer (7/14). PCGS# 133877

1880-CC Morgan, MS66
VAM-5, 8 Over High 7

4668 **1880-CC 8 Over High 7, VAM-5, MS66 PCGS.** A Top 100 Variety. While a relatively plentiful Carson City issue, the 1880-CC is of interest to VAM specialists because of the variety of overmintmarks available, as well as the different styles of the reverse. This piece has the slanting arrow feathers reverse and, on the obverse, the underdigit is remarkably strong beneath the second 8. Thick cartwheel luster races around each side of this mostly brilliant example that shows only a touch of golden toning at the margins.
Ex: Long Beach Signature (Heritage, 2/2008), lot 1124. PCGS# 133877

4669 **1880-CC 8 Over Low 7, VAM-6, MS65 PCGS. CAC.** A Top 100 Variety. An obvious overdate with most of the 7 (including a left "ear") visible within the second 8. Sharply struck and lustrous with light wheat-gold toning and splendidly smooth fields. PCGS# 133878

4670 **1880-CC MS66 PCGS.** Softly struck in the centers, but highly attractive overall, this Premium Gem displays softly frosted mint luster and mark-free surfaces. Mottled shades of teal, russet, and gold partially adorn the obverse; the reverse is brilliant save for a slight degree of russet-gold peripheral patina. Only 30 pieces are rated finer at PCGS (7/14). NGC ID# 2542, PCGS# 7100

4671 **1880-CC MS66 PCGS. VAM-3.** A small dash appears below the lower-loop of the second 8. Booming luster cartwheels around entirely brilliant surfaces with sharply struck devices. This is a frosty CC-mint representative that becomes excessively challenging any finer. PCGS has certified only 30 examples in higher numeric grades (7/14). NGC ID# 2542, PCGS# 7100

4672 **1880-CC MS66 PCGS.** The Carson City Mint struck 495,000 Morgan dollars in 1880. The issue is available up to and including MS66, after which point the certified population data declines dramatically. Thus, this lustrous and lightly toned Premium Gem strikes the perfect balance between condition and affordability. NGC ID# 2542, PCGS# 7100

4673 **1880-CC MS65 Prooflike PCGS. CAC.** This is the normally seen variety with the Reverse of 1879 and the slanted arrow feather. It is a fully brilliant Gem with outstanding reflectivity in the fields around frosted devices. Just a hint of lemon color visits the reverse margins. PCGS has certified only 11 numerically finer Prooflike pieces (7/14).
Ex: FUN Signature (Heritage, 1/2005), lot 11044; Dallas Signature (Heritage, 4/2007), lot 1027; Long Beach Signature (Heritage, 2/2011), lot 3885. NGC ID# 2542, PCGS# 7101

1880-O Dollar, MS64+
Lustrous and Well-Struck

4674 **1880-O MS64+ PCGS.** Pleasing luster embraces this high-end near-Gem Morgan dollar. The design elements are well-struck in the centers (an area often weak), especially on the hair over Liberty's ear. The untoned surfaces are devoid of significant marks. PCGS has seen only 35 finer and NGC 27 better (7/14). NGC ID# 2543, PCGS# 7114

1880-O Morgan, MS64+
Scarcely Seen Finer

4675 **1880-O MS64+ PCGS.** The 1880-O is easily obtainable in grades through MS64, but finer pieces are distinctly challenging to locate. This Choice example is minimally abraded for the grade, with essentially untoned, softly frosted surfaces. The strike is unusually sharp for a New Orleans issue, with nearly complete definition on the eagle's talons and the hair above Liberty's ear. Only 35 coins have been graded numerically finer at PCGS (7/14). NGC ID# 2543, PCGS# 7114

4676 **1880-O MS64 PCGS. CAC.** Ex: The Michigan Collection. Vibrant, frosty mint bloom illuminates nearly undisturbed fields on this well-struck near-Gem, with a few minor grazes on Liberty's cheek being all that precludes a finer assessment. A high-end piece for the grade, and bested by only 35 numerically finer coins at PCGS (7/14). NGC ID# 2543, PCGS# 7114

4677 **1880-O MS64 PCGS. CAC.** Micro O. This attractive near-Gem is strongly struck with illuminating luster and brilliant surfaces that are minimally abraded for the grade. PCGS has graded only 34 coins in higher numeric grades (7/14).
Ex: Dallas Signature (Heritage, 10/2009), lot 936. NGC ID# 2543, PCGS# 7114

4678 **1880/79-O Crossbar, VAM-4, MS64 PCGS.** A Top 100 Variety. A "crossbar" variant of the 1880/79-O overdate, distinguished from the similar VAM-5 by the Small or Micro mintmark. VAM-5 has a Medium Oval O. Dusky peach patina visits the obverse, while the equally lustrous reverse remains brilliant. The strike is good and marks are incidental for the grade. PCGS# 133880

1880-S Dollar, MS68
Beautifully Preserved

4679 **1880-S MS68 PCGS.** Medium S. Only in MS68 does the 1880-S Morgan dollar issue truly become scarce. This beautifully preserved representative offers coruscating luster over largely brilliant surfaces. The design elements are fully struck, and each side is remarkably clean. PCGS has graded just five coins numerically finer (7/14). NGC ID# 2544, PCGS# 7118

4680 **1880-S MS67 Prooflike PCGS.** Medium S. Both fields provide dazzling reflectivity, and this Superb Gem type coin is brilliant aside from a hint of tan toning on the portrait. The strike is precise, characteristic of the well made '80-S. Housed in a green label holder. NGC ID# 2544, PCGS# 7119

4681 **1880-S MS67 Prooflike PCGS.** This brilliant Superb Gem delivers incredible visual appeal with bold, heavily frosted design elements that deliver full Cameo contrast against the deeply mirrored fields. A loupe reveals a few insignificant ticks in the fields, likely only discernable because of the mirrored surface, though Liberty's cheek is seemingly pristine and fully deserving of the lofty grade assigned. PCGS has certified just 20 numerically finer Prooflike examples (7/14). NGC ID# 2544, PCGS# 7119

4682 **1880-S MS67 Prooflike PCGS.** Medium S. Flashy, smooth fields moderately contrast with intricately struck and lightly frosted devices. Hints of orange-gold color are most prominent on the upper reverse rim. The second 8 in the date is lightly recut. PCGS has seen only 20 coins finer with a Prooflike designation (7/14).
Ex: Dallas Signature (Heritage, 12/2005), lot 2301. NGC ID# 2544, PCGS# 7119

4683 **1880-S MS66 Deep Mirror Prooflike PCGS.** Medium S. Light wheat-gold patina clings to the margins of this highly lustrous and precisely struck silver dollar. Essentially pristine save for a solitary minor graze at the center of the cheek. Certified in a first generation holder. NGC ID# 2544, PCGS# 97119

4684 **1881-CC MS66 PCGS. VAM-2.** The upper loops of the 8s display die fill reminiscent of the 1880-CC overdate VAMs. Light to medium autumn-brown toning is mostly relegated to the obverse. A well struck and lustrous high grade, low mintage Carson City dollar. The fields appear pristine and the portrait displays only wispy contact. NGC ID# 2547, PCGS# 7126

4685 **1881-CC MS66 PCGS. VAM-2.** Delicate tan toning denies full brilliance, but this lustrous and boldly struck silver dollar has smooth fields and a minimum of contact on the portrait. A popular and low mintage Carson City issue. Certified in a green label holder. NGC ID# 2547, PCGS# 7126

4686 **1881-CC MS65 Prooflike PCGS.** From a mintage of 296,000 coins, the issue is one of the most challenging to locate in circulated condition, though Mint State coins are readily available. This Prooflike example shows minimal bagmarks, an uncommon attribute for the issue, and is essentially devoid of toning. The strike is bold and the eye appeal is vivid. NGC ID# 2547, PCGS# 7127

4687 **1881-CC MS64 Deep Mirror Prooflike PCGS.** The brilliant fields exhibit substantial depth of mirroring, while the razor-sharp devices showcase the heavy mint frost that Carson City issues are known for. A few minor surface grazes preclude a Gem grade assessment, though the immense aesthetic appeal makes up for any minor lack in technical quality. NGC ID# 2547, PCGS# 97127

4688 **1881-CC MS64 Deep Mirror Prooflike PCGS. CAC.** This Deep Mirror Prooflike example boasts remarkable contrast between heavily frosted design elements and immensely reflective fields. The issue's availability across upper grade levels and strong strike characteristics make it an excellent Carson City type representative. Only a graze behind Liberty's portrait merits mention. NGC ID# 2547, PCGS# 97127

4689 **1881-CC MS64 Deep Mirror Prooflike PCGS. CAC.** A fully brilliant near-Gem that boasts excellent cameo contrast between the frosty motifs and the glassy fields. A smattering of tiny marks determines the grade. Housed in a green label holder. NGC ID# 2547, PCGS# 97127

4690 **1881-O MS65 PCGS Secure.** The 1881-O issue is conditionally rare and generally requires a five-figure budget to obtain anything finer than this brilliant Gem. Each side is well-struck, lustrous, and free of mentionable marks. PCGS has seen only 25 numerically finer submissions. NGC ID# 2548, PCGS# 7128

4691 **1881-O MS64+ Deep Mirror Prooflike PCGS. CAC.** This piece is far better-struck than most examples of the 1881-O, showing nearly complete detail on the hair over the ear, and full definition of the eagle's breast. The Deep Mirror Prooflike surfaces also place this brilliant near-Gem in a distinct minority. Population: 377 in 64 (27 in 64+) Deep Mirror Prooflike, 15 finer (7/14). NGC ID# 2548, PCGS# 97129

4692 **1881-S MS67 Prooflike PCGS. CAC.** The design elements of this delightful Superb Gem exhibit razor-sharp definition throughout, and the pristine fields are deeply mirrored on both sides. The surfaces are essentially brilliant, but a few hints of green and blue toning show at the peripheries. Population: 73 in 67 (1 in 67+) Prooflike, 3 finer (7/14). NGC ID# 2549, PCGS# 7131

4693 **1882 MS66 NGC.** Vivid shades of violet, lavender-gray, and greenish-gold toning blanket the obverse of this attractive Premium Gem, while the reverse shows much more delicate toning. The design elements are well-detailed and vibrant mint luster shines through the toning. NGC has graded eight numerically finer examples (7/14). NGC ID# 254A, PCGS# 7132

4694 **1882 MS66 PCGS.** Well-struck and intensely lustrous with an intense frosty sheen over beautifully brilliant snow-white surfaces. A faint coating of die rust over the obverse creates somewhat mattelike field textures. A lovely Premium Gem example with splendid eye appeal and impressive technical quality. NGC ID# 254A, PCGS# 7132

4695 **1882 MS66 PCGS. CAC.** Solidly struck for the issue, this piece is also high-end for the grade; at first glance, the coin appears a full grade point finer, and only upon close examination are a few grade-limiting grazes detected on Liberty's cheek. Radiant, frosty mint luster engulfs both sides, while the surfaces are essentially untoned. PCGS has certified only eight numerically finer examples (7/14).
Ex: Long Beach Signature (Heritage, 9/2006), lot 5065; Dallas Signature (Heritage, 11/2006), lot 1246. NGC ID# 254A, PCGS# 7132

4696 **1882-CC MS66 PCGS.** Strongly defined through the centers with glimpses of gold toning near the rims. Pale silver and gray shadings are present elsewhere, and the portrait is lightly frosted. PCGS has graded only 168 examples finer as of (7/14).
Ex: *Long Beach Signature (Heritage, 9/2010), lot 4494.* NGC ID# 254B, PCGS# 7134

4697 **1882-CC MS66+ PCGS.** This is a frosty and fully brilliant Premium Gem from one of the more readily available Carson City issues, yet finer coins are very scarce. The surfaces are clean and the devices feature typically sharp detail. High-end for the grade, as affirmed by the Plus designation. NGC ID# 254B, PCGS# 7134

4698 **1882-CC MS66 PCGS. CAC.** PCGS rightfully encapsulated this Premium Gem Carson City dollar with the reverse up to showcase a crescent of spectacular multicolor toning that covers 40% of the surface. The remain 60% of the reverse and the entire obverse are entirely brilliant and fully struck. The visual appeal is outstanding. NGC ID# 254B, PCGS# 7134

1882-CC Dollar, MS67
Gorgeous and Razor-Sharp

4699 **1882-CC MS67 NGC.** Sharply struck, this Superb Gem specimen displays a strong degree of design detail and almost entirely brilliant surfaces. Areas of toning are present, primarily on the obverse, including shades of gold and golden-brown. A couple of minor marks appear on the obverse rim. Census: 59 in 67 (1 in 67+, 4 in 67 ★), 0 finer (7/14). NGC ID# 254B, PCGS# 7134

4700 **1882-CC MS65 Deep Mirror Prooflike PCGS. CAC.** Fully mirrored fields and sharp, frost-white devices deliver incredible cameo contrast on this brilliant Gem Carson City dollar. A few minute surface ticks contribute to the grade, but hardly inhibit the immense eye appeal. Numerically finer Deep Mirror Prooflike examples are seldom seen. NGC ID# 254B, PCGS# 97135

4701 **1882-O MS65 PCGS. CAC.** Soft, golden-gray patina encompasses much of each side of this Gem Morgan, while a blush of rainbow toning graces the lower obverse border and spills over onto the corresponding reverse periphery. The design elements are sharply impressed, and a single tick on Liberty's cheek near the nose is the only flaw of note. PCGS has certified just 37 numerically finer representatives (7/14). NGC ID# 254C, PCGS# 7136

4702 **1882-O MS65 PCGS. CAC.** Excellent cartwheel luster covers both sides of this brilliant and eye-appealing Gem, boasting few abrasions across frosty surfaces. The strike is strong for an O-mint Morgan with above-average definition throughout. NGC ID# 254C, PCGS# 7136

4703 **1882-O/S Recessed, VAM-4, MS64 NGC.** A Top 100 Variety. The middle curve of the undermintmark S is evident within the lower half of the overmintmark O. Lustrous and nearly brilliant with a smooth obverse and only minimal reverse grazes. Sharply struck from moderately rusted dies.
Ex: Dallas Signature (Heritage, 11/2006), lot 1249, which realized $1,840. PCGS# 133891

4704 **1882-O/S Recessed, VAM-4, MS64 PCGS. CAC.** A Top 100 Variety. The lower central curve of an S is obvious within the New Orleans overmintmark. Brilliant, lustrous, and boldly struck with smooth fields and light contact on the cheek. Struck from moderately rusted dies, characteristic of VAM-4. PCGS# 133891

4705 **1883 MS67 PCGS.** This Philadelphia issue's 12.2 million-coin mintage makes it plentiful in most grades but not so in Superb Gem. Comparable examples are conditionally scarce in MS67 and nearly unobtainable in finer grades. The moderately granular and fully brilliant surfaces are immaculately preserved and well-struck. PCGS has seen only two submissions numerically finer (7/14). NGC ID# 254G, PCGS# 7142

4706 **1883 MS67 NGC.** The 1883 Philadelphia issue is common in most Mint State grades, scarce in MS67, and very rare any finer. The fully struck surfaces appear largely brilliant with bands of multicolor toning in shades of green, yellow, and orange. NGC has seen just five numerically finer coins (7/14). NGC ID# 254G, PCGS# 7142

4707 **1883-CC MS66 PCGS. CAC. VAM-5A.** Splashes of cherry-red, butter-gold, powder-blue, and apple-green endow the obverse. The reverse shows only a minor peripheral glimpse of orange toning. The left obverse exhibits inconspicuous contact. A popular VAM due to its clashed N from IN and various reverse die scratches. NGC ID# 254H, PCGS# 7144

4708 **1883-CC MS66+ Prooflike PCGS. VAM-4.** The date is repunched, most prominently on the 18. The right-side stars are die doubled. This brilliant Carson City type coin has a flashy obverse, but it is the reverse that offers exceptional field reflectivity. The strike is bold and the surfaces show only infrequent and inconsequential contact. NGC ID# 254H, PCGS# 7145

4709 **1883-CC MS66 Deep Mirror Prooflike PCGS. VAM-5A.** An interesting clashed VAM with "starburst" die lines at both wingtips. A brilliant and prominently mirrored Premium Gem with minimal contact and a good strike. Although the GSA holdings of the issue were bountiful, only a few DMPL examples are certified finer. NGC ID# 254H, PCGS# 97145

4710 **1883-S MS61 NGC.** Boldly struck with bright, satiny mint luster and lightly toned surfaces that display a slight degree of mottled olive and sea-green toning on each side. Small surface marks seem typical for the MS61 grade assessment. NGC ID# 254K, PCGS# 7148

4711 **1883-S MS62 NGC.** Vibrant cartwheel luster illuminates primarily brilliant surfaces, though tinges of orange-gold and lavender toning are seen in the recesses around the borders. Scattered abrasions define the grade, though none are individually detracting. NGC ID# 254K, PCGS# 7148

1883-S Morgan, Lustrous MS63

4712 **1883-S MS63 PCGS.** A slightly more challenging issue in Mint State grades, the 1883-S becomes genuinely rare at the Gem level. This piece is lightly abraded, as the grade suggests, but semiprooflike fields and radiant, untoned mint luster balance the visual appeal. Close examination reveals a touch of weakness on the hair above Liberty's ear, though the overall definition is pleasing. NGC ID# 254K, PCGS# 7148

1883-S Silver Dollar, MS63 Fresh, Lustrous Appeal

4713 **1883-S MS63 NGC.** Both MS63 and MS64 examples of this San Francisco date are sought by collectors as the "optimal collecting grades" before the issue gets truly scarce and expensive in full Gem condition. This Select example is boldly struck with silver luster that seems mint-fresh. A hint of orange toning is limited to the obverse rim. Only minor abrasions limit the assigned grade. NGC ID# 254K, PCGS# 7148

4714 **1884-CC MS66 NGC. VAM-2.** The 18 is lightly repunched, but the present Premium Gem is more memorable for its golden-brown, powder-blue, and rose-red obverse patina. The reverse displays only a hint of tan toning. NGC ID# 254M, PCGS# 7152

4715 **1884-CC MS66 ★ NGC. VAM-4A.** A multicolor arc of cherry-red, lemon-gold, and forest-green endows the upper obverse. The remainder of this lustrous silver dollar is virtually brilliant. A popular Carson City VAM with a spike atop the the 1 in the date and a "pinned wing gouge" (as made) on the eagle's right wing. NGC ID# 254M, PCGS# 7152

4716 **1884-CC MS66+ NGC. CAC.** Most of the 1884-CC silver dollar mintage was distributed through the General Services Administration holdings (GSA), amounting to approximately 85% of the 1,136,000 mintage. Most distributed coins were Uncirculated but of lesser grade than this Premium Gem, which was awarded the NGC Plus designation of high-end appeal. A silver-white, untoned coin, this example is brightly lustrous and fully struck. Liberty's cheek is clean and smooth. NGC ID# 254M, PCGS# 7152

1884-CC Silver Dollar, VAM-4A MS66 Deep Mirror Prooflike

4717 **1884-CC MS66 Deep Mirror Prooflike PCGS. CAC. VAM-4A.** The "Pinned Wing Gouge" VAM with a die line at the left border of the right (facing) wing. In addition, the 1 in the date is repunched. Brilliant and prominently mirrored with a good strike and smooth fields. A few delicate facial grazes limit the grade. NGC ID# 254M, PCGS# 97153

4718 **1884-S AU58 PCGS.** The San Francisco Mint struck 3.2 million Morgan dollars in 1884, many of which were released into circulation. This near-Mint piece showcases golden-tan patina with rose and powder-blue accents. The devices are well-struck, and only a linear depression on Liberty's cheekbone merits mention. NGC ID# 254P, PCGS# 7156

4719 **1884-S AU58 NGC.** This largely untoned, near-Mint representative exhibits only a touch of wear over the high points of the design, and retains substantial mint luster. A pleasing example of this better San Francisco issue. NGC ID# 254P, PCGS# 7156

4720 **1884-S AU58 NGC.** An attractive near-Mint example with minimal marks and minor rub on the high points of the design. A great deal of original mint luster shimmers across both sides. NGC ID# 254P, PCGS# 7156

1884-S Morgan, Lustrous AU58

4721 **1884-S AU58 PCGS. CAC.** The majority of the 1884-S dollar's mintage was placed into circulation shortly after its issuance, with the result that Mint State survivors of this date are among the most elusive in the series. This near-Mint example boasts strong, light golden luster and nearly complete detail. Light, scattered abrasions accompany the grade. NGC ID# 254P, PCGS# 7156

4722 **1885 MS65 Deep Mirror Prooflike PCGS. CAC. VAM-14.** Golden-brown margins encompass brilliant and lustrous interiors. The so-called "Wild Hair" VAM with a thread impression on a lower portion of the cap. The top of the 5 in the date is widely repunched north.
Ex: Chicago Signature (Heritage, 8/2011), lot 11120. NGC ID# 254R, PCGS# 97159

4723 **1885-CC MS65 PCGS.** Blushes of golden-brown, aquamarine, and electric-blue dominate the left obverse border, while the remainder of this lustrous Gem is essentially brilliant. The reverse is remarkably preserved, and only the portrait shows detectable marks.
Ex: Dallas Signature (Heritage, 7/2006), lot 2815. NGC ID# 254S, PCGS# 7160

4724 **1885-CC MS66 NGC.** Despite one of the lowest mintages in the series (228,000 coins), most examples were stored away and released in the late 20th century. This Premium Gem is untoned and frosty with a just few lightly scattered marks. NGC ID# 254S, PCGS# 7160

4725 **1885-CC MS66 PCGS.** A great type coin with sharp strike definition and flashy, dynamic luster quality across essentially brilliant surfaces. A couple of dark specks and a slight degree of contact chatter are noted on the reverse, all located near the periphery. NGC ID# 254S, PCGS# 7160

4726 **1885-CC MS66 PCGS.** Yellow-gold splashes run over the radiantly lustrous surfaces of this well struck Premium Gem, accented with electric-blue, lavender, and orange at the margins. Some light grade-consistent marks are undisturbing.
Ex: Long Beach Signature (Heritage, 2/2010), lot 596. NGC ID# 254S, PCGS# 7160

1885-CC Morgan, MS66+ Radiant Mint Luster

4727 **1885-CC MS66+ PCGS. CAC.** Morgan dollars from the Carson City Mint are always in demand, and the 1885 issue is popular with mintmark type collectors and series specialists alike. This high-end Premium Gem displays especially vibrant, frosty mint bloom and sharply detailed design elements. The brilliant fields exhibit no mentionable flaws. PCGS has graded 63 numerically finer coins (7/14). NGC ID# 254S, PCGS# 7160

1885-CC Dollar, MS66+ Flashy and Semiprooflike

4728 **1885-CC MS66+ PCGS. CAC.** The 1885-CC Morgan dollar, although from a relatively small production of 228,000 pieces, exists in large numbers as more than one-half of the original mintage survived and was distributed in the late 20th century (Bowers, 2007). Pleasing frosty luster endows this high-end Premium Gem, and the design elements are well-struck, including most of the hair over Liberty's ear and the eagle's breast feathers. Well preserved surfaces are untoned save for subtle hints of reddish-gold at the reverse rims. PCGS has seen only 63 specimens finer (7/14).
NGC ID# 254S, PCGS# 7160

1885-CC Dollar, MS66+ Exceptional Eye Appeal

4729 **1885-CC MS66+ PCGS. CAC.** Although this issue is somewhat scarcer than the 1882, 1883, and 1884 Carson City dates, widespread release during the 20th century ensures its relative availability across most grade levels. This Premium Gem is an ideal type candidate. The surfaces are frosty and brilliant with sharply defined devices. A small planchet flake to the left of Liberty's eye is the only mentionable mark. PCGS has certified only 64 pieces finer (7/14). NGC ID# 254S, PCGS# 7160

4730 **1885-CC MS64 Deep Mirror Prooflike PCGS.** A thick layer of mint frost blankets razor-sharp devices on this near-Gem Carson City dollar, while the deeply mirrored fields provide a pleasing degree of cameo contrast. A few light grazes on the cheek preclude a Gem grade assessment. The 1885-CC is one of the more popular Morgan issues from this mint, due in part to the date's low mintage of only 228,000 pieces. NGC ID# 254S, PCGS# 97161

1885-CC Dollar, MS65+ Deep Mirror Prooflike
Flashy and Boldly Contrasted

4731 **1885-CC MS65+ Deep Mirror Prooflike PCGS. CAC.** Most of the 228,000-coin mintage was set aside and distributed throughout the 20th century, and Deep Mirror Prooflike examples are widely sought-after for type purposes. Thickly frosted and expertly struck design elements contrast starkly against remarkably deep mirrors, generating amazing eye appeal. Although marks are lightly scattered over each fully brilliant side, none are individually distracting. NGC ID# 254S, PCGS# 97161

4732 **1885-O MS65+ PCGS Secure.** Remarkable cherry-red, forest-green, and lemon-gold compete for territory across the obverse. The reverse is brilliant save for honey patina at the periphery. Sharply struck for an O-mint from its decade. A spectacular high-end Gem. NGC ID# 254T, PCGS# 7162

4733 **1885-O MS67 NGC.** The Treasury release in the early 1960s yielded myriad coins from this O-mint issue, however few are as fine as this Superb Gem. Sharply struck, especially for a New Orleans product, the surfaces remain largely brilliant with a band of rainbow toning over the lower-left reverse. Only 10 coins are certified numerically finer at NGC and PCGS combined (7/14). NGC ID# 254T, PCGS# 7162

1885-S Morgan, Radiantly Lustrous MS66
Attractive Obverse Toning

4734 **1885-S MS66 PCGS.** This San Francisco issue is readily available in most grades, but becomes genuinely scarce in MS66, and finer pieces are nearly nonexistent. This flashy representative boasts semiprooflike fields and frosty, well-defined design elements. The reverse is essentially brilliant, but the obverse exhibits rich, mottled hues of violet, aquamarine, and golden-orange overall. The surfaces reveal few flaws of any sort, even beneath the rich patina. Population: 39 in 66 (1 in 66+), 2 finer (7/14). NGC ID# 254U, PCGS# 7164

4735 **1886 MS67 PCGS. CAC. VAM-11.** Golden-brown dominates the reverse and the central obverse, but the left obverse exhibits ocean-blue and cherry-red. Fully struck and thoroughly lustrous with exceptionally smooth surfaces. NGC ID# 254V, PCGS# 7166

4736 **1886 MS67 PCGS. CAC.** Outstanding eye appeal is the hallmark of this splendid Superb Gem from the Philadelphia Mint. Dynamic cartwheel luster flashes over clean, unmarked fields; and the design motifs are fully brought up. Pleasing russet-red and cobalt-blue peripheral toning only enhances the already exceptional visual quality of this impressive Morgan dollar. NGC ID# 254V, PCGS# 7166

4737 **1886 MS67 NGC. CAC.** This radiant Superb Gem has no evidence of toning on either side. It is sharply struck with essentially pristine surfaces and frosty luster. The eye appeal is exceptional. NGC has only certified 25 numerically finer examples of the date (7/14). *Ex: Long Beach Signature (Heritage, 2/2010), lot 601.* NGC ID# 254V, PCGS# 7166

4738 **1886-O MS62 NGC.** The issue is known for its above-average strike for a New Orleans product. This attractive Uncirculated piece features razor-sharp definition throughout, notably over Liberty's ear and the eagle's breast feathers. Luster abounds over brilliant and minimally abraded surfaces. NGC ID# 254W, PCGS# 7168

4739 **1886-O MS62 NGC.** A thin layer of light champagne toning covers the otherwise frosty and brilliant surfaces of this Uncirculated New Orleans dollar. Impressive strike definition for the facility and a mintage of over 10 million coins make this minimally marked example ideal for type purposes. NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS63
Better O-Mint Issue in Mint State

4740 **1886-O MS63 PCGS.** A victim of the Pittman Act melting of 1918, the 1886-O Morgan can be found with little searching in MS63 and MS64, but Gems are nearly nonexistent. This is a pleasing Select example, with unusually attractive, softly frosted luster and well-defined design elements. Scattered grazes define the grade, but these are minor and the eye appeal is excellent for the grade. NGC ID# 254W, PCGS# 7168

1886-O Morgan, MS63
Elusive in Finer Grades

4741 **1886-O MS63 PCGS.** The 1886-O Morgan is difficult to locate in the finer Mint State grades, as Bowers writes in the *Guide Book of Morgan Silver Dollars:* "Most all were released in the 19th century or melted in 1918, and few were ever saved for numismatic purposes." This piece is highly lustrous with well-defined devices and a blush of light golden toning overall. The surfaces are largely free of major abrasions, though a series of minor grazes below Liberty's eye seem to be the grade-limiting factor. NGC ID# 254W, PCGS# 7168

4742 **1886-S/S VAM-2 MS65 NGC.** A Top 100 Variety. Undesignated as such on the NGC insert, but this is the familiar variety with repunched serifs on the mintmark. A brilliant and lustrous Gem with outstanding preservation and only slight incompleteness of strike on hair above the ear. PCGS# 133906

4743 **1886-S/S VAM-2 MS65 PCGS.** A Top 100 Variety. The mintmark shows repunching near the serifs, easily seen on this attractive Mint State example. The surfaces are brilliant and highly lustrous with excellent preservation and only minor incompleteness of strike above the ear.
Ex: West Palm Beach Signature (Heritage, 7/2009), lot 906, which realized $2,012.50. PCGS# 133906

4744 **1887 MS67 NGC.** Ex: Olathe Dollar Hoard from U.S. Treasury Bags. The present Superb Gem must have been at the top of the bag without any stored above it, since it offers uncommonly unabraded surfaces. Lustrous and essentially brilliant with a good strike. NGC ID# 254Y, PCGS# 7172

4745 **1887 MS67 NGC.** Ex: Binion Collection. A lightly toned and lustrous Superb Gem with minimal marks. The strike is good except on the eagle's left (facing) claw. Ted Binion was a Las Vegas casino baron and the son of reputed gangster Benny Binion. Binion's Horseshoe Casino was famous for its million-dollar display of 100 $10,000 bills. NGC ID# 254Y, PCGS# 7172

4746 **1887/6 VAM-2 MS65 NGC.** The curved base of a 6 is visible on both sides of the bottom of the 7. A brilliant and lustrous Gem with a good strike and a smooth cheek. Minor field marks are noted near the profile and arrowheads. PCGS# 133908

4747 **1887/6 VAM-2 MS65 PCGS. CAC.** A Top 100 Variety. A ghost of the bottom loop from an underdigit 6 is clearly visible beneath the primary 7 of the date, confirming the popular VAM-2 variety. A thin crescent of amber-gold toning visits the bottom of the obverse, although the coin is for all purposes brilliant, silver-white. A boldly struck Gem, with only minor marks on the lustrous, silver surfaces. Just two coins are certified numerically finer in the PCGS listing of this variety. Population (this variety): 4 in 65 (1 in 65+), 2 finer (7/14). PCGS# 133908

4748 **1887/6 VAM-2, MS65 PCGS. CAC.** A Top 100 Variety. The bottom of the lower loop of the underlying 6 is visible as a curved line through the lower stem of the 7. Sparkling luster radiates from untoned surfaces that exhibit well-impressed design features. Both sides are well-preserved, and reveal just a few minute grade-consistent marks. PCGS has certified 11 numerically finer coins (7/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 1180; FUN Signature (Heritage, 6/2008), lot 1365. PCGS# 133908

4749 **1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. A popular overdate variety with the right outside curve of the underlying 6 visible to the lower right of the 7 in the date. Frosty luster rolls over each side, and the brilliant surfaces exhibit pleasing detail with minor shallowness over the centers. A splash of golden color appears on Liberty's cheek. PCGS# 133912

4750 **1887-S MS64 PCGS. CAC.** A lovely near-Gem from the San Francisco Mint with brilliant surfaces that exhibit a dazzling cartwheel sheen across each side. A handful of trivial contact marks on Liberty's cheek seemingly limit the grade of this visually appealing dollar. NGC ID# 2554, PCGS# 7180

4751 **1887-S MS65 PCGS.** This is a delightful Gem example with untoned silver-white surfaces that are highly lustrous and display significant cartwheel flash as the coin rotates beneath a light. Minimal surface marks are in accord with the MS65 grade assessment. Just 25 examples are graded finer by PCGS (7/14). NGC ID# 2554, PCGS# 7180

4752 **1888-O MS66 PCGS.** Round O. Faint honey toning adorns this lustrous and well preserved Premium Gem. The strike is superior for a New Orleans issue of the era, although slightly incomplete at the centers. Encapsulated in a green label holder. NGC ID# 2556, PCGS# 7184

4753 **1888-O MS66 PCGS.** Dramatic layers of variegated toning blanket the obverse, while the reverse is snow-white and fully brilliant. The motifs are boldly defined overall, with slight weakness evident only on the hair detail just above Liberty's ear. A lustrous, well-preserved, minimally marked Premium Gem silver dollar from the New Orleans Mint. None are graded any higher by PCGS as of (7/14). NGC ID# 2556, PCGS# 7184

4754 **1888-S MS64+ PCGS. CAC.** A better date from the San Francisco Mint with a low mintage of 700,000 coins. This piece displays scintillating mint frost over snow-white surfaces that are minimally marked. The strike definition is razor-sharp, even on the central motifs. NGC ID# 2557, PCGS# 7186

4755 **1888-S MS65 PCGS.** A slightly better San Francisco issue, the 1888-S becomes genuinely rare above the MS65 grade level. This Gem example exhibits sharp design definition and brilliant, minimally abraded surfaces. The obverse fields appear fully prooflike, though the reverse is somewhat more frosty throughout. PCGS has seen 28 numerically finer submissions (8/14). NGC ID# 2557, PCGS# 7186

4756 **1888-S MS64 Deep Mirror Prooflike PCGS.** A stone-white silver dollar whose glassy fields, crisp strike, and modest cameo contrast provide the cursory appearance of a branch mint proof. Liberty's cheek and neck are surprisingly smooth, and the fields are also uncommonly clean for the designated grade. NGC ID# 2557, PCGS# 97187

4757 **1888-S/S VAM-2 MS64 Prooflike PCGS. CAC.** The mintmark is repunched with the original showing as a curved line on the left side of the upper loop opening. Sharply defined and frosty devices contrast pleasingly against the mirrored fields, generating delightful visual appeal. PCGS# 43071

4758 **1889-CC VF30 PCGS.** The lavender-gray surfaces of this VF30 specimen are lightly abraded, except for some random marks near E in the left obverse field. Much interior design detail remains intact, including most of the lines in Liberty's hair and ear. NGC ID# 2559, PCGS# 7190

4759 **1889-CC VF30 NGC.** A pleasing VF30 specimen of this key Carson City date, with most of Liberty's hairlines intact and the ear still bold. The lightly abraded surfaces retain a few traces of original mint luster under delicate silver-gray and greenish-gold patina. NGC ID# 2559, PCGS# 7190

4760 **1889-CC VF30 NGC.** Battleship and golden-gray patina covers the surfaces of this Carson City key date. Significant interior detail remains, and each side is largely devoid of anything other than a few scattered ticks. NGC ID# 2559, PCGS# 7190

4761 **1889-CC VF35 PCGS.** This late Carson City date has remained a key issue in the Morgan dollar series for many decades, persisting through the huge Treasury releases and the GSA sales of the 1960s and 1970s. This is a pleasingly original Choice VF coin with a great deal of remaining detail and smooth, largely unabraded surfaces. NGC ID# 2559, PCGS# 7190

4762 **1889-CC — Improperly Cleaned — NGC Details. XF.** Dusky cream-gray and tan-brown toning blankets this well defined key date Carson City Morgan dollar. The obverse exhibits vertical hairlines, and we note a few thin marks near PLU in PLURIBUS. NGC ID# 2559, PCGS# 7190

4763 **1889-CC — Improperly Cleaned — NGC Details. XF.** A mildly bright but nonetheless pleasing example of the famous Carson City key. Stone-white aside from peripheral obverse chestnut patina. Marks are inconsequential except for a line on the right (facing) wing. NGC ID# 2559, PCGS# 7190

4764 **1889-CC — Improperly Cleaned — NGC Details. XF.** Considerable luster fills the borders, wings, and hair, but the stone-white color suggests the coin has been improperly dipped. Minor marks are scattered but none are obtrusive. The key Carson City Morgan issue. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, XF40
Problem-Free Key-Date Example

4765 **1889-CC XF40 PCGS.** Stone-gray patina dominates each side, while darker olive toning occurs within the recesses. This is a problem-free example with expected friction over the high points. Nevertheless, most interior detail remains. Between 250,000 and 325,000 coins from the initial 350,000-piece mintage were melted, making this one of the most popular and sought-after dates in the series. NGC ID# 2559, PCGS# 7190

4766 **1889-O MS64+ PCGS.** The New Orleans Mint struck a large quantity of Morgan dollars in 1889, and the issue is readily available in most grade levels, unlike its Carson City counterpart. This near-Gem shows golden-brown peripheral toning and satiny luster over minimally marked and well-defined surfaces. NGC ID# 255A, PCGS# 7192

4767 **1889-O MS64 PCGS. CAC.** Brilliant and highly lustrous, with intense cartwheel effects in the fields and bold strike definition that only shows slight incompleteness over the central devices. Liberty's cheek and the eagle's breast are clean, but wispy marks in the field areas keep the piece from grading as a Gem. NGC ID# 255A, PCGS# 7192

1889-O Morgan Dollar, MS65
Attractive for the Issue

4768 **1889-O MS65 NGC.** Bowers writes of this issue: "Mint State coins are very common, but sharply struck Gems with beautiful luster are rare." This piece is better-struck than most, with only minor softness on the eagle's breast and the hair above Liberty's ear. Surface disturbances are minor and few, while the satiny luster on each side illuminates just a tint of golden color. Census: 55 in 65 (1 in 65+), 7 finer (7/14). NGC ID# 255A, PCGS# 7192

4769 **1889-S MS65 NGC.** The California branch mint struck only 700,000 Morgan dollars in 1889. Although the issue was at one time a major rarity, significant quantities were released throughout the 20th century. Still, examples are decidedly scarce above MS65, making this an ideal collectible grade. This is a frosty and brilliant piece with only lightly scattered bagmarks over each side. NGC ID# 255B, PCGS# 7194

4770 **1889-S MS65 PCGS.** While moderately available in this grade, the 1889-S Morgan becomes scarce any finer. This representative boasts strong, satiny luster and well-struck devices. Splashes of sea-green, orange-gold, and amber toning encompass the margins on each side. NGC ID# 255B, PCGS# 7194

4771 **1889-S MS65 PCGS. VAM-7.** The mintmark is repunched "with original showing as a curved horizontal line within middle of upper loop opening" per VAMworld.com. This highly lustrous Gem displays light wheat-gold toning and a good strike. NGC ID# 255B, PCGS# 7194

4772 **1889-S MS65 PCGS.** The 1889-S dollar tends to take a backseat to its famous Carson City brother, yet its low mintage of only 700,000 coins is certainly impressive within the context of the Morgan dollar series. This Gem exhibits swirling cartwheel luster over strongly detailed and brilliant surfaces with minimal marks. Two die lumps occur on Liberty's hair below the E in LIBERTY. NGC ID# 255B, PCGS# 7194

4773 **1889-S MS65 NGC. CAC.** Golden-brown, rose, and electric-blue colors illuminate the margins of this splendidly lustrous Gem. A boldly struck and well preserved example. The 1889-S is a lower mintage issue and colorful Gems are scarce. In a prior generation holder.
Ex: Portland Signature (Heritage, 3/2004), lot 6743, which realized $1,552.50. NGC ID# 255B, PCGS# 7194

4774 **1889-S MS65 PCGS. CAC.** The 1889-S is best classified as a semi-key date Morgan dollar, although MS65 is the top grade that is reasonably easy to locate. This Gem features brilliant surfaces with frosty luster. The obverse exhibits delicate peripheral gold toning. PCGS has certified 75 finer examples in higher numeric grades (7/14).
Ex: Stamford Signature (Heritage, 10/2010), lot 4268. NGC ID# 255B, PCGS# 7194

4775 **1890 MS65 NGC.** Scintillating cartwheel luster and brilliant surfaces are seen on each side of this visually compelling Gem example. As expected for the grade, there are only a few trivial tick marks found on the coin's well-preserved surfaces. Just two MS66 examples are graded even finer by NGC (7/14). NGC ID# 255C, PCGS# 7196

4776 **1890 MS65 PCGS.** Splashes of golden-gray toning are scattered over the obverse, while the remaining surfaces gleam with flashy brilliance. Abundant cartwheel luster rolls over each well-struck side. Although the 1890 dollar is available in Gem condition, collectors will require patience to locate anything finer. PCGS has certified only three submissions in higher numeric grades (8/14). NGC ID# 255C, PCGS# 7196

4777 **1890-CC MS64 PCGS. VAM-12.** The mintmark is lightly repunched, and Liberty's eye has a die gouge. Tobacco-brown toning endows the peripheries of this lustrous scarce date Carson City dollar. The reverse is well preserved and the obverse displays only a few moderate marks. NGC ID# 255D, PCGS# 7198

4778 **1890-CC MS64 NGC. CAC.** Strongly struck for the issue with predominantly brilliant surfaces that show faint toning over each side. An impressively lustrous Carson City coin bearing a later date. NGC ID# 255D, PCGS# 7198

4779 **1890-CC MS64+ Prooflike PCGS.** A stone-white and flashy near-Gem. Sharply struck and only lightly marked. A scarcer Carson City emission, especially with prooflike fields. NGC ID# 255D, PCGS# 7199

4780 **1890-CC MS63 Deep Mirror Prooflike PCGS.** The 1890-CC Morgan had a rather substantial mintage of more than 2.3 million pieces, but is not quite as available as are Carson City issues from the mid-1880s. This example delivers excellent eye appeal with boldly struck motifs and deeply mirrored fields. The surfaces are largely brilliant, save for a couple ribbons of pale golden color over the obverse portrait. Light, scattered abrasions contribute to the grade, though none are individually noteworthy. NGC ID# 255D, PCGS# 97199

4781 **1890-O MS65 NGC.** An impressive degree of thick mint frost is apparent over each side of this brilliant, snow-white example from the New Orleans Mint. A small number of superficial nicks and luster grazes fail to prevent the Gem grade designation by NGC. NGC ID# 255E, PCGS# 7200

4782 **1890-O MS64 Deep Mirror Prooflike PCGS. CAC.** Housed in a green label PCGS holder, this impressive O-mint Morgan features deeply mirrored fields that surround frosty devices, creating light cameo contrast. A few delicate marks are visible on each side, preventing a higher grade. PCGS has only certified 19 numerically finer Deep Mirror Prooflike coins. NGC ID# 255E, PCGS# 97201

1890-S Morgan, MS66
Radiant Mint Luster

4783 **1890-S MS66 PCGS.** Ex: Jackson Hole, The Michigan Collection. Superb, frosted luster rolls around this brilliant coin as it is tilted in the light. Only a couple of minor bagmarks separate this sharply struck piece from an even more illustrious grade. A beautiful Premium Gem that falls into the "must see" category.
Ex: Long Beach Signature (Heritage, 2/2005), lot 10341; Dallas Signature (Heritage, 4/2007), lot 68. NGC ID# 255F, PCGS# 7202

4784 **1890-S MS65 Prooflike PCGS.** Contrast between the watery fields and frosted design elements provide this Gem S-mint Morgan with a blazing prooflike appearance. This is an ideal representative for the issue, which is known for its sharp strike, strong luster, and vivid eye appeal. Population: 16 in 65 Prooflike, 3 finer (7/14). NGC ID# 255F, PCGS# 7203

4785 **1891 MS64+ PCGS. CAC.** The surfaces display coruscating luster and lack even the slightest hint of toning, generating strong eye appeal. The strike is above-average for the issue and marks are undistracting. A high-end representative. NGC ID# 255G, PCGS# 7204

1891 Morgan Dollar, MS65
Seldom Seen Finer

4786 **1891 MS65 PCGS.** Although the 1891 Morgan dollar is a reasonably available issue at the Gem level, it is a prime condition rarity in finer grades. This well-detailed MS65 representative displays frosty cartwheel mint luster under shades of golden-gray and violet toning. PCGS has graded only three numerically finer examples (7/14). NGC ID# 255G, PCGS# 7204

4787 **1891-CC MS64 PCGS. VAM-6.** The unheralded but scarce die variety with noticeable doubling on AMERICA and TRUST. A well struck near-Gem blanketed in rich patina. The obverse is principally gunmetal-gray and peach, while the reverse is mostly sea-green.
Ex: Baltimore Signature (Heritage, 7/2003), lot 8739. NGC ID# 255H, PCGS# 7206

4788 **1891-CC MS64+ NGC.** A thick blanket of vibrant mint frost covers each side of this Plus-graded near-Gem beneath a thin veil of light golden color. The strike is well-executed, save for a touch of minor weakness on the hair above Liberty's ear, and only a few faint disturbances in the luster preclude a full Gem grade assessment. NGC ID# 255H, PCGS# 7206

1891-CC Morgan, MS65
Virtually Prooflike Fields

4789 **1891-CC MS65 PCGS.** Ex: The Michigan Collection. A brilliant Gem specimen, this piece must have just missed a Prooflike designation. It is sharply struck and both sides are fully brilliant with no evidence of toning. Only a few scattered surface marks are evident on each side. While not particularly rare at this grade level, only 30 finer examples have been certified by PCGS (7/14).
Ex: Long Beach Signature (Heritage, 5/2007), lot 1559. NGC ID# 255H, PCGS# 7206

4790 **1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC.** A Top 100 Variety. The available but ever-popular "Spitting Eagle" variety earns its name from a small die lump that occurs in front of the eagle's beak. This Carson City representative offers an above-average strike for the issue. The untoned surfaces are lustrous and appealing. PCGS# 133937

4791 **1891-CC Spitting Eagle, VAM-3, MS64+ PCGS. CAC.** Undesignated by VAM on the PCGS insert, but the die lump beneath the beak is undeniable. A faintly toned and thoroughly lustrous near-Gem. Delicate obverse grazes preclude an even finer grade. PCGS# 133937

4792 **1891-S MS65 PCGS.** This is a beautiful San Francisco Morgan dollar from an issue that becomes prohibitively scarce any finer. The devices feature sharp strike detail and the surfaces are smooth and clean with vibrant luster that blends over each side. NGC ID# 255K, PCGS# 7210

4793 **1891-S MS65 NGC.** This San Francisco issue stands in stark contrast to its New Orleans Mint counterpart, which is known for a below-average strike and subpar appeal. The brilliant surfaces feature sharp detail and minimal marks with booming luster throughout. NGC has seen just 21 numerically finer pieces (7/14). NGC ID# 255K, PCGS# 7210

4794 **1891-S MS65 PCGS.** Most 1891-S dollars were paid out over a period of 10 years beginning in the early 1940s, and the Treasury release of the 1960s yielded few examples. This sharply struck Gem showcases vibrant cartwheel luster over largely brilliant surfaces, and light champagne toning occurs sporadically on each side. NGC ID# 255K, PCGS# 7210

1891-S Morgan Dollar, MS66
Sharply Defined Throughout

4795 **1891-S MS66 PCGS.** Although the issue's mintage of 5.3 million coins may be unremarkable, this Premium Gem certainly makes a strong impression. Variegated hues of blue, purple, green, and orange adhere to the peripheries and yield to mostly brilliant centers on each side. The design elements show pinpoint-sharp detail, especially over Liberty's ear and the eagle's breast, and luster shines throughout. PCGS has certified only eight coins numerically finer (7/14). NGC ID# 255K, PCGS# 7210

4796 **1892 MS64+ PCGS Secure.** Largely brilliant interiors yield to faint golden-brown hues at the margins on each side. This Choice representative is sharply detailed with trivial softness over the hair above Liberty's ear, and marks are minimal throughout. NGC ID# 255L, PCGS# 7212

4797 **1892-CC MS61 PCGS.** Radiant mint luster engulfs each side of the brilliant Carson City dollar. Considerable softness is seen on the central devices, though the fields are almost fully prooflike. Numerous, scattered abrasions contribute to the grade, though none are individually noteworthy. NGC ID# 255M, PCGS# 7214

4798 **1892-CC MS61 PCGS.** This brilliant, radiantly lustrous Carson City dollar is generally well-struck, tough a touch of minor softness is seen on the hair above Liberty's ear. Scattered surface abrasions define the grade. Despite a mintage in excess of 1.3 million coins, this Carson City issue is slightly scarcer in Mint State than are those of the mid-1880s. NGC ID# 255M, PCGS# 7214

1892-CC Morgan, MS64
Highly Pleasing for the Grade

4799 **1892-CC MS64 PCGS.** Despite numerous pieces being distributed in the Treasury releases of the 1960s, this issue remains highly popular among Carson City specialists. This piece exhibits strong, softly frosted mint luster and well-defined design elements. Abrasions are minimal, and just a faint trace of light golden color prohibits calling this coin brilliant. NGC ID# 255M, PCGS# 7214

1892-CC Morgan, MS64
Popular Carson City Issue

4800 **1892-CC MS64 PCGS.** The 1892-CC is a fairly high-mintage date for the Carson City Mint (more than 1.3 million coins), but it was not as well-represented in the GSA sales as were its counterparts from the early 1880s, and is therefore much more difficult to locate in the higher Mint State grades. This is a lustrous, Choice example, with largely brilliant centers and deep amber-gold toning around the periphery. A few scattered grazes are present, as the grade suggests, but none are individually detracting. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, Appealing MS64

4801 **1892-CC MS64 PCGS. CAC.** The 1892-CC dollar is readily available through the near-Gem level of preservation, but obtaining a Gem will require a great deal more searching. Both sides of the present MS64 offering yield strong luster and each exhibits nicely struck devices, including the central areas that are often weak. The minimally marked surfaces are untoned except for a sliver of electric-blue and russet around the obverse margin. Pleasing overall eye appeal, appropriately recognized by CAC. NGC ID# 255M, PCGS# 7214

4802 **1892-CC MS62 Prooflike PCGS. VAM-4.** The mintmark is repunched. A brilliant better date Carson City dollar that boasts dazzling luster and a good strike. The fields are surprisingly smooth although the cheek exhibits grazes. Clashed, but not yet VAM-4A. NGC ID# 255M, PCGS# 7215

1892-CC Morgan, MS63 Deep Mirror Prooflike
Moderate Cameo Contrast

4803 **1892-CC MS63 Deep Mirror Prooflike PCGS.** This flashy, well-struck representative has ample mirroring in the fields and relatively clean surfaces for the assigned grade. An exacting strike sharpens the design elements, including the hair at Liberty's ear and the eagle's breast feathers. The 1892-CC Morgan is a scarce issue with a Deep Mirror Prooflike finish. Population: 41 in 63 Deep Mirror Prooflike, 29 finer (7/14).
Ex: Long Beach Signature (Heritage, 6/2004), lot 9865; FUN Signature (Heritage, 1/2008), lot 5536. NGC ID# 255M, PCGS# 97215

4804 **1892-O MS64+ NGC. CAC.** This issue is consistently regarded as one of the most poorly struck dates in the Morgan dollar series, often with subpar eye appeal. Such is not the case with this example. Although typically struck, this near-Gem possesses pleasing luster and exceptionally clean surfaces. NGC ID# 255N, PCGS# 7216

4805 **1892-S AU50 NGC.** Substantial luster remains in the recesses of this Almost Uncirculated 1892-S Morgan. A touch of rub on the eagle's breast and the hair above Liberty's ear preclude a Mint State assessment, though accompanying abrasions are minor. A blush of pale lavender-gold toning covers much of each side. NGC ID# 255P, PCGS# 7218

4806 **1893 MS63 PCGS.** An attractive piece with creamy-white surfaces and bold cartwheel luster in the fields. Normal marks are noted for the grade on the obverse, while the Gemlike reverse shows minimal abrasions. NGC ID# 255R, PCGS# 7220

4807 **1893 MS63+ NGC.** While not as popular as its San Francisco-issued counterpart, the 1893 Morgan is still a better date in its own right. Softly frosted, brilliant mint luster illuminates well-struck devices on each side of this Plus-graded piece, while grade-defining abrasions are limited to just a few scattered, light grazes on each side. NGC ID# 255R, PCGS# 7220

4808 **1893 MS64 PCGS. VAM-3.** UNITED STATES OF and IN GOD WE TRUST are die doubled, as is Liberty's profile. The top of the 3 in the date is repunched. A nicely struck and lustrous near-Gem of this better and lower mintage Philadelphia issue. Brilliant centers are framed by golden-brown and forest-green toning. NGC ID# 255R, PCGS# 7220

1893 Morgan, MS64
Attractive, Frosty Luster

4809 **1893 MS64 PCGS. CAC.** The lustrous surfaces of this near-Gem display a few touches of faint light golden color. The design elements are typically struck, with weakness in the central areas. A few too many minor surface grazes are present to warrant a Gem grade assessment, though the overall eye appeal is nonetheless excellent.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1864. NGC ID# 255R, PCGS# 7220

1893 Morgan, MS64
High-End for the Grade

4810 **1893 MS64 PCGS. CAC.** In all grades, the 1893 Morgan dollar is the lowest-valued issue of the year, despite a mintage of only 378,000 business strikes, as the three branch mint issues are more highly prized and widely collected. This Choice Mint State example has frosty silver luster with mostly untoned surfaces, the obverse showing a small splash of gold and the reverse exhibiting light champagne toning. No major abrasions are present, putting this piece firmly in the upper end of its assigned grade.
Ex: FUN Signature (Heritage, 7/2011), lot 4127. NGC ID# 255R, PCGS# 7220

4811 **1893-CC XF40 NGC.** From the final year of production at the historic Carson City Mint, this lightly circulated 1893-CC Morgan exhibits natural golden-gray patina over each side, with strong detail for the grade. A small tick on Liberty's cheek is the only surface flaw of note. NGC ID# 255S, PCGS# 7222

4812 **1893-CC XF45 NGC.** This is a final-year representative from the Carson City Mint, as coinage operations ceased in May 1893. The untoned surfaces show good detail with an expected amount of wear. Abrasions are lightly scattered over each side. NGC ID# 255S, PCGS# 7222

4813 **1893-CC AU53 NGC.** Delicate silver-gray patina embraces each side. This final-year Carson City dollar features well-struck design elements with slight softness at the centers and trace amounts of friction over the high points. NGC ID# 255S, PCGS# 7222

4814 **1893-CC — Questionable Color — PCGS Genuine. Unc Details.** Lakers fans and LSU faithful take note. This Uncirculated Carson City Morgan shows rich golden patina with purple toward the peripheries, most likely artificially applied. As is frequently encountered on coins of the issue, the devices are softly struck, notably over Liberty's ear. From a mintage of only 677,000 pieces. NGC ID# 255S, PCGS# 7222

1893-CC Morgan, MS62
Final Carson City Issue

4815 **1893-CC MS62 NGC.** The 1893-CC was the final silver dollar issue from the Nevada mint, and as such is widely sought-after in all grades. This piece is somewhat softly struck in the centers, but a degree of semiprooflike mirroring in the fields balances the eye appeal. A blush of light golden toning warms attractive cartwheel luster, and the surfaces are only minimally abraded. NGC ID# 255S, PCGS# 7222

4816 **1893-S Good 4 NGC.** This is a well-worn example with little interior detail remaining. Steel-gray patina covers each side. For the budget-minded collector, this is an ideal opportunity to acquire the key issue in the Morgan dollar series. NGC ID# 255U, PCGS# 7226

4817 **1893-S Good 4 NGC.** Of all the low-mintage Morgan dollar issues produced in 1893, the San Francisco issue is by far the most famous. Ideal for the collector on a budget, this well-circulated example shows even wear and original battleship-gray patina. The rims are complete and the devices are boldly outlined. NGC ID# 255U, PCGS# 7226

4818 **1893-S Good 6 PCGS.** For the collector on a budget, this is an ideal representative of this key-date San Francisco issue. Tan-gray and deeper gunmetal hues intermingle on each side, while the well-circulated devices remain boldly outlined. NGC ID# 255U, PCGS# 7226

4819 **1893-S VG8 NGC.** The rims, dentils, date, and mintmark are clear. Both Liberty's portrait and the eagle show faint interior detail, while light-gray patination blankets each side. This is an affordable piece from a famous, low-mintage S-mint issue. NGC ID# 255U, PCGS# 7226

4820 **1893-S — Repaired — NGC Details. Fine.** In 1893, Congress repealed the Sherman Act of 1890, accounting for the issue's low mintage of only 100,000 coins. Battleship-gray patina covers each side of this well-worn San Francisco key date. The noted repair appears as a small linear depression on the obverse between stars 9 and 10.

4821 **1893-S — Improperly Cleaned — NGC Details. Fine.** NGC notes old cleaning, though the surfaces have long since retoned a pale battleship-gray hue, with deeper burgundy overtones seen periodically on each side. A pleasing degree of design definition remains for the details grade. NGC ID# 255U, PCGS# 7226

1893-S Morgan, Well-Detail Fine 15

4822 **1893-S Fine 15 PCGS.** This San Francisco issue has long been regarded as one of the major keys to the series, and is heavily sought in all grades. Pale tan-gray patina blankets each side of this middle-grade representative, while the devices retain strong detail for the grade. A few noticeable marks are present, as can be expected at this level, the most prominent being an old, thin scratch on Liberty's jaw. NGC ID# 255U, PCGS# 7226

1893-S Morgan, Fine 15
Remarkably Clean Surfaces

4823 **1893-S Fine 15 PCGS.** The 1893-S ranks as the "big key" in the Morgan dollar series, save for the famous 1895 proof, and is proportionately sought-after in all grades. This is a pleasing mid-grade example, with even pewter-gray patina over both sides and unusually smooth surfaces. Remaining detail is in keeping with the grade. NGC ID# 255U, PCGS# 7226

1893-S Morgan, Strong VF Sharpness

4824 **1893-S — Improperly Cleaned — NGC Details. VF.** The 1893-S Morgan had the lowest business strike mintage of the series (just 100,000 coins), and has long been recognized as one of the major keys in the series. This lightly circulated piece shows signs of cleaning, but retains strong detail for the grade level. Lilac and golden peripheral hues surround bright, silver-gray centers. NGC ID# 255U, PCGS# 7226

1893-S Morgan, VF Detail
Deeply Toned

4825 **1893-S — Improperly Cleaned — NGC Details. VF.** NGC notes old cleaning, but the surfaces have retoned deep shades of orange-gold and lilac-gray, and the detail is strong for the grade level. Due to their key-date status, 1893-S Morgan dollars always seems to find a waiting collector, regardless of condition. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, VF Details

4826 **1893-S — Rim Filing — NGC Details. VF.** This lightly worn example is representative of the issue, which experienced widespread circulation on the West Coast. The bright and untoned surfaces show substantial detail and evenly scattered marks. Evidence of rim filing appears to the left of star 7 on the obverse.

4827 **1894 VF35 NGC.** Prior to the discovery of several 1,000-coin bags in the mid-20th century, the 1894 Morgan dollar issue was a major rarity. From a mintage of just 110,000 coins, this circulated example offers bright silver-gray surfaces that show significant interior detail. NGC ID# 255V, PCGS# 7228

4828 **1894 XF40 NGC.** This is a pleasing steel-gray representative of this better Philadelphia issue, with pleasing detail and hints of deep olive-gray color in the crevices around the relief elements. A small tick on Liberty's chin appears to be the only noticeable imperfection. NGC ID# 255V, PCGS# 7228

4829 **1894 — Improperly Cleaned — NGC Details. AU.** Just a touch of friction appears over the strongly defined devices of this About Uncirculated key date. The bright surfaces are entirely untoned and minimally marked, and the noted cleaning is not overly distracting. NGC ID# 255V, PCGS# 7228

4830 **1894 — Improperly Cleaned — NGC Details. AU.** A layer of silver-gold patina blankets each side, and orange and ice-blue accents occur peripherally. This lightly circulated Philadelphia key date displays a bold strike with minor friction over the devices. NGC ID# 255V, PCGS# 7228

4831 **1894 AU50 NGC.** A degree of mint luster remains in the protected regions of this well-detailed About Uncirculated piece. Several small reed marks are noted on Liberty's lower jaw, while a faint golden tint blankets the otherwise untoned surfaces. NGC ID# 255V, PCGS# 7228

4832 **1894 AU53 NGC.** Among all Philadelphia issues in the Morgan dollar series, the 1894 date is the lowest-mintage with only 110,000 coins struck. This example shows brilliant and partly lustrous surfaces with bold detail and just slight friction over the high points. NGC ID# 255V, PCGS# 7228

4833 **1894 AU53 NGC.** Partial mint luster remains over the entirely untoned surfaces of this unimpaired About Uncirculated representative. The design elements are boldly impressed, and lightly scattered abrasions do not detract. NGC ID# 255V, PCGS# 7228

4834 **1894 AU55 NGC.** The Mint struck just 110,000 dollars in 1894, making it the first key date issue from Philadelphia. This piece displays well-struck devices with just a touch of friction over the high points. Substantial mint luster embraces each minimally mark side. NGC ID# 255V, PCGS# 7228

4835 **1894 AU55 NGC.** A faint blush of pale golden color graces the still-lustrous surfaces of this Choice About Uncirculated coin. Scattered abrasions accompany the grade, but actual wear is minimal. From a mintage of just 110,000 coins. NGC ID# 255V, PCGS# 7228

4836 **1894 AU55 NGC.** Substantial luster remains beneath a veil of golden-gray toning on each side of the Choice About Uncirculated example. A brush of rub precludes a Mint State grade from NGC, though the design elements remain virtually complete. From a low mintage of only 110,000 business strikes. NGC ID# 255V, PCGS# 7228

4837 **1894 AU55 PCGS.** Substantial mint luster remains and combines with entirely brilliant surfaces, supplying this key date example with strong visual appeal. Despite minor friction over the high points, the devices exhibit sharp detail throughout. NGC ID# 255V, PCGS# 7228

4838 **1894 AU58 NGC.** The surfaces exhibit sharp definition over the design elements and an impressive degree of remaining luster. This near-Mint representative is minimally abraded and fully brilliant save for a spot of russet toning below Liberty's chin. NGC ID# 255V, PCGS# 7228

1894 Morgan, Lustrous MS60

4839 **1894 MS60 NGC.** The 1894 Morgan dollar is a low-mintage semikey, seldom encountered in high grades and prized by collectors in all conditions. This attractive MS60 example is sharply detailed throughout and minimally abraded for the grade, with vibrant mint luster and strong eye appeal. NGC ID# 255V, PCGS# 7228

1894 Morgan, Lustrous MS61
Immensely Appealing for the Grade

4840 **1894 MS61 NGC.** Original, remarkably vibrant silvery mint luster cartwheels around each side of this well-struck key-date Morgan, with tiny tinges of olive toning seen in the crevices. Scattered abrasions define the grade, but these are seen only in the form of light grazes and do not overly detract. NGC ID# 255V, PCGS# 7228

1894 Morgan, Brilliant MS61
Low-Mintage Philadelphia Issue

4841 **1894 MS61 PCGS.** The 1894 Morgan boasts the second-lowest mintage of the series (only 110,000 coins), and is proportionately more elusive in Mint State than are many higher-mintage dates. This piece is moderately abraded, as the grade suggests, but retains brilliant, radiant luster, and only a touch of weakness is seen on the hair above Liberty's ear. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS62
Upper-End for the Grade

4842 **1894 MS62 NGC.** This piece is remarkably appealing for the grade; surface disturbances are light and exist only to a limited extent, and the luster is frosty with notable radiance. The eagle's breast is well-defined, and the hair above Liberty's ear is nearly complete. This issue is moderately available in grades through MS64, but it becomes rare at the Gem level. NGC ID# 255V, PCGS# 7228

1894 Morgan, MS62
Only 110,000 Pieces Struck

4843 **1894 MS62 NGC.** Unlike many low-mintage Carson City issues, the 1894 Morgan was not represented in bag form in the Treasury releases of the 1960s, with the result that Mint State examples are decidedly more elusive in pleasing condition. This piece is a trifle soft on the eagle's breast and the hair above Liberty's ear, but the luster is frosty and surface abrasions are minimal. Traces of light golden color are noted upon close examination. NGC ID# 255V, PCGS# 7228

4844 **1894-O MS61 NGC.** Radiant luster rolls over mostly brilliant surfaces that show faint russet toning in the hidden areas. This Uncirculated O-mint Morgan dollar features typically struck devices with softness at the centers, and abrasions are lightly scattered throughout. NGC ID# 255W, PCGS# 7230

1894-O Morgan, MS62+
Pleasing for the Grade

4845 **1894-O MS62+ PCGS.** This high-end MS62 piece exhibits brilliant surfaces with vibrant mint luster and just a scattering of minor, grade-consistent contact marks. The central devices are not fully defined, as is typical of this New Orleans issue. Though not notably rare at this grade level, the 1894-O becomes increasingly elusive in succeeding finer grades. NGC ID# 255W, PCGS# 7230

1894-O Dollar, Lustrous MS63
Above-Average Strike

4846 **1894-O MS63 PCGS.** The 1894-O Morgan is typically seen with a poor strike, subpar luster, and extensive bagmarks, helping to account for the relatively few examples extant in the better levels of Mint State. The present Select offering displays pleasing satiny luster residing on untoned surfaces. While not fully struck, the design elements reveal better definition than ordinarily encountered. For example, a fair amount of detail shows in the hair above Liberty's ear. Moreover, light scattered marks are fewer and less severe than usually seen. NGC ID# 255W, PCGS# 7230

4847 **1894-S MS63 NGC.** The 1894-S had a moderately low mintage of little more than 1.2 million pieces, and is widely popular in all Mint State grades. A high-end piece for the grade, this Select example exhibits only light, scattered surface grazes on each side. The strike is well-executed, while traces of light golden color add a small degree of warmth to the otherwise brilliant luster. NGC ID# 255X, PCGS# 7232

4848 **1894-S MS63 NGC.** This is an intensely lustrous, frosty example of this better San Francisco issue, with boldly impressed design elements. Light, scattered abrasions, primarily on the obverse, confirm the grade, though they are not overly distracting. NGC ID# 255X, PCGS# 7232

4849 **1894-S MS64 PCGS.** Radiant mint luster cascades over brilliant surfaces that exhibit minimal abrasions for the grade. This near-Gem example is generally well-defined, although roller marks appear over Liberty's ear from a lack of striking pressure. NGC ID# 255X, PCGS# 7232

4850 **1895-O AU53 NGC.** The 1895-O and 1895-S Morgan dollars are both low-mintage issues that are extremely popular due to the absence of a Philadelphia Mint business strike mintage. This piece is untoned and slightly subdued, with numerous wispy hairlines and even high-point wear that matches the assigned grade level. NGC ID# 255Y, PCGS# 7236

1895-O Morgan, Lustrous AU58
Virtually Mint State

4851 **1895-O AU58 NGC.** The 1895-O can be located in circulated grades with little searching, but it emerges as a major rarity in the series in Mint State grades. This near-Mint example showcases full luster and well-struck devices. NGC notes a faint trace of rub on Liberty's cheek and the eagle's breast, however, to the unaided eye, this coin delivers the overall appearance of a lower-grade Mint State piece. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, Scarce AU53 Prooflike
Modest Field-Motif Contrast

4852 **1895-O AU53 Prooflike NGC.** Judging by the large number of Extremely Fine and About Uncirculated 1895-O dollars in the extant population, this date must have been in circulation for only a short time. Mint State pieces can be located with some searching but are usually in the lower levels. Prooflike examples such as the present AU53 are relatively scarce. Mirrored fields highlight the frosty motifs, yielding modest contrast, and the design elements exhibit good definition despite high point wear. Light circulation marks are in accordance with the grade designation. NGC ID# 255Y, PCGS# 7237

1896 Morgan, MS67
Beautiful Rainbow Crescent

4853 **1896 MS67 PCGS.** The 1896 Morgan dollar is a scarce issue in MS67 condition, and finer coins are virtually unobtainable. This delightful Superb Gem displays well-preserved surfaces that radiate vibrant mint luster on both sides and display crescents of rich rainbow toning at the obverse border. PCGS has graded only two numerically finer examples (7/14). NGC ID# 2562, PCGS# 7240

1896 Morgan Dollar, MS67
Amazing Multicolor Toning

4854 **1896 MS67 PCGS. CAC.** This resplendent Superb Gem features dynamic multicolor toning over each side. Shades include ice-blue, purple-pink, orange, green, and yellow. Combined with a bold impression, booming luster, and virtually pristine surfaces, the result is a spectacular Morgan dollar representative. PCGS has certified only two coins in higher numeric grades (7/14). NGC ID# 2562, PCGS# 7240

4855 **1896 Bar 6, VAM-20, MS65 Deep Mirror Prooflike PCGS Secure.** A Hot 50 Variety. A thick curved bar of unknown origin appears inside the lower loop of the 6, possibly a 6/4 overdate. Thickly frosted design features and watery fields generate strong cameo contrast. The lustrous and sharply detailed surfaces are almost entirely brilliant save for faint golden-brown toning toward the lower reverse. In all varieties, PCGS has certified only 20 coins numerically finer in Deep Mirror Prooflike (7/14). PCGS# 43874

4856 **1896-O MS61 NGC.** Although graded MS61, this piece possesses the eye appeal of a coin certified at least a full grade point finer; frosty, gold-tinted mint luster engulfs each side, and the grade-defining abrasions are light and not overly detracting. A touch of the usual softness is seen on the eagle's breast and the hair above Liberty's ear. NGC ID# 2563, PCGS# 7242

4857 **1896-O MS61 PCGS.** The repunching evident on the lower left sides of 8 and 6 in the date do not match any known VAM variety. A bit weakly detailed over the centers, which is a frequently-seen occurrence with New Orleans Morgan dollars. A lustrous piece with slight golden-russet rim toning and surfaces that are only modestly abraded for the MS61 grade assessment by PCGS. NGC ID# 2563, PCGS# 7242

1896-S Morgan, MS62
Semiprooflike Fields

4858 **1896-S MS62 NGC.** The 1896-S is a better San Francisco issue in Mint State, especially in the finer grades of preservation. This piece is typically abraded, but the intense, untoned mint luster balances the visual appeal. The devices are boldly struck, and a degree of semiprooflike mirroring is seen in the fields. NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS62
CAC Green Label

4859 **1896-S MS62 PCGS. CAC.** The 1896-S is moderately available in lower Mint State levels, but becomes increasingly scarcer as one ascends the grade scale. This piece is lightly abraded, as the grade suggests, but exhibits strong luster with traces of light golden color over each side. The hair above Liberty's ear is slightly soft, not unusual for this better S-mint issue. NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS63
Better San Francisco Issue in Mint State

4860 **1896-S MS63 NGC.** Likely a victim of the massive silver dollar melting that followed the Pittman Act of 1918, the 1896-S is significantly scarcer in Mint State than its mintage of 5 million coins would otherwise imply. The present example is boldly struck, with frosty, vibrant mint luster and minimal abrasions. Traces of mint-green, pale amber, and light champagne color grace each side, attesting to the originality of the surfaces. NGC ID# 2564, PCGS# 7244

1896-S Dollar, Brilliant MS63

4861 **1896-S MS63 PCGS.** The silver-white surfaces of this Select Morgan are free of toning and exhibit well-struck design elements; indeed, much better defined than usually seen. The hair above Liberty's ear is nicely detailed, and a fair amount of clarity is seen on the eagle's breast feathers. Luster is above average, not subdued as usually encountered on this date. Scattered marks determine the grade, but these are less severe than typically seen. These factors add up to give this coin above-average eye appeal for the grade designation and for the issue. Most of the generous mintage of 5 million pieces is thought to have been melted under terms of the Pittman Act (Standish, 2014). NGC ID# 2564, PCGS# 7244

4862 **1896-S/S VAM-5 AU58 NGC.** A Hot 50 Variety. Although not indicated as such on the holder, this near-Mint dollar features a repunched mintmark, most visible within the lower-loop of the S. Significant luster remains and swirls over brilliant surfaces that show well-struck design motifs. PCGS# 134022

4863 **1897 MS66 PCGS. CAC.** The lovely stone-white surfaces display creamy luster and clean, mark-free surfaces. A sharply struck piece with great eye appeal. Only 24 coins are ranked higher by PCGS as of (7/14). NGC ID# 2565, PCGS# 7246

4864 **1897-O MS61 PCGS.** The obverse displays light peripheral toning around brilliant interiors, while the reverse shows intermingled shades of violet and golden-orange throughout. This lustrous Mint State piece offers an above-average strike for the New Orleans Mint with typical softness at the centers. NGC ID# 2566, PCGS# 7248

4865 **1897-O MS61 NGC.** A scarcer issue and a conservatively graded specimen. The design motifs are well-struck except over the obverse center. Very few abrasions are evident for the grade. NGC ID# 2566, PCGS# 7248

4866 **1897-O MS62 PCGS.** Faint almond-gold patina adorns this lustrous and bagmark-free silver dollar. A few delicate hairlines on the portrait determine the grade. Conditionally rare in Mint State, similar to the 1886-O and 1896-O. Encapsulated in a first generation holder. NGC ID# 2566, PCGS# 7248

4867 **1897-S MS66 NGC.** The issue usually appears well-struck and this Premium Gem is no different. The design elements are boldly impressed with only a touch of softness over Liberty's ear and the eagle's breast feathers. A flashy and brilliant representative with minimal marks. NGC has seen just 11 numerically finer submissions (7/14). NGC ID# 2567, PCGS# 7250

4868 **1897-S MS66 PCGS. CAC.** Ex: The Michigan Collection. Boldly struck and essentially untoned with pleasing luster. A well-preserved example of this issue that is elusive despite an original mintage of more than 5.8 million pieces. PCGS has certified just 23 numerically finer pieces (7/14).
Ex: Dallas Signature (Heritage, 11/2006), lot 1461. NGC ID# 2567, PCGS# 7250

4869 **1897-S MS66 PCGS. CAC.** Ex: STP Legacy Collection. Honey-gold toning adorns the borders of this otherwise brilliant Premium Gem. A highly lustrous example with a good strike and impressive preservation.
Ex: Long Beach Signature (Heritage, 9/2007), lot 2804. NGC ID# 2567, PCGS# 7250

4870 **1898 MS66+ PCGS.** The surfaces are exceptionally clean for the grade and the devices are fully struck. This Plus-designated Premium Gem offers blazing cartwheel luster and brilliance over each side. An ideal type representative. NGC ID# 2568, PCGS# 7252

1898-S Morgan Dollar, MS66
Rare Issue in Higher Grades

4871 **1898-S MS66 PCGS. VAM-4.** The mintmark is plainly repunched. The 1898-S Morgan dollar is rarely encountered in Premium Gem condition, and only four coins have been certified in higher numeric grades at PCGS and NGC combined (7/14). The present coin exhibits subtle mint luster beneath delicate shades of golden toning. The strike shows just a touch of softness on the hair above the ear.
Ex: FUN Signature (Heritage, 7/2010), lot 4262. NGC ID# 256A, PCGS# 7256

4872 **1899 MS66 PCGS.** Sharply struck with a beautifully clean, fully rounded cheek and excellent definition on the eagle's breast and wing feathers, as well as the talons and tailfeathers. Untoned and highly lustrous with a vibrant cartwheel sheen across both sides, and carefully preserved surfaces that are nearly mark-free. NGC ID# 256B, PCGS# 7258

4873 **1899 MS66 PCGS.** The 1899 Morgan boasts a low mintage of only 330,000 pieces, and thus is widely popular in the finer Mint State grades. This satiny, untoned Premium Gem example showcases nearly unabraded surfaces and well-defined details. PCGS has certified only 18 numerically finer representatives (7/14). NGC ID# 256B, PCGS# 7258

4874 **1899-S MS65 PCGS.** While available in lower Uncirculated grades, the 1899-S is somewhat scarce in Gem condition. This is a sharp, but not quite fully struck example with excellent luster characteristics. Both sides are mostly brilliant with just the slightest hint of golden-brown patina at the margins.
Ex: Central States Signature (Heritage, 4/2006), lot 404; Los Angeles Signature (Heritage, 8/2009), lot 1128. NGC ID# 256D, PCGS# 7262

4875 **1900 MS66+ NGC. CAC.** A new reverse hub was introduced in 1900, resulting in a loss of definition on the eagle's breast. This blazing Premium Gem offers frosty mint luster that rolls over entirely brilliant surfaces. Only a few ticks show on each side and a small planchet void occurs just inside the upper portion of the right wreath leaves. Good for type. NGC ID# 256E, PCGS# 7264

1900-O Morgan Dollar, Frosty MS67 Among the Finest Certified

4876 **1900-O MS67 PCGS. CAC.** A blush of faint golden-orange and lemon-yellow toning surrounds most of the obverse margin, while the remaining surfaces maintain their brilliance. This essentially flawless Super Gem features remarkable definition for an O-mint Morgan dollar, and only stars 1 through 5 show slight incompleteness. Population: 57 in 67 (3 in 67+), 0 finer (7/14). NGC ID# 256F, PCGS# 7266

4877 **1900-O/CC VAM-8 MS65 PCGS.** A Top 100 Variety. The outline of the left C in the undermintmark is nearly complete. Softly struck with cartwheel luster and light pearl-gray toning over each side.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4714. PCGS# 133960

4878 **1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. An early die state of the popular overmintmarked VAM. A well struck Gem with booming luster and only a hint of gold toning. High end for the designated grade. Encapsulated in an old green label holder. PCGS# 133963

4879 **1900-O/CC VAM-11 MS65 NGC.** A Top 100 Variety. The underlying CC mintmark is seen on each side of the primary O. This is a highly popular variety among VAM specialists, as the Carson City Mint had not produced any coins in seven years when this variety was coined. Traces of golden color accent frosty, luminous surfaces. Liberty's cheek is particularly clean, and the strike is above-average for an O-mint issue. NGC has certified only 11 numerically finer examples (7/14). PCGS# 133963

4880 **1900-S MS65 PCGS.** The hallmark of this attractive piece has got to be its unusual and variegated toning. The coloration itself is not dramatic, but the earth tones of olive, grayish-tan, and terra cotta are simply not often seen over the surfaces of a Morgan dollar. This Gem example is also well-struck, lustrous, and carefully preserved, with distraction-free surfaces. NGC ID# 256H, PCGS# 7270

4881 **1900-S MS65+ PCGS.** Untoned and lustrous, with sharply struck design elements and well-preserved surfaces. A paper-thin vertical mark beneath Liberty's eye is the only possible impediment to an even finer grade. NGC ID# 256H, PCGS# 7270

4882 **1901 AU58 NGC.** The majority of coins from this issue were released into circulation or melted under the Pittman Act of 1918. Thus, examples are common in lower grades and scarce in Mint State. This near-Mint representative is brilliant and partially lustrous. The strike is generally good and each side shows lightly scattered marks. Two small nicks to the right of the eagle's head are noted. NGC ID# 256J, PCGS# 7272

4883 **1901 — Cleaning — PCGS Genuine. Unc Details.** The 1901 Morgan is one of the most conditionally challenging issues in the series and is widely sought in all Mint State grades. This essentially brilliant piece is lightly cleaned, but retains moderate mint luster and is unusually free of major abrasions. NGC ID# 256J, PCGS# 7272

4884 **1901 MS60 ANACS.** A few hints of greenish-gold toning enliven the mostly brilliant surfaces of this attractive Mint State specimen. The design elements are well-detailed and the lustrous surfaces show a number of minor grade-consistent contact marks. NGC ID# 256J, PCGS# 7272

1901-O Dollar, MS66+ Brilliant and Satiny

4885 **1901-O MS66+ PCGS. CAC.** This Premium Gem exhibits satiny luster over fully brilliant surfaces, and the design features are sharply struck with just a touch of typical softness at the centers. A small reeding mark occurs to the left of the eagle's head. Large quantities of 1901-O dollars were released in the 1960s, yet PCGS has certified only 3 coins finer (7/14). NGC ID# 256K, PCGS# 7274

4886 **1901-S MS64+ PCGS. CAC.** This is a scarcer issue in the Morgan dollar series and the most elusive San Francisco date since 1896. The brilliant surfaces gleam with shimmering mint luster and show well-struck design motifs. An attractive example that is certainly high-end for the grade. NGC ID# 256L, PCGS# 7276

4887 **1901-S MS65 PCGS.** A bright example with scintillating mint luster and untoned silver-white surfaces. Sharply struck with minimal surface marks, as expected for a Gem. PCGS has graded just 36 coins finer as of (7/14). NGC ID# 256L, PCGS# 7276

4888 **1902-S MS64+ PCGS. CAC.** Frosty luster cartwheels over each side of this fully brilliant near-Gem. The design motifs show above-average definition, and no roller marks are present. Exceptionally few marks appear over surfaces that boast CAC-approved eye appeal. NGC ID# 256P, PCGS# 7282

4889 **1903-O MS66+ PCGS. CAC.** A brilliant New Orleans example with stone-white surfaces and bright, flashy mint luster. Other than a few minuscule ticks and a faint luster graze, in the far right obverse field, the surfaces are nearly flawless. Population: 23 in 66+, 70 finer (7/14). NGC ID# 256S, PCGS# 7286

1904-O Morgan, MS67
Tied for Finest at PCGS

4890 **1904-O MS67 PCGS.** The Treasury releases of the early 1960s drastically increased the Mint State population of the 1904-O Morgan. This representative stands out, however, as one of just 37 MS67 examples certified at PCGS, while none are finer (7/14). The surfaces are frosty and radiant, with virtually no signs of contact. The hair above Liberty's ear is slightly soft, but this remains an exceedingly attractive O-mint Morgan dollar. NGC ID# 256V, PCGS# 7292

4891 **1921-S MS65+ PCGS. CAC.** CAC has awarded a green label sticker to this final-year S-mint dollar for its originality and appeal. The devices are sharply detailed, and the smooth surfaces are free of any noteworthy blemishes. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1878 7TF Morgan, PR62
Reverse of 1878

4892 **1878 7TF Reverse of 1878 PR62 NGC.** Bowers writes of the seven tailfeathers, Reverse of 1878 proof: "This variety will challenge you, not only to find one in the first place, but beyond that, to get one with good eye appeal." This piece is highly pleasing for the grade, with full cameo contrast on the reverse and full design definition overall. Tinges of orange-gold toning highlight the peripheries, and the grade-limiting hairlines are not readily apparent to the naked eye. NGC ID# 2573, PCGS# 7312

1880 Morgan Dollar, PR64
Largest Proof Mintage of the Series

4893 **1880 PR64 PCGS.** Proof dollars were in vogue in 1880, when Trade dollar proofs were heavily promoted by the Mint and a large mintage of proof Morgan dollars was accomplished, too. The production of 1,355 pieces is the largest proof mintage of the entire Morgan dollar series. This example displays khaki-gold toning on the obverse and a slight, silver-gray patina on the reverse with gold accents. The mirrored fields reveal iridescent colors when viewed at the proper angle, with sharp motifs and no significant hairlines or other distractions. NGC ID# 27Z4, PCGS# 7315

1891 Morgan Dollar, PR64
Wondrous Patina Throughout

4894 **1891 PR64 PCGS. CAC.** Wonderfully toned in shades of jade-green, ice-blue, rose, violet, and orange, this Choice proof Morgan dollar earns its CAC-approval sticker. The Mint struck 650 proofs in 1891, and examples often feature moderate softness at the centers. Such is the case with this specimen, but it does nothing to affect its remarkable appeal. Population: 47 in 64, 39 finer (7/14). NGC ID# 27ZL, PCGS# 7326

4895 **1897 PR62 NGC.** This is a flashy and deeply mirrored example from a mintage of 731 specimens. As one would expect of a proof, the devices are razor-sharp. The surfaces appear carefully preserved with only a few wispy marks. NGC ID# 27ZV, PCGS# 7332

4896 **1901 PR62 NGC.** A thin veil of dusky gray patina covers clean surfaces that display pleasing reflectivity in the fields. The design elements show predictably sharp detail, and a spot of russet toning occurs at the tip of Liberty's cap. One of 813 proofs struck in 1901. NGC ID# 27ZZ, PCGS# 7336

PEACE DOLLARS

4897 **1921 MS65 PCGS.** The radiantly lustrous, golden surfaces of this Gem yield occasional wisps of lavender color. The typical strike-weakness is seen on Liberty's ear and the corresponding eagle feathers on the reverse, though the overall appeal remains pleasing. NGC ID# 2U4E, PCGS# 7356

4898 **1921 MS65 NGC. VAM-1F.** The die pair used to strike matte proofs, although the present Gem is a business strike. The pearl-gray surfaces are smooth and well defined except for the usual blending on the hair near the ear. NGC ID# 2U4E, PCGS# 7356

4899 **1921 MS65 PCGS. CAC.** The issue is popular as a first-year type and as the only collectible Peace dollar issue struck in High Relief. This CAC-approved Gem offers lustrous, original surfaces with delicate toning over each side. The strike is typically light at the centers, the reason for which the design was altered in succeeding years. NGC ID# 2U4E, PCGS# 7356

4900 **1922 MS66+ PCGS. CAC.** Vibrant, frost-white luster engulfs both sides of this razor-sharp Premium Gem. The surface preservation is nearly flawless, and the eye appeal is proportionately high. PCGS has certified just 24 numerically finer coins (7/14). NGC ID# 257C, PCGS# 7357

4901 **1922-D MS66 NGC.** Both sides of this satiny piece display brilliant luster and sharp design features. Few examples can qualify for the Premium Gem grade level, and seldom are nicer quality pieces located. NGC has only certified 16 pieces finer (7/14).
Ex: FUN Signature (Heritage, 7/2007), lot 1836. NGC ID# 257D, PCGS# 7358

4902 **1922-D MS66 PCGS.** Original blushes of golden-russet and apple-green fill the peripheries of this sharply struck Premium Gem. Wispy portrait grazes deny numismatic perfection. The dies are slightly rotated clockwise. PCGS has graded three numerically finer examples (7/14). NGC ID# 257D, PCGS# 7358

4903 **1922-S MS65 PCGS.** Original pumpkin-gold and stone-gray toning colors this lustrous Gem. The surfaces are sharply struck for an S-mint issue, and the date is unexpectedly scarce in Gem condition and above given the 17.4 million-coin mintage. PCGS has seen only 7 coins in higher numeric grades.
Ex: Central States Signature (Heritage, 5/2007), lot 5096. NGC ID# 257E, PCGS# 7359

4904 **1922-S MS65 PCGS Secure.** Medium blue-gray is the dominant color of this luminous Gem, though gold and reddish-brown elements are also visible at the margins. Attractively detailed and pleasingly preserved with just seven numerically finer examples at PCGS (7/14). NGC ID# 257E, PCGS# 7359

4905 **1923 MS66+ PCGS. CAC.** Radiant luster cascades over brilliant and sharply defined surfaces. This appealing Premium Gem Peace dollar is an ideal type representative, and PCGS has seen only 52 submissions finer from a mintage of over 30 million coins (7/14). NGC ID# 257F, PCGS# 7360

4906 **1923 MS67 NGC.** One of the best-produced and most popular issues in the Peace dollar series is this one from the Philadelphia Mint. Speckled russet patina occurs near the borders, occasionally wandering into the fields and central areas. A fully struck coin with lustrous, gorgeously preserved surfaces. Census: 95 in 67, 0 finer (7/14). NGC ID# 257F, PCGS# 7360

1923-D Peace Dollar, Lustrous MS66
Only One Numerically Finer Coin Certified

4907 **1923-D MS66 PCGS.** While not as scarce as some later branch mint issues, the 1923-D Peace dollar is a more challenging date in Gem and finer condition. This frost-white, blazing Premium Gem example delivers remarkable visual appeal with sharply impressed design elements and only a few minute, grade-determining grazes in the luster. Some mint-made planchet reflectivity is noted in the obverse field around IN GOD WE. PCGS has seen only a single numerically finer representative (7/14). NGC ID# 257G, PCGS# 7361

1923-S Peace Dollar, MS65
Lightly and Originally Toned

4908 **1923-S MS65 PCGS.** Nearly every San Francisco Mint Peace dollar is an important condition rarity in MS65 grade, and this date is certainly no exception. Both sides have pale yellow color with subtle hints of russet near the borders. Liberty's cheek and neck are splendidly smooth, and the strike is good with only unimportant incompleteness in the centers and on the motto.
Ex: Central States Signature (Heritage, 5/2007), lot 5102; Summer FUN Signature (Heritage, 7/2007), lot 1853. NGC ID# 257H, PCGS# 7362

1923-S Peace Dollar, MS65
Vibrant Mint Bloom

4909 **1923-S MS65 PCGS.** The San Francisco issue is the scarcest of the three 1923 Peace dollar issues in Gem and finer grades. Strike quality is also the poorest on this issue, a common characteristic of S-mint coins from the 1920s. This example shows a touch of the usual softness on the central devices, but the blazing, gold-tinted luster and the lack of major abrasions delivers exceptional visual appeal. PCGS has certified only three numerically finer representatives (7/14). NGC ID# 257H, PCGS# 7362

1924 Peace Dollar, MS67
Just a Single Coin Finer at NGC

4910 **1924 MS67 NGC.** Each side of this frosty Superb Gem is entirely brilliant and almost completely free of even the slightest imperfection. Moderately granular surfaces and a die crack the extends from the base of Liberty's neck to TR in TRVST indicate that this coin was struck from a later die state. NGC has certified only one submission numerically finer (7/14). NGC ID# 257J, PCGS# 7363

4911 **1924-S MS64 PCGS. VAM-4.** Liberty's profile is lightly die doubled. Booming luster and light chestnut toning attest to the originality of this nicely struck near-Gem. The reverse is well preserved, and the obverse is clean save for minor grazes on the cheek. Housed in a green label holder.
Ex: Tide Collection (Heritage, 10/2006), lot 1698, which realized $1,265. NGC ID# 257K, PCGS# 7364

4912 **1924-S MS64 PCGS. CAC.** The 1924-S Peace dollar is easily obtainable in Choice and lower grades, but becomes distinctly elusive any finer. This near-Gem example boasts vibrant, frosty luster and sharp devices. A few grade-consistent surface imperfections are noted, and a ribbon of pale golden toning bisects each side. NGC ID# 257K, PCGS# 7364

4913 **1925 MS66+ PCGS. CAC.** An exceptional example of this issue, with essentially untoned, highly lustrous surfaces that are free of any mentionable marks. Slight die rust is noted over much of the obverse. NGC ID# 257L, PCGS# 7365

4914 **1925-S MS64+ PCGS Secure.** This high-end Choice example exhibits well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are blanketed in shades of greenish-gold and lavender toning, with more color on the obverse. NGC ID# 257M, PCGS# 7366

4915 **1925-S MS64+ PCGS. CAC.** This frosty Choice representative is just a half grade point short of earning a rare Gem designation. The largely brilliant surfaces offer sharp detail over the devices and minimal marks, primarily confined to secondary areas. PCGS has seen only 39 coins finer (7/14). NGC ID# 257M, PCGS# 7366

4916 **1926 MS66 PCGS.** The 1926 Peace dollar is scarce in MS66 condition and PCGS has certified no coins in higher numeric grades (7/14). This sharply detailed Premium Gem exhibits vibrant mint luster and well-preserved surfaces with hints of greenish-gold toning. NGC ID# 257N, PCGS# 7367

4917 **1926 MS66 NGC.** A evenly struck example with bold, if not full definition throughout; and visually appealing satin luster that imparts a slightly coruscant sheen. Essentially untoned and nearly mark-free; an impressive Premium Gem Peace dollar. Census: 49 in 66, 1 finer (7/14). NGC ID# 257N, PCGS# 7367

4918 **1926-D MS66 PCGS.** Strikingly frosted luster under a layer of silver-blue patina with visible gold, lavender, and watermelon-rose elements at the margins. A long die crack trails from Liberty's hair bun. PCGS has graded eight numerically finer examples (7/14). NGC ID# 257P, PCGS# 7368

4919 **1927 MS65 NGC.** A warm satiny sheen encompasses the largely untoned surfaces of this attractive Gem example. There are a few russet toning specks on the obverse, and each side of the coin displays just two or three trivial nicks. A elusive issue in Gem condition. NGC ID# 257S, PCGS# 7370

4920 **1927 MS65 PCGS.** Soft but thorough cartwheel luster radiates from each side of this splendid Gem Peace dollar. The satiny surfaces are silver-gray tinged with gold on the obverse; the reverse adds pale saffron and pinkish hues. Well-struck surfaces are free of all but a few tiny marks, mostly on the reverse. PCGS has graded 10 numerically finer examples (7/14). NGC ID# 257S, PCGS# 7370

4921 **1927 MS65 PCGS.** A pleasing Gem example of this low-mintage key, with well-detailed design elements and full, but slightly subdued, mint luster on both sides. The surfaces are well-preserved, with traces of apple-green and lavender toning. PCGS has graded 10 numerically finer examples (7/14). NGC ID# 257S, PCGS# 7370

4922 **1927 MS65 PCGS.** Light gold toning adorns this lustrous and well struck Gem. Exceptionally free from abrasions, and a desirable acquisition. A blush of gray toning is noted above the O in DOLLAR. Housed in a first generation holder. NGC ID# 257S, PCGS# 7370

1927-S Dollar, Well-Struck MS64+

4923 **1927-S MS64+ PCGS. CAC.** The 1927-S dollar can be located through near-Gem without too much difficulty, after which the population declines significantly. The lustrous surfaces of this MS64+ display wisps of reddish-gold and light blue patina clinging to the obverse margin, while the same color palette becomes more extensive on the reverse where it is joined by occasional freckles of gray. The design elements are well-struck, better so than usually seen on this poorly struck issue. A few minute marks are consistent with the grade. NGC ID# 257U, PCGS# 7372

4924 **1928 MS64 PCGS.** This issue is often seen with somewhat muted, light golden patina, though this piece displays deeper orange-gold hues over the obverse and intermittently around the reverse periphery. The strike is sharp and the luster is stronger than is usually seen. With a mintage of only 360,649 pieces, the 1928 is a popular key date in the Peace dollar series. NGC ID# 257V, PCGS# 7373

1928 Peace Dollar, MS65
Rarely Offered in Finer Condition

4925 **1928 MS65 PCGS.** With far and away the lowest mintage in the Peace dollar series (360,649 coins), this issue is highly sought-after. Although examples are generally available across most grade levels, demand consistently outpaces supply. This Gem representative offers mostly brilliant surfaces with vibrant luster and strongly detailed devices. PCGS has certified only 12 coins numerically finer (7/14). NGC ID# 257V, PCGS# 7373

4926 **1928-S MS64 PCGS.** This San Francisco issue's Philadelphia counterpart is a well-known key date in lower grades because of its low mintage. However, in higher grades this issue is significantly scarcer. At the Gem level, this is one of the rarest dates in the series. The surfaces are frosty and brilliant with good detail, and marks are lightly scattered. NGC ID# 257W, PCGS# 7374

4927 **1928-S MS64+ PCGS.** An attractive coin with a thick coating of white patina across the frosty, highly lustrous surfaces. Well-preserved and lightly marked, a high-end example per the PCGS + grade. NGC ID# 257W, PCGS# 7374

4928 **1928-S MS64+ PCGS.** The olive-green centers are framed by peripheral lavender, powder-blue, and rose-red. Lustrous and nicely struck with exceptional preservation for the designated grade. Rare any finer. NGC ID# 257W, PCGS# 7374

4929 **1928-S MS64+ PCGS. CAC.** Light chestnut toning overlies smooth pearl-gray surfaces. Nicely struck, and as close to a PCGS Gem as can be obtained for under five figures. The TR in TRVST is die doubled, as seen on many high grade examples of this conditionally scarce issue. NGC ID# 257W, PCGS# 7374

4930 **1934 MS66 PCGS.** Excellent luster characterizes this softly frosted Gem. Light toning and peripheral golden-brown coloration occur over each side, and only the most trivial abrasions appear throughout. This is one of the finest survivors of this scarce, low-mintage issue. PCGS has certified three numerically finer examples (7/14).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2848; Long Beach Signature (Heritage, 9/2006), lot 5690. NGC ID# 257X, PCGS# 7375

4931 **1934 MS66 PCGS.** The 1934 Peace dollar is a better date in the series, from a mintage of less than 1 million pieces. This impressive Premium Gem is well-detailed and lustrous, with attractive shades of pale gold toning. PCGS has graded only three numerically finer coins (8/14). NGC ID# 257X, PCGS# 7375

4932 **1934-D MS65 PCGS.** Medium D. A fully white Gem that boasts dazzling luster and few marks. The strike is bold aside from the lower obverse margin. The lower mintage 1934-D is the final regular issue silver dollar from the Denver Mint. NGC ID# 257Y, PCGS# 7376

4933 **1934-D MS65 NGC.** Medium D. An exquisite Gem with light and original chestnut-gold and ice-blue patina. A few russet freckles are noted along the right reverse margin. Lustrous and well preserved. NGC ID# 257Y, PCGS# 7376

4934 **1934-D MS65 PCGS.** Medium D. Butter-gold toning adorns this lustrous and impressively unabraded Gem. The strike is bold and the eye appeal is exemplary. A relatively low mintage issue. NGC ID# 257Y, PCGS# 7376

4935 **1934-D MS65 PCGS.** Medium D. Richly patinated tan-gold, powder-blue, forest-green, and lavender. Lustrous and boldly struck with exemplary surfaces save for a small strike-through beneath the BU in PLURIBUS. NGC ID# 257Y, PCGS# 7376

4936 **1935 MS66 PCGS.** Satiny luster, typically seen on this issue, characterizes both sides on this Premium Gem representative. Slivers of gold and crimson patination hug portions of the borders, and the design features are well brought up. Close inspection reveals just a few minor ticks on the eagle, none of which are worthy of individual comment. This piece is among the finest numerically certified at PCGS (7/14).
Ex: Long Beach Signature (Heritage, 2/2007), lot 5911. NGC ID# 2582, PCGS# 7378

4937 **1935 MS66 NGC. CAC.** A popular issue among Peace dollar enthusiasts, the 1935 boasts a fairly low mintage of little more than 1.5 million pieces and ranks as the final Philadelphia issue in this widely collected series. This Premium Gem example is by far one of the most attractive Peace dollars this cataloger has ever seen; booming, frost-white mint luster dazzles the eye as it cartwheels around nearly pristine surfaces. This is a well-struck piece with a considerable degree of "pop," worthy of only the finest Peace dollar set or advanced type collection. Census: 71 in 66, 5 finer (7/14). NGC ID# 2582, PCGS# 7378

4938 **1935-S MS65 NGC.** Four rays below ONE. Freckles of russet patina visit the borders of this lustrous and nicely struck final-year Gem. Scattered unobtrusive abrasions fail to deny the eye appeal.
Ex: New York Signature (Heritage, 7/2002), lot 7243. NGC ID# 2583, PCGS# 7379

4939 **1935-S MS66 NGC.** Four rays below ONE, a design subtype found only on the present issue. A wisp of golden toning graces this thoroughly lustrous, lower mintage, and well preserved final-year Peace dollar. The strike is precise, and the eye appeal is pleasing. Census: 65 in 66 (1 in 66+, 2 in 66 ★), 3 finer (7/14). NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLAR

1974 Eisenhower Dollar, MS66+
Registry Set Representative

4940 **1974 MS66+ PCGS. CAC.** When held beneath a lamp at the correct angle, the surfaces reveal delicate powder-blue and apricot-orange patina. This fully struck and eye-appealing Premium Gem offers no singularly distracting marks. PCGS has awarded a Plus designation to only three MS66 examples, and no coins are certified finer (8/14). NGC ID# 258D, PCGS# 7415

COMMEMORATIVE SILVER

4941 **1893 Isabella Quarter MS65 PCGS.** Proponents of originality will certainly appreciate this richly toned example. The obverse color alternates between crimson-apricot and antique-copper shades, while the reverse is predominantly sea-green in appearance. The underlying luster is full with a thickly frosted texture. Every bit the Gem, this sharp example is free of mentionable handling marks.
Ex: FUN Signature (Heritage, 1/2002), lot 8603. NGC ID# 28HR, PCGS# 9220

4942 **1900 Lafayette Dollar MS63 PCGS. DuVall 2-C.** Medium almond-gold toning adorns this lustrous and boldly impressed silver dollar. Devoid of contact save for a hairline northeast of the tail. Washington's cheek is uncommonly smooth. NGC ID# 28N8, PCGS# 9222

4943 **1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** The 1900 Lafayette memorial dollar is the first commemorative silver dollar issue, with a distribution figure of 36,026 pieces. Many examples were sold to the general public and show evidence of handling or circulation. The present coin is a delightful Choice specimen, with sharply defined design elements, brilliant surfaces, and strong mint luster.
Ex: Houston Signature (Heritage, 12/2010), lot 4069. NGC ID# 28N8, PCGS# 9222

4944 **1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** The leaf points between 1 and 9 in the date. This near-Gem representative features dusky silver-gray patination overall with sea-green, ice-blue, and peach-orange accents. A lovely example from the first commemorative silver dollar issue that would make a fine addition to any collection. NGC ID# 28N8, PCGS# 9222

4945 **1921 Alabama MS66 PCGS.** This is a highly attractive example of the Alabama Centennial half dollar, with shimmering light golden luster and nearly unabraded surfaces. A bold strike further heightens the visual appeal. PCGS has certified only three numerically finer representatives (7/14). NGC ID# 28HT, PCGS# 9224

4946 **1921 Alabama 2x2 MS65 PCGS. CAC.** Shimmering, virtually undisturbed mint bloom illuminates untoned surfaces on this Gem Alabama Centennial half dollar. The strike is crisp throughout, and the visual appeal is simply remarkable. NGC ID# 28HS, PCGS# 9225

4947 **1921 Alabama 2x2 MS66 PCGS.** Well struck, satiny, and exquisitely preserved. This example displays seemingly flawless definition and essentially pristine surfaces that are lightly toned, with occasional mottled accents of autumn-gold noted on each side. NGC ID# 28HS, PCGS# 9225

1921 2x2 Alabama Centennial Half, MS66
Rarely Encountered Finer

4948 **1921 Alabama 2x2 MS66 PCGS. CAC.** Partway through the production of the 1921 Alabama Centennial half dollars, the number 22 was added to the right obverse field, symbolizing Alabama's rank as the 22nd state admitted into the Union. A small depiction of the St. Andrew's cross, an emblem seen on the state flag, was also added, but was positioned between the numbers 22, resulting in the familiar "2x2" variety. This example displays shimmering, satiny mint luster with just a blush of light golden toning. The strike is well-executed, and only a few minute surface grazes preclude an even finer grade. PCGS has only seen seven numerically finer submissions (7/14). NGC ID# 28HS, PCGS# 9225

4949 **1936 Albany MS67 PCGS. CAC.** An outstanding example of the Albany commemorative half dollar issue, struck to celebrate the 250th anniversary of the charter for New York State's capital city. Well-struck and intensely lustrous, with delightful hues of peach and silvery-gray toning across both sides. Just two pieces are graded even finer by PCGS (7/14). NGC ID# 28HU, PCGS# 9227

4950 **1936 Albany MS67+ PCGS. CAC.** An exceptional example of this popular commemorative type, showing a beaver chewing on a maple branch on the obverse. The bright, radiant mint luster and appealing reddish-brown peripheral toning enhance the outstanding eye appeal of this virtually pristine specimen. Population: 7 in 67+, 2 finer (7/14). NGC ID# 28HU, PCGS# 9227

4951 **1935-D Arkansas MS67 PCGS.** The issue celebrates the centennial of Arkansas statehood in 1836 but was distributed a year early. In 1935, the Denver facility struck 5,506 coins, of which PCGS has certified only a single coin finer numerically (7/14). This representative exhibits immensely appealing and satiny surfaces devoid of any hint of toning. NGC ID# 28HX, PCGS# 9234

4952 **1936-D Arkansas MS67 PCGS.** Attractive ruby-red, golden-brown, and aquamarine toning fills the peripheries of this coruscating and crisply struck Superb Gem. Pristine aside from a solitary graze on the neck of Liberty. Population: 32 in 67 (3 in 67+), 1 finer (7/14). NGC ID# 28J2, PCGS# 9238

4953 **1936-D Arkansas MS67 PCGS. CAC.** A pleasingly toned Superb Gem example of this popular commemorative type, from a low distribution of just 9,660 pieces. The strike definition is unusually sharp on both sides, and the satiny surfaces are smooth and blemish-free. Population: 32 in 67 (2 in 67+), 1 finer (7/14). NGC ID# 28J2, PCGS# 9238

4954 **1938-S Arkansas MS66 PCGS.** This Premium Gem offers mostly silver-gray color with blue accents and peripheral golden-tan elements. Two small reed marks at the upper-left reverse contribute to the grade. Population: 82 in 66 (5 in 66+), 2 finer (7/14). NGC ID# 28J9, PCGS# 9247

4955 **1938-S Arkansas MS66 PCGS. CAC.** Dusky golden-gray toning settles over satiny luster on each side, while deeper olive hues are seen around the peripheries. The motifs are well-defined, and only a few grade-consistent grazes are present, primarily on the portrait side. Population: 87 in 66 (5 in 66+), 2 finer (7/14). NGC ID# 28J9, PCGS# 9247

1939 Arkansas Centennial Half, MS66
Only 2,104 Pieces Struck

4956 **1939 Arkansas MS66 PCGS. CAC.** Although the *Guide Book* lists the eagle side of the Arkansas Centennial half dollar to be the obverse, due to the placement of the coin's date thereon, original correspondence regarding the designs from the National Archives indicates that the portrait side was actually intended to be the obverse. This representative of the commemorative displays soft golden toning over satiny luster on each side, with the reverse periphery exhibiting a pattern reminiscent of the original display box backing. The strike is pleasing and no signs of contact are apparent to the unaided eye. Population: 46 in 66 (5 in 66+), 2 finer (7/14). NGC ID# 28JA, PCGS# 9249

4957 **1939-S Arkansas MS66 PCGS.** The surfaces feature light silver-gray overall with blue accents and lavender touches toward the peripheral reverse. This Premium Gem is one of just 2,105 examples struck, and PCGS has certified only 10 coins in numerically higher grades (7/14). NGC ID# 28JC, PCGS# 9251

1935-D Daniel Boone Half Dollar, MS67
Among the Finest Certified

4958 **1935-D Boone MS67 PCGS.** Varieties of the 1935-D Daniel Boone Bicentennial half dollars were coined both with and without an added "1934" date in the right reverse field. This piece represents the slightly more available "Plain" variety, of which only 5,000 pieces were struck (plus five coins for assay purposes). This lustrous example displays mottled hues of amber and olive gold over each side, with deeper green and orange tinges seen periodically around the rims. The strike is well-executed, and the surfaces are free of any noticeable flaws. Population: 13 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 28JG, PCGS# 9259

4959 **1935-S Boone MS67 PCGS. CAC.** Delicate lilac highlights appear over the brilliant silver surfaces of this Superb Gem. A sharply struck and attractive example with softly frosted mint luster. PCGS and NGC have each certified a single finer example of this issue. Population: 28 in 67 (1 in 67+), 1 finer (7/14). NGC ID# 28JH, PCGS# 9260

4960 **1935/34 Boone MS67 PCGS. CAC.** The 1935 Philadelphia issue with the Small 1934 above PIONEER is more available than its branch mint counterparts, but it remains popular nevertheless. This Superb Gem is lightly toned overall with splashes of jade-green, lemon-yellow, and magenta toward the margins on each side. Population: 57 in 67 (7 in 67+), 2 finer (7/14). NGC ID# 28JJ, PCGS# 9262

4961 **1935/34 Boone MS67+ PCGS. CAC.** Small tinges of navy-blue, red, and lemon-gold toning appear periodically around the rims on this high-end Superb Gem, while the central regions display dusky golden-gray and ice-blue hues. A well-executed strike further complements the essentially clean surfaces. Population: 57 in 67 (7 in 67+), 2 finer (7/14). NGC ID# 28JJ, PCGS# 9262

1935/34-S Boone Half, MS67
Softly Frosted and Lightly Toned

4962 **1935/34-S Boone MS67 PCGS.** This low-mintage issue consisted of 2,004 pieces and included the addition of the commemorative date 1934 above the words PIONEER YEAR. The issue is sometimes referred to as "1935 small 1934." Golden-gray patina is imbued with wisps of green and lilac. Well-struck with lustrous, impeccably preserved surfaces. Population: 18 in 67 (3 in 67+), 2 finer (7/14). *Ex: Central States Rosemont Signature (Heritage, 4/2008), lot 1635.* NGC ID# 28JL, PCGS# 9264

4963 **1938-D Boone MS67 PCGS. CAC.** Mottled olive and light golden hues encompass each side, but are somewhat more prominent on the obverse. The strike is bold throughout, and a small tick on the chin seems to be the only grade-limiting factor. Population: 67 in 67 (6 in 67+), 4 finer (7/14). NGC ID# 28JV, PCGS# 9275

4964 **1925-S California MS66+ PCGS. CAC.** Struck to mark the 75th anniversary of California's statehood, this high-end Premium Gem California Diamond Jubilee half dollar exhibits satiny luster and well-defined motifs. Soft rainbow peripheral toning surrounds light golden hues in the centers. NGC ID# 28JY, PCGS# 9281

1925-S California Half Dollar, Toned MS67
A Collector Favorite

4965 **1925-S California MS67 PCGS.** The California Diamond Jubilee half dollars were struck to mark the 75th anniversary of California's statehood, and are a favorite with collectors today. Most certified examples are in the MS62 to MS65 range. Very pretty mottled multicolored toning graces the lustrous surfaces of both sides of this Superb Gem. Well-struck and minimally marked. Population: 99 in 67 (3 in 67+), 6 finer (7/14). NGC ID# 28JY, PCGS# 9281

1936-S Columbia Half Dollar, MS68
No Coins Finer at Either Service

4966 **1936-S Columbia MS68 NGC.** Though the Commission of Fine Arts, perhaps reeling from the deluge of designs in 1936, panned the design for the Columbia halves, few numismatists were critical of its simple, yet effective design. The obverse shows pale greenish-gold at the rims and in tiny specks at the center, while the fields are largely brilliant. Slight amounts of violet and teal patina decorate the reverse periphery. NGC recognizes just seven other coins in MS68, while PCGS has seen six, with none any finer at either service (7/14). NGC ID# 28K7, PCGS# 9293

4967 **1892 Columbian MS66+ PCGS. CAC.** The centers remain largely brilliant and blend to multicolor peripheral toning on each side. The result is spectacular, CAC-recognized visual appeal. This is a sharply detailed Premium Gem, and PCGS has certified only 26 coins finer (7/14). NGC ID# 26H5, PCGS# 9296

4968 **1935 Connecticut MS67 NGC.** Struck to commemorate the 300th anniversary of the found of the colony of Connecticut, this Superb Gem Connecticut Tercentenary half dollar boasts strong design definition and smooth, satiny luster. Dusky olive-gold toning encompasses much of each side, with faint iridescent hues seen upon close examination. NGC ID# 28K8, PCGS# 9299

4969 **1936 Delaware MS67 PCGS.** The obverse shows the Old Swedes Church in Wilmington, Delaware, while the reverse features the *Kalmar Nyckel*, one of the Swedish ships that brought settlers to the New Sweden colony. Golden-tan toning occurs peripherally around the obverse and more broadly across the reverse with rose and jade-green accents. Each side is pristine and sharply struck. PCGS has seen just two coins numerically finer (7/14). NGC ID# 28K9, PCGS# 9301

4970 **1936 Elgin MS67+ PCGS. CAC.** This issue was created to recognize the 100th anniversary of Elgin, Illinois. The proceeds were slated to finance a Pioneer Memorial statue; not dedicated until 2001. This is a boldly struck piece, a trifle soft on the reverse faces, with warm satin luster and attractive obverse peripheral toning. Population: 13 in 67+, 5 finer (7/14). NGC ID# 28KA, PCGS# 9303

4971 **1936 Gettysburg MS66 PCGS. CAC.** Crimson, violet, and magenta color the low-relief areas of this Premium Gem, while the higher-relief design elements are only lightly toned. The result is spectacular, CAC-recognized visual appeal. Well-struck and pleasing overall. NGC ID# 28KB, PCGS# 9305

4972 **1936 Gettysburg MS67 PCGS.** The double portraits on the obverse are fully struck; as are the fasces, shields, and legends on the reverse. Speckled russet peripheral toning frames steel-gray fields and centers on each side. The satiny surfaces are blemish-free. Population: 97 in 67 (5 in 67+), 2 finer (7/14). NGC ID# 28KB, PCGS# 9305

1922 No Star Grant Memorial Half, MS67
None Numerically Finer at PCGS

4973 **1922 Grant No Star MS67 PCGS.** The small incuse star that was present in the right obverse field when the Grant Memorial half dollar debuted in early 1922, was later removed, likely to create a new variety to offer to collectors, with the result that the majority of the Grant halves struck were of this later, No Star variant. The present example is well-struck and equally well-preserved, with satiny, gold-tinted luster. Splashes of olive-brown toning are seen periodically around the margins, primarily on the obverse, confirming the originality of the surfaces. Population: 45 in 67 (2 in 67+), 0 finer (7/14). NGC ID# 28KD, PCGS# 9306

1922 Grant No Star Half Dollar, Toned MS67

4974 **1922 Grant No Star MS67 PCGS.** Splashes of peach-gold, bluish-gray, and lavender visit the lustrous surfaces of this Superb Gem Grant commemorative. The design elements are well-struck and both sides have been well preserved. The No Star variety, having a relatively large mintage exceeding 67,000 pieces, is more common than its With Star counterpart. Population: 45 in 67 (2 in 67+), 0 finer (7/14). NGC ID# 28KD, PCGS# 9306

1922 No Star Grant Memorial Half, MS67
Sharp and Attractive

4975 **1922 Grant No Star MS67 PCGS.** Ex: Young Collection. Of the two varieties of the Grant Memorial half dollar, the No Star variant is by far the most plentiful, but even it becomes elusive at the Superb Gem grade level. Struck during the 100th anniversary of Ulysses S. Grant's birth year, this high-end example displays deep toning of orange-gold and lavender-gray hues, with lustrous underlying surfaces that are nearly pristine. Population: 45 in 67 (2 in 67+), 0 finer (7/14). NGC ID# 28KD, PCGS# 9306

4976 **1928 Hawaiian MS62 NGC.** A deep layer of speckled brownish-green patina covers the obverse. The reverse is largely untoned and creamy-gray, with a bit of mottled coloration near the borders. A well struck and distraction-free representative of this popular, key commemorative issue. NGC ID# 28KE, PCGS# 9309

4977 **1928 Hawaiian MS63 PCGS.** Blended green-gold, peach, and sky-blue hues encompass each side of this satiny piece, while the design elements are well-struck, and surface abrasions are at a minimum. Production of Hawaiian half dollars was limited to just 10,000 pieces (plus eight coins for assay purposes), and the issue is highly popular in all grades. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, Lustrous MS65

4978 **1928 Hawaiian MS65 PCGS.** Struck to commemorate the 150th anniversary of Captain James Cook's landing in Hawaii. MS65 examples can be located with minimal difficulty, but finer specimens are much more challenging. The lustrous silver-gray surfaces display occasional blushes of russet and are well-struck. NGC ID# 28KE, PCGS# 9309

4979 **1935 Hudson MS65 NGC. CAC.** Mottled russet and silver-gold patina alternates on each side of this Gem Hudson half dollar. The exposed sails of the ship on the reverse show a few tiny nicks that likely limit an even finer grade. NGC ID# 28KF, PCGS# 9312

4980 **1935 Hudson MS65 PCGS. CAC.** Luminous with light-gray color overall and a suggestion of peripheral tan. This is a pleasing, satiny Gem example from a lower-mintage, local-interest issue. NGC ID# 28KF, PCGS# 9312

1935 Hudson, New York Half Dollar, MS66+
Rarely Seen Finer

4981 **1935 Hudson MS66+ PCGS. CAC.** This commemorative was issued to honor the 150th anniversary of the founding of Hudson, New York, which was named after the famous English explorer whose flag ship, the *Half Moon*, is pictured on the obverse. This piece displays soft, satiny luster beneath a light golden veil, while the peripheries exhibit deep amber and gunmetal-blue toning from the original cardboard distribution holder. PCGS has certified only 11 numerically finer representatives (7/14). NGC ID# 28KF, PCGS# 9312

4982 **1924 Huguenot MS67 PCGS.** An arc of golden-tan and lime-green iridescence illuminates the upper left reverse. The remainder of the coin is dusky pearl-gray. Well struck, coruscating, and essentially immaculate.
Ex: Baltimore Signature (Heritage, 7/2003), lot 9341, which realized $2,357.50. NGC ID# 28KG, PCGS# 9314

4983 **1924 Huguenot MS67 PCGS.** A lovely Superb Gem representative, this coin displays pleasing, satiny luster, while yellow-gold, orange, auburn, and lime-green toning is present on both sides, primarily at the outer edges. The devices are sharply-struck with very few abrasions. Population: 60 in 67 (8 in 67+), 2 finer (7/14). NGC ID# 28KG, PCGS# 9314

4984 **1918 Lincoln MS67 NGC.** A greatly lustrous Superb Gem example of this long-popular earlier commemorative, this piece displays faint peach and light golden hues over most of each side, while the strike is bold and the surfaces are frosty. Census: 78 in 67 (1 in 67+, 7 in 67 ★, 2 in 67+★), 5 finer (7/14). PCGS# 9320

4985 **1918 Lincoln MS67 PCGS.** The issue celebrates the 100th anniversary of Illinois' entry into the Union. Delicate pastel toning colors this well-struck Superb Gem in shades of powder-blue, lavender, and orange with peripheral green and yellow elements on the obverse. PCGS has seen only 2 numerically finer examples (7/14). PCGS# 9320

4986 **1918 Lincoln MS67 PCGS. CAC.** Authorized to celebrate the centennial of Illinois' admission into the United States, this was the first in a long line of commemorative silver half dollars that were produced by the dozens, well into the 1950s. This Superb example is sharply struck and immaculately preserved, with a full coat of mottled patina over each side that ensures the coin's originality. Only two examples are rated finer at PCGS (7/14). PCGS# 9320

4987 **1936 Lynchburg MS67 PCGS.** The tab-toned obverse displays iridescent sea-green and pink-red shades. The reverse has similar but more comprehensive patina. A lustrous and nearly immaculate Superb Gem of this lower-mintage silver commemorative type. Population: 95 in 67 (9 in 67+), 0 finer (7/14). NGC ID# 28KM, PCGS# 9324

4988 **1936 Lynchburg MS67 PCGS. CAC.** Silver-blue interiors with dotted reddish-orange and claret toning around much of the margins. Impressively preserved with only a few tiny, scattered faults. Population: 96 in 67 (9 in 67+), 0 finer (7/14). NGC ID# 28KM, PCGS# 9324

4989 **1936 Lynchburg MS67+ NGC. CAC.** This high-end Superb Gem commemorative offers vibrant mint luster and sharply detailed design elements, under shades of greenish-gold, silver-gray, and amber toning. NGC has graded six numerically finer examples (7/14). NGC ID# 28KM, PCGS# 9324

4990 **1921 Missouri MS65 PCGS.** A well-struck example of this early commemorative type, with better-than-average sharpness on the reverse figures and bold articulation of the reverse stars and legends. A lustrous and originally toned representative with well-preserved, unmarked surfaces. NGC ID# 28KS, PCGS# 9330

4991 **1921 Missouri 2x4 MS65 PCGS.** This is a satiny and lightly toned Gem that commemorates the 100th anniversary of Missouri's entry into the Union. The devices are sharply impressed, notably at the centers, and marks are minimal. A band of cherry-red color appears confined to the lower-obverse margin. NGC ID# 28KR, PCGS# 9331

1923-S Monroe Half Dollar, MS66
Extremely Rare in Higher Grades

4992 **1923-S Monroe MS66 NGC.** More than 274,000 examples of this commemorative were struck, but many unsold pieces were subsequently released into circulation at face value. High-grade Mint State specimens survive to a certain extent, though pieces grading finer than this representative are genuinely rare. Radiant mint luster illuminates mottled rainbow toning over much of the obverse and the around the reverse periphery. The design elements are well-defined, and the surfaces are free of any distracting abrasions. Census: 58 in 66 (3 in 66+, 1 in 66 ★, 1 in 66+★), 8 finer (7/14). NGC ID# 28KT, PCGS# 9333

4993 **1938 New Rochelle MS67 PCGS.** This pleasing design was executed by Gertrude Lathrop, of Albany, New York, who also designed the Albany New York Charter half dollar. This piece displays razor-sharp definition and attractive light patina that enhances the coin's overall appeal. PCGS has only graded five examples even finer as of (7/14). NGC ID# 28KU, PCGS# 9335

4994 **1938 New Rochelle MS67 PCGS.** This coin exhibits excellent detail for a New Rochelle half, with only trifling softness on the central iris. Subtle golden accents at the margins yield to nearly untoned centers. Housed in an old green label holder. PCGS has graded only five numerically finer pieces (7/14).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1173. NGC ID# 28KU, PCGS# 9335

4995 **1938 New Rochelle MS67 PCGS. CAC.** Curiously, the issue was authorized in 1936, struck in 1937, and carries a 1938 date. Additionally, it celebrates the 250th anniversary of the founding of New Rochelle, New York — an event of questionable national significance. This beautiful Superb Gem offers coruscating luster over virtually unmarked and brilliant surfaces. PCGS has seen just five coins in higher numeric grades (7/14). NGC ID# 28KU, PCGS# 9335

1938 New Rochelle Half Dollar, MS67+ ★
Exceptional Visual Appeal

4996 **1938 New Rochelle MS67+ ★ NGC. CAC.** The obverse is possibly tab-toned, since the rich orange-red and lime-green toning is confined to selected portions of the border. The reverse displays similar shades, but they are comprehensive throughout that side. Each side is boldly struck, with only a few minute ticks detected upon close examination. Census: 121 in 67 (1 in 67+, 29 in 67 ★, 6 in 67+★), 20 finer (7/14). NGC ID# 28KU, PCGS# 9335

4997 **1934-D Oregon MS67 PCGS.** Seemingly flawless surfaces and mildly frosted luster give this exceptional Superb Gem a soft glow on each side, with faint ice-blue and champagne hues throughout. The design elements are bold, save for the rear upright of the wagon, which is frequently soft. Population: 70 in 67 (4 in 67+), 1 finer (7/14). NGC ID# 28L2, PCGS# 9344

4998 **1939-D Oregon MS68 NGC.** The Oregon Trail commemorative half dollar series finally came to an end in 1939, a year in which the Denver mint struck only 3,000 examples. This satiny MS68 representative features immaculately preserved and fully brilliant surfaces with strongly struck design detail. Census: 28 in 68 (14 in 68 ★, 2 in 68+★), 0 finer (7/14). NGC ID# 28LA, PCGS# 9353

4999 **1939 Oregon PDS Set MS67 PCGS. CAC.** Housed in separate PCGS holders bearing consecutive certification numbers and matching grades and CAC seals. The low mintage and essentially pristine set includes: **1939,** light tan toning; **1939-D,** delicate powder-blue and gold patina; and a **1939-S,** faint honey and ice-blue toning.(Total: 3 coins) PCGS# 9355

5000 **1915-S/S Panama-Pacific, FS-502, MS65 NGC. CAC.** The mintmark is repunched north. A straw-gold and pearl-gray Gem of this better silver commemorative type. Essentially pristine except for an inconspicuous abrasion on the horizontal stripes of the shield. PCGS# 511601

1921 Pilgrim Tercentenary Half, MS67
Only One Numerically Finer at PCGS

5001 **1921 Pilgrim MS67 PCGS.** Struck to commemorate the 300th anniversary of the Pilgrims' arrival at Plymouth in 1620, the Pilgrim Tercentenary half dollar was produced in 1920 and 1921, with the latter issue being the scarcer overall. This richly lustrous representative exhibits bold design definition and nearly undisturbed surfaces. The obverse exhibits mottled lavender-gray, olive, and forest-green toning, while the reverse displays lesser amounts of the same, with an ice-blue hue dominating the central regions. Population: 34 in 67 (2 in 67+), 1 finer (7/14). NGC ID# 28LD, PCGS# 9360

5002 **1936 Rhode Island MS67 PCGS.** Splashes of olive and golden-brown toning visit the otherwise brilliant obverse of this Superb Gem, while olive and gold toning blend over the entire reverse. Well-struck and essentially pristine. Population: 38 in 67, 0 finer (7/14). NGC ID# 28LE, PCGS# 9363

5003 **1935-S San Diego MS67 PCGS. CAC.** A beautifully toned Superb Gem that features chestnut-gold, ocean-blue, and lilac-red patina. Essentially pristine, and sharply struck except for minor incompleteness on the observation tower. Encapsulated in an old green label holder. NGC ID# 28LK, PCGS# 9371

1935-S San Diego Half Dollar, Bright MS67+

5004 **1935-S San Diego MS67+ PCGS. CAC.** The California-Pacific International Exposition held in San Diego saw the issuance of commemorative pieces popularly known today as San Diego half dollars. The bright silver-white surfaces of this high-end Superb Gem display freckles of gold-orange and crimson around the borders. This sharply struck, lustrous half is impeccably well preserved. NGC ID# 28LK, PCGS# 9371

5005 **1935 Spanish Trail MS65 PCGS.** Hints of faint champagne toning grace the carefully preserved surfaces of this Gem commemorative half dollar. Satiny luster blankets each well-struck side and just few minor marks occur in the fields. NGC ID# 28LN, PCGS# 9376

5006 **1935 Spanish Trail MS66 NGC.** Sharply struck with pleasing mint luster showing through light, silver-gray surfaces. A couple tiny ticks at 4 o'clock in the obverse field are all that keep this Premium Gem from a higher grade. NGC ID# 28LN, PCGS# 9376

5007 **1935 Spanish Trail MS66 NGC.** Satiny luster illuminates the lightly toned surfaces of this Premium Gem commemorative half. As the grade implies, each side is sharply executed and devoid of any noticeable impairments. NGC ID# 28LN, PCGS# 9376

1935 Spanish Trail Half, MS67
High-End Example

5008 **1935 Spanish Trail MS67 PCGS.** Ex: The Roman Collection. Cartwheels of silver luster emanate from the stark visage of the longhorn steer on this Superb Gem Spanish Trail half. The surfaces have a silvery-gray patina with a sprinkling of cinnamon-gold in the obverse legends. Both obverse and reverse of this attractive, high-end coin are smoothly mark-free and fully struck. Just two pieces are numerically finer at PCGS (7/14). NGC ID# 28LN, PCGS# 9376

5009 **1925 Stone Mountain MS67 PCGS.** Proceeds from the sale of these commemoratives went toward the expense of carving the Stone Mountain memorial in Georgia. This example displays satiny luster, with light gold and ice-blue hues merging across each side. Deeper olive-gold is seen around the peripheries, and the strike is well-executed. PCGS has seen only eight numerically finer submissions (7/14). NGC ID# 26H8, PCGS# 9378

1935-D Texas Independence Half, MS67+
Well-Struck Throughout

5010 **1935-D Texas MS67+ PCGS. CAC.** Although the Texas Independence Centennial half dollar (struck to commemorate the independence of Texas in 1836) received much criticism for its "overcrowded" design, it is now considered by collectors to be one of the more attractive and historically desirable issues in the classic commemorative series. This piece showcases virtually undisturbed, frosty mint luster, with pale hues of champagne and ice-blue throughout each side. Only five coins have graded numerically finer at PCGS (7/14). NGC ID# 28LS, PCGS# 9383

5011 **1937 Texas PDS Set MS67 PCGS. CAC.** The set includes: **1937 MS67 CAC,** bright, silvery-white luster is met by faint golden tints in the fields, while the design elements are well-struck throughout; **1937-D MS67,** boldly struck, with excellent surface preservation and frosty, gold-tinted luster; **1937-S MS67 CAC,** a blush of light golden color warms softly frosted luster on each side, while the design elements are crisply impressed. This is a well-matched set of one of the most popular commemoratives in the classic series. (Total: 3 coins) PCGS# 9393

5012 **1938-D Texas MS67 PCGS.** A light dusting of champagne toning blankets the obverse, while the reverse maintains its brilliance. Within the five-year Texas half dollar series, the 1938-D claims the lowest mintage with only 3,775 coins struck. Collectors will have difficulty finding a finer piece, as this Superb Gem is surpassed only by a single coin at PCGS (8/14). NGC ID# 28M3, PCGS# 9395

5013 **1938-S Texas MS67 PCGS. CAC.** Assembling a complete high-grade 1934-38 PDS Texas commemorative set is a challenging endeavor, but this example of the 1938-S would bookend the series in a great way. Light golden patina that includes faint splashes of orange, with small areas of gray appears primarily at portions of the outer edges. Population: 81 in 67 (8 in 67+), 1 finer (7/14). NGC ID# 28M4, PCGS# 9396

5014 **1925 Vancouver MS66 PCGS. CAC.** Struck to celebrate the 100th anniversary of the construction of Fort Vancouver, this commemorative was produced in San Francisco, though the mintmark was omitted. This Premium Gem example shows satiny luster and well-defined design elements. Lemon-gold and aquamarine hues grace the peripheries, while the central regions exhibit light golden toning. NGC ID# 28M5, PCGS# 9399

5015 **1946-S Booker T. Washington MS67+ PCGS. CAC.** A wonderfully toned Superb Gem showing intermingled hues of rose, olive-gold, green, and sunset-orange across clean, unmarked surfaces. Sharply struck and intensely lustrous. Population: 10 in 67+, 2 finer (7/14). NGC ID# 28M9, PCGS# 9406

1947-D Booker T. Washington Half, MS67
Among the Finest Examples Certified

5016 **1947-D Booker T. Washington MS67 NGC.** Whispers of golden-orange, purple, and light green patina concentrate at the margins of this Superb Gem. Both sides are highly lustrous and exhibit sharply struck design elements. A few tiny specks on the portrait prevent an even higher grade. Census: 12 in 67 (2 in 67+, 2 in 67 ★), 0 finer (7/14).
Ex: Cincinnati Central States Signature (Heritage, 5/2009), lot 3415.
NGC ID# 28MB, PCGS# 9409

1947-S Booker T. Washington Half, MS67
Ex: BE Young PCGS Registry Set

5017 **1947-S Booker T. Washington MS67 PCGS. CAC.** Ex: WPE-Young. Often found with untoned and somewhat abraded surfaces — even in high Mint State grades — this attractive Booker T. half is a departure. The surfaces have a pleasing mix of silver-gray luster and golden toning, with sky-blue and rose accents near the rims. It is especially well-struck for the issue with bold details on the portrait and virtually void of the planchet texture on the lower cheek. The BE Young Registry Set of silver commemoratives is ranked #4 all-time at the PCGS website. Population: 16 in 67, 0 finer (7/14). NGC ID# 28MC, PCGS# 9410

5018 **1948-D Booker T. Washington MS67 PCGS. CAC.** Gorgeous luster emanates from both sides of this well-struck Superb Gem, providing this piece with exceptional eye appeal. Modestly toned silver-blue with gold-green on the reverse. Population: 23 in 67, 0 finer (7/14). NGC ID# 28ME, PCGS# 9413

1948-S Booker T. Washington Half, MS67+
Tied for Finest Certified at PCGS

5019 **1948-S Booker T. Washington MS67+ PCGS. CAC.** A dazzling Washington commemorative from the San Francisco Mint that offers faint sea-green, russet, and violet toning over the obverse, while the reverse remains mostly brilliant. From a mintage of 8,005 pieces, this Superb Gem is sharply struck and virtually flawless. Population: 24 in 67 (3 in 67+), 0 finer (7/14). NGC ID# 28MF, PCGS# 9414

5020 **1949-D Booker T. Washington MS67 PCGS. CAC.** Essentially untoned with frosty, virtually undisturbed luster, this Superb Gem also boasts a strong strike and a proportionately high degree of eye appeal. The Booker T. Washington halves are fairly plentiful in an absolute sense, but the 1949-D issue is elusive at this grade level. Population: 31 in 67 (3 in 67+), 0 finer (7/14). NGC ID# 28MH, PCGS# 9417

1952 Washington Carver Half, MS67
Just One Coin Finer at PCGS

5021 **1952 Washington-Carver MS67 PCGS.** The prodigiously struck and widely distributed 1952 Washington-Carver half dollar is always available in lower grades. Some were even spent in circulation. However, very few were preserved in Superb condition. This brightly lustrous example is draped in multicolored, mottled toning over each side, and none of the usually troubling abrasions are present. Population: 16 in 67 (2 in 67+), 1 finer (7/14). NGC ID# 28MV, PCGS# 9434

5022 **1936 York MS68 NGC.** Struck to commemorate the 300th anniversary of the found of York Country, Maine, this boldly struck, satiny York half dollar showcases virtually perfect surface preservation and proportionately substantial eye appeal. Pastel hues of champagne and rose blend across the radiant surfaces. Census: 33 in 68 (7 in 68 ★), 0 finer (7/14). NGC ID# 28N7, PCGS# 9449

COMMEMORATIVE GOLD

5023 **1903 Louisiana Purchase/Jefferson MS65 PCGS. CAC.** Struck for the Louisiana Purchase Exposition held in St. Louis in 1904, this example of the Jefferson variety of the Louisiana Purchase gold dollar displays rich honey-gold luster and semiprooflike mirroring in the fields. The strike is well-executed, and the preservation is outstanding. NGC ID# 26HA, PCGS# 7443

5024 **1903 Louisiana Purchase/McKinley MS66 PCGS.** Produced alongside the Jefferson variety of the same year, this example of the McKinley Louisiana Purchase commemorative gold dollar boasts deep apricot-gold luster and nearly flawless surfaces. The strike is bold and the eye appeal is outstanding. NGC ID# 26HB, PCGS# 7444

5025 **1903 Louisiana Purchase/McKinley MS66+ PCGS. CAC.** Sharply detailed design elements and vibrant mint luster are the calling cards of this high-end Premium Gem, from a distribution of 17,500 pieces. The well-preserved yellow-gold surfaces show a few highlights of rose. NGC ID# 26HB, PCGS# 7444

1903 Louisiana Purchase, McKinley Gold Dollar, MS67
Only Two Coins Finer at PCGS

5026 **1903 Louisiana Purchase/McKinley MS67 PCGS.** Two gold dollars were issued during the 1904 Louisiana Purchase Exposition held in St. Louis: one bearing the portrait of Thomas Jefferson and the other showing the recently assassinated William McKinley. This Superb Gem McKinley example features lustrous, honey-gold surfaces that are devoid of any mentionable flaws. PCGS has certified only two numerically finer pieces (8/14). NGC ID# 26HB, PCGS# 7444

5027 **1905 Lewis and Clark MS62 NGC.** The 1905 Lewis & Clark gold dollar claims a low distribution of 10,000 pieces. This attractive MS62 example displays brightly lustrous greenish-gold surfaces that show a scattering of minor contact marks on both sides. The design elements are sharply detailed and eye appeal is quite strong for the grade. NGC ID# 26HD, PCGS# 7448

5028 **1905 Lewis and Clark MS63 NGC.** Struck for the Lewis and Clark Centennial Exposition held in Portland, Oregon, in 1905, this Lewis and Clark commemorative gold dollar displays rich lemon-gold luster and well-struck devices. A few small abrasions limit the grade.
From The Valley View Life Collection, Part Two. NGC ID# 26HD, PCGS# 7448

5029 **1915-S Panama-Pacific Gold Dollar MS65 NGC.** Satiny yellow-gold surfaces reveal seemingly flawless preservation, while the devices are well-defined and the eye appeal is equally strong. From a low production total of just 15,000 representatives.
From The Valley View Life Collection, Part Two. NGC ID# 26HE, PCGS# 7449

5030 **1915-S Panama-Pacific Gold Dollar MS65 PCGS.** Only 15,000 specimens of the 1915-S Panama Pacific gold dollar were actually distributed. This attractive Gem offers lustrous yellow-gold surfaces and sharply detailed design elements with no mentionable distractions. NGC ID# 26HE, PCGS# 7449

5031 **1915-S Panama-Pacific Gold Dollar MS66 PCGS.** The mintmark is widely repunched southeast. Cherrypickers' lists two RPM varieties for the P.P.I.E. half dollar but omits the gold dollar variety. Rose-red borders encompass olive-green toning. NGC ID# 26HE, PCGS# 7449

5032 **1915-S Panama-Pacific Quarter Eagle — Cleaned — ANACS. MS60 Details.** This is a surprisingly attractive example of the Panama-Pacific quarter eagle commemorative, despite the light cleaning noted by ANACS. Warm honey-gold luster with wisps of deeper peach color illuminates well-struck design elements and nearly unabraded surfaces.
From The Valley View Life Collection, Part Two. NGC ID# 26HK, PCGS# 7450

5033 **1916 McKinley MS65 NGC.** The McKinley gold dollar was struck in 1916 and 1917, but the former is more available for type purposes. This Gem example is rich with rose-gold color and softly frosted luster, while the surfaces are free of any significant abrasions. The portrait is slightly soft in areas, not uncommon for this issue.
From The Valley View Life Collection, Part Two. NGC ID# 26HF, PCGS# 7454

5034 **1916 McKinley MS65 PCGS.** The McKinley Memorial gold dollar was produced in 1916 and 1917, with the former issue being the more available for type purposes. This Gem example is beautifully preserved for the grade and displays well-defined motifs. The obverse exhibits soft rose-gold luster, while the reverse is primarily yellow-orange in color. NGC ID# 26HF, PCGS# 7454

1916 McKinley Gold Dollar, MS67
Green Label Holder

5035 **1916 McKinley MS67 PCGS.** A needle-sharp butter-gold Superb Gem that has sweeping luster and an absence of contact. The second of three gold dollar issues that commemorated President McKinley. Encapsulated in a green label holder, and essentially unobtainable any finer. Population: 80 in 67 (1 in 67+), 0 finer (7/14). NGC ID# 26HF, PCGS# 7454

1916 McKinley Gold Dollar, MS67
Popular Early Commemorative Issue

5036 **1916 McKinley MS67 PCGS.** The 1916 McKinley is a popular gold commemorative dollar that is considerably more available than the elusive 1917 McKinley, actually increasing demand for the 1916 from gold type collectors. This splendid Superb Gem offers a bold strike and beautiful orange-gold color, with no mentionable distractions save for a shallow mark at the front of the president's neck. Population: 80 in 67 (1 in 67+), 0 finer (7/14).
Ex: *Dallas Signature (10/2009), lot 1193.*
From The Pannonia Collection. NGC ID# 26HF, PCGS# 7454

1917 McKinley Dollar, MS66+
Strong Visual Appeal

5037 **1917 McKinley MS66+ PCGS. CAC.** The McKinley gold dollars were issued in 1916 and 1917 to raise money for a memorial at the president's birthplace. The Mint only struck 5,000 coins with the later date, making it significantly scarcer than the earlier date (15,000 pieces), especially in this lofty grade. This lustrous Premium Gem offers orange-gold color overall with pleasing lilac accents. Well-struck and virtually unmarked. NGC ID# 26HG, PCGS# 7455

1917 McKinley Gold Dollar, MS67
Extraordinary Eye Appeal

5038 **1917 McKinley MS67 PCGS.** The eye appeal of this diminutive, Superb Gem coin is extraordinary. Powerfully lustrous, it displays radiant reddish-gold accents that play over lemon and yellow-gold surfaces, with prooflike flash surrounding the main motifs. The strike is for all purposes full on McKinley's hair and the bottom of the flagpole. Given the scarcity of the 1917 date in comparison to the 1916 issue, this is the preferred representative for many specialists of the series. No examples are certified numerically finer by either service (7/14). NGC ID# 26HG, PCGS# 7455

1917 McKinley Gold Dollar, MS67
Vivid Peach-Gold Color

5039 **1917 McKinley MS67 PCGS.** Given his memorable association with the "gold bugs," it is fitting that a gold dollar was chosen as the medium for the McKinley Birthplace Memorial commemoratives. This example, from the second year of the design, exhibits impressive peach-gold color and radiant luster that enlivens the carefully preserved surfaces. Neither NGC nor PCGS has graded a numerically finer example (7/14).
Ex: Houston Signature (Heritage, 12/2009), lot 1379.
From The Pannonia Collection. NGC ID# 26HG, PCGS# 7455

5040 **1922 Grant No Star AU58 ANACS.** This piece represents the later No Star variant, of which only 5,000 pieces were distributed to the public. This near-Mint example shows just a touch of rub on the highest point of the portrait, precluding an Uncirculated grade assessment, though the surfaces are clean and the eye appeal is excellent. While many pieces are finer, this commemorative is actually quite scarce in the AU58 grade.
From The Valley View Life Collection, Part Two. NGC ID# 26HJ, PCGS# 7458

5041 **1922 Grant No Star MS65 PCGS.** Glowing apricot-gold luster engulfs this satiny, well-preserved Gem. The strike is sharp throughout. A couple tiny, faint toning specks are noted near the lower-right reverse periphery. NGC ID# 26HJ, PCGS# 7458

1922 Grant Memorial Gold Dollar, MS66
The Earlier With Star Variant

5042 **1922 Grant With Star MS66 NGC.** The small incuse star in the right obverse field identifies this piece as being from the first production run of just 5,000 coins (plus 16 pieces for assay purposes). The significance of the star has never been confirmed, but its removal partway through production appears to have been solely to create a new variety to market to collectors. This beautifully preserved Premium Gem displays satiny yellow-gold luster, and the design elements are boldly impressed.
From The Valley View Life Collection, Part Two. NGC ID# 26HH, PCGS# 7459

1922 Grant With Star Gold Dollar, Lustrous MS67+

5043 **1922 Grant With Star MS67+ NGC.** The Grant With Star variety, having a distribution of 5,000 pieces, is readily available through Premium Gem. Locating a Superb Gem will require more searching, and higher-grade examples are extremely rare. Yellow-gold luster embraces both sides of this MS67+, each of which is impeccably preserved. The design elements are sharply struck. NGC ID# 26HH, PCGS# 7459

1922 Grant With Star Gold Dollar, MS67
Impressive, Beautifully Preserved Example

5044 **1922 Grant With Star MS67 PCGS. CAC.** The Grant With Star commemorative gold dollar was designed by Laura Gardin Fraser — wife of Buffalo nickel designer James Earle Fraser — and utilized her design for the Grant Memorial half dollar on a slightly smaller scale. This is a well-struck and unmarked example with strong mint luster and lovely yellow-gold toning. Just one coin is graded numerically higher by PCGS (7/14).
From The Pannonia Collection. NGC ID# 26HH, PCGS# 7459

5045 **1926 Sesquicentennial MS65 PCGS.** Struck to commemorate the 150th anniversary of the signing of the Declaration of Independence, this Gem Sesquicentennial quarter eagle exhibits radiant yellow-gold luster and sharp design elements. No mentionable abrasions are observed on either side. NGC ID# 26HL, PCGS# 7466

MODERN ISSUES

5046 **1984-P Olympic Gold Ten Dollar PR70 Ultra Cameo NGC.** A technically perfect example of this modern gold commemorative, with fully struck frosty design elements that contrast profoundly with the deeply mirrored fields to create a startling cameo effect. Eye appeal is terrific. NGC ID# 28PD, PCGS# 9614

5047 **1995-W Olympic/Stadium Gold Five Dollar MS69 PCGS.** The 1995-W Stadium gold five dollar was produced in proof and business strike format, with the latter being significantly scarcer. This piece exhibits deep, golden-orange luster with bold design elements and nearly flawless surfaces. NGC ID# 28TK, PCGS# 9734

5048 **1995-W Olympic/Stadium Gold Five Dollar MS70 NGC.** With a mintage of just 10,579 pieces, the business strike variant of the 1995-W Olympic Stadium commemorative five dollar is somewhat more elusive than its proof counterpart, of which more than 43,000 examples were coined. This representative of the former is beautifully struck and perfectly preserved, as the NGC grade designation confirms. NGC ID# 28TK, PCGS# 9734

2001-P Capitol Visitor Commemorative Half
PR70 Ultra Cameo

5049 **2001-P Capitol Visitor's Center Half Dollar PR70 Ultra Cameo NGC.** This Ultra Cameo representative is simply flawless. The central design elements are thickly frosted and appear to float over remarkably reflective fields. Fully struck and unmarked, this coin commemorates the convening of the Capitol Building in 1800. Census: 13 in 70 Ultra Cameo, (7/14). NGC ID# 28V8, PCGS# 99790

5050 **2001-W Capitol Visitors Center Gold Five Dollar MS70 NGC.** Only 6,761 business strike examples of the 2001-W Capitol Visitor Center gold five dollar were produced, compared to more than 27,000 examples of the proof variant. This piece showcases full mint bloom and pristine surfaces, fully deserving of the ultimate grade assigned. NGC ID# 28VB, PCGS# 9792

5051 **2009-W Julia Tyler Half-Ounce Gold Ten Dollar PR70 Deep Cameo PCGS.** One of the more popular issues in this modern bullion series, the Julia Tyler proof piece had a mintage of only 3,878 coins. This representative showcases a flawless strike and perfect preservation. The field-motif contrast is simply incredible. PCGS# 404579

5052 **2012-W Frances Cleveland, Second Term Half-Ounce Gold Ten Dollar, First Strike, Mercanti Signature, MS70 PCGS.** This is the Type Two design, representing Frances Cleveland's second term as First Lady. The reverse insert features Chief Engraver John M. Mercanti's signature. Technical perfection defines this satiny, yellow-gold ten, of which 2,425 examples were struck. PCGS# 512929

MODERN BULLION COINS

5053 **1986 Half-Ounce Gold Eagle MS70 NGC.** Full mint radiance illuminates each side of this dazzling first-year half-ounce American Gold Eagle. The coin is boldly struck and flawlessly preserved in every respect. NGC ID# 28Y8, PCGS# 9805

5054 **1986-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** The deeply mirrored fields seem to flow like liquid around the heavily frosted, razor-sharp design elements. Struck during the first year of issue, this piece radiates full mint bloom and an equal degree of eye appeal. NGC ID# 28YV, PCGS# 9807

5055 **1987-P Half-Ounce Gold Eagle PR70 Deep Cameo PCGS.** This was the second year of the American Eagle bullion coin program, but the first year half-ounce gold proofs were produced. This example showcases the ultimate in Cameo contrast, with razor-sharp devices and flawless surfaces. NGC ID# 28Y9, PCGS# 9813

5056 **1990-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** The date is inscribed in Roman numerals. This boldly struck, flawless Cameo showcases full mint radiance and delivers incredible flash when tilted beneath a light. NGC ID# 28YZ, PCGS# 9845

5057 **1991 Tenth-Ounce Gold Eagle MS70 NGC.** The date is inscribed in Roman numerals. This is a beautifully produced, perfectly preserved example of this popular fractional issue. From a low mintage of only 165,200 pieces. NGC ID# 26L2, PCGS# 9848

5058 **1991 Quarter-Ounce Gold Eagle MS70 NGC.** This is a pristine, fully struck representative of this popular Roman numeral-dated issue. Full mint radiance abounds on each side. From a mintage of only 36,100 pieces. NGC ID# 26M7, PCGS# 9850

5059 **1991-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** The proof American Eagle gold specialist will find much to love about this piece; the coin is well-deserving of the ultimate PR70 Deep Cameo grade awarded it by PCGS, with bold field-motif contrast and flawless preservation. NGC ID# 28Z2, PCGS# 9855

5060 **1992-P Half-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Stark field-motif contrast delivers incredible visual appeal on this Superb Cameo. Struck to full definition and preserved to perfection, this piece is truly the ultimate in every respect. NGC ID# 28YE, PCGS# 9863

5061 **1992-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** This is the first one-ounce Gold Eagle issue struck with Arabic numerals. The deeply contrasted surfaces feature heavily frosted devices and watery mirrors. Fully struck and attractive. NGC ID# 28Z3, PCGS# 9865

5062 **1994-P Silver Eagle PR70 Deep Cameo PCGS.** Even the non-numismatist must respect the beauty of these modern issue coins. This piece is just one year removed from the undisputed key issue of 1995. Fully struck with magnificent white-on-black contrast and flawless, seemingly pristine surfaces. NGC ID# 26JM, PCGS# 9877

5063 **Five-Piece 1995-W 10th Anniversary American Eagle Set.** A complete five-piece 10th Anniversary American Eagle proof set. Contains the one-ounce $50, half-ounce $25, quarter-ounce $10, and tenth-ounce $5 gold eagles, but as always, the star is the one-ounce silver eagle, the key to its widely collected series. Comes with the government-issued case, box, and certificate of authenticity. (Total: 5 coins) NGC ID# 28WZ, PCGS# 9887

5064 **1995-W Silver Eagle PR67 Deep Cameo PCGS.** Ranked fourth on the list of *100 Greatest U.S. Modern Coins*, the 1995-W proof Silver Eagle was only available in 10th anniversary proof sets. Its 30,125-coin mintage makes it the key to the series, and this is a deeply contrasted, fully brilliant example without any noticeable impairments. NGC ID# 28WZ, PCGS# 9887

5065 **1996 Quarter-Ounce Gold Eagle MS70 NGC.** A flawless, needle-sharp example of this popular quarter-ounce American Eagle bullion issue. This date boasts a mintage of more than 60,000 pieces, but few have been encapsulated at the perfect, MS70 grade level. NGC ID# 26MC, PCGS# 9904

5066 **1997-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Struck at the West Point Mint and produced to the limited extent of just 32,999 pieces. This example shows fully mirrored fields, heavily frosted devices, and a lack of even the most minuscule of surface abrasions. NGC ID# 28Z9, PCGS# 9928

5067 **1997 Quarter-Ounce Platinum Eagle MS70 NGC.** A perfectly preserved, beautifully produced example of this popular quarter-ounce Platinum American Eagle bullion coin. The design elements are starkly contrasted, delivering exceptional visual appeal from all angles. NGC ID# 26SR, PCGS# 99753

5068 **1998-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** Technical perfection and dramatic cameo contrast characterize this one-ounce Gold Eagle proof. The heavily frosted design elements appear almost three-dimensional against jet-black fields with light yellow-gold surfaces overall. NGC ID# 28ZA, PCGS# 9938

5069 **1999-W Quarter-Ounce Gold Eagle — Struck From Unfinished Proof Dies — MS69 PCGS.** The dies bearing the W mintmark were originally intended for the production of proofs. However, one die pair was inadvertently used to strike Uncirculated coins. This is an essentially perfect example that shows yellow-gold color and a full strike. Ranked 24th in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. NGC ID# 26MG, PCGS# 99942

5070 **2005 One-Ounce Gold Eagle MS70 NGC.** According to the NGC insert, this coin is number 257 of 2500, although this does not refer to the mintage. The satiny, yellow-gold surfaces are fully struck and lack even the most trivial of marks. NGC ID# 26PW, PCGS# 9979

5071 **2005-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** The 2005 reverse features the Eagle with Cornucopia design. This gorgeous and flawless Platinum Eagle coin is deeply contrasted and fully struck. From a mintage of just 6,602 specimens. NGC ID# 293V, PCGS# 921111

5072 **Four-Piece 2006 Gold Eagle Denomination Set MS70 NGC.** The set includes the $5 tenth-ounce, $10 quarter-ounce, $25 half-ounce, and $50 one-ounce sans-mintmark gold American Eagle coins, housed within separate NGC holders designated as MS70. All four coins are fully struck and immaculate.(Total: 4 coins) PCGS# 89988

5073 **2006-W 20th Anniversary One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Originally intended to be purely bullion coins, the American Eagle gold pieces quickly became a collectible series in its own right. This is a beautiful example of the 2006 proof fifty dollar piece, with flawless surfaces and full Cameo contrast. NGC ID# 2TTS, PCGS# 99984

5074 **Three-Coin 20th Anniversary 2006-W Gold Eagle Set NGC.** The three pristine one-ounce $50 gold eagles are housed in separate holders with serial numbers that indicate they came from the same submission. All the Mint packaging is included with the lot. The set includes a reverse proof PR70, a regular proof PR70 Ultra Cameo, and an MS69.(Total: 3 coins)

5075 **2007-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** This one-ounce West Point proof Buffalo is technically flawless. Thick mint frost covers design elements surrounded by deeply reflective fields, creating outstanding cameo contrast and strong visual appeal. NGC ID# 26RP, PCGS# 149583

5076 **2007 One-Ounce Gold Buffalo Early Releases MS70 NGC.** This is a second-year Gold Buffalo struck in .9999 fine gold. The satiny, yellow-gold surfaces are fully struck and devoid of even the slightest imperfection. PCGS# 149122

5077 **2008-W Tenth-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** A lovely First Strike representative of this popular tenth-ounce gold American Buffalo bullion coin, this piece shows a full strike and bold field-motif contrast. Struck in 24-karat gold. PCGS# 399933

5078 **2008-W Tenth-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** Fully struck and pristine, with awesome frosted gold devices and shimmering jet-back fields. PCGS# 399933

5079 **2008-W Tenth-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** An essentially flawless example of this popular tenth-ounce, five dollar denomination, this boldly struck Deep Cameo proof beautifully showcases Fraser's sculptural Indian and Buffalo motifs. PCGS# 399933

5080 **2008-W Tenth-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** Stark field-motif contrast and lovely apricot-gold mint bloom complement technically flawless surfaces and bold design elements. From the first year of production for this popular tenth-ounce size, struck at the West Point Mint. PCGS# 399933

5081 **2008-W Quarter-Ounce Gold Buffalo, First Strike, MS70 PCGS.** This is a perfectly preserved, satiny First Strike example of this popular quarter-ounce American Buffalo bullion coin. The strike is bold, beautifully showcasing Fraser's iconic design. PCGS# 399929

5082 **2008-W Quarter-Ounce Gold Buffalo, First Strike, MS70 PCGS.** This boldly struck, perfectly preserved quarter-ounce gold American Buffalo beautifully showcases James Earle Fraser's rugged artistry. Struck at the West Point Mint in 24-karat gold. PCGS# 399929

5083 **2008-W Gold Eagle MS70 NGC.** Top 50 Most Popular Modern Coins. A fully struck caramel-gold representative. The reverse is pristine, and it takes a powerful lens to locate the few microscopic obverse imperfections. PCGS# 393069

5084 **Four-Piece 2008-W Gold Buffalo Set MS70 NGC.** The set includes the tenth-ounce $5, quarter-ounce $10, half-ounce $25, and one-ounce $50, separately housed in holders bearing the ideal third party grade. All four coins are pristine and intricately struck. (Total: 4 coins) PCGS# 400037

5085 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** This is a flawless example of Augustus Saint-Gaudens' double eagle design in Ultra High Relief. The Mint made only a few minor changes, such as the addition of four stars to represent the current 50 states. Each side shows lemon-yellow coloration and remarkable definition. NGC ID# 26S4, PCGS# 407404

5086 **2009 One-Ounce Gold Twenty Dollar High Relief, First Strike MS70 PCGS.** Technical and aesthetic perfection define this Ultra High Relief twenty. This is a stunning representation of Augustus Saint-Gaudens' legendary design, slightly modified and flawlessly executed. NGC ID# 26S4, PCGS# 407405

Paris Mint Modern Restrike
Gold Libertas Americana Medal
PR69 Ultra Cameo

5087 **(2000) Libertas Americana Medal, Paris Mint Gold Restrike, PR69 Ultra Cameo NGC.** 46.5 mm. 64 gm of .916 fine gold. The edge is plain except for a cornucopia hallmark and the serial number 321/500. The latter is visible due to a special feature of the NGC holder. A pristine and intricately struck high relief modern restrike of the famous Libertas Americana medal, which celebrated the independence of the United States and its military victories of the British at Saratoga and York.

Gold Restrike Libertas Americana Medal
PR69 Ultra Cameo

5088 **(2000) Libertas Americana Medal, Paris Mint Gold Restrike, PR69 Ultra Cameo NGC.** 46.5 mm. 64 gm of .916 fine gold. Cornucopia hallmark on edge, along with the serial number 384/500, visible within the NGC holder. A fully struck and flawless modern representative of the famous and historic Betts medal, originally commissioned by Benjamin Franklin during his service as diplomat to France. A presentation box and certificate of authenticity is included.

Gold Libertas Americana Medal
Modern Paris Mint Restrike
PR69 Ultra Cameo

5089 **(2000) Libertas Americana Medal, Paris Mint Gold Restrike, PR69 Ultra Cameo NGC.** 46.5 mm. 64 gm of .916 fine gold. Cornucopia hallmark on edge. The NGC holder allows inspection of the serial number 143/500 on the edge. Just 500 examples were struck in gold alloy. An immaculate and high relief restrike of the classic Libertas Americana medal, which was the inspiration for the depiction of Liberty on the 1793 half cent. The presentation box and certificate of authenticity are included.

5090 **Private Strike One-Ounce Gold "1849 Pattern Double Eagle" Ultra Cameo Gem Proof NGC.** Struck in 999 Fine gold in 2009, authorized by the Smithsonian Institution. A presentation box and certificate of authenticity accompany the lot.

COINS OF HAWAII

5091 **1847 Hawaii Cent MS63 Brown NGC. Medcalf 2CC-2.** Crosslet 4, 15 berries. Rich burgundy and chocolate-brown hues merge beneath glossy patina on each side. The strike is bold throughout, and the surfaces are free of major abrasions. Listed on page 413 of the 2015 *Guide Book*. Census: 46 in 63 Brown, 24 finer (7/14). PCGS# 10965

5092 **1883 Hawaii Ten Cents MS62 NGC.** Produced in San Francisco and designed by Charles Barber, this Kingdom of Hawaii dime shows delicate toning over boldly impressed surfaces. A handful of small marks appear on each side, but they do not detract. PCGS# 10979

5093 **1883 Hawaii Half Dollar MS62 NGC.** Olive-gray patination blankets each side of this Hawaiian half dollar, designed by Charles Barber and struck at the San Francisco Mint. Cartwheel luster radiates from beneath the toning, and marks are undistracting. From a mintage of 700,000 coins. PCGS# 10991

5094 **1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars, M. 2TE-8, AU55 PCGS.** Captain Thomas H. Hobron built a railroad in Maui to transport sugar from plantations to a seaport. There are two varieties of the 12 1/2 cent denomination, one with six stars on the dated side, while the other (M. 2TE-9) shows two stars. This is a problem-free chocolate-brown example with moderate inexactness of strike along the lower borders. Listed on page 414 of the 2015 *Guide Book*. PCGS# 600515

ERRORS

Jefferson Nickel on a Roosevelt Dime
Double Denomination, MS62

5095 **Undated Jefferson Nickel — Double Denomination on a 19??-P Dime — MS62 PCGS.** A Roosevelt dime found its way between Jefferson nickel dies. The portraits of two presidents overlap. The nickel date and mintmark are off the flan but the P mintmark and first two date digits of the dime are visible. The portraits show a few thin test marks made by a puzzled finder.

1887-S Seated Dime, AU53
Uncentered Broadstrike

5096 **1887-S 10C Seated Dime — Uncentered Broadstrike — AU53 PCGS.** A broad band of unstruck surface is widest at 1 o'clock. All design details are present, which precludes an off center error. The collar die was presumably blocked, and that allowed expansion of the coin during its strike. Satiny, well defined, and unabraded with gunmetal-gray and forest-green toning.

1956-Dated Washington Quarter, MS63
Struck on a Silver Dime Flan

5097 **1956-? Washington Quarter — Struck on a Silver Dime Planchet — MS63 PCGS.** A lustrous and minimally abraded pearl-gray wrong planchet error. The upper half of the date is present but the mintmark, if any, is off the flan. Appropriately, QUARTER DOLLAR is absent, as well as the eagle's wingtips and LIBERTY.

1963 Quarter on a 1963 Dime, MS62
Double Denomination

5098 **1963 Washington Quarter — Double Denomination on a 1963 Dime — MS62 NGC.** This "35-cent piece" began its life as an ordinary dime before it struck by quarter dies. The quarter date is bold, and the dime date is partially present on the crest of the eagle's left (facing) wing. Most of the undertype is effaced by the quarter strike, but Roosevelt's chin is evident. Satiny and toned caramel-gold.

2007-D Idaho Quarter, MS66
Double Struck, 2nd Strike 40% Off Center

5099 **2007-D Idaho Statehood Quarter — Double Struck, Second Strike 40% Off Center — MS66 PCGS.** The first strike was normal, but the coin only partially ejected. It was struck a second time, widely off center toward 10:30, at 8:30 relative to the first strike. The clock positions are designated for the statehood side. No planchet intervened between strikes, but the second strike has a large, granular strike-through along the back of the peregrine falcon.
Ex: Central States Signature (Heritage, 5/2009), lot 10091.

WASHINGTONIA

5100 **1796 REPUB. AMERI Medal MS63 Brown PCGS. Baker-68.** Bronze, 33 mm, plain edge. Dies by Wyon. Obverse: bust right. Reverse: cannon, fasces, scroll, and caduceus at center surrounded by three circular lines of text listing Washington's achievements. A glossy deep chocolate-brown and sea-green example with pleasing surfaces.

SO-CALLED DOLLARS

5101 **(1933) Pedley-Ryan Dollar, Type I, MS63 NGC. HK-822, R.7.** This early Pedley-Ryan variety displays identical gang punch impressions of the company name and DENVER on both sides. The firm promoted the use of silver at the Century of Progress Exposition held in Chicago in 1933. A satiny tan-gold and ice-blue example. Smooth aside from a faint coin counter mark along the obverse periphery and a slender straight graze on the upper reverse field.

Silver 1826 Erie Canal Medal
Uncirculated Details, HK-1000

5102 **1826 Erie Canal Completion Medal, Silver — Improperly Cleaned — NGC Details. Unc. HK-1000.** The white metal Erie Canal medal is scarce but collectible. Its silver variant is rare, relegated to "non-collectible" section of the Hibler-Kappen First Edition. The present well struck representative displays medium to deep golden-brown toning with blushes of aquamarine near the rims. Lightly hairlined from a wipe, but nonetheless attractive.

ALASKA TOKENS

5103 **(1935) Complete Eight-Piece Alaska Bingle Set, XF to AU Uncertified. Gould-Bressett 4 to 11.** These tokens were issued by the U.S. government for the use of the colonists of the Matanuska Valley Colonization Project, and were redeemable only at the Alaska Rural Rehabilitation Corporation stores. The "bingles," as they were called, were in use only about six months during 1935 and 1936. This complete set consists of the cent (aluminum, octagonal, 22 mm), the five cent (aluminum, round, 21 mm), the ten cent (aluminum, round, 18 mm), the twenty-five cent (aluminum, round, 24 mm), the fifty cent (aluminum, round, 31 mm), the one dollar (aluminum, round, 35 mm), the five dollar (brass, round, 24 mm), and the ten dollar (brass, round, 31 mm). Grades range from AU to Mint State. Housed in a custom black Capital holder.(Total: 8 tokens)

5104 **1911 Gold 'One,' Parka Head, 11 Stars, MS65. Gould-Bressett 171.** The devices are boldly struck, with even honey-gold color over each side. Surface abrasions are almost nonexistent, though a small planchet fissure is noted at the rim below the 19 in the date. Listed on page 402 of the 2015 *Guide Book*.
From The J.S. Morgan Collection. PCGS# 661160

5105 **1911 Gold '1/2,' Parka Head, 10 Stars, MS66. Gould-Bressett 176.** The head faces right with 10 stars surrounding. The obverse is highly reflective throughout, though the reverse is more satiny, with magnification revealing parallel die striations in the fields. Well-struck with excellent surface preservation. Listed on page 402 of the 2015 *Guide Book*.
From The J.S. Morgan Collection.

GSA DOLLARS

5106 **1890-CC Uncirculated Details Uncertified.** Splendid arcs of navy-blue, plum-red, and golden-brown grace the upper half of the reverse. The obverse displays only a glimpse of lemon toning near the rim. Lustrous and well struck with moderate reed marks on the portrait and a patch of hairlines from a counter near the L in PLURIBUS. A GSA box is included.

1890-CC GSA Dollar, MS62
Better Carson City Issue

5107 **1890-CC MS62 NGC.** Only a wisp of golden toning adorns this lustrous and sharply struck Carson City GSA dollar. The reverse is well preserved and the obverse field is nearly as smooth. The 1890-CC ranks among the rarest collectible GSA Carson City issues, along with the 1879-CC. No box or certificate is included. PCGS# 407198

1891-CC GSA Dollar, MS62
Brilliant and Lustrous

5108 **1891-CC MS62 NGC.** A scarcer date GSA dollar that boasts booming luster and exhibits a good strike. Brilliant save for a glimpse of honey patina near 5 o'clock on the reverse. Marks are minor for the designated grade and are mostly confined to the portrait. Unlike the Carson City issues from the 1880s, the majority of the 1891-CC issue went into local circulation. PCGS# 407206

1891-CC GSA Dollar, MS62

5109 **1891-CC MS62 NGC. VAM-3.** A Top 100 Variety. The well known "Spitting Eagle" with a die lump beneath the eagle's beak. Stone-white and lustrous with smooth fields and moderate facial marks. Among the more challenging Carson City GSA issues. A GSA box is included, along with a certificate missing its serial number. PCGS# 407206

CERTIFIED MODERN PROOF SETS

5110 **Five-Piece 1938 Proof Set PCGS.** The coins are housed in separate PCGS holders with consecutive serial numbers. The set includes: **Cent PR64 Red and Brown,** mostly cherry-red with peripheral blue-green, a couple of small spots; **Nickel PR66, CAC,** pristine and fully struck with milky straw-gold toning; **Dime PR66,** an intricate strike, flashy, freckles of russet-gray toning; **Quarter PR65, CAC,** an undisturbed Gem with light tan and gray patina; and a **Half Dollar PR65,** sharply struck, golden-brown, pearl-gray, and jade-green toning, a few tan spots near the sun.(Total: 5 coins) NGC ID# 22L5, PCGS# 3340

SESSION FOUR

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. After proxy bidding closes, live bidding will take place through Heritage Live!®, that lets you bid live during the actual auction. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bids will not be recognized, so we advise placing your proxy bids in advance.)

COLONIALS

7001 **1723 Hibernia Farthing, DEI GRATIA AU55 NGC.** NGC Census: (8/38). PCGS Population (30/132). PCGS# 176

7002 **1776 Machin's Mills Halfpenny — Environmental Damage — NGC Details. Fine.** NGC Census: (0/2). PCGS Population (0/26).

7003 **1787 Fugio Cent, UNITED STATES, Cinquefoils Fine 15 PCGS.** PCGS Population (12/276). NGC Census: (2/57). PCGS# 889

7004 **(1792-94) Kentucky Token, Plain Edge AU55 PCGS. CAC.** PCGS Population (62/116). NGC Census: (16/68). PCGS# 614

7005 **(1792-94) Kentucky Token, LANCASTER Edge AU50 PCGS.** PCGS Population (12/139). NGC Census: (2/59). PCGS# 623

7006 **1794 Franklin Press Token AU58 PCGS.** PCGS Population (51/61). NGC Census: (14/56). PCGS# 630

7007 **1795 Talbot Allum & Lee Cent AU58 PCGS. CAC.** PCGS Population (32/129). NGC Census: (14/45). PCGS# 640

7008 **Undated Washington Double Head Cent AU55 PCGS.** Ex: Norweb. PCGS Population (42/21). NGC Census: (18/19). PCGS# 692

7009 **1791 Washington Small Eagle Cent VF35 PCGS.** PCGS Population (7/214). NGC Census: (1/58). PCGS# 705

7010 **1793 Washington Ship Halfpenny, Copper, Lettered Edge XF45 PCGS.** PCGS Population (46/142). NGC Census: (15/26). PCGS# 734

7011 **1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge AU58 PCGS.** PCGS Population (27/131). NGC Census: (7/48). PCGS# 746

7012 **1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS62 Brown PCGS.** PCGS Population (45/80). NGC Census: (12/28). PCGS# 746

7013 **1795 Washington Liberty & Security Halfpenny, LONDON Edge — Questionable Color — PCGS Genuine. AU Details.** NGC Census: (2/0). PCGS Population (12/19).

HALF CENTS

7014 **1794 Normal Head — Rim Damage — NGC Details. VG.** C-4a. NGC Census: (4/161). PCGS Population (14/339). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $900.

7015 **1797 1 Above 1, Plain Edge — Plugged — NGC Details. Fine.** C-1. NGC Census: (0/0). PCGS Population (8/69). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $1,050.

7016 **1803 VF25 PCGS.** PCGS Population (20/154). NGC Census: (6/74). Mintage: 92,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $449. NGC ID# 222E, PCGS# 1060

7017 **1804 Spike Chin XF45 PCGS.** PCGS Population (55/128). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $484. NGC ID# 222G, PCGS# 1075

7018 **1804 Spike Chin XF45 PCGS. CAC.** PCGS Population (55/128). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $484. NGC ID# 222G, PCGS# 1075

7019 **1804 Crosslet 4 Stems XF40 PCGS.** PCGS Population (57/165). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $325. NGC ID# 222F, PCGS# 1069

7020 **1804 Crosslet 4, No Stem XF45 PCGS.** PCGS Population (12/66). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $466. NGC ID# 222F, PCGS# 1072

7021 **1804 Plain 4, No Stems VF35 PCGS.** PCGS Population (67/583). NGC Census: (23/660). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $239. NGC ID# 222F, PCGS# 1063

7022 **1806 Small 6, No Stems AU50 PCGS.** PCGS Population (62/202). NGC Census: (20/358). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $550. NGC ID# 222J, PCGS# 1093

7023 **1806 Small 6, No Stems AU55 PCGS. CAC.** PCGS Population (48/122). NGC Census: (55/280). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $750. NGC ID# 222J, PCGS# 1093

7024 **1809 AU58 NGC.** NGC Census: (60/97). PCGS Population (21/55). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $450. NGC ID# 222P, PCGS# 1123

7025 **1809/6 9 Over Inverted 9 AU50 NGC.** C-5. NGC Census: (0/0). PCGS Population (28/95). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $450. NGC ID# 222N, PCGS# 1126

7026 **1809/6 9 Over Inverted 9 AU55 PCGS.** PCGS Population (31/45). NGC Census: (0/0). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $565. NGC ID# 222N, PCGS# 1126

7027 **1825 AU55 PCGS.** PCGS Population (33/98). NGC Census: (26/100). Mintage: 63,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $375. NGC ID# 222T, PCGS# 1141

7028 **1833 MS64 Brown NGC.** C-1. NGC Census: (0/0). PCGS Population (64/28). Mintage: 120,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $665. NGC ID# 222Z, PCGS# 1162

7029 **1834 MS62 Brown PCGS.** PCGS Population (49/162). NGC Census: (0/0). Mintage: 141,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $315. NGC ID# 2232, PCGS# 1165

7030 **1849 MS63 Brown PCGS.** PCGS Population (45/32). NGC Census: (39/45). Mintage: 39,864. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $620. NGC ID# 26Y5, PCGS# 1218

7031 **1853 MS63 Brown PCGS.** PCGS Population (166/200). NGC Census: (0/0). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $340. NGC ID# 26YX, PCGS# 1227

7032 **1853 MS64 Brown PCGS. CAC.** PCGS Population (156/44). NGC Census: (0/0). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $480. NGC ID# 26YX, PCGS# 1227

7033 **1854 MS65 Brown NGC.** NGC Census: (0/0). PCGS Population (21/1). Mintage: 55,358. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $865. NGC ID# 26YY, PCGS# 1230

LARGE CENTS

7034 **1793 Wreath, Vine and Bars Edge — Device Engraved — PCGS Genuine. P/FR Details.** NGC Census: (5/137). PCGS Population (16/495). Mintage: 63,353.

7035 **1794 Head of 1794, S-28, B-10, R.2, — Environmental Damage — PCGS Genuine. XF Details.** NGC Census: (0/0). PCGS Population (0/5).

7036 **1794 Head of 1794, S-41, B-30, R.3, Good 6 PCGS.** PCGS Population (1/6). NGC Census: (0/0). PCGS# 35588

7037 **1796 Liberty Cap AG3 PCGS.** PCGS Population (18/176). NGC Census: (0/47). Mintage: 109,825. NGC ID# 223V, PCGS# 1392

7038 **1802 VF35 PCGS.** PCGS Population (64/168). NGC Census: (16/109). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $897. NGC ID# 224E, PCGS# 1470

7039 **1802 — Cleaning — PCGS Genuine. XF Details.** NGC Census: (31/78). PCGS Population (56/112). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $1,150.

7040 **1802 No Stems Fine 15 PCGS.** PCGS Population (5/35). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $329. NGC ID# 224F, PCGS# 1476

7041 **1803 Small Date, Small Fraction Fine 15 NGC.** NGC Census: (23/271). PCGS Population (33/366). Mintage: 3,131,691. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $395. NGC ID# 224G, PCGS# 1482

7042 **1803 100/000 — Obverse Damage — NGC Details. VF.** S-249. NGC Census: (0/0). PCGS Population (2/22). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $750.

7043 **1807/6 Large 7, S-273, B-3, R.1, Fine 12 PCGS.** PCGS Population (1/12). NGC Census: (4/45). PCGS# 36442

7044 **1810 VG10 NGC.** NGC Census: (6/60). PCGS Population (11/133). Mintage: 1,458,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: $207. NGC ID# 224S, PCGS# 1549

7045 **1814 Crosslet 4 VF20 PCGS. CAC.** PCGS Population (16/203). NGC Census: (8/162). Mintage: 357,830. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $650. NGC ID# 224Y, PCGS# 1573

7046 **1814 Crosslet 4 — Altered Surfaces — PCGS Genuine. AU Details.** NGC Census: (7/107). PCGS Population (15/95). Mintage: 357,830. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $1,850.

7047 **1817 13 Stars AU55 NGC.** NGC Census: (18/116). PCGS Population (34/173). Mintage: 3,948,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $400. NGC ID# 2252, PCGS# 1594

7048 **1821 VF30 PCGS.** PCGS Population (11/92). NGC Census: (4/36). Mintage: 389,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $814. NGC ID# 2258, PCGS# 1621

7049 **1822 AU58 NGC.** N-10. NGC Census: (15/30). PCGS Population (16/23). Mintage: 2,072,339. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $775. NGC ID# 2259, PCGS# 1624

7050 **1832 Medium Letters AU53 PCGS.** PCGS Population (2/17). NGC Census: (0/0). PCGS# 1690

7051 **1836 MS63 Brown PCGS.** PCGS Population (22/21). NGC Census: (15/20). Mintage: 2,111,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $625. NGC ID# 225T, PCGS# 1726

7052 **1840 Small Date AU58 NGC.** NGC Census: (0/0). PCGS Population (9/10). PCGS# 1823

7053 **1847 MS62 Brown PCGS. CAC.** PCGS Population (23/119). NGC Census: (52/128). Mintage: 6,183,669. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $325. NGC ID# 226D, PCGS# 1877

7054 **1852 MS64 Brown NGC.** NGC Census: (153/171). PCGS Population (174/119). Mintage: 5,063,094. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $380. NGC ID# 226J, PCGS# 1898

7055 **1853 MS65 Brown PCGS. CAC.** PCGS Population (90/18). NGC Census: (3/0). Mintage: 6,641,131. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $675. NGC ID# 226K, PCGS# 1901

7056 **1853 MS64 Red and Brown PCGS.** PCGS Population (220/100). NGC Census: (161/155). Mintage: 6,641,131. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $560. NGC ID# 226K, PCGS# 1902

7057 **1855 Upright 55, MS64 Brown PCGS.** PCGS Population (115/50). NGC Census: (114/120). Mintage: 1,574,829. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $380. NGC ID# 226M, PCGS# 1907

7058 **1855 Upright 5s MS65 Red and Brown NGC.** NGC Census: (93/28). PCGS Population (74/2). Mintage: 1,574,829. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $925. NGC ID# 226M, PCGS# 1908

7059 **1855 Slanting 5s MS64 Brown NGC.** N-10. Ex: Mervis Collection. NGC Census: (0/0). PCGS Population (16/9). PCGS# 1910

7060 **1857 Small Date AU58 NGC.** NGC Census: (0/0). PCGS Population (19/32). PCGS# 1931

FLYING EAGLE CENTS

7061 **1857 MS61 NGC.** NGC Census: (127/2034). PCGS Population (59/2430). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: $420. NGC ID# 2276, PCGS# 2016

7062 **1857 MS62 NGC.** NGC Census: (325/1706). PCGS Population (434/1996). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $520. NGC ID# 2276, PCGS# 2016

7063 **1857 MS63 PCGS.** PCGS Population (798/1197). NGC Census: (539/1167). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $850. NGC ID# 2276, PCGS# 2016

7064 **1858 Large Letters MS63 PCGS.** PCGS Population (399/693). NGC Census: (46/101). Mintage: 24,600,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $850. NGC ID# 2277, PCGS# 2019

INDIAN CENTS

7065 **1859 MS63 NGC.** NGC Census: (3/8). PCGS Population (545/783). Mintage: 36,400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $590. NGC ID# 227E, PCGS# 2052

7066 **1859 MS63 PCGS. CAC.** Ex: Eagle Eye Photo Seal, photo card not included. PCGS Population (545/784). NGC Census: (3/8). Mintage: 36,400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $590. NGC ID# 227E, PCGS# 2052

7067 **1860 MS65 NGC.** NGC Census: (137/41). PCGS Population (165/49). Mintage: 20,566,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $975. NGC ID# 227F, PCGS# 2058

7068 **1862 MS65 NGC.** NGC Census: (190/47). PCGS Population (238/85). Mintage: 28,075,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $865. NGC ID# 227H, PCGS# 2064

7069 **1863 MS64 PCGS. CAC.** PCGS Population (822/264). NGC Census: (638/234). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $340. NGC ID# 227J, PCGS# 2067

7070 **1864 Bronze No L MS65 Red and Brown NGC.** NGC Census: (243/75). PCGS Population (208/25). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $440. NGC ID# 227L, PCGS# 2077

7071 **1864 L On Ribbon Brown — Altered Color — NGC Details. Unc.** NGC Census: (2/305). PCGS Population (7/207). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $310.

7072 **1864 L On Ribbon MS62 Red and Brown PCGS.** PCGS Population (31/488). NGC Census: (13/355). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $475. NGC ID# 227M, PCGS# 2080

7073 **1868 MS63 Red and Brown NGC.** NGC Census: (44/266). PCGS Population (104/332). Mintage: 10,266,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $360. NGC ID# 227S, PCGS# 2092

7074 **1869 MS64 Brown PCGS.** PCGS Population (60/15). NGC Census: (80/38). Mintage: 6,420,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $750. NGC ID# 227T, PCGS# 2094

7075 **1870 Shallow N, FS-901 MS62 Brown PCGS.** PCGS Population (24/62). NGC Census: (38/110). Mintage: 5,275,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $500. NGC ID# 227U, PCGS# 2097

7076 **1871 — Questionable Color — PCGS Genuine. Unc Details.** NGC Census: (1/185). PCGS Population (3/141). Mintage: 3,929,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $450.

7077 **1875 MS64 Brown PCGS.** PCGS Population (37/5). NGC Census: (60/24). Mintage: 13,528,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $260. NGC ID# 2282, PCGS# 2121

7078 **1876 MS64 Red and Brown PCGS.** PCGS Population (231/77). NGC Census: (138/110). Mintage: 7,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $550. NGC ID# 2283, PCGS# 2125

7079 **1877 AG3 NGC.** NGC Census: (0/2158). PCGS Population (410/3623). Mintage: 852,500. NGC ID# 2284, PCGS# 2127

7080 **1877 Good 4 NGC.** NGC Census: (259/1892). PCGS Population (481/3137). Mintage: 852,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $530. NGC ID# 2284, PCGS# 2127

7081 **1877 Good 6 PCGS.** PCGS Population (437/2705). NGC Census: (230/1669). Mintage: 852,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : $584. NGC ID# 2284, PCGS# 2127

7082 **1877 VG10 NGC.** NGC Census: (177/1270). PCGS Population (336/2031). Mintage: 852,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: $778. NGC ID# 2284, PCGS# 2127

7083 **1877 — Improperly Cleaned — NGC Details. XF.** NGC Census: (121/493). PCGS Population (256/716). Mintage: 852,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $1,925.

7084 **1877 — Improperly Cleaned — NGC Details. XF.** NGC Census: (121/492). PCGS Population (256/714). Mintage: 852,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $1,925.

7085 **1881 MS65 Red and Brown NGC.** NGC Census: (113/25). PCGS Population (81/5). Mintage: 39,211,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $320. NGC ID# 2288, PCGS# 2140

7086 **1888 MS65 Red and Brown NGC.** Ex: Eagle Eye Photo Seal, photo card included. NGC Census: (66/7). PCGS Population (29/0). Mintage: 37,494,416. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $750. NGC ID# 228G, PCGS# 2167

7087 **1897 MS64 Red PCGS. CAC.** PCGS Population (141/71). NGC Census: (68/37). Mintage: 50,466,328. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $205. NGC ID# 228S, PCGS# 2198

7088 **1902 MS65 Red NGC.** NGC Census: (117/112). PCGS Population (140/57). Mintage: 87,376,720. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $440. NGC ID# 228X, PCGS# 2213

7089 **1906 MS65 Red PCGS.** PCGS Population (179/27). NGC Census: (129/33). Mintage: 96,022,256. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $440. NGC ID# 2293, PCGS# 2225

7090 **1909 MS65 Red PCGS.** PCGS Population (647/172). NGC Census: (253/35). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $420. NGC ID# 2297, PCGS# 2237

7091 **1909 MS65 Red PCGS.** PCGS Population (647/172). NGC Census: (253/35). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $420. NGC ID# 2297, PCGS# 2237

7092 **1909 MS65 Red PCGS. CAC.** PCGS Population (647/172). NGC Census: (253/35). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $420. NGC ID# 2297, PCGS# 2237

7093 **1909-S VF20 NGC.** NGC Census: (185/1552). PCGS Population (338/2398). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $435. NGC ID# 2298, PCGS# 2238

7094 **1909-S — Improperly Cleaned — NGC Details. VF.** NGC Census: (186/1562). PCGS Population (338/2403). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $435.

From The J.S. Morgan Collection.

9323 **1915 One California Gold, Round, Minerva, Bear, MS64 NGC.** Hart's Coins of the West.
From The J.S. Morgan Collection.

20TH CENTURY TOKENS AND MEDALS

9324 **1921 Visit of Marshal Foch MS63 NGC.** Silver, 64 mm. Medallic Art Co. N.Y.

9325 **(1956) J.J. Conway Restrike Denomination Set, Goldine.** The set includes the 2 1/2 Dollars, 5 Dollars, and 10 dollars. The informational envelope of issue accompanies. Also, a **circa-1960 $5 J.J. Conway Bashlow goldine restrike**. The first three pieces are ex: *Newport Collection (Bowers and Merena, 1/1975), lot 792; Harvey E. Smith Collection (Bowers and Merena, 11/1986), lot 2318.* (Total: 4 tokens)

9326 **(circa 1960) J.J. Conway & Co. Bashlow Restrike, Silver, MS66 NGC.**

WORLD MEDALS

9327 **(2004) Libertas Americana Medal, Paris Mint Restrike PR69 Ultra Cameo NGC. Silver, 40 mm.**

9328 **Great Britain 1793 Halfpenny MS65 Red and Brown NGC. D&H-13A. Staffordshire - Leek.** Edge: Milled ///.

MISCELLANEOUS MEDALS AND TOKENS

9329 **(2) Imitative Federal Gold "Kettle" Tokens Uncertified.** The lot includes: **"1803 Quarter Eagle"** and an **"1803 Half Eagle".** (Total: 2 tokens)

HOBO NICKELS

9330 **Two Original Hobo Nickels.** One of early vintage, the other is somewhat later. The earlier piece is deeply toned and depicts a derbied gent with dark beard and a distinctive ear. The fields are roughly "dressed" and unfinished, and the carving shows with a few slips of the engraving tool. The second example is of more recent origin, dated on the reverse "1951," which may have been the year it was carved. The ear is a dug hole, with a pinpricks forming the beard and collar above a criss-cross plaid shoulder. (Total: 2 coins)

9331 **Two Original Hobo Nickels.** The diagnostic ear (looking like a backwards 3) and the smoothed-over fields and date area suggest the work of the O.H.N.S.-named carver "Smoothie" for at least one of these nickels, with a two-dimensional hat and simple collar. The other example in this lot may be his work, too, since it has the same characteristics, although the collar is missing. Perhaps it was unfinished by the artist. (Total: 2 coins)

9332 **Four Original Hobo Nickels.** An interesting and promising study group of four original hobos, each of average of slightly above-average quality. Two of the carvings are on Variety One 1913 nickels; one is on a later-dated D-mint nickel. All are well-made and appealing examples. (Total: 4 coins)

9333 **Four Original Hobo Nickels.** Another excellent group of original hobo nickels for research and attribution. This average quality group includes four different styles and undoubtedly represents four different carvers. Two of the coins are on 1916 nickels, with one on a 1913 Variety One host coin and the other of unknown date. (Total: 4 coins)

9334 **Modern Hobo Nickel.** A haunting skull sculpture by Paolo "MR THE" Curcio. A modern handmade nickel of superior quality, known as one-of-a-kind pieces of hobo nickel art. Signed and dated on the reverse by the artist. One of the most distinctive modern pieces in our consignor's collection.

9335 **Modern Hobo Nickel.** Exceptional scrollwork is seen on this superior carving by the late Jim Stewart, stamped "JIMBO" on the rim as the artist's signature. These exquisite knights are one-of-a-kind carvings, and the different knight examples are eagerly sought by collectors of contemporary hobo nickels.

9336 **Modern Hobo Nickel.** Joe Paonessa is well known among hobo nickel enthusiasts for both his outstanding carvings and also for his educational courses for modern carvers. This example is one of his more traditional designs, a superior quality modern hobo nickel with his signature logo on bison's foreleg.

9337 **Modern Hobo Nickel.** This superior modern hobo nickel was carved by Ronald Proulx, a master hand engraver from the Seattle area. The buffalo nickel remains a favored coin for modern carvers because of its size, thickness, and relative softness. The present example is a miniature bas relief sculpture of excellent quality.

9338 **Original Hobo Nickel.** A "Carvetoon," as described by O.H.N.S. This is an example of Beetle Bailey, done in a love token style on a planed-off nickel. Only a dozen or so such pieces are known of different cartoon characters. All are hand engraved with no power tools to create the art.

9339 **Six Modern Hobo Nickels.** Six seemingly recent recreations of classic hobo nickel designs. Each is on an authentic buffalo nickel, but the hobo obverses are apparently of modern origin (see online images). (Total: 6 coins)

9340 No lot.

9341 No lot.

9342 **Original Hobo Nickel.** An above-average example by "Peanut Ear" — a prolific nicknamed carver, who is known for his trademark ear that resembles the shape of a peanut. Other characteristics of the artist's work include a distinctive hat (often notched on the top), detailed hat band, and the extension of the brim to the right edge of the coin, sometimes appearing as a pair of dashes. This gent shows an unusually heavy, punched beard with a diagnostic enlarged nostril and Peanut Ear's typical, V-shaped collar. On a 1913 nickel, as usually seen.

9343 **Original Hobo Nickel.** An interesting and above-average example on an S-mint nickel, the date and LIBERTY effaced during the carving. It is believed to be from an early artist by our consignor. This hobo has a particularly well-made, three-dimensional hat and exhibits several different carving techniques. The hair is fashioned in straight lines, while the beard is strengthened with a beading tool or jeweler's punch. An ear is hidden among the hair strands. This piece is notable for the thin neck and visible Adams apple.

9344 **Original Hobo Nickel.** The distinctive ear, sloping hat, simple collar, and a tuft of hair peeking out beneath the hat brim identifies this piece as the work of "Tufty," a well-known O.H.N.S. named artist. The simple style is well-executed on this sharp example. Extra curve was altered into the bridge of the nose — one of Tufty's signature characteristics. On a Variety One 1913 nickel.

9345 **Original Hobo Nickel.** The artist is yet to be confirmed on this classically carved original nickel. Seemingly, the carver had few tools at his disposal and "made do" with what he had — perhaps only a knife. The hat is simple but carefully done including lines on the hat band to simulate shading. The beard and hair was deeply carved and the ear may hold clues to the artist's identity. On a 1913 Variety One nickel.

9346 **Original Hobo Nickel.** An interesting and three-dimensional carving by an artist unknown to our consignor, yet believed to be an original, early work. The derby is smoothly rounded yet simple in its lines. The nose is heavily altered, as are the facial features and expression. The ear is a deeply set semicircle, and a high collar is set on a smoothed, rounded shoulder.

9347 **Two Original Hobo Nickels.** An above-average pair of early hobo nickels, each expressively carved and needing attribution. One features a flat-topped hat set high on the head, with beaded hair and beard and a distinctive, C-shaped ear. The other shows a more traditional, round-shaped derby with carved details. Note the outlined collar and altered nose and flared nostril, as well as the distinctive ear. (Total: 2 coins)

9348 **Two Original Hobo Nickels.** The 1926-dated nickel is by an unknown artist of slightly above average quality, with a sharp derby and stippled hair and beard. The braid area at the neck is unfinished, not hidden by a collar or other device. The second example (undated) shows an expressive face with a lightly inscribed beard. Note the smile lines at the eye and furrowed brow. An attractive early pair of nickels. (Total: 2 coins)

9349 **Two Original Hobo Nickels.** A pair of holed nickels, each original and of average to slightly above-average quality. One example shows an extremely tall hat on a hairy-faced hobo, somewhat roughly smoothed in the fields as if the artist worked with a single tool to accomplish the entire design. The second example is classically carved on a 1913 Variety One nickel, with beady eye and bumped nose, the pointed beard reaching to the edge of the coin. An interesting hobo duo. (Total: 2 coins)

9350 **Two Original Hobo Nickels.** Each of these nickels is holed, a common occurrence for hobo nickels since many were worn for safe-keeping. The 1915-dated example is dimensionally carved and attractive. Note the position of the well-shaped ear, far back on the head. Ear placement on hobo nickels is a key identifier, and the ear roams front-to-back, up-and-down by different artists - the ear position is as distinctive as the shape. The second example (undated) is classically carved, attractive, and obviously original. Two nice research subjects for the hobo nickel aficionado. (Total: 2 coins)

REDFIELD DOLLARS

9351 **1888-S MS65 Paramount (MS64 NGC).** NGC Census: (882/113). PCGS Population (1436/331). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $875.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:

- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first $100,000 (minimum $14), plus twenty percent (20%) of any amount between $100,000 and $1,000,000, plus twelve percent (12%) of any amount over $1,000,000..

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real- time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

    The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< - $10	$1	$10,000 - $19,999	$1,000
$10 - $29	$2	$20,000 - $29,999	$2,000
$30 - $49	$3	$30,000 - $49,999	$2,500
$50 - $99	$5	$50,000 - $99,999	$5,000
$100 - $199	$10	$100,000 - $199,999	$10,000
$200 - $299	$20	$200,000 - $299,999	$20,000
$300 - $499	$25	$300,000 - $499,999	$25,000
$500 - $999	$50	$500,000 - $999,999	$50,000
$1,000 - $1,999	$100	$1,000,000 - $4,999,999	$100,000
$2,000 - $2,999	$200	$5,000,000- $9,999,999	$250,000
$3,000 - $4,999	$250	>$10,000,000	$500,000
$5,000 - $9,999	$500		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under $1500 and there is no sales tax on coins in Texas) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes..
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor

Terms and Conditions of Auction

under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. Auctioneer shall not be liable for any loss caused by or resulting from:

a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, http://www.ngccoin.com/services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #0952360; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Paul Minshull #2001161-DCA; Andrea Voss, #1320558, Michael J. Sadler, # 1304630, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-4-2014

MYRECOMMENDATIONS
Online Suggestion Tool

The last piece of the puzzle? Heritage has it.

Our new online tool, **MyRecommendations** looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with **MyRecommendations** visit Heritage's US Coin pages now at HA.com/Coin.
